Population Changes in the Territories Since 1950

Alaska—Total population, including men in the Armed Forces, on July 1, 1953, estimated 205,000, as against 191,000 on July 1, 1952, increase of 59.2% over 1950.

Hawaii—Population, July 1, 1953, 523,000, including 475,000 civilians, as against a 1952 total of 522,000. Increase of 4.6% over 1950.

Puerto Rico—Population, July 1, 1953, 2,229,000, as against 2,240,000 in 1952, an increase of .8% over 1950.

Canal Zone—Population, July 1, 1953, 57,000, including 42,000 civilians, as against a total of 58,000 in 1952, and an increase of 7.6% over 1950.

Virgin Islands—Population, July 1, 1953, 25,000, a loss of 2,000 or 6.7% since 1950.

The Continental Divide

Source: U.S. Geological Survey, Department of the Interior

Continental Divide: watershed, created by mountain ranges or table-lands of the Rocky Mountains, from which the drainage is easterly or westerly; the easterly flowing waters reaching the Atlantic Ocean chiefly through the Gulf of Mexico, and the westerly flowing waters reaching the Pacific Ocean through the Columbia River, or through the Colorado River, which flows into the Gulf of California.

The location and route of the Continental Divide across the United States may briefly be described as follows:

Beginning at point of crossing the United States-Mexican boundary, near long. 108° 45' W., the Divide, in a northerly direction, crosses New Mexico along the eastern edge of the Rio Grande drainage basin, entering Colorado near long. 106° 41'.

Thence by a very irregular route northerly across Colorado along the western summits of the Rio Grande and of the Arkansas, the South Platte, and the North Platte River basins, and across Rocky Mountain National Park, entering Wyoming near long. 106° 52'.

Thence northwesterly across Wyoming along the western rims of the North Platte, Big Horn, and Yellowstone River basins, crossing the southwest corner of Yellowstone National Park.

Thence in a northerly direction, forming the common boundary of Idaho and Montana, to a point on said boundary near long. 114° 00' W.

Thence northeasterly and northwesterly through Montana and the Glacier National Park, entering Canada near long. 114° 04' W.

Area, Boundaries and Dependencies of Continental United States

Area
Continental United States, land area 2,977,128 sq. m., water area 45,259 sq. m.; total, 3,022,387 sq. m.
Territories (land and water area in square miles) 592,823; Possessions, 3,888; Canal Zone 553; Corn Islands 4; Trust territory of the Pacific Islands 8,475. Total United States (aggregate) 3,628,130.

Boundaries and Dependencies

The United States is bounded on the north by Canada, on the east by the Atlantic Ocean and the Gulf of Mexico, on the south by the Gulf of Mexico and Mexico, and on the West by the Pacific Ocean.

It comprises 48 States and the Federal District of Columbia. This is called for convenience in reference Continental United States. Its non-contiguous areas are the Commonwealth of Puerto Rico, the Organized Territories of Alaska and Hawaii; the Virgin Islands of the United States, American Samoa, Guam, Wake and scattered islands in the Pacific and the Panama Canal Zone. The United States also is trustee, by mandate of the United Nations, of the Caroline, Marshall and Mariana Island chains in the western Pacific. The islands, formerly held by Japan under League of Nations mandates, comprise 96 distinct island units aggregating 2,141 individual islands or atolls with a combined land area of 687 sq. mi.

Mason and Dixon's Line

The Mason and Dixon's line was surveyed by Charles Mason and Jeremiah Dixon between 1763 and 1767 to settle dissensions between the Lords Baltimore and the Penn family, the lords proprietors of Maryland and Pennsylvania respectively. The line runs along the parallel in latitude 39° 42' 26.3" and was originally marked by milestones,

every fifth one bearing on one side the coat of arms of Penn and on the other those of Lord Baltimore.

Later regarded as the dividing line between slave and free states in the South Atlantic region, it now is traditionally called the line between North and South. The reference to the South as Dixie is believed to have come from this line.

Population and Area of Counties, Census of 1950

WITH NAMES OF COUNTY SEAT OF COURT HOUSE, LAND AREA IN SQUARE MILES

Source: Bureau of the Census

There are 3,068 Counties in the United States exclusive of 32 independent cities, the District of Columbia and the parts of Yellowstone National Park in Idaho, Montana and Wyoming.

Population Changes in the Territories Since 1950

Alaska—Total population, including men in the Armed Forces, on July 1, 1953, estimated 205,000, as against 191,000 on July 1, 1952, increase of 59.2% over 1950.

Hawaii—Population, July 1, 1953, 523,000, including 475,000 civilians, as against a 1952 total of 522,000. Increase of 4.6% over 1950.

Puerto Rico—Population, July 1, 1953, 2,229,000, as against 2,240,000 in 1952, an increase of .8% over 1950.

Canal Zone—Population, July 1, 1953, 57,000, including 42,000 civilians, as against a total of 58,000 in 1952, and an increase of 7.6% over 1950.

Virgin Islands—Population, July 1, 1953, 25,000, a loss of 2,000 or 6.7% since 1950.

The Continental Divide

Source: U.S. Geological Survey, Department of the Interior

Continental Divide: watershed, created by mountain ranges or table-lands of the Rocky Mountains, from which the drainage is easterly or westerly; the easterly flowing waters reaching the Atlantic Ocean chiefly through the Gulf of Mexico, and the westerly flowing waters reaching the Pacific Ocean through the Columbia River, or through the Colorado River, which flows into the Gulf of California.

The location and route of the Continental Divide across the United States may briefly be described as follows:

Beginning at point of crossing the United States-Mexican boundary, near long. 108° 45' W., the Divide, in a northerly direction, crosses New Mexico along their eastern edge of the Rio Grande drainage basin, entering Colorado near long. 106° 41'.

Thence by a very irregular route northerly across Colorado along the western summits of the Rio Grande and of the Arkansas, the South Platte, and the North Platte River basins, and across Rocky Mountain National Park, entering Wyoming near long. 106° 52'.

Thence northwesterly across Wyoming along the western rims of the North Platte, Big Horn, and Yellowstone River basins, crossing the southwest corner of Yellowstone National Park.

Thence in a northerly direction, forming the common boundary of Idaho and Montana, to a point on said boundary near long. 114° 00' W.

Thence northeasterly and northwesterly through Montana and the Glacier National Park, entering Canada near long. 114° 04' W.

Area, Boundaries and Dependencies of Continental United States

Area

Continental United States, land area 3,977,128 sq. m., water area 45,259 sq. m.; total, 3,022,387 sq. m.

Territories (land and water area in square miles) 592,823; Possessions 3,883; Canal Zone 553; Corn Islands 4; Trust territory of the Pacific Islands 8,475. Total United States (aggregate) 3,628,130.

Boundaries and Dependencies

The United States is bounded on the north by Canada, on the east by the Atlantic Ocean and the Gulf of Mexico, on the south by the Gulf of Mexico and Mexico, and on the West by the Pacific Ocean.

Mason and Dixon's Line

The Mason and Dixon's line was surveyed by Charles Mason and Jeremiah Dixon between 1763 and 1767 to settle dissensions between the Lords Baltimore and the Penn family, the lords proprietors of Maryland and Pennsylvania respectively. The line runs along the parallel in latitude 39° 42' 26.3" and was originally marked by milestones,

every fifth one bearing on one side the coat of arms of Penn and on the other those of Lord Baltimore.

Later regarded as the dividing line between slave and free states in the South Atlantic region, it now is traditionally called the line between North and South. The reference to the South as Dixie is believed to have come from this line.

U. S. Cities with Metropolitan Areas, 1950 Census

Source: Bureau of the Census

A standard metropolitan area must contain at least one city having a population of 50,000 or over. The largest city is the principle central city for which the area is named, although there may be several cities in the area with a population of 50,000 or over. Metropolitan areas have been specifically defined to identify large concentrations of population in and around cities of 50,000 population or more. One exception exists to this rule. In the case of the standard metropolitan area centering on New York City, the central cities are New York City, Newark, N. J. and Jersey City, N. J.

Rank	Standard metropolitan area	Total population	In central cities	
			Number	Per cent
1	New York-Northeastern New Jersey	12,911,994	8,629,750	66.8
2	Chicago, Ill.	5,495,364	3,620,962	65.9

VITAL STATISTICS

Source: National Office of Vital Statistics, Public Health Service,
Dept. of Health, Education, and Welfare

BIRTHS

The estimated number of registered live births in 1954 reached an all-time high of 4,021,000. This figure is 2.9% higher than in 1953 (3,909,000), making 1954 the fourth successive record breaking year. The birth rate per 1,000 pop. was 25.0 in 1954 and 24.7 in 1953. Taking into account unregistered events, there were 4,076,000 births in 1954 and 3,971,000 in 1953 (est.) During the 5-year period 1950-54, 19,415,000 children were born alive. This is over one-third again as many as in the corresponding 5 years of the last decade.

Much of the increase in births in 1954 and 1953 can probably be attributed to a continuing rise in the number of third, fourth, and fifth children.

In 1954, birth rates were somewhat higher in most of the geographic divisions, with the largest increase, 2.4%, in East North Central. As in earlier years, the largest rates were found in the Mountain Division and in the three southern divisions, and the lowest in the New England and Middle Atlantic. These data are based on registered events. Since underregistration is greater in the Southern and Mountain States, the range in rates would be even larger.

MARRIAGES

The total number of marriages in 1954 was 1,476,000 (est.) with a rate of 9.2 marriages per 1,000 population. This is the first year since 1944 that marriages have not reached the 1,500,000 mark. The estimated annual rate of 9.2 per 1,000 for 1954 was the lowest since 1933. The decline in marriages in recent years has generally been attributed to a decline in the number of single young people as a result of: (1) low birth rates in the 1930's, (2) record marriage rates in 1946 and 1947, and (3) continued "borrowing" from future marriages through reduction in age at first marriage.

June remained the peak month of 1954 in spite of a decrease of 6.9%. The June rate was 13.4 per 1,000. September was second highest with a rate of 10.4. January and March were the low months, each with a rate of 7.0.

On a geographic basis, decrease in marriage rates in 1954 compared with 1953 ranged from 2.3% in the West North Central Division to 10.2% in the West South Central Division. The decline in the latter division was affected by a sharp decrease in marriage licenses in Arkansas, where a premarital medical examination law went into effect on July 1, 1953. Excluding Arkansas, the largest decreases in marriage rates occurred in Delaware, Vermont, and New Mexico.

Marriage licenses in major city areas.—Fewer marriage licenses were issued in 1954 than in 1953 in the major city areas of over 100,000 popu-

lation. Nearly two-fifths of the population of the United States was concentrated in these major city areas. A total of 494,799 marriage licenses issued in these areas in 1954 was 4.4%, or 22,929, smaller than the total for 1953.

Changes in marriage licenses ranged from a decrease of 14.4% in Norfolk, to an increase of 7.6% in Flint. Pittsburgh, with 14.0% fewer marriage licenses in 1954, had the second largest decrease, and Savannah, with 12.8%, the third largest. Other increases reported were Spokane (6.6%), Yonkers (6.5%) and Little Rock (4.5%).

DIVORCES

Provisional data on divorces in 1953 and 1954, available for 24 states and the District of Columbia and covering 44% of the total population in 1954, indicate a decline of 3.5% in divorces in 1954—from 166,036 in 1953 to 160,276 in 1954. Changes in the individual areas ranged from a decrease of 16% in the District of Columbia to an increase of 12% in Maine.

Final figures on divorces in 1953 in the entire country, based on data from 42 States and the District of Columbia, with an estimate for the nonreporting States, are 390,000 divorces and annulments with a rate of 2.5 per 1,000 population.

DEATHS

The death rate for the U.S. fell to a record low of 9.2 per 1,000 population in 1954 after having remained nearly stationary at 9.6 or 9.7 for the 5 previous years. This substantial drop in the death rate was associated with the absence of any reported outbreak of influenza in 1954, in contrast with outbreaks in the early part of each of the 4 years before. The rates were relatively low for the chronic cardiovascular diseases, which account for over half the deaths.

For 9 of the 12 months of 1954, the death rates were lower than for the corresponding month of any previous year. The exceptions were January, July, and December. The record low for January is 10.0, and for July is 8.8, both set in 1950. For December it is 9.8, set in 1953.

During July, 1954, very hot weather occurred in the West Central States, and associated with this was a rise in the numbers of deaths reported by most of these states. Kansas and Oklahoma reported the largest percent increases in deaths, about 50% compared with July 1953.

There was a relatively low number of infant deaths, 2,000 less than in 1953, although the number of live births increased by 112,000 in 1954 over 1953. The infant mortality rate for each month was lower than the rate for that month in any year before 1954. The rate for the entire year was 26.8 deaths under 1 year per 1,000 live births.

Births and Deaths in the United States

*Based on a 50 percent sample.

*Data for 1953-54 are estimated.

Birth rates are based on population enumerated as of April 1 for 1940 and 1950 and for other years estimated as of July 1. Estimates for 1941-46 includes Armed Forces overseas.

Death rates are based on population enumerated as of April 1 for 1940 and 1950; for other years estimated as of July 1; excluding members of the Armed Forces overseas.

Births and Deaths by States, 1953-54

Deaths and Crude Death Rates for Selected Causes, 1954

Source: Public Health Service, Dept. of Health, Education, and Welfare

Exclusive of fetal deaths and of deaths among Armed Forces overseas. Rates per 100,000 estimated midyear population excluding Armed Forces overseas.

Cause of death	Number	Rate	Cause of death	Number	Rate
All causes	1,481,000	918.8	General arteriosclerosis	30,670	19.0
Tuberculosis, all forms	16,920	10.5	Other diseases of circulatory system	10,170	6.3
Syphilis and its sequelae	4,970	3.1	Chronic and unspecified nephritis and other renal sclerosis	17,660	11.0
Typhoid fever	60	0.0	Influenza and pneumonia, except pneumonia of newborn	40,650	25.2
Dysentery, all forms	560	0.3	Ulcer of stomach and duodenum	9,610	6.0
Diphtheria	200	0.1	Gastritis, duodenitis, enteritis and colitis, except diarrhea of newborn	8,500	5.3
Whooping cough	330	0.2	Cirrhosis of liver	16,760	10.4
Meningococcal infections	1,090	0.7	Acute nephritis and nephritis with edema, including nephrosis	2,520	1.6
Acute poliomyelitis	1,620	1.0	Deliveries and complications of pregnancy, childbirth and the puerperium	2,140	1.3
Measles	440	0.3	Congenital malformations	20,750	12.9
All other infective and parasitic diseases	4,710	2.9	Certain diseases of early infancy	63,580	39.4
Malignant neoplasms, incl. neoplasms lymphatic and hematopoietic tissues	236,900	147.0	Symptoms, senility and ill-defined conditions	20,340	12.6
Diabetes mellitus	24,830	15.4	Motor vehicle accidents	37,190	23.1
Major cardiovascular-renal diseases	791,640	491.1	All other accidents	54,490	33.8
Disease of cardiovascular system	773,980	480.2	Suicide	15,980	9.9
Vascular lesions affecting central nervous system	166,950	103.6	Homicide	7,710	4.8
Rheumatic fever	1,230	0.8	All other causes	96,510	59.9
Diseases of heart	553,530	343.4			
Hypertension without mention of heart	11,430	7.1			

Estimates are based on a 10% sample of death certificates. The sampling error varies with the number of deaths. For example, the estimate for diseases of heart is subject to an error of 0.3% and for syphilis 4%. Typhoid fever with only 60 deaths is subject to an error of 39%.

Single and Plural Births in the United States

REGISTERED CASES IN WHICH AT LEAST ONE CHILD WAS BORN ALIVE

Uniform Crime Reports

FIRST HALF OF 1955

Major crimes committed in the United States during the first half of 1955, January through June, reached an estimated total of 1,128,350, a decline of 7,790 from the figures for the same period in 1954, less than 0.7%. This was reported by J. Edgar Hoover, director Federal Bureau of Investigation (FBI), in the semi-annual bulletin of Uniform Crime Reports, issued Sept. 26, 1955. The annual report for 1955 will be issued in 1956.

Five of the 8 major crime classes showed decreases. Robbery, taking property by force or threat of weapons, had 30,260 cases, a drop of 5,390, or 15.1%. Burglary, including breaking and entering, had 254,330, a drop of 8,790 (3.3%), and auto theft, 109,830 cases, was down by 230. Auto theft decreased in cities, rose in rural areas.

Murder and manslaughter, in the first 6 mos., 1955, wiped out 3,290 lives, 130 fewer than the period a year before, but only 1,743 were in

cities. Manslaughter by negligence accounted for 2,950, 10 fewer, but 214 fewer in cities. But rape by force or statutory, reached 9,300 reported cases, an increase of 550, up 6.3%, with 5,141 of this number in cities, a 10.4% increase.

Murders in Large Cities

During January-June, 1955, murders were reported as follows from major cities: New York, 151; Chicago, 143; Philadelphia, 61; Los Angeles, 48; Boston, 13; Baltimore, 32; Atlanta, 38; Birmingham, 31; Dallas, 30; Detroit, 52; Houston, 45; Kansas City, Mo., 17; New Orleans, 28; St. Louis, 46; San Antonio, 22; Washington, D. C., 23.

For the same period, autos were stolen as follows: New York, 6,044; Chicago, 2,200; Philadelphia, 2,042; Los Angeles, 3,356; Baltimore, 2,237; Boston, 1,279; Detroit, 3,424; Houston, 1,057; New Orleans, 1,235; St. Louis, 2,292; San Francisco, 2,362; Atlanta, 680; Albuquerque, 237.

CRIME SUMMARY FOR THE YEAR 1954

Crimes were still increasing according to reports in 1954. Major crimes were up 5%, a new high of 2,267,250 major crimes (est.). This rise in the 7th year of increases came from robberies, burglaries and larcenies. Rapes and aggravated assaults were up slightly, whereas criminal homicide and auto thefts decreased.

Crime, up 26.7% since 1950, has increased almost 4 times as fast as population. The crime rate per 100,000 pop. is up 18.4%. City crimes were up 4% in 1954 and are now 44.2% above the prewar average. Rural crime increased 8.3%. Persons under 18 represented 57.6% of all arrested for auto theft, 49% of all arrested for burglary and 43.6% of all those arrested for larceny in 1954, according to reports from 1,389 cities, pop. 38,642,183.

Murders and non-negligent manslaughter were 6,850, 270 below 1953. In 20 years 146,869 lives have been taken in the U. S. Manslaughter by negligence reached 5,410, 280 below 1953. Only about 15% of the deaths by motor car are counted by the police as crimes.

Big Increase in Burglaries

Crimes against property—robbery, burglary, larceny and auto theft, reached 2,143,420, or 107,650 more than in 1953. There were 40,000 more burglaries than in 1953, a total of 519,190, and an estimated loss of \$91,000,000. Of the auto thefts, 215,940, 94% were recovered. The unrecovered 12,956 represent a loss of \$12,000,000.

Rape found 18,000 victims, about one-half of the cases forcible. Brutal assaults, except rapes, numbered 93,540, an increase of 940.

Automobiles Stolen in Large Cities, 1954:

New York	12,896	Seattle	1,667
Detroit	7,140	Newark	1,531
Los Angeles	6,890	Atlanta	1,507
Chicago	5,053	Cleveland	1,370
Baltimore	4,826	Oakland	1,333
Philadelphia	4,549	Indianapolis	1,346
St. Louis	4,022	Washington	1,272
San Francisco	3,962	Denver	1,236
New Orleans	2,370	Minneapolis	1,264
Boston	3,306	Buffalo	1,231
Dallas	2,106	San Antonio	1,168
Houston	2,063	Fort Worth	1,035
Pittsburgh	1,765	Long Beach	946
Louisville	1,697		

Murders in large cities in 1954 were recorded as follows: New York, 315; Chicago, 277; Philadelphia, 134; Detroit, 108; Houston, 102; Atlanta, 85; Baltimore, 82; New Orleans, 67; Fort Worth, 45; Kansas City, Mo., 45; Newark, 43.

Increase in Shoplifting

Shoplifting and auto accessory thefts led the increases in the larceny classification. While the over-all rise in larcenies was 4.5% in 409 cities over 25,000, shoplifting jumped 11.4% and auto accessory thefts 9.4%. Pocket pickings declined.

Persons Found Guilty

For every 7 major offenses reported to police, there is an average of 1 conviction in court. For murder, the ratio is about 2 offenses for each conviction, negligent manslaughter and rape 3 to 1. Robberies and aggravated assaults occur at the rate of about 4 for every conviction. Burglaries and auto thefts occur 7 times more frequently than convictions. Other thefts, larceny, occur almost 9 times more frequently.

The highest conviction rate in the individual crime classes continues in cases of driving while intoxicated (87.5%). The lowest is in manslaughter by negligence category, 42.5% found guilty. Manslaughter by negligence offenses are principally traffic killings. An offense is scored only when the police investigation reflects that the victim was killed as the result of the gross negligence of someone else.

Crimes by Regions. Increases in total crime occurred in all areas with the exception of the South Atlantic states where a 1.2% decrease was reported. Increases in other geographic divisions range from 1.1% in the Pacific states to a high of 9.5% in the West North Central states.

Notable variations from the over-all trend include a 10.3% increase in murders in the Mountain states, a 20.8% increase in negligent manslaughters in the East South Central states, an 8.1% decrease in rape in the East North Central states, a 3.2% decrease in the Pacific states in the robbery classification, a 5.3% decrease in the East North Central states for aggravated assault and a 7.5% increase in auto thefts in the New England states.

Police Organizations in the United States

Source: Uniform Crime Reports, Federal Bureau of Investigation

The total number of police employees in cities, officers and civilians, on Apr. 30, 1955, was estimated at 171,000, an increase of 4% over 1954. Civil police (employees without the power of arrest) increased from 15,000 in 1954 to 16,000 in 1955, or 7%. All police in state and local governments were estimated at 259,000 in October, 1954. Of police employees, 9.6% were civilians in 1955.

Reports from 3,704 cities show that 61 city police were killed in line of duty in 1954. Police cleared by arrest better than 1 out of 4 crimes in 1954. They cleared up over 3 out of 4 homicides and felonious assaults and 1 out of 4 property crimes. Five out of 7 persons charged by the police in 1954 were found guilty.

Police employees, officers and civilians, in major cities reported to the FBI as of Apr. 30, 1955:

New York	22,675	Milwaukee	1,786
civilians	1,330	Pittsburgh	1,570
Chicago	8,390	Buffalo	1,497
civilians	670	Newark	1,310
Los Angeles	5,393	Jersey City	1,013
civilians	1,047	New Orleans	1,118
Detroit	4,880	Cincinnati	891
Philadelphia	5,575	Seattle	889

San Francisco	1,812		

Federal Bureau of Investigation (FBI)

J. Edgar Hoover, Director, Ninth and Pennsylvania Avenues, N.W., Washington 25, D. C.

The Federal Bureau of Investigation was created in 1908 by order of the then Attorney General Charles J. Bonaparte. Special Agents of this Bureau are charged with the duty of investigating violations of the laws of the United States, collecting evidence in cases in which the United States is or may be a party in interest, and performing other duties imposed upon them by law.

Special Agents of the FBI are college trained. An applicant must be a graduate of an accredited law school, or he must be a graduate of an accredited accounting school. Agents get sixteen weeks of preliminary training in the FBI Training Academy, with classes in Quantico, Va., and Washington, D.C. During this time they must learn to shoot all of the various firearms used by the F.B.I. and become adept in handling them. They must learn the various Federal violations over which the FBI has jurisdiction. They must study the techniques and mechanics of arrest and the search of crime scenes for evidence. To become a Special Agent in the FBI a man must be at least 25 years old but must not have reached 41.

When J. Edgar Hoover took office in 1924 there was no centralized fingerprint collection in the United States. One of his first moves was to bring together the collection housed at Fort Leavenworth

by the Federal Government and the fingerprints being maintained by the International Association of Chiefs of Police in Washington, D. C. Starting with a nucleus of 810,188 fingerprints this file had grown in ten years to more than 5,000,000 prints. During the next five-year period (by 1939) the file had grown to 10,000,000 prints. As of April 1, 1954, 130,460,252 fingerprint cards were on file in the F.B.I. Identification Division.

On June 11, 1930, Congress passed an Act authorizing the FBI to collect criminal statistics from police agencies throughout the country and to compile and publish such statistics in the Uniform Crime Reports bulletin.

The Laboratory of the FBI was established in 1932 and for a time only one man was designated to carry out the scientific studies of evidence in criminal cases. The scientists and technicians of the FBI Laboratory examine evidence involved in all types of criminal cases handled by the FBI and other Federal law enforcement agencies. A great deal of work also is done for local agencies.

In July, 1935, there was established in the Federal Bureau of Investigation the FBI National Academy. Since that time selected police officers from every state in the Union and many foreign countries have attended this school.

How the FBI Performs Its Duties

From an Address by Louis B. Nichols, Asst. to the Director, FBI, Apr. 29, 1955.

J. Edgar Hoover (Director, FBI) has never looked with favor upon extending the jurisdiction of the FBI because an organization such as ours functions best when it is tightly knit and highly mobile. We are constantly concerned over how extended we are. This becomes obvious when you realize that there is approximately one special agent to each 27,000 inhabitants in the United States, or only about two special agents for each county in the United States.

While the FBI has been expanded since World War II, its work has increased 13 times while its personnel has increased only 8 times. We have made up the difference by increased efficiency and burning the midnight oil. In 1954 alone the voluntary overtime for which bureau agents were not compensated was valued at more than \$9,900,000. In the past 18 years it has cost the taxpayers \$748,180,514 to maintain the FBI while fines, savings, recoveries and claims adjusted in favor

of the government have totaled \$1,052,808,902 in FBI cases. In other words, the monetary value of our work exceeded our cost of operations by \$304,628,388.

We have always taken special pride in the FBI contributions to protection of civil rights. Mr. Hoover early established the basic principle that we fulfill our responsibility only when we secure all the facts, fairly, impartially and in a manner consistent with the judicial process. Thus, the fundamental objective in any investigation is to get the facts.

Once the facts are secured, the innocence of the innocent and the guilt of the guilty inevitably follow. Last year convictions resulted in 95.8% of the cases investigated by the FBI which were taken to court. Of these, 91.3% resulted from pleas of guilty. This hardly could be possible unless there was a conscientious effort to protect the rights of those involved.

Blue Cross Plans are local non-profit organizations that provide hospital service to members. Enrollment as of December 31, 1954, constituted 28.8% of the population of the United States, Alaska and Puerto Rico served by Blue Cross and 27.8% of the population of the eight Provinces served by the five Canadian Blue Cross Plans. During 1954, Blue Cross Plans paid \$763,676,588 to hospitals for care of 7,245,359 members for 43,980,304 days of care. This amount represented 98.10% of earned subscription income, the remainder being devoted to total operating expenses, 6.83% of earned subscription income and reserves, 4.07%.

Blue Cross Plans provide service in 6,000 hospitals, for a period ranging from 21 to 120 days at full benefits per year or per disability, usually plus a period of partial benefits, ranging from 30 to 245 days. All Plans provide board and room, general nursing care, use of operating and delivery rooms, routine laboratory service, routine

drugs and medications, routine dressings and casts. Most of the Plans cover the following services in varying degrees: special diets, emergency room care, anesthesia, X-Ray, electrocardiograms, basal metabolism tests, physical therapy, oxygen therapy, pathology, special drugs and medications, and other hospital services.

Members of one Plan moving into the area of another Plan usually must transfer their membership. A reciprocal program, the Inter-Plan Bank, supplemented by schedules of benefits in non-member hospitals, assures receipt of care in any recognized general hospital in the world. Health Service, Incorporated, a Blue Cross-owned stock company, provides a means for enrollment of employees of national firms. Medical and surgical care are available through non-profit prepayment Plans affiliated with 82 of the 84 Blue Cross Plans; most of these medical/surgical Plans are known as Blue Shield Plans.

Blue Shield Plans are non-profit organizations sponsored by State or local medical associations. They provide medical and surgical service to members. Enrollment as of Dec. 31, 1954 constituted 20.02% of the population of the United States, Puerto Rico and Hawaii served by Blue Shield Plans and 14.18% of the eight Provinces served by the six Canadian Blue Shield Plans. During 1954, Blue Shield Plans paid \$301,125,564 to physicians for care of Blue Shield members. This amount represented 81.92% of earned subscription income, the remainder being devoted to total operating expense, 1.21% of earned subscription income, and reserves, 6.87%.

Blue Shield Plans provide benefits in the form of service or cash indemnities, depending upon the income of the subscriber. Generally speaking a single person with an income of \$2500, and a family with an income of \$4000, receive benefits

in the form of services described in the membership contract and the Blue Shield Plan pays the physician's fee for all such services performed. When the subscriber's income exceeds these average income limits, the subscriber receives cash or credit in specified amounts described in his membership contract which he may apply toward the physician's bill.

Blue Shield Plans offer medical care, surgical and maternity care during delivery, diagnostic X-ray and anesthesia. In addition, many Plans also cover the following services in varying degrees: X-ray, laboratory examinations, medical examinations, medical treatment, radium treatment and consultant's services.

Members of one Plan moving into the area of another Plan usually must transfer their memberships. The majority of the Blue Shield medical care Plans are coordinated with Blue Cross hospital service Plans.

Average Height and Weight of Men and Women

Source: Equitable Life Assurance Society during 1940. Heights are in shoes and weights (lbs.) in ordinary indoor clothing, excluding coats and vests in the case of men.

Marriage Information

Source: Compiled by John H. Mariano; Council on Marriage Relations, Inc.,
110 East 42 St., New York 17, N. Y.

Marriageable age, by States, for both males and females with and without consent of parents or guardians. But in most States the court has authority, in an emergency, to marry young couples below the ordinary age of consent, where due regard for their morals and welfare so requires.

State	With consent		Without consent		Blood test	Wait for license	Wait after license	License fee etc.

(a) 24 hours if one or both parties resident of state; 96 hours if both parties are non-residents.

(b) 50c to file; \$2.00 when license is issued.

(c) Cook County \$5.00; balance of state, \$1.00.

(d) \$2.50 for license, plus \$1.00 registration fee.

(e) For males only, examination for venereal disease.

(f) \$3 to \$6 depending upon county.

(g) None, but a medical certificate is required.

Wedding Anniversaries

Source: Jewelry Industry Council

The Jewelry Industry Council, in cooperation with the American National Retail Jewelers Association, the National Association of Credit Jewelers and the National Wholesale Jewelers Association, issued a new and revised wedding anniversary list, effective Jan. 1, 1948. By agreement with the American National Retail Jewelers Association the new list replaced the one authorized by the Association in 1937.

1st—Clocks	10th—Diamond jewelry	19th—Bronze
2nd—China	11th—Fashion jewelry, accessories	20th—Platinum
3rd—Crystal, glass	12th—Pearls or colored gems	25th—Sterling silver jubilee
4th—Electrical appliances	13th—Textiles, furs	30th—Diamond
5th—Silverware	14th—Gold jewelry	35th—Jade
6th—Wood	15th—Watches	40th—Ruby
7th—Desk, pen and pencil sets	16th—Silver hollowware	45th—Sapphire
8th—Linen, laces	17th—Furniture	50th—Golden jubilee
9th—Leather	18th—Porcelain	55th—Emerald
		60th—Diamond jubilee

TRADITIONAL LIST RECOMMENDED BY SOCIAL AUTHORITIES

1st—Paper. 2nd—Cotton. 3rd—Leather. 4th—Fruit and Flowers. Silk. 5th—Wooden. 6th—Sugar and Candy. Iron. 7th—Woolen or Copper. 8th—Bronze or Pottery. 9th—Willow or Pottery. 10th—Tin or Aluminum. 11th—Steel. 12th—Silk or Linen. 13th—Lace. 14th—Ivory. 15th—Crystal. 20th—China. 25th—Silver. 30th—Pearl. 35th—Coral. 40th—Ruby. 45th—Sapphire. 50th—Golden. 55th—Emerald. 60th and 75th—Diamond.

Grounds for Divorce

Source: Compiled by John H. Mariano: Council on Marriage Relations, Inc., 110 East 42nd Street, New York 17, N. Y. Persons contemplating divorce should study latest decisions or secure legal advice before initiating proceedings since different interpretations or exceptions in each case can change the conclusion reached. Some States apply statutes strictly, others are more lenient.

*Exceptions are to be noted. **Determined by court order. Georgia, period of 30 days to elapse before right to remarry. ¹Requires 60 days' notice of intention to sue. ²No minimum residence required in adultery cases. A—Violence. B—Indignities. C—Loathsome disease. D—Joining religious order disbelieving in marriage. E—Unchaste behavior after marriage. F—No reconciliation for one year after judgment of separation. E—Unchastity of wife prior to marriage. H—Any gross misbehavior or wickedness. I—Wife being a prostitute. J—Husband being a vagrant. K—5 years insanity; exceptions: 3 years Arkansas, Georgia and Idaho; 2 years Nevada, Washington and Wyoming; 10 years North Carolina. L—Defendant must wait two years to remarry. M—Plaintiff, three months; defendant may not remarry before three years without consent of court. So-called Enoch Arden law provides for annulment of marriage for absence of either party for five successive years if unknown to be alive; void marriages, like bigamy require no waiting time. N—Except in cruelty cases, one year to remarry. O—Plaintiff, six months; defendant, two years to remarry. P—If guilty spouse is sentenced to infamous punishment. Q—Crime against nature. R—Sixty days to remarry. S—One year to remarry. T—Six months to remarry. U—Adultery cases, remarriage in discretion of Court. V—Four months to remarry. W—Separation for three years after decree for same. X—Separation no cohabitation—five years. Exceptions: Rhode Island and Texas, 10 years. Y—Separation no cohabitation—three years. Z—Separation for two years after decree for same.

The plaintiff can invariably remarry in the same State where he or she procured a decree of divorce or annulment. Not so the defendant, who is barred, except in certain States. After a period of time has elapsed even the offender can apply for special permission.

The U. S. Supreme Court in a 5 to 4 opinion, ruled April 18, 1949, that one-sided quick divorces could be challenged as illegal if notice of the action was not served on the divorced partner within the divorcing State, excepting where the partner was represented at the proceedings.

Marriage Information

Source: Compiled by John H. Mariano; Council on Marriage Relations, Inc.,
110 East 42 St., New York 17, N. Y.

Marriageable age, by States, for both males and females with and without consent of parents or guardians. But in most States the court has authority, in an emergency, to marry young couples below the ordinary age of consent, where due regard for their morals and welfare so requires.

State	With consent		Without consent		Blood test	Wait for license	Wait after license	License fee etc.

(e) For males only, examination for venereal disease.

(f) \$3 to \$6 depending upon county.

(g) None, but a medical certificate is required.

Wedding Anniversaries

Source: Jewelry Industry Council

The Jewelry Industry Council, in cooperation with the American National Retail Jewelers Association, the National Association of Credit Jewelers and the National Wholesale Jewelers Association, issued a new and revised wedding anniversary list, effective Jan. 1, 1948. By agreement with the American National Retail Jewelers Association the new list replaced the one authorized by the Association in 1937.

1st—Clocks	10th—Diamond jewelry	19th—Bronze
2nd—China	11th—Fashion jewelry, accessories	20th—Platinum
3rd—Crystal, glass	12th—Pearls or colored gems	25th—Sterling silver jubilee
4th—Electrical appliances	13th—Textiles, furs	30th—Diamond
5th—Silverware	14th—Gold jewelry	35th—Jade
6th—Wood	15th—Watches	40th—Ruby
7th—Desk, pen and pencil sets	16th—Silver hollowware	45th—Sapphire
8th—Linen, laces	17th—Furniture	50th—Golden jubilee
9th—Leather	18th—Porcelain	55th—Emerald
		60th—Diamond jubilee

TRADITIONAL LIST RECOMMENDED BY SOCIAL AUTHORITIES

1st—Paper. 2nd—Cotton. 3rd—Leather. 4th—Fruit and Flowers. Silk. 5th—Wooden. 6th—Sugar and Candy. Iron. 7th—Woolen or Copper. 8th—Bronze or Pottery. 9th—Willow or Pottery. 10th—Tin or Aluminum. 11th—Steel. 12th—Silk or Linen. 13th—Lace. 14th—Ivory. 15th—Crystal. 20th—China. 25th—Silver. 30th—Pearl. 35th—Coral. 40th—Ruby. 45th—Sapphire. 50th—Golden. 55th—Emerald. 60th and 75th—Diamond.

Grounds for Divorce

Source: Compiled by John H. Mariano: Council on Marriage Relations, Inc., 110 East 42nd Street, New York 17, N. Y. Persons contemplating divorce should study latest decisions or secure legal advice before initiating proceedings since different interpretations or exceptions in each case can change the conclusion reached. Some States apply statutes strictly, others are more lenient.

¹Per cent of persons single at beginning of year of age who marry during the year. This figure indicates the chance of marriage within one year from attaining the specified age.

²Per cent of persons single at beginning of year of age who marry in that year and all later years. This figure indicates the total chance of marriage for persons who have attained the specified age.

The Dionne and Diligenti Quintuplets

The Dionne quintuplets, the most famous sisters in the world, lost one of their number Aug. 6, 1954, when Emilie died at a Roman Catholic hostel near Ste. Agathe, Que., Canada. She was 20 years old. Emilie had intended to enter the order of the Oblate Sisters of Mary Immaculate that conducted the hostel for the aged. She had suffered from epilepsy. She was buried in the Catholic cemetery at Corbelle, Ont., near her home.

The quintuplets were born to Mr. and Mrs. Olivia Dionne May 28, 1934, in Callender, Ont., Canada, and named Annette, Cecile, Emilie, Marie and Yvonne. Dr. Allan R. Dafoe delivered all within half an hour. Their aggregate weight was 13 lbs., 6 ounces. The state interested itself in their welfare and their education was carefully supervised. Photographs and articles about them yielded the basis for financial independence, but they were not exploited on the stage. They came to New York in October, 1950, with classmates of the Villa Notre Dame high school, and sang at a benefit for the Alfred E. Smith Memorial Hospital at the Waldorf-Astoria Hotel.

In September, 1953, the sisters separated for the first time. Marie entered the Roman Catholic order

of the Sisters of the Holy Sacrament at Quebec as a postulant and on May 24, 1954, took the vows of a novice. She returned home in July and resumed her vocation in September, 1955. During the winter of 1953-54 Emilie, Annette and Cecile studied domestic science at the Institut Familiale in Nicolet, Que., and Yvonne studied art at the Congregation of Notre Dame, Montreal. In the fall, 1954, Marie and Annette enrolled in the College Marguerite-Bourgeoys, Montreal, Marie taking the regular course and Annette studying the piano for teaching.

DILIGENTI QUINTUPLETS

Quintuplets, two boys and three girls, were born to G. Franco Diligenti and his wife Vallota July 15, 1943, in Buenos Aires, Argentina. The father is president of textile corporations and visited the United States in 1954. He reported that the quintuplets attend different private schools in order to develop as individuals. They speak Spanish, Italian, French, German and English. The Diligentis also have a son, married and in Montreal, and two teen-age daughters at home.

Balance of Nature—All plant and animal life is interrelated in a delicately balanced scheme, reports the National Geographic Society. Plants provide food for insects, birds and animals. Each in turn whets the appetite of another creature, usually larger and stronger. Thus every creature attains its special diet until it meets its fate and returns to the soil. To insure survival, each species has the power to reproduce much faster than its death rate. So nature provides police—parasites, disease and predators—to keep a balance between life and the food supply. Disaster sometimes follows the removal of plants and animals from nature's discipline.

Average Weight of Organs of the Human Body

Fully Developed Medium-sized Individuals

Source: Armed Forces Institute of Pathology; data based on Autopsy Diagnosis and Technic by Otto Saphir.

Birth Stones

Source: American National Retail Jewelers' Association

Month	Ancient	Modern	Month	Ancient	Modern	Month	Ancient	Modern
January	Garnet	Garnet	May	Agate	Emerald	September	Chrysolite	Sapphire
February	Amethyst	Amethyst	June	Emerald	Pearl, Moonstone or Alexandrite	October	Aquamarine	Opal or Tourmaline
March	Jasper	Bloodstone or Aquamarine	July	Onyx	Ruby	November	Topaz	Topaz
April	Sapphire	Diamond	August	Carnelian	Sardonyx or Peridot	December	Ruby	Turquoise or Zircon

The term precious stones actually applies only to diamonds, rubies, sapphires and emeralds. All others are semiprecious. Precious gems are minerals dug from the earth and brought to perfection by the lapidary's art. The pearl, often a gem of great value, is not a precious stone.

President Eisenhower and Veterans Commemorate Crossing of Remagen Bridge

To commemorate a great feat of arms President Dwight D. Eisenhower on Mar. 7, 1955, sponsored a veterans' group called the Society of the Remagen Bridge. At the White House offices he gave certificates of membership to 12 men who had received the Distinguished Service Cross for their part in the capture of the Ludendorff railway bridge across the Rhine at Remagen, which the Germans had failed to destroy and therefore enabled American divisions to establish a bridgehead on the opposite side. The crossing took place Mar. 7, 1945, by the 9th Armored Division, 3rd Corps, First Army. The President said:

"Gentlemen, I have asked you to come here this morning because you know old soldiers' minds

are bound to turn back once in a while to dramatic events of war—particularly of the kind that took place at the Remagen bridgehead. Now, of course, that was not the biggest battle that ever was, but for me it always typified the dash, the ingenuity, the readiness at the first opportunity that characterizes the American soldier."

Among the 12 veterans were Alex A. Drabik, Toledo, O., first man across the bridge, and William J. Goodson, Pendleton, Ind., driver of the first truck to cross. Certificates also were given Col. Leonard Engeman, commander of the unit and Lt. Gen. John W. Leonard, who commanded the 9th Armored Division.

Construction and Housing in the United States

NUMBER OF NEW PERMANENT NONFARM DWELLING UNITS STARTED¹, BY METROPOLITAN OR NONMETROPOLITAN LOCATION², AND BY PUBLIC OR PRIVATE OWNERSHIP, 1950-54

Number of new permanent units

Year	Total			Private			Public		
	All non-farm	Metropolitan	Non-metropolitan	Total	Metropolitan	Non-metropolitan	Total	Metropolitan	Non-metropolitan
1950.....	1,396,000	1,021,600	374,400	1,352,200	987,000	365,200	43,800	34,600	9,200
1951.....	1,091,300	776,800	314,500	1,020,100	723,100	297,000	71,200	53,700	17,500
1952.....	1,127,000	794,900	332,100	1,068,500	750,600	317,900	58,500	44,300	14,200
1953.....	1,103,800	803,500	300,300	1,068,300	776,900	291,400	35,500	26,600	8,900
1954.....	1,220,400	896,900	323,500	1,201,700	879,400	322,300	18,700	17,500	1,200

¹These estimates are based on building permit records which have been adjusted for lapsed permits and for lag between permit issuance and start of construction. They are based also on reports of Federal construction contract awards and on field surveys in nonpermit-issuing places. All temporary units are excluded. ²Metropolitan and nonmetropolitan classifications based on 1950 Census.

AVERAGE CONSTRUCTION COST OF NEW PRIVATELY OWNED NONFARM DWELLING UNITS STARTED¹

This table does not show change in the construction cost of a single dwelling of a given type, but does show change in the average cost of all dwelling units started. Does not include land costs.

Year	Average construction cost per new dwelling unit in—		Index numbers (1947-49=100) of construction cost per new dwelling unit in—	
	All types of structures	1-family structures	All types of structures	1-family structures
1945.....	\$4,625	\$4,650	63.6	62.8
1946.....	5,600	5,525	77.1	74.6
1947.....	6,650	6,750	91.5	91.1
1948.....	7,700	7,850	106.0	106.0
1949.....	7,450	7,625	102.5	102.9
1950.....	8,450	8,675	116.3	117.1
1951.....	9,000	9,300	123.9	125.5
1952.....	9,075	9,475	124.9	127.9
1953.....	9,525	9,950	131.1	134.3
1954.....	10,250	10,625	141.1	143.4

¹Based on building permit valuations, adjusted for understatement of cost, and, since 1946, on field surveys in nonpermit-issuing places. Construction costs cover only the cost of labor, materials, sub-contracted work, and that part of the builder's overhead and profit chargeable directly to the construction project. Thus construction costs should not be confused with selling price.

NUMBER AND PERCENTAGE DISTRIBUTION OF NONFARM DWELLING UNITS STARTED¹

Year	Number of dwelling units in—				Percentage of dwelling units in—		
	All types of structures	1-family structures	2-family structures	Multi-family structures	1-family structures	2-family structures	Multi-family structures
1945.....	209,300	184,600	8,800	15,800	88.2	4.2	7.6
1946.....	670,500	590,000	24,300	56,200	88.0	3.6	8.4
1947.....	849,000	740,000	33,900	74,900	87.2	4.0	8.8
1948.....	931,600	766,600	46,900	118,100	82.3	5.0	12.7
1949.....	1,025,100	794,300	36,500	194,300	77.4	3.6	19.0
1950.....	1,396,000	1,154,100	44,800	197,100	82.7	3.2	14.1
1951.....	1,091,300	900,100	40,400	150,800	82.5	3.7	13.8
1952.....	1,127,000	942,500	45,900	138,600	83.6	4.1	12.3
1953.....	1,103,800	937,800	41,500	124,500	85.0	3.7	11.3
1954.....	1,220,400	1,077,900	34,200	108,300	88.3	2.8	8.9

¹These estimates are based on building permit records which have been adjusted for lapsed permits and lag between permit issuance and start of construction. They are based also on reports of Federal construction contract awards and on field surveys in nonpermit-issuing places. All temporary units are excluded.

INDEXES OF BUILDING PERMIT ACTIVITY¹

Year	Indexes (monthly average 1947-49 = 100)			
	All building construction	New residential building ²	New nonresidential building	Additions, alterations and repairs
1945.....	29.6	18.8	38.3	50.4
1946.....	71.4	71.1	67.4	81.6
1947.....	83.7	83.6	79.2	94.4
1948.....	104.9	101.8	109.5	106.3
1949.....	111.3	114.6	111.3	99.2
1950.....	157.7	176.2	145.9	115.6
1951.....	134.2	141.6	130.1	116.1
1952.....	134.2	145.9	121.5	119.7
1953.....	144.5	142.1	153.9	132.3
1954.....	159.9	164.8	162.0	128.4

¹Indexes for 1945-53 are based on estimates of building for which building permits were issued and Federal contracts awarded in all urban places. The indexes for 1954 are based on a new expanded series which covers building activity in all localities having building-permit systems (over 7,000 places). A six-month overlap period, January-June 1954, provided the basis for linking the old and new estimates. Despite the differences of coverage in the two series, the linked index numbers appear to be satisfactory in measuring trends.

²Includes value of hotels, dormitories, tourist cabins, and other nonhousekeeping residential building. Revised estimated expenditures for new construction in Continental United States (in millions of dollars)—(1930) 8,741, (1935) 4,232, (1940) 8,682, (1945) 5,633, (1950) 27,902, (1951) 29,363.

BUILDING PERMIT ACTIVITY: VALUATION AND NUMBER OF DWELLING UNITS, BY LOCATION, 1954¹

Location	Valuation (in millions)				Number of dwelling units		
	All building construction	New residential building	New nonresidential building	Additions alterations and repairs	Total	1-family houses	Units in 2 or more family structures
United States total.....	\$16,464.9	\$9,990.7	\$5,005.8	\$1,468.4	1,074,483	928,457	146,026
Metropolitan areas ²	13,161.1	8,187.5	3,819.3	1,154.3	860,743	727,537	133,206
In central cities.....	5,091.0	2,463.6	1,033.1	704.7	280,034	194,170	85,864
Outside central cities.....	8,070.1	5,723.9	1,886.2	450.0	580,709	533,367	47,342
Nonmetropolitan areas.....	3,303.8	1,803.2	1,186.5	314.1	213,740	200,920	12,820
Geographic division:							
Northeast.....	3,657.1	2,175.7	1,145.5	335.9	221,886	179,548	42,338
North Central.....	4,834.3	2,941.1	1,489.2	404.0	272,344	250,025	22,319
South.....	4,133.0	2,378.8	1,363.1	391.2	297,835	262,859	34,976
West.....	3,840.4	2,495.1	1,007.9	337.3	282,418	236,025	46,393

¹These statistics on building construction authorized by local building permits measure building activity in all localities having building-permit systems—rural nonfarm as well as urban. Such localities (over 7,000) include about 80 percent of the nonfarm population of the country, according to the 1950 Census. The data cover publicly and privately owned construction. No adjustment has been made in the building-permit data to reflect the fact that permit valuations generally understate the actual cost of construction, nor for lapsed permits or the lag between permit issuance or contract award dates and start of construction. Components may not always equal totals because of rounding.

²Comprised of the 168 Standard Metropolitan Areas used in the 1950 Census.

Exports (In thousands board feet)—Average pre-war year, 1,197,003; (1942) 345,260; (1943) 268,253; (1944) 325,424; (1945) 402,213; (1946) 648,287; (1947) 1,356,678; (1948) 647,356; (1949) 661,972; (1950) 513,648; (1951) 986,245; (1952) 639,318.

Imports (In thousands board feet)—Average pre-war year, 604,640; (1942) 1,510,206; (1943) 839,270; (1944) 978,043; (1945) 1,046,345; (1946) 1,225,564; (1947) 1,304,990; (1948) 1,869,018; (1949) 1,562,665; (1950) 3,428,915; (1951) 2,511,623; (1952) 2,481,846.

National Parks and New Industries in Canada

Development of the great system of national parks of Canada has proved most alluring to thousands of visitors from the United States, who cross the border to fish, hunt, canoe, swim, ski or motor over roads that lead for miles through virgin forests and over high mountain passes. Opportunities for angling are provided by the administrations of the provinces, which furnish information to all interested in rod and reel. Details also may be obtained from the Canadian Government Travel Bureau, Ottawa, Can.

Playgrounds of Eastern Canada have become increasingly popular among Canadians and Americans, and in 1955 many visited the Cape Breton Highlands, Fundy, Prince Edward Island, Point Pelee National parks, Georgian Bay Islands, and the historic forts of the East where colonial Americans from New England fought side by side with the British against the French.

Most famous is the fortress of Louisbourg, on Cape Breton Isl., Nova Scotia, captured in 1745, again the scene of fighting in 1755-58. Others now treated as national parks are Fort Anne, N. S., Fort Beauséjour, N. B., Fort Lennox, Que., Fort Chambly, Que., Fort Wellington, Ont., and Fort Malden, Ont. Several of these forts were attacked by Americans during the Revolution and the War of 1812 and Fort Chambly was captured by Gen. Montgomery in 1775.

Newest of the eastern parks is Fundy, in New Brunswick, 80 sq. mi. above the Bay of Fundy, where the world's swiftest tides have cut the shoreline into coves and promontories.

A unique natural phenomenon may be observed at Reversing Falls, on the outskirts of St. John, N. B. At low tide the river waters flow over a normal waterfall. As the tide rises the sea begins to meet the river higher up and when the tide is at medium the falls disappear and the river presents a smooth surface. At high tide water flows up the river channel for a considerable distance.

Jubilee Year for Provinces

During 1955 Saskatchewan and Alberta observed the 50th anniversary of their organization as provinces. In 1900 farming and lumbering were the principal occupations of Alberta; today there is a great empire of oil and natural gas. Early in the century Edmonton was a group of shacks on the Klondike trail; now it is a city that counted 159,000 residents in the latest census and estimates the actual number as 200,000. Calgary's meat packing plants draw on the livestock of the region. Saskatchewan raises the most wheat.

Banff (2,564 sq. mi.) and Jasper (4,200 sq. mi.) are the two national parks situated on the great Rocky Mountain barrier at the western boundary of Alberta. The mountains, forests and lakes of these parks are made accessible by extensive highways. The Banff-Jasper highway affords unparalleled scenic grandeur as it follows great rivers and mountain lakes within sight of glaciers and ice fields, at times 7,000 ft. above sea level. The parks preserve many varieties of wild life rarely seen in the rest of the continent, including bears, elk, moose, caribou, deer, mountain lions and cougars, while eagles wheel overhead.

Waterton Lakes National Park, at the southwest corner of Alberta adjoins Glacier National Park in Montana, and the two since 1932 have been termed Waterton-Glacier International Peace Park, by U. S. and Canadian legislation. Canada's Glacier National Park is in British Columbia (521 sq. mi.) in the Selkirk mountains. This province also has the mountain parks of Yoho, which contains sections of the Columbia and Kicking Horse rivers; Kootenay (543 sq. mi.) adjoining Banff and Yoho, and Mt. Revelstoke, noted for winter sports.

Directions for Tourists

Citizens of the United States by birth do not need passports when entering Canada as tourists; but should carry papers of identification for convenience. Naturalized Americans should carry certificates of naturalization. Americans entering with motor cars for their own use may obtain a permit good for 60 days from the Canadian Customs at port of entry. This may be extended up to 6 mos. This applies also to motorcycles and bicycles. Pleasure boats may remain until Oct. 1 following entry, and until Dec. 31 on the Pacific Coast. No fees are collected.

Sportsmen may bring equipment free of duty. Shotguns and rifles may be imported for a temporary period free of duty under permit issued at the border, but all sporting equipment must be reported and identified upon return, within

6 mos. of time of entry. Revolvers, pistols and automatic weapons are not admitted. Licenses to hunt are obtainable from local authorities. Regulations covering migratory birds should be consulted by sportsmen.

American citizens returning to the United States after a stay of not less than 48 hours in Canada may bring in \$200 worth of articles duty free not more than once in a 30-day period. These do not include liquor and cigars. Those who have been in Canada not less than 12 days may bring in \$300 worth additional, including liquors and cigars, but not more than once in 6 mos. The U. S. limits cigars to 100 and alcoholic beverages to one wine gallon.

Building the Seaway

Start of work on the St. Lawrence Seaway was welcomed by Canada as promising vast economic expansion. The electric power produced is expected to be even more valuable than the opening of the channel to ocean-going vessels. The Great Lakes—St. Lawrence basin has a potential of 10,000,000 hp, 70% of it in Canada, of which one-third has been developed.

The largest task is the development of 2,200,000 hp potential in the International Rapids section, which calls for an upper control dam at Iroquois and a main dam and powerhouse at Cornwall. The main dam will extend from the U. S. mainland to Barnhart Isl. The powerhouse from the foot of Barnhart to the Canadian mainland will act as a dam over 3,000 ft. long and 162 ft. above foundation. Canada has built two tunnels under Cornwall canal for use during construction of these works. Long Sault dam and powerhouse, from the head of Barnhart Isl. to the U. S. mainland will be 2,250 ft. long, 145 ft. high.

First generating units will deliver electricity in 1958 and the power project is to be completed by 1959. The power project will average 12.6 billion kt hrs. when completed. The St. Lawrence River has the steepest flow, with maximum only 2.2 times minimum, whereas Bonneville on the Columbia River is 33 times and the Tennessee at Florence, Ala., 115 times minimum.

Canada is proceeding with canal and lock construction and deepening the channel for the Seaway. It is preparing to raise bridges to provide minimum clearance of 120 ft. for vessels. Bridges to be elevated are the Jacques Cartier, Victoria, Mercier and several Canadian National Ry. bridges.

Engineers believe ocean-going vessels will not penetrate the heart of the continent to any great extent but that a special fleet of smaller vessels of 20,000 tons will transship their cargoes at ocean ports. Iron ore, grain and coal will be the principal products moved. A saving of transportation charges of 5 to 6c a bushel of wheat is expected. If ore from Sept. Isles, Que. reaches 20,000,000 tons annually steel producers expect to save about \$250,000.

Rise in Industrial Activity

Canada experienced marked improvement in economic activity in 1955. Recovery from the slowing up of industry in the early 1950's has followed by some months that of the United States, Canada's largest customer. Industrial production early in 1955 rose by 8%, exports were 10% higher than in 1954 and by mid-April employment was 117,000 higher. Complete reports for 1955, estimated by the Minister of Finance, were expected to show an increase in national production of 5 to 6%.

New Copper Mine Opened

One of the newest industrial developments is the copper mine of Needle Mountain in the Gaspe, operated since April, 1955, by Gaspe Copper Mines, Ltd., subsidiary of Noranda Mines, Ltd., at Murdochville, Que. The mountain is said to contain over 60,000,000 tons of low-grade ore, and the annual yield is expected to reach 42,000 tons of copper.

Fight on Ragweed Pollen

The value to Canada of tourist travel has led to a systematic study of pollen, in the interest of sufferers from hay fever. The provinces and the Dept. of Agriculture of Canada prepare a pollen index and indicate where tourists will escape the irritants. Canada has many areas comparatively free from ragweed pollen, the most satisfactory being the Gaspe peninsula. Controls are instituted and eradication of the offending weeds is unabated.

Structure of the British Commonwealth of Nations

The British Commonwealth covers 12,992,102 square miles (one-fourth of the world's land surface). Its population according to the latest census and official estimates is 646,191,893, more than one-fourth of the inhabitants of the world.

The term British Commonwealth of Nations includes British Colonies and their subdivisions, and associated independent countries, officially termed Dominions, a term now little used.

The term Colony is an abbreviation of the official designation "Colony not possessing responsible Government" and includes all such colonies whether or not they possess elective legislatures. The British Colonial Empire includes in addition to the Colonies proper a number of Protectorates, Protected States and Trust Territories.

The Statute of Westminster, effective Dec. 11, 1931, ratified the declarations of the Imperial Conferences (1926 and 1930), which were participated in by the United Kingdom of Great Britain and Northern Ireland, and the Prime Ministers of the Dominion of Canada, the Commonwealth of Australia, the Dominion of New Zealand, the Union of South Africa, the Irish Free State, and the Dominion of Newfoundland.

The 1926 Conference defined the Dominions as "autonomous Communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations. . . . Every self-governing member of the Empire is master of its destiny. In fact, if not always in form, it is subject to no more compulsion whatever."

Newfoundland became a province of Canada Mar. 31, 1949. Ireland (Eire) left the Commonwealth Apr. 18, 1949, when the Republic of Ireland Act became effective. India, a Dominion since Aug. 15, 1947, became a republic Jan. 26, 1950, but remained as an independent member of the Commonwealth. Pakistan became a self-governing Dominion Aug. 15, 1947. Ceylon became a self-governing Dominion with a British governor general Feb. 4, 1948.

Capital of this vast area is London, England.

Population of Greater London, comprising the City and Metropolitan Districts, in 1951 was 8,346,137, of which 3,348,336 was in the Outer Ring.

Greater London has an area of 443,455 acres. The parliamentary and registration City is a small area of 675 acres in the heart of the capital; the registration County, approx. coinciding with the area of the parliamentary boroughs, has 74,850 acres; the remainder constitutes the Outer Ring. For population comparisons Greater London is in the same category as New York, N. Y.

The ruling sovereign is Elizabeth II, the former Princess Elizabeth Alexandra Mary, eldest daughter of the late King George VI. She succeeded to the throne Feb. 6, 1952, and was crowned June 2, 1953. Her title is "Elizabeth II, by the Grace of God, Queen of this realm and all her other realms and territories, Head of the Commonwealth, De-

fender of the Faith." She was born April 21, 1926.

The Queen, as Princess Elizabeth, was married Nov. 20, 1947 to Lt. Philip Mountbatten, born June 10, 1921, former Prince of Greece. He was created Duke of Edinburgh Nov. 19, 1947, H.R.H. Prince Philip Nov. 20, 1947.

They have two children: (1) Prince Charles Philip Arthur George, born Nov. 14, 1948, and (2) Princess Anne Elizabeth Alice Louise, born Aug. 15, 1950.

The Queen has one sister, Princess Margaret Rose, born Aug. 21, 1930.

The late King George VI was born Dec. 14, 1895 (died Feb. 6, 1952), son of King George V (died Jan. 20, 1936), and Queen Mary (died March 24, 1953). He succeeded to the throne on the abdication of his brother, Edward VIII, Dec. 11, 1936. As Prince Albert, Duke of York, he married April 26, 1923, Lady Elizabeth Bowes-Lyon (born Aug. 4, 1900). Besides Elizabeth, the Queen Mother, two brothers and a sister survive King George VI. They are H.R.H. Prince Edward Albert (born June 23, 1894) formerly King Edward VIII (Jan. 20, 1936 to Dec. 10, 1936), created Duke of Windsor (Dec. 12, 1936), married (June 3, 1937) Mrs. Wallis Warfield; H.R.H. Prince Henry William (born March 31, 1900), created Baron Culloden, Earl of Ulster and Duke of Gloucester (March 31, 1928), married (Nov. 6, 1935) Lady Alice Montagu-Douglas-Scott (born Dec. 25, 1901), daughter of the Duke and Duchess of Buccleuch and Queensbury—issue: William Henry Andrew Frederick (born Dec. 18, 1941), Richard Alexander Walter George (born Aug. 26, 1944); Princess (Victoria Alexandra Alice) Mary, Princess Royal (born April 25, 1897), married (Feb. 28, 1922) Viscount Lascelles, later Earl of Harewood—issue: George Henry Hubert, Earl of Harewood (born Feb. 7, 1923), Gerald David (born Aug. 21, 1924).

A third brother, the Duke of Kent, was killed in an airplane accident in Scotland (Aug. 25, 1942). He was H.R.H. Prince George (born Dec. 20, 1902), married (Nov. 29, 1934) Princess Marina of Greece (born Nov. 30, 1906)—issue: Edward George Nicholas Patrick, Duke of Kent (born Oct. 9, 1935), Alexandra Helen Elizabeth Olga Christabel (born Dec. 25, 1936), Michael George Charles Franklin (born July 4, 1942).

Prince Charles is the Heir Apparent. Under an amendment (passed Nov. 19, 1953) to the Regency Act of 1937 which makes provision for performance of the functions of the Crown in the absence of incapacity of the monarch, the Duke of Edinburgh would replace Princess Margaret as Regent for Prince Charles.

The Queen receives from Parliament an annuity of £475,000 (\$1,330,000), comprising her privy purse of £60,000 (\$168,000) and the rest for her household salaries and expenses. The Civil List grants the Duke of Edinburgh £40,000 (\$121,000); Queen Mother Elizabeth £70,000 (\$196,000); the Duke of Gloucester £35,000 (\$98,000); the Princess Royal £6,000 (\$16,800); the Princess Margaret £6,000 (\$16,800) plus an additional £9,000 (\$24,300) in the event of her marriage.

The United Kingdom of Great Britain and Northern Ireland

Capital: London. Area: 94,279 square miles. Population (1951 census), 50,368,455. Flag: Union Jack (blue ground with superimposed crosses of St. George, St. Andrew and St. Patrick in red and white). Monetary unit: Pound (U. S. \$2.80).

Description. The United Kingdom of Great Britain and Northern Ireland, comprising England, Wales, Scotland, Northern Ireland, Isle of Man, and the Channel Islands, lies off the northwest corner of Europe, with the North Atlantic Ocean on the North and West, the North Sea on the East and the English Channel separating it from the mainland on the South. The Straits of Dover, 21 miles wide, divide it from France.

England has an area of 50,874 square miles and a population (1951 census) of 41,147,938. Wales has an area of 7,466 square miles and a population 2,596,986 (1951) including Mommouthshire.

The climate of the British Isles is equable, mild and somewhat warmer than that of the continent because of the Gulf Stream modifying the temperature, which is mean at 48°. Rainfall averages 41 inches annually, and covers longer periods, and fogs often prevail.

The coastline is tortuous, providing many har-

bors for shipping, and numerous rivers up which deep sea craft may go.

The soil is of varied natural fertility. It is more sterile in the north, notwithstanding the figures show that the Scots have attained a relatively high acre production by intensive cultivation. However, centuries of tillage have made necessary elaborate and large use of artificial fertilizers.

Birmingham, succeeding Glasgow as the second largest city has a population of 1,112,340. Glasgow has 1,089,555, and Coventry 258,211 (1951 census).

Parliament is the legislative governing body for the United Kingdom, with certain powers over the dependent Empire but none over the Dominions. It consists of two Houses. The House of Lords is made up of the peers of the United Kingdom: the Royal Dukes, the Archbishops, the Dukes, the Marquesses, the Earls, the Viscounts, 24 Bishops, the Barons; a group of Irish peers elected for life; and 16 Scottish peers elected for the duration of Parliament. The full membership of the House of Lords comprises 801 members, exclusive of minors, but most of the work of the House is done by about 85 members.

The House of Commons was raised from 625

seats to 630 in a 1955 redistribution. Members are elected by direct ballot and divided as follows: England, 511; Wales and Monmouth, 36; Scotland, 17; Northern Ireland, 12.

Clergymen of the Church of England, ministers of the Church in Scotland and Roman Catholic clergymen are disqualified from sitting as members, also certain government officers, sheriffs and government contractors. Women have had the right to vote since 1918 and are eligible to sit in Parliament.

Conservatives Remain in Power

In general elections, May 26, 1955, following the resignation of Prime Minister Winston Churchill April 6, and dissolution of Parliament, the Conservative party retained power. Sir Anthony Eden was appointed Prime Minister and First Lord of the Treasury. Distribution of Commons seats has been:

	1950	1951	1955
Conservatives	297	321	345*
Labor	315	295	277
Liberal	9	6	6
Others	4	3	2

* Includes Associates.

Popular vote in 1955: Conservatives and associates, 13,336,182 (49.84% of total); Labor, 12,405,130 (46.36%); Liberal, 722,400 (2.7%); others, 295,772 (1%). Percentage of electorate voting was 76.78, compared with 82.6% in 1951.

Upon their return to power in 1951, the Conservatives began to denationalize some industries which the preceding Labor government, 1945-1951, had socialized. Electricity, coal and others remain nationalized. Food rationing ended completely July 3, 1954, for the first time in more than 14 years.

National Insurance was begun July 5, 1948. It provides for practically universal compulsory insurance against sickness, maternity, unemployment, and industrial accidents; and pensions for widows, orphans and the aged. The National Health Service, in operation since July 5, 1948, which had provided free medical, dental and nursing care, makes minimum charges (effective June 1, 1952) for medical prescriptions and certain appliances. Under the Family Allowance Act of 1945, amended in 1952, the government pays 8 shillings a week for each child of compulsory school age, after the first. A National Assistance Scheme provides for those not fully protected by National Insurance. Contributions are made by purchase of National Insurance stamps, the amounts varying according to sex and classification (employed, self-employed, non-employed). In the case of employed persons, the employer pays an amount equal to nearly half of the payment.

Individual income tax rate, announced April 19, 1955, is lowered to 42½% from 45%, after allowances. Allowances: single persons, £140; married, £240, plus £100 for each child. Surtax rate reaches over 90% on largest incomes.

Emigration to non-European countries has been:

	1952	1953	1954
United States	23,200	16,212	23,600
Canada	44,400	21,268	40,600
Australia	52,500	30,244	34,800
New Zealand	15,300	14,534	10,400
South Africa	8,700	9,846	6,000

Resources and Industries. Great Britain's major occupations are manufacturing and trade. Its economy is one of the most highly industrialized in the world, with 9 out of 10 engaged in mining, manufacturing and building. Metals and metal-using industries contributed more than 50% of the exports. Agriculture provides wheat, barley, oats, sugar beets, rye and garden truck. England, Wales, Scotland, the Isle of Man and the Channel Islands have a total area of 56,342,000 acres devoted to agriculture. England has 18,104,000 acres of arable land, and 13,059,000 acres devoted to pasture; Scotland devotes nearly 11,000,000 acres to grazing.

The country is rich in mineral resources. There are huge deposits of coal, the annual output approximates \$2 billion in value. Limestone, igneous rock and iron ore are valuable products. Other important minerals, in the order of their value, are gravel and sand, clay and shale, slate, sandstone, salt, China clay, fireclay, chalk, gypsum, oil shale, lead ore, tin ore, ganister and silica rock. Potters' clay, moulding and Pig-bed sand, barytes and witherite, and dolomite.

Since nationalization the railway system is divided into six regions, five in England and Wales and one in Scotland with a total single-track

Cabinet

(As of Oct. 1, 1955)

Prime Minister and First Lord of the Treasury—Rt. Hon. Sir Anthony Eden, K.G., M.C., M.P.
Lord President of the Council—Most Hon. Marquess of Salisbury, K.G.

Chancellor of the Exchequer—Rt. Hon. R. A. Butler, C.H., M.P.

Secretary of State for Foreign Affairs—Rt. Hon. Harold Macmillan, M.P.

Lord Chancellor—Rt. Hon. Viscount Kilmauir, G.C.V.O.

Chancellor of the Duchy of Lancaster—Rt. Hon. Viscount Woolton, C.H.

Lord Privy Seal—Rt. Hon. Harry Crookshank, C.H., M.P.

Secretary of State for the Home Department and Minister for Welsh Affairs—Major Rt. Hon. Gwilym Lloyd-George, M.P.

Secretary of State for Scotland—Rt. Hon. James Stuart, M.V.O., M.C., M.P.

Secretary of State for Commonwealth Relations—Rt. Hon. Earl of Home.

Secretary of State for the Colonies—Rt. Hon. Alan Lennox-Boyd, M.P.

Minister of Labor and National Service—Rt. Hon. Sir Walter Monckton, K.C.M.G., K.C.V.O., M.C., Q.C., M.P.

Minister of Defense—Rt. Hon. Selwyn Lloyd, C.B.E., T.D., Q.C., M.P.

Minister of Housing and Local Government—Rt. Hon. Duncan Sandys, M.P.

President of the Board of Trade—Rt. Hon. Peter Thorneycroft, M.P.

Minister of Agriculture, Fisheries and Food—Rt. Hon. D. Heathcoat Amory, M.P.

Minister of Pensions and National Insurance—Rt. Hon. Osbert Peake, M.P.

Minister of Education—Rt. Hon. Sir David Eccles, K.C.V.O., M.P.

OTHER DEPARTMENTS OF STATE AND NON-CABINET MEMBERS

Admiral, First Lord—Rt. Hon. J. P. L. Thomas, M.P.

War, Secretary of State—Rt. Hon. Antony Head, C.B.E., M.C., M.P.

Air, Secretary of State—Rt. Hon. Lord De L'Isle and Dudley, V.C.

Fuel and Power, Minister—Rt. Hon. Geoffrey Lloyd, M.P.

Health, Minister—Rt. Hon. Iain Macleod, M.P.

Transport and Civil Aviation, Minister—Rt. Hon. John Boyd-Carpenter, M.P.

Supply, Minister—Rt. Hon. Reginald Maudling, M.P.

Works, Minister—Rt. Hon. Nigel Birch, O.B.E., M.P.

Postmaster-General—Rt. Hon. Charles Hill, M.P.

Minister Without Portfolio—Rt. Hon. Earl of Munster.

Paymaster-General—Earl of Selkirk, O.B.E., A.F.C.

Foreign Affairs, Minister of State—Most Hon. Marquess of Reading, C.B.E., M.C., T.D., Q.C.

Colonial Affairs, Minister of State—Rt. Hon. Henry Hopkinson, C.M.G., M.P.

Board of Trade, Minister of State—Rt. Hon. A. R. W. Low, C.B.E., D.S.O., T.D., M.P.

Foreign Affairs, Minister of State—Rt. Hon. Anthony Nutting, M.P.

Scottish Office, Minister of State—Rt. Hon. Lord Strathclyde.

Attorney-General—Rt. Hon. Sir Reginald Manningham-Buller, Q.C., M.P.

Lord Advocate—Rt. Hon. W. R. Milligan, Q.C., M.P.

mileage of 53,000. Public highways extended 183,821 miles in Great Britain, divided into 157,197 for England and Wales and 26,624 miles for Scotland. Telephone service is a part of the postal system. The number of telephones in Great Britain was 6,500,000 in 1954.

Broadcast receiving licenses totaled 14,017,447 on Apr. 30, 1955, including 4,580,725 for television.

Tourist industry set a new high in 1954, with receipts from 850,000 visitors totaling £130,000,000 (\$364,000,000).

The key industries are food products, beverages, motor cars, shipbuilding, textiles, chemicals, paper and printing, clothing, non-ferrous metals, clay

and building materials, building and contracting, timber, leather.

In June, 1954, total employment was 23,531,000, against 23,474,000 in 1953. Workers in civilian employment comprise 95% of working force.

Index of industrial production (1948=100) rose 6% in 1954 over 1953 to a record est. 128 and touched 132 in Jan. 1955. The manufacturing index in 1954 reached 133; metal and engineering trades were main contributors, increasing 8% over 1953. Motor vehicles reached an all-time peak over more than 1,000,000 units.

Industrial production has been:

	1938	1953	1954
Coal (million tons)	227	224	223.8
Steel (million tons)	10.4	17.6	18.5
Automobiles (thousands)	341	595	769
Trucks (thousands)	104	240	260

The merchant marine totaled 19,520,000 tons in 1954, and comprised about 50% of active world shipping. British shipyards build 35% of the world's new shipping; of this about 27% is for export. Shipyards reached a postwar peak of 1,500,000 tons in 1954.

In 1955 Britain planned a 10-year \$840,000,000 program to build 12 nuclear powered electric stations to meet part of future needs.

The British pound was devalued Sept. 18, 1949, from an official rate of \$4.03 to \$2.82. The London gold market was reopened in 1954, but certain restrictions on exchange were retained. To curb inflation and strengthen the pound, the government raised the bank rate from 3 to 3½%, Jan. 27, 1955, and to 4½%, Feb. 24. A wave of railway, dock and coal-mining strikes during the first half of 1955 cost the economy about 2,000,000 working days. A new series of restrictions on credit purchases was announced July 25 to reduce consumption and increase exports. Down payment on a wide range of goods was increased from 15 to 33½%.

Great Britain's principal imports are food, non-ferrous metals and manufactures: wool, timber, gasoline, raw cotton and cotton waste; oils, fats and resins; hides and skins; machinery; iron ore; iron and steel manufactures; tobacco, paper, chemicals, rubber, drugs, dyes and colors. It depends on imports for all its copper, gasoline, cotton, sulphur and rubber; for four-fifths of its wool, and for half of its food and iron ore. It reworks for export wool, rubber, cotton, tea, fur, tin, lead.

Bulk of the exports is supplied by textiles, woolen and worsted goods, iron and steel, machinery and vehicles, including locomotives and shipping. Domestic exports also include cotton yarns, aircraft, coal, food and beverages, drugs, dyes and colors; electrical goods and apparatus, earthenware, glass, cutlery, hardware and implements and wool. Of growing importance are jet aircraft, radio, TV, radar and navigation equipment, harvester-threshers, diesel locomotives, drugs and synthetic detergents, nylon knitted goods.

Imports and exports (in pounds):

	Imports	Exports
1945	1,103,700,000	450,000,000
1946	1,301,000,000	965,000,000
1947	1,794,000,000	1,196,250,000
1948	2,079,500,000	1,647,900,000
1949	2,272,481,000	1,842,996,000
1950	2,602,945,000	2,255,048,000
1951	3,904,000,000	2,707,000,000
1952	3,481,000,000	2,693,000,000
1953	2,872,000,000	2,675,000,000
1954	3,379,000,000	2,774,000,000

RECENT BUDGETS OF GREAT BRITAIN

Trade with the United States in 1954 was: Imports, \$792,000,000; exports, \$447,000,000.

Education and Religion. The Church of England is Protestant Episcopal. The Queen is the supreme governor, possessing the right to appoint to the vacant archbishoprics and bishoprics. There are two archbishops (of Canterbury and York), 43 bishops and 40 suffragan bishops.

The Church of Scotland is Presbyterian.

There are about 450,000 Jews in the United Kingdom with approximately 200 synagogues (Jewish Year Book 1953). Active membership of various churches in 1950 follows:

Episcopalians	Total 3,744,093
Church of England	2,989,704
Church in Wales	196,389
Church in Ireland	500,000
Episcopal Church in Scotland	58,000

Methodists	775,294
Congregationalists	410,174
Baptists	343,798
Welsh Presbyterians	171,185
English Presbyterians	67,236
Church of Scotland	1,256,167
Northern Ireland Presbyterians	119,582
Roman Catholics	Total 3,955,549

England and Wales	2,754,249
Scotland	721,300
Northern Ireland	480,000

Primary and secondary education is free and compulsory from five to 15 years of age.

The most celebrated of British universities are Oxford and Cambridge, each with colleges founded in the 13th century. Other major institutions are in London, Durham, Manchester, Birmingham, Liverpool, Leeds, Sheffield, Bristol, Nottingham and Reading; in Scotland: St. Andrews, Edinburgh, Glasgow and Aberdeen; and one in Wales.

Defense. This is supervised by the Defense Committee, presided over by the Prime Minister and consisting of a number of Ministers of the Government, including the Minister of Defense, who coordinates the policies of the three services; the First Lord of the Admiralty and the Secretaries of State for War and Air. Each of the three service ministers is responsible to Parliament.

The National Service Act provides for two years' service in the regular forces and for eight years' service in one of the three Reserve forces. The Territorial Army corresponds to the National Guard in the United States and serves only at home in peacetime. The women's services were integrated into the three regular branches of the armed forces on a volunteer basis February 1949.

Active strength of the armed forces April 1, 1955, was: Army, 440,800; Navy, 129,500; Air, 259,500.

The fleet (1955) includes one battleship, 13 aircraft carriers, 24 cruisers, 89 destroyers, 167 frigates, 3 minelayers, 57 submarines, 220 minesweepers, and 138 others. About 139 ships are under construction.

The air force is equipped with three types of long range bombers: Vickers Valiant, Avro Vulcan, Handley Page Victor.

The government announced Feb. 17, 1955, its intention and ability to produce hydrogen weapons. It also planned introduction of surface-to-surface guided missiles and vessels to operate them.

SCOTLAND

Scotland, a kingdom now united with England in Great Britain, occupies the north half of the main

British island, also Hebrides, Orkney, Shetland and smaller islands. The Atlantic lies North and West; the North Sea East. Length, 275 mi., breadth approx. 150 mi., area, 30,405 sq. mi., population (Census, 1951), 5,095,969.

The Lowlands, a belt of land approximately 60 miles wide from the Firth of Clyde to the Firth of Forth divide the farming region of the Southern Uplands from the granite Highlands of the north. Only one-tenth of the land area, the Lowlands contain three-quarters of the population and most of the industry. The Highlands, famous for hunting and fishing, is being economically restored by hydro-electric power development.

Glasgow (pop. 1,089,555) is the largest city in Scotland and third largest in Britain.

Scotland was settled by Scots, Picts and Norse. The Romans called the land Caledonia. The term Scotland derives from Scotia, land of a tribe of Scots. Colomba introduced Christianity 563 A. D. The kingdom was established in the 11th century. William Wallace, patriot leader, died 1305. Robert Bruce, crowned 1305, defeated the English at Bannockburn, June 24, 1314. John Knox led church reform after 1560. In 1603 James VI of Scotland, son of Mary, Queen of Scots, succeeded Queen Elizabeth to the throne of England as James I, and effected the Union of the Crowns. In 1707 Scotland received representation in the British parliament. Its executive in the British cabinet is the Secretary of State for Scotland.

Union of the Church of Scotland and the United Free Church (Presbyterian) was effected 1929. Universities are at Aberdeen, Edinburgh, Glasgow, St. Andrews. Education gains some support from the Carnegie Trust, founded by Andrew Carnegie. St. Andrews is the birthplace of golf.

Land reform, with drainage, crop support, loans and wage laws, has been progressing since 1919. Mechanization has increased agricultural output 50% since 1939. Scotland produces fine woolsens, worsteds, tweeds; silk textiles at Paisley and Glasgow; fine linens, and latterly jute. It is known for its Ayrshire, Angus Aberdeen and Galloway shorthorn cattle. It raises Shetland, Highland and Cheviot sheep. Shetland ponies and Clydesdale draft horses. Fisheries have biggest hauls in herring, cod and whiting. Whisky, from barley, is highly profitable.

Large industrial expansion is in progress. Coal is the chief fuel and new fields have been opened in the Fife, Clackmann and Lothian areas. Steel castings, pipes and tubes are a major output. It contributes about 40% of all British shipbuilding, much industrial machinery, locomotive building (largest in Europe), boiler, pump and valve manufacture. Clyde shipbuilders launched 550,000 tons in 1954.

Historic sites and literary associations, where memorials of Robert Burns, Sir Walter Scott, John Knox, Mary, Queen of Scots, are preserved, draw many tourists, as do the beauties of the Trossachs, Loch Katrine, Loch Lomond and abbey ruins that are now state property.

NORTHERN IRELAND

Descriptive. Six of the nine counties of Ulster, the northeast corner of Ireland, constitute Northern Ireland, with the parliamentary boroughs of Belfast and Londonderry; they are Antrim, Armagh, Down, Londonderry, Fermanagh and Tyrone. The country has a population (1951 census) of 1,369,579 and an area of 5,238 square miles. Belfast is the capital and chief industrial center.

The finest scenery in Northern Ireland is to be found on or close to the coast line. From Belfast northward the Antrim road takes the visitor to the famous Giant's Causeway, which consists of a perfect honeycomb of stone columns, 40,000 in all,

each having the shape of a polygon or hexagon. Along the north coast, at the head of a long inlet of the sea, Lough Foyle, is the city of Londonderry. Lough Erne, studded with islands, is one of the most famous of lakes, and Lough Neagh the largest in the British Isles.

Resources and Industries. Agriculture is the main industry; 90,000 small farms produce fat cattle, sheep, eggs, poultry, potatoes and milk. Milk production reaches 83,000,000 gals., often 75,000 gals. per day going to Great Britain. Condensed and dried milk, butter and cheese are produced, as well as many canned foods. Four-fifths of Northern Ireland's whiskey is exported.

Linen manufacture and shipbuilding are the chief manufacturing industries. Belfast shipyards launch more than 100,000 tons annually and city is Ireland's largest port, with 10 mi. of wharves, Ropes and twines, rayon, clothing, aircraft, engineering products, tobacco, aerated waters, hosiery and underwear are also made.

Government. An act of the British parliament, 1920, divided Northern and Southern Ireland, each with a parliament and government. When Ireland became a dominion, 1921, and later a republic, Northern Ireland elected to remain a part of the United Kingdom. The Prime Minister is Viscount Basil Brooke (appointed 1943). The Governor is Lord Wakehurst, K.C.M.G. (app. 1952).

Parliament consists of a Senate of 26, and House of Commons of 52, both elected with power to legislate in local matters except such as are reserved to the Imperial Parliament. Northern Ireland returns 12 members to the Commons at London.

The bulk of the taxation is imposed and collected by the United Kingdom, which makes deductions and remits the remainder to the local exchequer.

Education and Religion. Northern Ireland is preponderantly Protestant. Elementary education is compulsory. Queens University of Belfast is the largest institution of higher education.

Northern Ireland closely followed Britain in systems of social insurance, industrial accident and disability benefits, family allowances and pensions. Large grants have been made for mental and physical health services, including direct aid to the Tuberculosis Authority.

CHANNEL ISLANDS

The Channel Islands, off the northwest coast of France, are the only portions of the Dukedom of Normandy belonging to England, to which they have been attached since the conquest. The islands consist of Jersey, Guernsey and these dependencies of Guernsey, Alderney, Brechou, Great Sark, Little Sark, Herm, Jethou and Lihou. The islands have an area of 75 square miles and a population of 102,770 (1951 census). They have their own laws and own customs. Jersey has a separate legal existence and a Lieutenant-Governor named by the Crown. The islands are not bound by acts of Parliament unless named in the legislation. The islands were the only British soil occupied by German troops in World War II.

ISLE OF MAN

The Isle of Man, in the Irish Sea, has an area of 221 square miles and a population of 55,213 (1951 census). The island is equidistant from England, Scotland and Ireland and rich in lead and iron. The island has its own laws and a Governor appointed by the Crown. The island is not bound by acts of Parliament unless named in the legislation. The main industry is catering to vacationists, approximately 600,000 a year.

British European Possessions

Gibraltar, a Crown Colony southeast of Spain, guards the entrance to the Mediterranean. The width of the strait dividing Europe from Africa varies from 7.75 miles at the narrowest part to 23.75 at the widest. The Rock has been in British possession since 1713. It has been elaborated, tunneled and armed until it is considered impregnable. A large and secure harbor has been constructed at its foot. As a naval base its position is of the greatest strategic importance. The Rock is 2 1/2 miles long, 3/4 of a mile wide and 1,396 ft. in height; a narrow isthmus connects it with the mainland; civil population (est. 1953), 24,736.

Malta, an island 58 miles due south of Sicily in the Mediterranean Sea and about 180 miles from Africa, was annexed to the British Empire (1814) following the Napoleonic wars and has been greatly strengthened and made into a base for repair and refitment for the British fleet. The area is 95 square miles and its width is about nine miles. The neighboring island of Gozo has an area of 26 square miles which with Comino, one square mile, brings the total for the group to approximately 122 square miles. The civil population (1953) is 316,619, mostly engaged in farming.

CANADA

Capital: Ottawa. Area, 3,845,774 square miles. Population, 1951 census: 14,009,429; estimated, 1955: 15,482,000. (Figures include Newfoundland and Labrador.) Flag (unofficial): Red field, with shield of coat of arms of Canada in fly; Union Jack in first quarter next to staff. Monetary unit: Dollar.

Descriptive. The boundaries of Canada are: On the East, Baffin Bay, the Gulf of St. Lawrence and the Atlantic; on the South, the Atlantic, Maine, New Hampshire, Vermont, New York, the St. Lawrence and the Great Lakes, Minnesota, North Dakota, Montana, Idaho, Washington and the Juan de Fuca Strait; and on the West Alaska and the Pacific Ocean. Canada includes all the Arctic islands in an area beginning half-way between Greenland and Baffin and extending westward to 141° longitude, which coincides approximately with the Alaskan border. The sea coast of Canada, one of the longest of any country in the world, comprises 17,863 miles of mainland and 41,809 miles of islands. The 3,986-mile boundary between Canada and the United States has been unfortified for more than one hundred years.

The country has an extremely varied topography—mountains in the West, then foothills and prairies, the barrens north of Lake Superior, the open lands of Ontario, the rocky Laurentian district in Quebec, with the fertile Eastern Townships to the south of it, and then plains sloping down to sea level in the East; the coastline of Newfoundland is rugged, particularly in the southwest; the mountains of New England extend north into Canada.

Newfoundland and its dependency Labrador were independently administered until Mar. 31, 1949 when it became the 10th province by referendum vote of July 22, 1949.

Population. Canada's population was estimated at 15,482,000 as of Mar. 1, 1955, compared with 14,009,429 in the 1951 census.

The population of the chief Canadian cities, '95' census) follows:

Montreal	1,021,520	London	95,343
Toronto	675,754	Halifax	85,589
Vancouver	344,833	Verdun	77,391
Winnipeg	235,710	Regina	71,319
Hamilton	208,321	Saskatoon	53,268
Ottawa	202,045	St. John's	52,873
Quebec	164,016	Victoria	51,331
Edmonton	159,631	Saint John	50,799
Calgary	129,060	Three Rivers	46,074
Windsor	120,049	Sherbrooke	50,543

According to the 1951 census the population of Greater Montreal was 1,395,400; Greater Toronto, 1,117,470; Greater Vancouver, 530,728; Greater Winnipeg, 354,069.

The total urban population of Canada was 8,628,253 compared with 6,502,779 (excluding Newfoundland), based on the 1941 census. Of the population, 1951, there were 7,083,873 males and 6,920,556 females. Population per square mile was 3.92. Of the males, 3,747,409 were single, 3,141,754 were married, 186,595 were widowed, and 13,115 were divorced. Of the females, 3,325,096 were single, 3,119,824 were married, 456,753 were widowed, and 18,883 were divorced.

The largest origins in Canada (1951) are as follows: British Isles, 6,709,685; French, 4,319,167; German 619,995; Ukrainian, 395,043; Scandinavian 283,024; Netherlands 264,267; Polish 219,845; Jewish 181,670; Native Indian and Eskimo 165,607; Italian 152,245; Russian 91,279.

Immigration to Canada in recent calendar years has been: (1950), 73,912; (1951), 194,391; (1952), 164,498; (1953), 168,868; (1954), 154,227.

Vital Statistics. In 1953 there were 416,825 live births with a rate of 28.2 per 1,000 population; 130,337 marriages (8.9 per 1,000); 127,381 deaths (8.6 per 1,000).

Ontario led in births with 129,771 (26.5 per 1,000); marriages (9.4 per 1,000); and deaths, 45,242 (9.2 per 1,000).

In 1954 Canada had 5,800 divorces (38.2 per 100,000).

Resources and Industries. Canada is largely agricultural, although manufacturing industries now dominate the economic life of the nation. Increases in value of trade have made Canada the third leading trading nation of the world. The principal crops are wheat, oats, barley, rye, flaxseed, potatoes, roots, tobacco, and corn. Dairy and fruit products are enormous. The wool yield is large.

Fisheries are subject to new methods of processing and are protected by conservation and government research. The annual catch of 2 billion lbs. has a raw value of \$80,000,000 and a marketed value of \$150,000,000. The northwest Atlantic

region provides two thirds of the take. Lobster, cod, haddock, herring, smelts and sardines are the chief salt-water fish; whitefish, pickerel, trout, pike, saugers, tullibee and, above all, salmon, come from fresh-water. About 450 whales are caught annually. Meat and vitamin oils are important adjuncts. Frozen fillets account for increased values.

Furs are a prolific source of income and the fox, mink, muskrat, beaver, raccoon, marten, fisher and nutria are raised commercially on large farms.

The country is rich in minerals, particularly petroleum, gold, and uranium; also copper, lead, nickel, platinum, silver, cobalt, zinc, coal, natural gas. Total value of mineral production increased from \$474,602,059 in 1939 to an estimated \$1,454,196,460 in 1954. Petroleum recently has displaced gold as the leader in mineral value, its 1954 provisional value being \$245,995,500.

Gold produced from primary sources in 1954 totaled 4,279,852 fine oz., valued at \$145,814,558, compared with 4,055,723 oz., valued at \$139,597,985 in 1953. Virtually all Canada's newly mined bullion is sold to the Federal Government through the Royal Canadian Mint in Ottawa or the Assay Office in Vancouver.

In 1954 Canada produced 560,000 tons of aluminum, 19% of the world's total. The Kitimat (B.C.) plant of Aluminum Co. of Canada, with a present capacity rate of 91,500 tons, is being expanded manifold, with a projected goal of 331,500 tons by 1959, eventually to reach 550,000 tons. Canada leads the world in production of newsprint, asbestos, nickel and platinum and has North America's largest uranium deposits at Beaver Lodge Lake, Saskatchewan.

Eighteen major groups of manufactures and their gross value in 1953 were:

Food and beverages	\$ 3,479,479,000
Tobacco and products	214,145,000
Rubber products	290,729,000
Leather products	221,745,000
Textiles	699,414,000
Clothing	699,704,000
Knitting mills	162,900,000
Wood products	1,279,573,000
Paper products	1,552,797,000
Printing, publishing, etc.	543,143,000
Iron and steel products	2,090,093,000
Transportation equipment	2,094,175,000
Non-ferrous metal products	1,242,349,000
Electrical apparatus, supplies	845,843,000
Non-metallic mineral products	407,526,000
Petroleum and coal products	812,832,000
Chemical and allied products	872,850,000
Miscellaneous	262,461,000

Total value, 1953 \$17,771,758,000

The St. Lawrence River is navigable to ocean going vessels for 600 miles, as far as Montreal, which is by virtue of its Great Lakes connections and its proximity to London and Liverpool, one of the greatest grain exporting harbors on the continent. The Port of Montreal has nine miles of deep-draft wharf, capable of accommodating 100 large ocean steamers.

The U. S. Congress voted in May, 1954, to join Canada in developing the long debated St. Lawrence Seaway project which will exploit the river's resources of power and navigation facilities. Work was begun on a \$600,000,000 hydroelectric project between a point near Massena, N. Y., and Cornwall, Ont. in 1954.

Canada's first subway, costing more than \$50,000,000, covering 4.6 miles along Yonge Street, Toronto, was opened March 30, 1954.

Telephones numbered 3,606,407 on Jan. 1, 1954, a rate of 24 to every 100 persons. Radio receivers numbered more than 2,300,000. There were 26 television stations compared with 11 in 1953.

In civil aviation, passenger traffic increased to 2,724,432 in 1953 from 2,298,174 in 1952 (18.5%). Revenue miles flown were 64,076,912. Revenue freight amounted to 177,451,345 lbs. One of the world's most important airports is Gander, Newfoundland, operated by the government for trans-Atlantic airplanes flying the North Atlantic route.

Of the 43,163 miles of single track operated by the steam railroads of Canada in 1953, 16,589 mi. were part of the Canadian Pacific Railway. The other principal railways are now, in pursuance

of the government policy of nationalization, included in the Canadian National Railway System, which has a trackage (1953) of 22,460 miles. In 1953 the railways had \$4,328,569,388 capital, gross earnings of \$1,205,935,414, and operating expenses of \$1,100,393,836. They carried 28,736,159 passengers and 156,249,259 short tons of freight.

Life insurance in force at year's end has been: (1949) \$14,408,763,850; (1954), \$23,133,695,025.

Fire insurance at risk: (1949), \$25,970,407,358; (1954), \$45,588,409,653.

Currency and Banking. The monetary unit of Canada is the dollar. After consultation with the International Monetary Fund, the government cancelled the official exchange rates (\$1.10 and \$1.10½ for United States funds), effective Oct. 1, 1950. No new rates were prescribed.

The Bank of Canada was incorporated as a central bank by Act of Parliament 1934. On Aug. 15, 1938 it became wholly government owned, capital \$5,000,000. It does not compete with chartered banks in commercial banking fields. Its statement of March 31, 1955, showed assets and liabilities of \$2,299,385,524.

Commercial bank statements as of Mar. 31, 1955, compared with 1954 showed assets of \$11,527,591,000 against \$10,610,510,839; liabilities of \$11,527,591,000 against \$10,604,035,541; deposits, \$10,779,539,000 against \$9,722,268,697. Post Office and Government Savings Bank Deposits were \$36,780,667 against \$37,792,914. Savings on deposit in Canada's chartered banks, Mar. 31, 1955, were \$5,971,553,000 (of which \$5,425,499,000 were personal savings), against \$5,311,521,078 on Mar. 31, 1954. Call and short loans in Canada amounted to \$197,133,000 on Mar. 31, 1955 against \$166,941,940 on Mar. 31, 1954.

History and Government. Canada is an independent and sovereign member of the British Commonwealth of Nations. Like the United States it is a federation with provincial governments similar to the state governments and with Ottawa corresponding to Washington, D.C., as the federal capital. The members of the Senate are nominated for life by summons of the Governor-General. The House of Commons is elected directly by the people for terms of five years, but the House may be dissolved before a term has expired.

The Senate now has 102 members. Representation by provinces is as follows: Newfoundland 6, Prince Edward Island 4, Nova Scotia 10, New Brunswick 10, Quebec 24, Ontario 24, Manitoba 6, Saskatchewan 6, Alberta 6, Columbia 6.

A general election was held Aug. 10, 1953, with 8,401,261 eligible to vote and 5,701,825 voting. The result was the 5th successive victory for the Liberal party of the Prime Minister, Louis S. St. Laurent, which won 171 seats in the House of Commons out of 265. The Progressive Conservatives won 50, a gain of 9; the Cooperative Commonwealth Federation won 23, a gain of 10; the Social Credit party won 15, a gain of 5. Six independents were elected. The Liberal party polled 49% of all votes.

Canada conducts its own foreign relations through the Dept. of External Affairs. Seven high commissioners represent it in major units of the Commonwealth. It maintains 23 embassies, 10 legations and 11 consulates, 9 of the latter in the United States. It is a member of United Nations, NATO, OEEC and Berlin military mission. In July, 1950, Canada supported U.N. action in Korea with destroyers, air transports and an army brigade and stood with the U. S. in limiting fighting and negotiating peace along the final battle line. It has supported UN Korean Reconstruction Agency.

Trade improvement is an important part of Canada's foreign relations. Canada renders technical aid under the Colombo Plan of \$25,000,000 a year in India and Pakistan.

The Communist party and the National Unity (Fascist) party were outlawed June 5, 1940, under the Defense of Canada regulations.

Family Allowances Act and Old Age Social Security.—The Family Allowance Act (1944) was introduced as a basic social security measure designed to assist in providing equal opportunity for all Canadian children. Allowances are payable for every child in Canada below the age of 16 years, who was born in Canada, or has been a resident for one year. The allowances, ranging from \$5 to \$8 monthly, are paid to mothers who must use them exclusively for the care, education and advancement of the child. On March 31, 1955, 2,208,235 families were receiving family allowances and the amount paid during the fiscal year ended March 31, 1955, was \$366,824,926.

FEDERAL CABINET

(By precedence; as of Sept. 1, 1955)

Prime Minister and President of the Privy Council—Louis Stephen St. Laurent.

Minister of Trade and Commerce and Minister of Defense Production—Clarence Decatur Howe.

Minister of Agriculture—James Garfield Gardiner.

Minister of National Health and Welfare—Paul Joseph James Martin.

Minister of National Revenue—James J. McCann.

Minister of Labour—Milton Fowler Gregg.

Secretary of State for External Affairs—Lester Bowles Pearson.

Minister of Justice and Attorney General—Stuart Sinclair Garson.

Minister of Public Works—Robert Henry Wint.

Minister of Veterans' Affairs—Hughes Lapointe.

Minister of Finance and Receiver-General—Walter Edward Harris.

Minister of Mines and Technical Surveys—George Prudham.

Postmaster General—Alcide Côté.

Minister of Fisheries—James Sinclair.

Minister of National Defense—Ralph Osborne Campney.

Solicitor General and Leader of the Government in the Senate—William Ross MacDonald.

Minister of Citizenship and Immigration—John Whitney Pickersgill.

Minister of Northern Affairs and National Resources—Jean Lesage.

Minister of Transport—George Carlyle Marler.

Secretary of State—Roch Pinard.

Governor-General—Rt. Hon. Vincent Massey, C. H. (born Feb. 20, 1887), sworn in Feb. 28, 1952.

British High Commissioner—Sir Archibald Nye.

Three important measures are: Old Age Security Act, Old Age Assistance Act, Blind Persons Act, providing basic payments or allowances of \$40 per month.

A national system of unemployment insurance was established in 1940. Both employers and employees contribute to the fund. The federal government contributes an amount equal to one-fifth of the combined employer-employee contributions, and also assumes the cost of administration. Employers' and employees' contributions to Dec. 31, 1954 amounted to \$1,361,528,422, to which the government added \$272,311,592. From 1942 to Dec. 31, 1954 benefit payments amounted to \$903,118,571.

Individual income tax rate graduates upward from 15% to a surtax maximum of 80%. Exemptions: Single, \$1,000; married, \$2,000, plus \$400 for each child not eligible for family allowance, or \$150 for each child eligible for family allowance.

Education and Religion. Canada is officially bilingual, employing English and French. Enrollment in all educational institutions in Canada (which include four types—provincially controlled schools, private schools, universities and colleges, and Dominion Indian schools) was 3,047,605 in the 1951-52 school year. The census (1951) gave the religious population as follows:

Roman Catholic	6,069,496
United Church of Canada	2,867,271
Church of England (in Canada)	2,060,720
Presbyterian	781,747
Baptist	519,585
Lutheran	444,923
Jewish	204,836
Ukrainian (Greek) Catholic	190,831
Greek Orthodox	172,271
Mennonite	125,938
Others, and not stated	571,811

Total 14,009,429

DEPARTMENT OF NATIONAL DEFENSE

The Department of National Defense is administered under a single Minister and the work of the Navy, Army and Air Force is coordinated.

Navy.—The Royal Canadian Navy was established 1910 and comprises the Navy and RCN (Reserve). Strength of the permanent naval force was 17,494 officers and men on Mar. 31, 1954.

As of Apr. 30, 1955, there were 53 ships in commission, including one light fleet carrier, two cruisers, 10 destroyer escorts, 10 modernized frigates, seven coastal escorts, nine coastal minesweepers, a repair ship and 12 small craft. In addition, there were 114 auxiliary vessels manned by civilian personnel, and 62 ships in reserve.

Since 1949, 77 ships have been laid down, of which 49 have been launched and 28 completed.

Recruits, on enlistment, sign a five-year agreement with succeeding periods of the same length where a man wishes to continue to the point where he is pensionable (25 years' service).

Army—The Canadian Army includes all the ground forces of Canada, comprising 7 parts.

(a) The Canadian Army (Regular) consists of officers and men enrolled for continuing full time service.

(b) The Canadian Army (Militia) perform, when not on active service, duty and training as may be required.

(c) The Regular Reserve consists of men who have served in the active force and who may be called for active service and annual training.

(d) The Supplementary Reserve consists of former officers and men of any of Her Majesty's Forces, specialists, technicians and other civilians not required to perform active duty or training.

(e) The Canadian Officers Training Corps consists of officers under training and those required for the command, administration and instruction of officers under training.

(f) The Cadet Services consists of commissioned officers liable for annual training and whose duty is the administration and training of the Royal Canadian Army Cadets.

(g) The Reserve Militia consists of officers and

men who volunteer for service in an emergency but are not required to undergo annual training. The strength of the Canadian Army in World War II at wartime peak on Mar. 22, 1944, was 495,804. On April 30, 1955, the strength of the Regular Army was 49,187.

Royal Canadian Air Force—The Royal Canadian Air Force was officially brought into being Apr. 1, 1924. During World War II it operated 48 squadrons overseas and many more at home. Peak personnel strength rose to 215,000. The RCAF operated the British Commonwealth Air Training Plan which turned out more than 131,000 crew men for the Commonwealth nations, more than half of them Canadian. RCAF fatal casualties during World War II numbered 17,047.

Personnel strength of the RCAF as of Apr. 30, 1955, was 49,520, and entering the final stages of its planned buildup to 41 squadrons. This includes a 12-squadron Air Division which forms part of the NATO forces in Europe. The RCAF is also training airmen of other NATO nations.

Royal Canadian Mounted Police

The Royal Canadian Mounted Police (org. 1873) was formed to patrol the vast North West. Its work has been extended to all of Canada. In 1950 it took over the Newfoundland Constabulary. Its hq. are at Ottawa, Ont. It has a uniformed personnel of 4,700, a Marine Division and an Air Division.

India

The Indo-Pakistan sub-continent was partitioned into two nations in 1947.

The Dominion of India, raised to dominion status along with Pakistan, Aug. 15, 1947, became a sovereign democratic republic under a constitution adopted Nov. 26, 1949, effective Jan. 26, 1950. It elected to remain a member of the Commonwealth of Nations, the word "British" being omitted. Consult the Republic of India, page 355.

Pakistan

Capital: Karachi. Area: 364,737 square miles. Population (1951 Census): 75,842,165. Flag: dark green rectangle with white vertical bar at mast; white crescent and white heraldic five-pointed star in center. Monetary unit: Pakistani rupee (U.S. 20.8c).

Describe. The Dominion of Pakistan, one of the largest countries in the world, comprises two zones in the northeast and northwest corners of the Indo-Pakistan sub-continent, separated by a thousand miles of Republic of India territory. Pakistan was formed by the partition of the sub-continent of India, Aug. 15, 1947, on the basis of Islamic faith of the majority of the population. West Pakistan, area 310,236 sq. mi., includes the former provinces of Punjab, Sind, Baluchistan, Northwest Frontier Province, the Northwest Frontier States, and states of Khairpur and Bahawalpur. It adjoins Iran and Afghanistan on the West and Northwest, India on the East, Arabian Sea on the South. East Pakistan, area of 54,501 sq. mi., comprises East Bengal which includes the Sylhet District of Assam and the Chittagong Hill Tracts. It is bordered by India to the West and North, Assam to the Northeast, Burma to the East, and Bay of Bengal to the South.

Discord among peoples of the provinces and states of West Pakistan led the government to vote to merge its semi-autonomous units into a single province, Dec. 17, 1954. The new province will have 50 districts grouped into 11 divisions, with its capital at Lahore and proposed a summer capital at Abbottabad.

Karachi, the capital, is a major seaport and has the largest airport in Asia. Fifteen international airlines land there, including Pan American, Air France, BOAC-British, KLM, Philippine and SAS.

The rivers in Western Pakistan flow parallel to each other and join the Indus, which empties into the Arabian Sea. They supply the oldest and second largest irrigation canal system in the world.

Lying between 20° and 38° N. Lat., the two zones have three well divided periods of winter, summer and rainy seasons. The climate is generally tropical. Eastern Pakistan is warm and humid, and has a heavier rainfall, averaging more than 100 inches during the monsoon season, July-September.

The two zones are linked by sea, air and radio-telephone.

There are 7,000 miles of railroad, 58,000 miles of highways, and radio and telephonic communications. In Eastern Pakistan the vast system of internal waterways provides valuable transport.

Although 80 per cent of Pakistan's population lives on farms, a dozen cities have over 100,000.

Resources and Industries. Pakistan essentially is an agricultural country and one of the largest granaries in the Far East. Rice and wheat, staple foods of the country, are the two main food crops and cover 36,000,000 acres. Pakistan has the world's largest raw jute production: over 6,000,000 bales annually. Next in importance is cotton, which comprises 3,000,000 acres and produces an annual output of 1,500,000 bales. Wool, hides and skins, tea, and oil seeds also are exported.

The most important industries of the eastern zone are cotton spinning and weaving, flour milling and other food processing. The western zone contains more than a score of iron and steel foundries and a like number of railway shops. Pakistan is embarked on a vast program of industrial expansion, with government support lent to basic industries: jute, paper, heavy engineering, shipbuilding, fertilizers, sugar, cement, textiles. Private industry is encouraged by concessions on taxation, import and export duties. Irrigation is converting many millions of unused acres. An agrarian program, launched in July, 1953, with U.S. technical aid, will reclaim 400,000 acres and increase yield on 57,000,000 acres.

A geological survey has revealed rich deposits of sulphur, chromite, petroleum, gas, and coal. New iron ore deposits discovered at Dandkhel will provide a potential of 250,000 tons annually. Also found are salt, asbestos, antimony, gypsum, limestone, magnesite, celestite, and silica sand. Reserves of the Sui gas dome 350 mi. north of Karachi are estimated at more than 2½ trillion cu. ft. A 16-in. natural gas pipeline costing \$25,000,000 was scheduled for completion in 1955, as were plans for a \$180,000,000 iron and steel works with a capacity of 100,000 tons per year, financed by IBRD and private capital.

Index of industrial production reached 185 in 1955 (1949=100).

Pakistan devaluated the rupee one-third, July 31, 1955, bringing it in line with the pound sterling.

History and Government. The area has been inhabited for thousands of years. Relics from the gravel beds of the Sohan River date from Paleolithic times. The banks of the Indus River were the site of a civilization that flourished 5,000 years ago. Darius of Persia arrived in 512 B.C., Alexander the Great in 326 B.C., and in 711 A.D. the Arabs under Mohammed bin Qasim conquered Sind and introduced the Islamic faith. The empire reached its zenith under Mogul Emperor Shah Jehan during the 17th century.

Following more than 40 years' struggle for independence, Pakistan became a self-governing member of the Commonwealth of Nations Aug. 15, 1947, with dominion status.

Pakistan is a democracy, with a governor-general, a prime minister and a cabinet. The first constituent assembly, elected in 1947, acted as an interim legislative body until its dissolution by the governor-general in 1954. He assumed overall administrative authority, Mar. 27, 1955, pending formation of a new 80-member constituent assembly

which will draft a constitution affirming the Islamic character of Pakistan and providing secular laws for a democratic parliamentary form of government. The Moslem League party, founding group, won 25 of the new assembly seats, June 21, 1955, and the first coalition government emerged. It voted in 1955 to drop dominion status but remain as a republic within the Commonwealth.

The governor-general is Ghulam Mohammed; the prime minister, Chaudry Mohammed Ali, appointed Aug. 11, 1955.

Pakistan was accepted as the 57th member of the United Nations, Sept. 30, 1947. It is a member of the Colombo Plan and has signed treaties of friendship and established diplomatic missions in 33 countries. The Communist party was banned in July, 1954.

Education and Religion. About 86% of the population are Moslems. Minorities include 10,000,000 Hindus, 500,000 Christians, and smaller groups of Parsees and Buddhists. Education is free and compulsory. Adult education is promoted. Of the many languages spoken, Urdu and Bengali are official. English also is spoken in Parliament.

Defense. Pakistan has an army, navy and air force, women's auxiliaries, and civil defense.

Under an agreement signed May 19, 1954, Pakistan receives material and technical military assistance from the United States. It also signed a regional defense agreement with Turkey in 1954.

Ceylon
DOMINION OF CEYLON

Capital: Colombo. **Area:** 25,332 square miles. **Population** (U.N. est., 1954): 8,384,000. **Flag:** dark red with yellow border and finials in corners, yellow lion symbol in center; two vertical stripes of green and saffron at pole. **Monetary unit:** Ceylon rupee (U.S. 21c).

Descriptive. Ceylon is an island in the Indian Ocean 31 miles off the southern tip of India at its closest point. Its greatest length is from North to South, 270 miles, and its greatest width, 140 miles. The coastal area of the island is flat, but the central part is mountainous with several peaks rising to more than 7,000 feet; the highest, Pidurutalagala, reaches 8,281 feet. The climate is hot but dry, and healthy except in the low-lying jungle regions. There are many mountain streams, which are navigable only by small river craft. Colombo is served by air by TWA.

Resources and Industries. Minerals and metals found on the island include graphite, limestone, iron, precious and semi-precious stones, ilmenite, monazite, zircon, quartz. Industrial production took rapid strides after the end of World War II and factories were established for the manufacture of plywood, paper, glassware, ceramics, cement and acetic acid. Projects contemplated or under way include factories for textiles, coconut oil, sugar, steel, caustic soda, fertilizers, insecticides, ilmenite, rubber goods, and flour milling.

Several hydroelectric plants are projected. The multi-purpose plant at Gal Oya has a capacity of 10,000 kws. and will irrigate 120,000 acres.

Principal agricultural products are tea, rubber, coconuts, rice, cacao, cinnamon, citronella, tobacco.

History and Government. Ceylon was known to the ancient Romans as Taprobane (copper-colored). It was first settled by colonists from the valley of the Ganges in India who immigrated about 543 B.C. and whose descendants, the Sinhalese, still form three-fourths of the population. Descendants of Tamil immigrants from Southern India account for one-tenth of the population. Parts of the maritime area were occupied in turn by the Portuguese in 1505 and by the Dutch in 1658. The British annexed the island to the presidency of Madras, India in 1796 and it became a Crown colony under the Treaty of Amiens in 1802. Principal stages of political reform were the Donoughmore Constitution, 1931, granting universal suffrage, and a new constitution on the British model promulgated in 1946. Ceylon was granted full Dominion status effective Feb. 4, 1948. The first native Governor General—Sir Oliver Goonetilleke—was sworn in July 17, 1954.

The constitution provides for a parliament composed of a Senate, with 30 members, and a House of Representatives, with 101 members. The administration of the island is in the hands of the Cabinet of Ministers, headed by the Prime Minister, who are collectively responsible to the legislature. The United National party won 66 seats in Parliament in general elections, May, 1952. Prime Minister, Sir John Kotelawala, Oct., 1953.

Education and Religion. All education is free in government schools from kindergarten to university, under a postwar plan (Oct. 1, 1945) which was also adopted by 203 assisted schools. All types of schools, including English, bi-lingual, Sinhalese and Tamil, are included in the plan. The majority of the population belongs to the Buddhist faith.

Maldiv Islands

The Maldiv Islands, a British Protected State formerly a dependency of Ceylon 400 miles to the Southwest, is a group of coral atolls with an area of 115 square miles and a population est. at more than 93,000. It became a republic in 1953 but returned to the status of a Sultanate by decision of the Assembly, Feb. 22, 1954. The Assembly elected Al Amir Mohammed Farid Didi as Sultan. The islands produce coconuts, fruit and nuts, and millet. The chief occupation is fishing and chief industry is the production of cured processed fish marketed in Ceylon. **Capital:** Male.

British Malaya
FEDERATION OF MALAYA

The Federation of Malaya which became effective Feb. 1, 1948, consists of the four former Federated Malay States of Perak, Selangor, Negri Sembilan and Pahang, the five former Unfederated States and the two British settlements of Malacca and Penang with Province Wellesley. Singapore became a separate Crown colony and Labuan was transferred to North Borneo, April 1, 1946, when the former colony of the Straits Settlements was dissolved and the Interim Malayan Union formed.

Each state in the Federation is governed by its native ruler subject to the advice of the British High Commissioner, except in religious matters. The central government comprises an executive council headed by the High Commissioner and a federal legislative council.

Following an amendment to the constitution in 1954, providing for increased popular rule, voters chose 52 of the legislature's 98 members, July 27, 1955. **Chief Minister:** Tengku Abdul Rahman, Alliance party.

Area of the Federation is approximately 50,690 square miles; **population** (estimated 1953), 5,750,000. **Kuala Lumpur** is the capital.

State	Area (sq. mi.)	Population (Est. 1952)
Perak	7,980	1,097,106
Selangor	3,160	829,287
Negri Sembilan	2,580	314,836
Pahang	13,820	277,450
Johore	7,330	860,523
Kedah	3,660	634,207
Perlis	310	81,000
Kelantan	5,750	487,635
Trengganu	5,050	246,199

The area of Penang is 400 square miles, population (1952), 503,789. Malacca's area is 640 square miles, population (1952), 278,340.

Its mixed population is approximately divided: 50% Malays, 40% Chinese, 14% Indians, Pakistani and others.

Rubber and tin are the chief products, others being coconuts, rice, tapioca, sugar, pepper, copra, camphor and nepah and oil palm. Rubber trees were introduced from Brazil.

The Malay states are the world's richest source of tin, centering in the Kinta valley in the state of Perak, supplying about one-third of the total world's supply. Refined in smelters in Penang and Singapore, Straits tin is at least 99.87% pure.

Communist-inspired harassment has hampered progress since World War II.

SINGAPORE

Singapore, an island 27 miles long and 14 miles wide, with an area of 217 square miles, off the Malay peninsula, was the capital and chief port of the former Straits Settlements. It now is a separate Crown Colony, with a colonial governor and a Legislative Assembly which has broad powers under a new constitution effective Feb. 8, 1955. It seeks complete self-government.

Singapore just misses being the southernmost point of Asia by a half-mile water channel. The Johore Causeway joins it with the mainland and affords through train service between Bangkok and Singapore. It is at the funnel point of the Strait of Malacca, which extends between the Malay Peninsula and the island of Sumatra, the great water highway between India and China.

Singapore has a polyglot population of which 80 per cent is Chinese. The population (1953) was 1,147,364.

Other Asiatic Possessions

British North Borneo, a Crown Colony formerly administered by a chartered company, has an area of 29,500 sq. mi. and a population (1951 census) of 333,752, including 241,831 natives, 949 Europeans, 74,315 Chinese. Included is the island of Labuan, area 35 sq. mi., population (1951), 8,784, which was united with North Borneo, July 15, 1946, after the Straits Settlements were dissolved. Exports are mainly rubber, copra, timber, tobacco, firewood, cutch, fish and hemp.

Brunei has been since 1888 a protected sultanate on the north side of the island of Borneo, between Sarawak and British North Borneo. Its area is about 2,226 square miles, and population (estimated 1951), 46,000. The Seria oil field, largest in the Commonwealth, turns out 5,000,000 metric tons per year.

Sarawak, a Crown Colony, is along the northwest coast of Borneo, between the mountains and the China Sea. Its coast line is 450 miles long and its area 50,000 square miles. Its population (est. 1953) is 596,790. The capital is Kuching. The chief exports are sago, pepper, gold, plantation rubber, petroleum.

Aden, a Crown Colony, occupies a peninsula on the Arabian coast at the southern end of the Red Sea with 75 square miles of area in Aden proper and 115,080 square miles including protectorate areas. The population of the Colony proper (est., 1952) was 150,000; for the entire Protectorate, 800,000. It is the principal commercial center for the Arabian peninsula, producing cigarettes and salt. It is a free port, an important coaling station, and has an excellent harbor. A \$126,000,000 refinery near the port, completed in 1954, is one of the world's largest, daily capacity of 120,000 bbls.

Socotra is an island off the African coast under British protection, attached to Aden. Area in all is 1,400 square miles, and population 12,000, mostly engaged in livestock husbandry.

Bahrain Islands constitute an independent Arab state under British protection and are described under Saudi Arabia.

Hong Kong is a Crown Colony, acquired in 1841, lying at the mouth of the Canton River 90 miles south of Canton, China. The island is 11 miles long, with an area of 32 square miles. Total area of the colony, including the New Territories and the peninsula of Kowloon, on the mainland, is 391 square miles. The population (estimated, 1953) is 2,250,000, including many refugees from Communist China, and less than 10,000 British.

Hong Kong is an important British naval station in addition to its commercial value. It is the gateway between the East and West and one of the greatest trans-shipment ports in the world. U.S. efforts to cut shipments of materials essential to war uses to Communist China via Hong Kong have been only partially successful.

Cyprus, a Crown Colony, is the third largest island in the Mediterranean Sea, 40 miles south of Turkey, 60 miles west of Syria, and 240 miles north of Egypt. Its area 3,572 sq. mi., and population (est., 1953), 509,000. It has been administered by England since 1878; first under an agreement with Turkey, then annexed in 1914.

The legislative council was suspended in 1931 because of agitation for union with Greece and legislative powers conferred on the Governor-in-Council. The U.N. decided against further action, Dec. 15, 1954, after voting to consider a Greek proposal which in effect claimed ownership. The Turkish minority resists Greek claims.

Four-fifths of the inhabitants are Greek Christians, and nearly all the remainder are Turkish Mohammedans, Turkish customs and laws prevail.

The island is mainly agricultural, with wheat, barley, vetches, fruits, olives, and cotton as chief products. Thirty per cent of the land is cultivated. Mineral production includes copper concentrates, iron pyrites and asbestos.

Nicosia is the capital. The chief ports are Limasol, Larnaca and Famagusta.

Union of South Africa

UNIE VAN SUID AFRIKA

Capitals: Pretoria and Cape Town. **Area:** 472,733 sq. mi. **Population** (U.N. est., 1954): 13,393,000. **Flag:** three horizontal stripes, orange, white and blue; in the center of the white stripe the former Orange Free State flag flanked by the Union Jack and the Transvaal Vierkleur. **Monetary unit:** South African pound (U.S. \$2.80).

Descriptive. The Union of South Africa, a Do-

minion within the British Commonwealth of Nations, occupying the southern portion of Africa, includes the former Colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State.

Province	Area Sq. Mi.	Pop. 1951	Capital
Transvaal	110,450	4,802,405	Pretoria
C. of Good Hope	277,169	4,417,330	Cape Town
Orange Fr. State	49,647	1,018,207	Bloemfontein
Natal	35,284	2,408,433	Pietermaritzburg

In 1954 the white, European origin population was 2,803,000; the non-European was over 10,000,000, including about 399,000 East Indians and over 8,981,000 of native Bantu stock.

The capital of the Union is Pretoria, although the Union's legislature meets in Cape Town. The largest cities are Johannesburg and Cape Town.

Resources and Industries. The Transvaal and Natal have land suitable for growing cotton. Corn is the largest farm crop. Wheat, tobacco, tea, sugar cane, citrus fruits, butter and cheese are major products and merino wool has a larger export value than diamonds.

South Africa is the richest gold and diamond country in the world, and one of the richest in uranium. A number of uranium plants are in operation and more than 26 gold mines are approved for uranium production. Approximately 35% of the world's supply of gold originates there. Gold production in 1954 was a record 13,250,000 fine oz. worth \$461,000,000.

Coal, copper and tin are also important. Other minerals are iron, lead, lime, manganese, platinum, salt, talc, chrome, mica, graphite, beryl.

Ten international airlines maintain regular services.

History and Government. The Union was formed by act of the British parliament, effective May 31, 1910, 8 years after the British defeated the independent republics of the Transvaal and the Orange Free State in the Boer War (1899-1902). The nations were settled by emigrants from Cape Colony, mostly of Dutch extraction, in the Great Trek of 1831 and later. After gold was discovered in 1886 the Boers faced repeated difficulties from the Uitlander (Outlanders) and the wildcat Jameson raid against the gold-bearing ridge, the Witwatersrand, at Johannesburg in 1896 increased the tension. The Boer War made a hero of Paul Kruger ("Oom Paul") pres. of the Transvaal, who died in exile, 1904. After brief existence as a Crown Colony the Transvaal was incorporated in the Union.

The Governor General is appointed. Dr. E. G. Jansen is the incumbent. The parliament has a Senate and a House of Assembly. An elective Provincial Council meets in each of the 4 provinces. The predominance of the older Dutch strain (Afrikaners) has resulted in attempts to curtail voting privileges of the larger colored population and immigration of East Indians. In the national elections of 1953 the National party won 94 seats, a majority of 29, but failed to pass proposed discriminatory legislation. The policy of separation, Apartheid, includes forcing the colored voters to take white representatives. Nonviolent resistance, practiced by the colored and the East Indians, has been made punishable by law as obstructing the government. Opposition to Apartheid is frequently expressed by intellectuals as in Alan Paton's novel, *Cry the Beloved Country*. South Africa withdrew from UNESCO membership, April 5, 1955, alleging interference in its racial problems.

Prime Minister: Johannes G. Strijdom, Nationalist, elected Nov. 30, 1954, succeeding Dr. Daniel F. Malan.

Education and Religion. There are nine universities—Cape Town, Stellenbosch, Witwatersrand, Pretoria, Natal, Bloemfontein, Grahamstown, Potchefstroom, Univ. of South Africa (Pretoria), average enrollment exceeding 20,000 students. Primary education is free to all citizens and compulsory for European children over seven years of age.

Dutch Protestant churches predominate, with Anglicans and Methodists next among Europeans. English and Afrikaans are official languages.

Defense. The defense system makes every white citizen between 17 and 60 years of age eligible for military duty in time of war. Those between 17 and 25 are obligated to undergo training in the Coast Garrison Force, the Active Citizen Force, the Royal Naval Volunteer Force, or a Rifle Association, over a period of four years. The Rifle Association provides for training in the handling of a rifle for those between 21 and 25 years.

The Naval Service comprises two destroyers, three frigates, two fleet mine sweepers, one mine

layer and a number of smaller vessels, and is undergoing expansion. The air force likewise is expanding.

SOUTH-WEST AFRICA

South-West Africa occupies the Atlantic coast from the Orange River to Angola and from the Atlantic to Bechuanaland and Northern Rhodesia. It was seized by Germany in 1884 and surrendered to the Union of South Africa in 1915. The League of Nations gave it as a mandate to the Union, which since has refused to accept a U.N. trusteeship. It has 317,725 sq. mi., and population (est., 1954), of 447,000, including fewer than 50,000 Europeans. The registered voters choose 18 members of their Legislative Assembly and 6 members to sit in the House of the U. of S-A, while 4 Senators are appointed to the Union Senate. Windhoek is the capital. Among the native races are the Hottentots, Hereros, Bushman and Bantu tribes.

The Zambesi river, 4th largest in Africa, is a boundary between the country and Rhodesia. Cattle and other livestock, butter, cheese are produced, diamonds, lead, zinc and vanadium concentrates are exported.

SUDAN

For information on the Sudan, a former Anglo-Egyptian condominium in transition to self-rule, see Sudan.

Central African Federation

The Central African Federation was established by Act of Parliament, March 24, 1953, and became effective Aug. 1, 1953. It affects Northern and Southern Rhodesia and Nyasaland. Northern Rhodesia and Southern Rhodesia have a governor, an executive council and a legislature; Nyasaland is a protectorate.

The Federation has an estimated area of 488,060 sq. mi., and a population (est., 1953) of 6,707,500, including 6,470,000 Africans, 213,500 Europeans, and 24,000 Asiatics and others. The topography is generally elevated, without outlet to the sea, but containing watersheds of large rivers and lakes.

Under the constitution, approved by the Queen Aug. 1, 1953, the Federation will have virtual self-governing status and each of the three territories will retain status on local matters. The federal parliament consists of 35 elected members, including two native representatives from each state. The Prime Minister is Sir Godfrey Huggins, founder of the federation movement.

Railway systems of the states are connected and also linked with that of the Union of South Africa in the South, the Belgian Congo and Angola line in the North, and in the East with the Beira Railway which runs 200 mi. through Mozambique. The states have common radio, airways and statistical services. The Federation produces copper, asbestos, gold, and tobacco. The monetary unit is the Southern Rhodesian pound.

A three-year program of economic development to cost \$210,000,000 was announced in 1954, encompassing hydroelectric projects, railways, aviation and social welfare. Rhodesia University College, open to all races, was authorized to be built in Salisbury, Southern Rhodesia, with a British grant of £1,250,000.

Southern Rhodesia lies in the central part of Southern Africa, extending from the Transvaal Province northward to the Zambesi River, with Portuguese East Africa on the East and Portuguese West Africa and Bechuanaland on the West. It has an area of 150,333 square miles. Population (estimated 1953) is 2,259,900 and includes 158,500 Europeans. The country is rich in gold reefs and other minerals, but has proved to be an ideal agricultural country. Salisbury is the capital.

The Victoria Falls in Southern Rhodesia on the Zambesi River are the greatest natural spectacle in Southern Africa. The chasm itself has the form of a long, narrow box, one mile long and 354 feet high by 200 to 300 feet wide—the distance between the two parallel walls. The falls are broken into four parts. In the rainy season as much as 100,000,000 gals. per minute are their estimated capacity. David Livingstone found the falls in 1855. The Cape to Cairo Ry. crosses below the falls on a bridge 650 ft. long, (500 ft. span) 450 ft. high.

Southern Rhodesia was under the administration of the British South Africa Company from 1889 to 1923 when the country was annexed. A new form of government was established, Oct. 1, 1923, with a governor, assisted by a legislature which has full control over internal affairs. The legislative Assembly consists of 30 members.

Corn, cotton, tobacco are grown. The output of gold, coal, chrome and asbestos is considerable. Cattle lead livestock, and dairying is important. Citrus fruit cultivation is increasing.

Northern Rhodesia was under the administration of the South Africa Company, 1889-1924, when the office of governor was established with an executive council and subsequently a legislative council.

Its area is 290,323 square miles extending north from the Zambesi River to the Belgian Congo and Tanganyika Territory. The country is mostly high plateau covered with thin forest and suitable for farming and grazing. The population is estimated (1953) at 2,015,000, including 50,000 Europeans. The country is rich in minerals, including copper, zinc, cobalt, gold, vanadium, manganese.

Nyasaland Protectorate, until 1907 British Central Africa, is situated on the southern and western shores of Lake Nyasa and extends nearly as far as the Zambesi River. Its area is 47,404 square miles including 10,575 of water, with a population (estimated 1953) of 2,511,575. Tea, wheat, cotton, rubber and tobacco are cultivated.

British South Africa

Outside the Union of South Africa, under a High Commissioner appointed by the Queen and responsible to the Secy. of State for Commonwealth Relations. Under him three Resident Commissioners administer the following territories:

Basutoland, colony, with 11,716 square miles, and a population (est. 1951), 555,390, lies in South Africa northeast from the Cape Province on an elevated plateau. Stock raising is most important. Products are wool, wheat, cereals.

It is a reservation set apart for the natives of the country. White people may not own land.

Bechuanaland Protectorate, area 294,020 square miles, population of 294,000 including 2,320 Europeans and 1,804 Asiatics and colored persons; is in the middle of Southern Africa, between South-west Africa and the Union of South Africa and Rhodesia. Cattle raising and dairying are the chief industries.

Swaziland Protectorate, with 6,704 square miles, and a population (est. 1951) of 184,000, lies at the Southeast side of the Transvaal in South Africa, and produces chiefly tobacco, corn, asbestos, tin, butter and livestock. Some gold is exported.

British West Africa

GOLD COAST STATE

In elections held in June, 1954, a new virtually self-governing state was formed composed of the former Gold Coast colony, Ashanti, the Northern Territories, and Togoland. Its total area is 91,843 square miles, population (est. 1954), 4,125,000. It adopted a constitution and named an all-native legislative assembly. Pending reaching dominion status, tentatively scheduled for 1956, it has complete home rule. Accra is the capital. Prime Minister is Kwame Nkrumah, whose Convention People's party won 71 of the assembly's 104 seats in 1954.

The Gold Coast, a former Colony and Protectorate, lies along the Gulf of Guinea for 334 miles. Its area is 78,802 square miles (including Ashanti and the Northern Territories). The population (est. 1952) is 3,089,000.

Manganese output averages 70,000 tons per month, second only to the USSR. Aluminum ore reserves are great.

Ashanti and the Northern Territories lie to the north of the Gold Coast proper. These territories have enormous wealth in their forests, and the cultivation of cacao and rubber is being fostered. The chief exports are cacao, gold and diamonds. The area of Ashanti is 24,379 square miles and population (census 1948), 823,672. The area of Northern Territories is 30,486 square miles. Population (census 1948), 1,077,138.

Togoland, east of the Gold Coast Protectorate, is a former German Colony, divided by mandate of the League of Nations between Great Britain and France, and now held under trusteeship by the United Nations. British portion has 13,041 square miles and 410,000 population (est., 1952).

Nigeria, largest British colonial territory, lies in Western Africa, between Cameroon and Dahomey (French) on the Gulf of Guinea. The hinterland stretches back 600 miles to French West Africa. The tin and lead industries are old and valuable. Railroad development has been rapid be-

cause of the mines. The chief exports are, besides tin, palm oil, palm kernels, cotton lint, cocoa, hides and skins, rubber and peanuts.

Nigeria is a Colony and Protectorate with a Governor, Central Legislature, and Legislature Council. It has an area of approx. 373,250 square miles and a population (1953) of 31,200,000. It received a new constitution giving a larger role in government to the natives, July 1, 1951.

British Cameroons, 34,081 square miles, population (est. 1953), 1,441,000, lies between British Nigeria and the French Cameroons in Western Africa. Once part of the former German colony Kamerun, the eastern and larger part of which went to France after World War I, the Cameroons now is a Trust Territory, administered with Nigeria. It is a region of fertile soils. Chief exports are cocoa, bananas, rubber and palm kernels.

Gambia is a British Colony and Protectorate in western Africa consisting of the island of St. Mary at the mouth of the Gambia River which flows through the French colony, Senegal and a 10-mile wide strip of territory on each side of the river. Colony and protectorate have a total area of 4,005 sq. mi. and a population (census 1952), 250,160. Bathurst, on St. Mary's Island, is the capital.

Sierra Leone, Colony and Protectorate, lies on the west coast of Africa for 210 miles, between French Guinea and Liberia. In its capital, Freetown, it has one of the finest seaports in West Africa, with an excellent harbor and a naval coaling station. The colony has been in British possession since 1788. The hinterland forms the British protectorate of Sierra Leone, which extends inland about 180 miles. The area of the colony and protectorate is 27,925 square miles; the population is est. at 2,000,000.

The principal products are iron ore, hides, rice, piaslava and kola-nuts, palm kernels, chrome ore, gold and diamonds.

British East Africa

Kenya, Crown Colony and Protectorate, extends from the Indian Ocean Northeast to Somaliland, North to Ethiopia, West to Uganda, and South to Tanganyika. Its area is 224,960 square miles, and population (est. 1954), 5,947,000, largely native. The capital is Nairobi.

The northern three-fifths is arid. Most economic production is centered in the South, a low coastal area and a plateau varying from 3,000 to 10,000 feet. Five million acres in the Highlands are reserved to Europeans. The main products are coffee, tea, cereals, sisal dairy products, timber, and minerals. Since 1953 Kenya has been the scene of terroristic activities of the Mau Mau, an oath-bound unit of the Kikuyu, Meru, and Embu tribes, which killed natives who opposed its attempts to oust white rule. In 1954-55 United Kingdom troops tracked down the Mau Mau and those of the Kikuyu who supplied them. Death was prescribed for those associating with terrorists, possessing unlawful weapons or attending oath-taking ceremonies. More than 60,000 terrorists and sympathizers were jailed or detained.

The **Uganda Protectorate** lies to the West of Kenya with the Sudan on the North, Belgian Congo on the West, and Tanganyika on the South. Its territory includes part of the Victoria Nyanza, Lake Kioga and Lake George and part of Lake Albert, also the Nile from Victoria Nyanza to the Sudan.

Uganda has 93,981 square miles, including 13,680 square miles of water. The population (1951) is 5,187,000, largely native. Victoria is the second largest fresh-water lake, exceeded only by Lake Superior. Cotton, coffee, oil seeds, tin ore, hides, ivory, sugar and tobacco are produced.

Tanganyika, a Trust Territory administered by a Governor, with Executive and Legislative Councils, formerly was German East Africa, and was taken by the British in 1918, the Urundi and Ruanda districts going to Belgium and the Kioga Triangle to Mozambique (Portuguese East Africa). It reaches from the coast to Lake Tanganyika and Lake Nyasa to Victoria Nyanza. A constitutional advancement in 1955 gives parity representation in the Legislative Council to British, Africans and Asians.

The area is 362,688 square miles, and population (est. 1954), 8,196,000.

The principal products are sisal, cotton, coffee, hides and skin, beeswax and ivory. Diamonds, lead, gold and Red Ruby mica are found.

British Somaliland, a Protectorate, with 68,000 square miles, and 640,000 population, mostly Mohammedans, is in Northeast Africa on the Gulf of Aden, with Ethiopia to the South and West and Somaliland on the East. The chief town is Berbera and the products skins, resin, gum, goats and sheep.

Islands East of Africa

Zanzibar, a Protectorate, is an island of 640 square miles, 23 miles off the eastern coast of Africa. The British protectorate was established in 1890 by agreement with Germany and France. Heligoland was ceded to Germany and Britain waived claims to Madagascar in favor of France.

It is governed by a Sultan, Seyyid Khalifa Ibn Harub, but is administered by a British resident. The island of **Pemba**, 25 miles to the northeast, area 380 square miles, is included in the government. The population of the Protectorate, including Pemba, (est. 1953) is 274,000. The people are mostly Mohammedans.

The chief industry is the production of cloves, the islands of Zanzibar and Pemba yielding the bulk of the world's supply from 4,750,000 trees devoted to that product. Coconuts and copra are important exports. Pottery, coir fiber, rope, soap, oil, jewelry and mats are the principal manufactures.

Indian Ocean Possessions

Mauritius, an island in the Indian Ocean, 500 miles east from Madagascar, has 720 square miles, and a population (est. 1953) of 540,617, including dependencies. Port Louis is the capital.

The one industry is sugar. Aloe fiber and rum are also exported. Rodrigues (42 sq. mi.) and Diego Garcia (Oil Islands) are chief dependencies.

Seychelles and tributary dependencies include 92 islands of 156 square miles, and a population (estimated 1953) of 37,100, lying in the Indian Ocean near Mauritius. The capital is Victoria, a port with a coaling station. Coconuts are the chief product, followed by cinnamon, patchouli, mangrove bark, vanilla and tortoise shell.

Atlantic Ocean Possessions

St. Helena, an island 1,200 miles off the West coast of Africa, has 47 square miles and population (est. 1953) of 4,900. Flax, lace making and the export of lily bulbs to England are the chief industries. After Napoleon Bonaparte was defeated at Waterloo the British exiled him to St. Helena, where he lived from Oct. 16, 1815, to his death, May 5, 1821. He was buried there until 1840, when his remains were transferred to Paris.

Ascension, an island of volcanic origin, 34 square miles in area, 700 miles northwest of St. Helena, is noted for its sea turtles. Population (1953), 168.

Tristan da Cunha, the principal of a group of islands of volcanic origin, 12 square miles in area, half way between the Cape and South America, forms one of the loneliest places on the globe. About 280 persons, descendants of shipwrecked sailors, and soldiers from St. Helena, get a rude livelihood there. The island is an important meteorological and radio station.

Australia

COMMONWEALTH OF AUSTRALIA

Capital: Canberra. **Area:** 2,974,581 square miles. **Population** (govt. estimate 1954), 9,090,738. **Flag:** Red or blue ground, with Union Jack in top corner of hoist above large seven-pointed star; Southern Cross constellation on fly. **Monetary unit:** Australian pound (U.S. \$2.24).

Descriptive. The continent of Australia is situated between 10° 41' and 39° 8' (or including Tasmania 43° 39') south latitude and 113° 9' to 153° 39' east longitude in the Pacific Ocean, with the Indian Ocean on the West, and the South Pacific Ocean on the East and South.

Geologically one of the oldest continents, Australia is the most level and regular in outline, with a great plateau extending over half the continent, a central basin and coastal plains. The Great Dividing Range runs down the east coast from Northern Queensland to Tasmania. Peaks vary from 4,000 ft. to Mt. Kosciusko (7,305 ft.) in New South Wales. The northern third lies within the tropics, the other two-thirds within the temperate zone, but because of its position and island form, Australia has a more temperate climate than other regions in the same latitudes.

The states and territories of the Commonwealth with their areas and populations (Dec. 1954):

	Area sq. mi.	Population
New South Wales	309,433	3,462,502
Victoria	87,844	2,480,873
Queensland	670,500	1,322,886
South Australia	380,070	808,308
Western Australia	975,920	649,360
Tasmania	26,215	319,542
Northern Territory	523,620	16,123
Australian Capital Territory	939	31,144
	2,974,581	9,090,738

The state capitals are: New South Wales, Sydney; Victoria, Melbourne; Queensland, Brisbane; South Australia, Adelaide; Western Australia, Perth; Tasmania, Hobart; Northern Terr., Darwin; Australian Capital Terr., Canberra.

Home of the kangaroo, Australia also is the habitat of other strange flora and fauna: the koala, or living Teddy Bear, which obtains its only moisture from eucalyptus leaves; the platypus, one of the only two creatures which lays eggs and nourish their young with milk; the wombat; Tasmanian devil; dingo; a mole that is blind, deaf and dumb; barking and frilled lizards; fish that breathe, and others.

In the North are to be seen the best specimens of the aboriginal tribes. They are the most primitive of all peoples, entirely nomadic, making fire with sticks, throwing boomerangs, and killing game with spears.

Resources and Industries. Almost from earliest days of settlement a primary producing country, Australia has become also one of the world's most highly industrialized nations.

Wool is Australia's greatest primary industry. With an annual clip of more than 1 billion lbs. Australia produces 27% of the world's wool, 57% of its merino wool. The continent also is one of the world's largest wheat producers (167,000,000 bu. in 1954); about one-third is exported. Other important primary industries are sugar, wine, fruit, vegetables, grains, minerals, including uranium, gold, coal, copper, iron, silver, tin, and zinc.

Principal manufactures include iron and steel, textiles, electrical and radio equipment, drugs, chemicals, paints, machinery, metal work, clothing, motor cars and engines, aircraft and ships.

Australia's main exports are food and wool. Main imports: Metals, textiles, machinery, paper and drugs (United Kingdom); metals, machinery, paper and timber (Canada); machinery, tobacco, oil, drugs, optical and surgical instruments, paper (United States); oil, tea, rubber, silk, cotton, linen, sacks and hessian (Asia).

Pan American Airways is one of the 8 international airlines serving Australia.

Foreign trade:

	Imports	Exports
1952	1,050,200,000	668,000,000
1953	510,500,000	850,700,000
1954	755,000,000	752,392,000

History and Government. Australia has been settled since 1788. The Commonwealth, proclaimed Jan. 1, 1901, is a self-governing member of the Commonwealth of Nations and is governed on the federal plan with a Parliament consisting of a Senate and a House of Representatives.

In the general elections, May 29, 1954, the Liberal-Country party coalition retained power, holding 64 of the 123 Representatives seats, and 32 of the 60 Senate posts. Government policy is designed to encourage private enterprise and strengthen Australia's relations with the British Commonwealth and the United States and arms to build up with the latter the same relationship as exists within the Commonwealth of Nations. Australia has been active in the Colombo Asia Treaty Organization formed in 1954.

The Governor-General is Sir William Slim, appointed Sept. 2, 1952. The British High Commissioner is Sir Stephen Holmes. The Prime Minister is Robert G. Menzies.

Pension acts provide for payments of old age and invalid pensions; also cover the blind, the unemployed, victims of tuberculosis and in some cases to dependents of former soldiers.

A maternity act provides for the payment of a bonus for every child born in Australia. Social security for children include child endowment payments for children under 16.

Education and Religion. Education is free and compulsory. There are 9 universities and one university college. The Church of England claims 44.4% of the population, the remainder being distributed as follows—Roman Catholic 22.3%;

Presbyterian, 12.3%; and Methodist, 11.8%; other, 9.2%.

Defense. A supplementary defense program was begun in 1950, involving all three services, envisaging overall strength of over 190,000 men. Under the National Service Act, 1951, compulsory military training for 18-year-old men was inaugurated. The armed forces, including permanent and citizen forces in 1954-55, comprised: Army, 110,983; navy 21,833; air, 28,654.

The fleet consists of 2 light carriers, 2 cruisers, 9 destroyers, 15 frigates, 28 minesweepers and other craft. Additional ships in all categories are under construction.

AUSTRALIAN TERRITORIES

The jointly administered Territory of Papua and New Guinea, originally two separate territories, is governed by a 1949 Act placing New Guinea under the U.N. Trusteeship system, but retaining the status of Papua as a Crown territory. It has a Legislative Council of 29 members and an Executive Council of about 9 appointed by the Governor-General. Principal products are copra, cacao, and rubber.

Papua is the southeastern part of the Island of New Guinea, north from Australia. Area, 90,540 sq. mi.; population (est. 1953), 397,400, including 4,691 non-indigenous.

Territory of New Guinea, once German New Guinea, later a League of Nations mandate to Australia, occupies the northeast quarter of the island and includes important nearby island groups: New Britain, New Ireland and the Admiralty Islands of the Bismark Archipelago; Bougainville, 3,880 square miles; Buka, 220 square miles, and smaller islands of the Solomons. Total area of the territory is about 93,000 square miles, with a native population (est. 1953) of 1,143,564 and non-indigenous population of 11,064.

Norfolk Island was taken over by the Government of the Commonwealth of Australia, 1914. It has an area of 13.5 square miles and a population (1953), 1,160. The soil is very fertile and is suitable for the cultivation of citrus fruits, bananas and coffee.

Nauru Island, 166° 55' E. Long., 32 mi. south of the Equator, formerly German, mandated by the League of Nations to the British Empire, was placed under U.N. jurisdiction as a trust territory Oct. 22, 1947, administered by Australia, New Zealand and Great Britain. Its area is about eight square miles; its population (1953) is 3,404. It has valuable phosphate deposits.

Territory of Ashmore and Cartier Islands in the Indian Ocean came under the authority of the Commonwealth of Australia May, 1934.

Cocos Islands, 27 small coral islands in the Indian Ocean 1,300 miles northwest of Australia, formerly administered from Singapore, are important for aviation use.

Australian Antarctic Territory came under the authority of the Commonwealth of Australia in 1933. It claims 2,472,000 sq. mi. of territory south of 60th parallel S. Lat. and 160th-45th meridians E. Long. except the French-claimed Adelle Land. It has research stations on Heard and Macquarie islands, and at Mawson base, estab. 1954.

New Zealand

Capital: Wellington. Area: 103,736 square miles. Population (govt. estimate 1954): 2,118,485. Flag: blue ground with Union Jack, four five-pointed red stars with white borders on the fly. Monetary unit: New Zealand pound (U. S. \$2.80).

Descriptive. The main islands of New Zealand, a self-governing member of the British Commonwealth of Nations, lie between the parallels of 34° and 48° and the meridians of 166° and 179° east longitude, in the South Pacific Ocean, about 1,200 miles to the eastward of Australia. Including the remote islands in the North and the Ross Dependency in the far South, the reach of New Zealand is from the tropics to Antarctica.

New Zealand comprises North Island, 44,281 square miles; South Island, 58,093 square miles; Stewart Island, 670 square miles; Chatham Islands, 372 square miles. Both the North and South Islands slightly exceed 500 miles in length. Cook Strait, separating the two islands, is only 16 miles in width at its narrowest part.

Additional islands within the geographical boundaries of New Zealand are Campbell Island, Solander Island, the Three Kings, Auckland, Antipodes, Bounty, and Snares Islands, a total area of 307 square miles. Islands annexed to New Zealand are the Cook Islands, Kermadec Islands,

Niue Island, and certain other small islands in the Pacific totaling 212 square miles.

New Zealand has a remarkable diversity of landscape—plains, downs and broad valleys, extensive tracts of hills and mountains, numerous rivers and many lakes. The Sutherland Waterfalls, with a total drop of 1,904 ft., is one of the tallest and most beautiful in the world. The climate ranges from the sub-tropical in the north to the mildly temperate in the south. The country has one of the lowest death rates, and the lowest infant mortality rate, in the world.

On the South Island the Southern Alps (highest point, Mt. Cook, 12,349 ft.) stretches from end to end of the island. On the eastern side rich river-formed plains stretch toward the sea, while on the western side towering mountain slopes crowd in upon the coastline.

Resources and Industries. New Zealand is primarily a farming country. For decades the sheep held supremacy in value of exports (wool, meat, tallow, pelts, etc.) by a large margin, but during recent years, butter and cheese and condensed milk have increased greatly in value. Two-thirds of the surface of the country is suitable for farming. Wheat, oats, barley are principal crops.

Mineral production includes coal, petroleum, gold and silver.

Auckland and Wellington are chief ports.

History and Government. New Zealand was discovered in 1642 by Abel Janszoon Tasman, a Dutch navigator, and its coasts were explored by Capt. James Cook, 1769-1770. British sovereignty was proclaimed in 1840, with organized settlement commencing in the same year. Representative institutions were granted in 1853 and the Colony became a Dominion in 1907.

The Maoris, the native race, are Polynesians of high intelligence, their forebears having migrated from the Eastern Pacific several centuries ago. Their number (estimated 1954) is 130,806.

The government of New Zealand consists of a Governor-General, representing the ruler of Great Britain and the British Dominions, and a General Assembly whose members are elected by universal franchise for a three-year term. The Governor-General is Lieut. Gen. Sir Willoughby Norrie.

In national elections Nov. 13, 1954, the 80 seats in the House of Representatives were distributed: National party, 45; Labor, 35. The Prime Minister is Sidney G. Holland.

Education and Religion. Education is free, and compulsory between the age of seven and 15. The University of New Zealand consists of university colleges in Dunedin, Christchurch, Wellington and Auckland, and agricultural colleges at Palmerston North and Lincoln. Church of England is the dominant faith.

Defense. There are regular forces representing the Reserve, Territorial Army and Air Force. A system of compulsory military training was introduced in 1950 for those attaining 18 years of age. War pensions and veterans' allowances are provided from tax revenue.

Western Samoa was German Samoa, which included Savaii and Upolu, the two largest of the Samoan Islands in the western Pacific, and was occupied by the New Zealand forces Aug. 29, 1914. This territory was assigned as a mandate from the League of Nations to New Zealand in 1920, but now is administered by New Zealand under United Nations Trusteeship.

Their areas aggregate 1,133 sq. mi., population (Sept. 1954): 93,247. Chief exports are copra, bananas and cocoa.

The Union or Tokelau Islands, formerly part of the Gilbert and Ellice Islands Colony, were transferred to the jurisdiction of New Zealand in 1926 and became a part of New Zealand Jan. 1, 1949. The area of the three clusters of islets is four square miles, and population (1954) 1,795.

Ross Dependency, comprises Antarctic territory between the 160th meridian E. Long. and 150th W. Long. south of the 60th parallel of S. Lat., including Edward VII Land and portions of Victoria Land. Whaling is carried on extensively.

British Oceania

Fiji Islands, a Colony, number about 320 (106 inhabited), with an area of 7,036 square miles, and a population (est. 1953) of 320,800, including more than 7,000 Europeans. They are situated in the South Pacific Ocean, east of Northern Australia. The larger islands are mountainous, reaching altitudes of 4,000 ft. The highest peak, Mt. Victoria, is 4,341 ft. The southern islands contain

dense forests with many valuable woods. The islands are very fertile and well watered. The climate is for the tropics comparatively cool; the temperature seldom rising about 90°.

The capital is Suva, on Viti Levu, largest of the islands (area 4,010 sq. mi.). Coconuts, sugar, gold and tobacco are the principal products.

Tonga Islands, or Friendly Islands, independent Polynesian kingdom, form a Protected State, with an area of 269 square miles, and a population (1953) of 52,577. The native Queen is Salote Tupou.

Principal island groups administered by the High Commissioner for the Western Pacific Islands, now seated at Honiara in the British Solomon Islands:

SOLOMON ISLANDS

The British Solomon Islands, a Protectorate, number 10 large islands and four groups of small islands with a total area of 12,400 square miles and a population (est. 1953) of 100,000. The chief islands in the group are Guadalcanal, Malaita, San Cristobal, New Georgia, Ysabel, Choiseul, Shortland, Mono or Treasury, Vella Lavella, Gannonga, Gizo, Rendova, Russell, Florida and Rennell. Among the groups of islands are the Lord Howe, Santa Cruz, Tucopia and Mitre and the Duff or Wilson and Reef.

Exports: copra, ivory, nuts, and trochus shell.

Gilbert and Ellice Islands Colony. The group of Islands in the Crown Colony was proclaimed a Protectorate in 1892 and, at the request of the native Governments, was annexed Nov. 10, 1915 as the Gilbert and Ellice Islands Colony. The Colony includes the Ellice Islands, Fanning, Washington and Ocean Islands, Christmas Islands, largest atoll in the Pacific, the Phoenix Group and the Gilbert Islands. The total area is 375 square miles and the population (1951) 39,000. Exports: chiefly copra and phosphates.

NEW HEBRIDES

New Hebrides, a Condominium jointly administered by Great Britain and France, is a group of 11 main islands lying 250 miles northeast of New Caledonia and 500 miles west of Fiji, with an aggregate area of approximately 5,700 square miles. Population: 52,000 (1951 est.). Chief products are copra, cotton, cacao and coffee.

Banks (309 square miles) and **Torres** (40 square miles) Islands are attached to the New Hebrides.

PITCAIRN ISLAND

Pitcairn Island is situated in the Pacific, equidistant from America and Australia. The island was discovered in 1767 by Carteret but was not inhabited until 23 years later when the mutineers of the Bounty landed there. Their existence became known in 1808. The area is two square miles and population (1952) 140. It is a British Colony by settlement and was brought within the jurisdiction of the High Commissioner of the Western Pacific in 1898. The islands of **Henderson**, **Ducie** and **Oeno**, annexed in 1902, are in the Pitcairn group.

British West Indies and Other American Possessions

BERMUDA

Bermuda, oldest self-governing British colony, with a royal governor and a representative legislature, is a group of 360 small islands of coral formation, 20 inhabited, comprising 21 sq. mi. in the Atlantic Ocean, 677 mi. Southeast of New York, 580 mi. East of North Carolina. Population (est. 1953) 39,983. It was named for Juan de Bermudez, Spanish explorer, and settled by Virginia-bound colonists under Sir Geo. Somers who were wrecked here, 1609.

Its parliament dates from 1620. The assembly has 36 elective members; the crown appoints an executive council of 7 and a legislative council of 9. Women have had the right to vote and hold office since 1944. The governor is Lieut. Gen. Sir Alexander Hood.

The United States Government maintains air and naval bases on Bermuda islands, under long-term lease.

Bermuda levies no taxes on real estate, incomes or inheritance, but raises revenue by excise, postal, transportation, stamp taxes and duties.

The capital is Hamilton. Hotels, beaches, golf, British goods, yachting, and fishing make Bermuda a popular winter resort for Americans. A bus service has been substituted for the railway. Motor cars have been permitted since 1946, speed limited to 15 mi. an hour in urban and 20 mi. in country areas.

Bermuda exports lily bulbs, potatoes, bananas, onions and green vegetables. Airlines: Avianca, BOAC, Colonial, Cubana, Pan American, Trans-Canada.

A British Caribbean Federation, eventually to become a self-governing unit in the Commonwealth, agreed upon Apr. 30, 1953, will comprise Barbados, British Guiana, British Honduras, Jamaica, Leeward Islands, Trinidad, Dominica, Grenada, Saint Lucia, and Saint Vincent.

JAMAICA

Jamaica is situated in the Caribbean Sea, 90 miles south of Cuba, and is the largest and most valuable of the British West Indies. It has an area of 4,411 sq. mi. and population (est. 1953), 1,503,047. Attached to Jamaica for administrative purposes are the Turks and Caicos Islands (pop. 6,600; area, 166 sq. mi.) and Cayman Islands (pop. 7,000; area, 100 sq. mi.). The capital is Kingston.

The climate, ranging from 80° to 86° on the coast to 40° in the mountains has attractions for winter tourists. It is estimated 65 to 75% of tourists are American. The island figures largely in the history of the Buccaneers of the West Indies before and during the time of Sir Henry Morgan, once its governor. Port Royal, old haunt of the pirate, at the entrance to the harbor, frequently has been the victim of earthquakes.

The principal products are sugar-cane, coffee, bananas, rum, coconuts, ginger, cocoa, pimento, citrus fruits and cigars.

Barbados is the most eastern of the West Indies, lying out in the Atlantic at 13° north latitude. Its area is 166 square miles; the population (estimated 1952), 219,015. Bridgetown is the capital.

The chief products are sugar and cotton. Molasses and rum are manufactured. Imports are heaviest from United States and exports heaviest to Canada.

Trinidad, with an area of 1,864 square miles is the most southerly of the West Indies. It lies off the north coast of South America. Attached to it for administrative purposes is the island of Tobago (116 sq. mi.). Population of the two (est. 1953) is 678,000. The capital is Port of Spain. Import trade is heaviest with Canada, export trade with Britain. Products are mostly petroleum and asphalt products, sugar, rum and cocoa. The great asphalt lake, 114 acres in extent, on the island is immensely valuable and seems inexhaustible.

The Bahamas Islands comprise nearly 700 islands and over 2,000 cays and rocks (about 20 inhabited) in the Atlantic Ocean, off the coast of America, Nassau, on the Island of New Providence, near the Florida coast, is an attractive winter resort for Americans. The land area of the group is 4,404 square miles; the population (est. 1953) is 86,659. Nassau is the capital.

Tomatoes, crawfish, salt, strawwork, hardwoods and lumber are the chief sources of revenue. Fruit growing is being developed. Trade is heaviest with the United States.

The Windward Islands lie at the eastern side of the Caribbean Sea, between Trinidad and Martinique. They are Grenada and the Grenadines, Dominica, St. Vincent and St. Lucia. Each has its own local government. The total area is 810 square miles (Grenada, 133; St. Vincent, 150; St. Lucia, 233; Dominica, 305). The population (est. 1952) is 283,000. Capital: St. George's, Grenada.

The chief products are arrowroot, cotton, copra, sugar, molasses, rum, cocoa, peanuts, cassava, limes, fruits, vegetables and spices. St. Vincent is famous for its arrowroot and Sea Island cotton.

Dominica was transferred from the Leeward to the Windward Islands, Jan. 1, 1940, and since has been governed as a separate colony.

The Leeward Islands, of the West Indies, situated southeast of Puerto Rico, are part of the Lesser Antilles. They comprise the islands of Antigua, Barbuda, Redonda, St. Christopher (St. Kitts), Nevis, Anguilla, Montserrat, Sombbrero, and the British Virgin Islands. The area is 422 square miles, population (est. 1952) is 120,145.

The principal products are sugar and molasses (Antigua and St. Kitts), cotton (Montserrat, St. Kitts, Nevis and Virgin Islands), limes and fruits, tomatoes and onions (Montserrat), coconuts (Nevis), livestock and charcoal (Virgin Islands), and salt (Anguilla and St. Kitts).

BRITISH HONDURAS

British Honduras, a Crown Colony, is situated in Central America, on the Caribbean Sea, south of Yucatan, and produces chiefly mahogany, logwood,

tropical fruits, chicle, and cedar, much of which comes to the United States.

Its area is 8,867 square miles, and population (est. 1952), 73,171. Belize is the capital.

BRITISH GUIANA

British Guiana is on the north shore of South America, with Venezuela on the West, Dutch Guiana on the East and Brazil on the South. It is a Crown Colony administered by a governor. An Executive Council assists the Governor. The area is 83,000 square miles; the population (estimated 1952), 452,600. Georgetown is the capital.

There are many beautiful waterfalls in British Guiana, including King George VI, with a drop of 1,600 ft.

Much of British Guiana is jungle land, but there are extensive deposits of gold, diamonds, manganese, mica and bauxite. Sugar is an important export, as are timber products, rice, rum, molasses, balata, charcoal and copra.

Falkland Islands and Dependencies, a Crown Colony, comprise the Falkland Islands, 300 mi. east of the Strait of Magellan at the southern end of South America and a sector of Antarctica between long. W. 20 and W. 80.

The Falklands include more than 100 islands of strategic and economic value with an area of 4,618 square miles and population (est. 1952) of 2,230. There are whaling interests and large sheep farms; wool is exported.

Antarctic dependencies include South Georgia, area 1,450 square miles, population (1952) 360; South Orkney, Sandwich, South Shetland Islands; and Graham Land and Coats Land.

Although Great Britain has held possession of the Islands since 1834, Argentina and Chile refuse to renounce claims of ownership. Great Britain laid its dispute before the World Court, May 6, 1955.

Afghanistan

DOULAT I PADSHAHI YE AFGHANISTAN

Capital: Kabul. Area: 250,000 square miles. Population (govt. estimate, 1949): 12,000,000. Flag: three vertical bars, black, red and green; design in center (red) bar composed of a mosque enclosed by a crescent formed of two ears of wheat joined at the bottom. Monetary unit: Afghani (silver).

Descriptive. Afghanistan occupies a mountainous country in Asia between 61° and 75° east longitude and 29° and 38° 20' north latitude. Its extreme length from east to west (Yoli Pass in the Wakhan to Sulfikar Pass, northwest of Herat) is 770 miles. It is bounded on the North by the U.S.S.R., on the East and South by the western zone of Pakistan, and on the West by Iran. The elevation is generally over 4,000 ft. There are three great river basins, the Oxus and the Kabul in the Northeast, and the Helmand, which runs Southwest through the middle of the country.

Towering above Kabul are the Hindu-Kush Mountains, 15,000 and 16,000 ft. high and reaching 25,425 ft. 100 or 200 miles to the east. Trade to India flows through the famous Khyber Pass from Kabul to Peshawar.

Resources and Industries. It is almost exclusively an agricultural country, producing with the aid of irrigation sizable quantities of fruits, cereals and vegetables. The fat-tailed sheep is native to the country, furnishing the Afghans their chief meat diet while the fat of its immense tail is a substitute for butter. The castor oil, madder, and asafoetida plants abound. Wool and skins are the main articles of export, together with fruits and nuts. The imports are cotton, textiles, metals and hardware, leather goods, tea and sugar. Copper, lead, iron, silver, oil and asbestos are found.

There are no railroads in the country. Merchandise is transported on trucks or camel or pony back along the seven important trade routes. A program of construction of modern roads and irrigation systems is under way.

History and Government. Afghanistan was so named in about the middle of the 18th century. In ancient times it was known as Aryana, in the Middle Ages as Khorasan. Pukhtuns (Pashtuns) comprise 53.5% of the population; Tajik 36.7%; Uzbeks 6%; Hazaras 3%; others 1.1%.

The government is a constitutional monarchy. Legislative power is vested in a parliament consisting of the King; a Senate of 50 members appointed for life by the King; and a National Council of elected members. The reigning King is Mohammed Zahir Shah, born 1914, who ascended the throne Nov. 8, 1933, on the assassination of his father, Mohammed Nadir Shah. All Afghan men over 20 may vote.

Education and Religion. Instruction is free in all educational and technical institutions. Adult education is compulsory for all men during army service. The University of Kabul was established in 1932. Principal languages are Pushtu and Persian. Islam is the predominant religion, but there is complete religious freedom.

Albania

SHQIPERIA

REPUBLIKA POPULORE E SHQIPERISE

Capital: Tirana. **Area:** 10,629 square miles. **Population** (U.N. estimate 1948): 1,175,000. **Flag:** red, with black double-headed eagle and yellow-bordered red star. **Monetary unit:** Lek (100 quin-tars).

Descriptive. Albania is a mountainous country bounded by Yugoslavia on the North and East, Greece on the East and South, and the Adriatic Sea on the West.

Racially the Albanians are mainly Ghegs in the north and Tosks in the south.

Resources and Industries. There are important forest resources and some mineral wealth, the latter not fully developed. Chief products of the country are tobacco, timber, wool, hides, furs, cheese, and dairy products, fish, olive oil, corn, cattle and bitumen. The state has attempted to develop farming, light industry, build new roads and power stations and to modernize mines.

There are four seaports, Durazzo being fully equipped. Ten regular air routes serve the country.

History and Government. Albania was the scene of conflict with Turkey, the Balkan states and Italy for many years. Its autonomy was established 1912 by a European conference, which placed William of Wied on the throne. He fled with outbreak of war in 1914. Italy proclaimed Albania's independence, 1915. It became a republic, 1925, a monarchy, 1928, when its president became King Zog. He fled, 1939, and Albania was overrun by German and Italian armies until 1944. A provisional government under Gen. Enver Hoxha was recognized by Britain, U. S. and the Soviet Union, Nov. 10, 1945. Communists won the elections of Dec. 1945, and proclaimed a republic, Jan. 12, 1946. Deputies to the Assembly, unicameral legislature, serve four years, one to every 10,000 population. **Premier:** Maj. Gen. Mehmet Shehu, appointed July 20, 1954, succeeding Enver Hoxha.

Albania's association with the Cominform led the U. S. and Britain to break off relations. They voted against its admission to the U. N. In June, 1948, Yugoslavia denounced its economic treaty with Albania because of the latter's hostility to the Tito government.

Education and Religion. There is no state religion. The largest segment of the population are Moslems, followed by Orthodox Christians (Church of Albania), and Roman Catholics. Primary education nominally is compulsory and free under the constitution, but schools are few.

Defense. The army numbers about 52,000.

Andorra

Capital: Andorra. **Area:** 191 square miles. **Population,** 5,231, scattered in six villages. **Flag:** blue, yellow, red (vertical.)

Andorra is a republic in a valley of the Pyrenees under the suzerainty of France and the Spanish Bishop of Urgel. It has enjoyed undisturbed sovereignty since 1278 and was granted a constitution as a republic by Napoleon in 1806. It pays an annual tribute of 960 francs to France, and 460 pesetas to the Bishop. It is governed by a Council-General of 24 elected members. The judiciary is appointed in equal numbers by the Bishop and the French government.

The inhabitants speak Catalan and are chiefly Roman Catholics. Sheep raising is the principal industry.

Universal suffrage was abolished in 1941 and election through the heads of families restored.

Arabian States

Area (estimated): 1,350,000 square miles. **Population** (estimated): 10,000,000.

Arabia, largest peninsula in the world, lies in the southwest corner of Asia, bounded on the North by Iraq and Jordan and enclosed on the other three sides by the sea—the Red Sea on the West, the Arabian Sea on the South and the Persian Gulf and Gulf of Oman on the East. The peninsula includes Saudi Arabia, Yemen, the independent sultanate of Muscat and Oman, the Sheikdoms of Bahrain, Kuwait, the Trucial

Sheikdoms and Qatar. The peninsula is largely desert and rainfall is negligible except in Yemen and Oman, but there are numerous oases.

For information about the independent kingdom of Yemen see page 381, and the British colony and protectorate of Aden, page 327.

THE ARAB LEAGUE

The Arab States formed a union by a pact signed in Cairo March 22, 1945, for the purpose of maintaining Arab solidarity. The League consists of Egypt, Iraq, Jordan, Saudi Arabia, Syria, the Lebanon, Yemen and Libya. Provision was made for admission of the Arab portion of Palestine, upon achievement of independence. The League's Council approved customs and payments agreements, Sept. 7, 1953.

Saudi Arabia

Al-Mamlaka Al-'Arabiya As-Sa'udiya

Capitals: Mecca and Riyadh. **Area:** 876,000 square miles. **Population** (govt. estimate, 1948): 6,500,000. **Flag:** green with white sword below an excerpt from Koran in white Arabic characters. **Monetary unit:** Riyal.

Descriptive. Saudi Arabia comprises nearly four-fifths of the Arabian Peninsula. The country consists mainly of desert and steppe land distinguished for its aridity and barrenness. Considered one of the driest and hottest of countries, it cannot boast a single lake or river. Altitude of the plateau ranges from 2,000 to 3,000 feet, with a vast desert in the center called Rub el Khali (Abode of Emptiness).

The kingdom of Saudi Arabia comprises the former Sultanate of Nejd and the kingdom of Hejaz and its dependencies. The dependencies include El Hasa, Katif, Jabal, Shammar, El Jauif and the greater part of Asir.

Resources and Industries. Increasingly large petroleum resources of the country are being developed by the Arabian American Oil Co., composed of American oil companies. Production is estimated at more than 979,021 barrels per day in 1955. An extensive modernization program is under way involving health, agriculture, ports, roads, railroads, airports and electrification of cities, largely paid for out of fees for all concessions. Medical care and medicine are free.

One of the most modern airports in the Middle East at Dhahran along the eastern coast, built by the United States in 1946, links Saudi Arabia with the main airways of the world.

A modern harbor was completed in 1950 in Jeddah, main Red Sea seaport, followed by another in Dammam on the Persian Gulf. The first railway in the Arabian desert since Col. T. E. Lawrence destroyed the Hejaz railway, 1917, was opened Oct. 1951; it runs 350 mi. from Dammam inland to Riyadh.

An agricultural country except for oil, and recently discovered gold, silver and rich iron ore, Saudi Arabia's products are dates, wheat, barley, fruit, hides, wool. Camels, horses, donkeys and sheep are raised. Some hides, wool and gum are exported. It receives UN technical assistance.

History and Government. The form of government is a hereditary monarchy. The king is Sa'ud, who succeeded his father Nov. 9, 1953. The late king, Abdul-Aziz Ibn Abdul-Rahman, Al-Faisal Al-Sa'ud (born in 1880) proclaimed King of the Hejaz and Sultan of Nejd Jan. 11, 1926, following a series of victories over rival leaders. The Crown Prince is the Emir Faisal, named Prime Minister, Aug. 16, 1954. An Advisory Council assists the King, while legislation is entrusted to the Consultative Assembly. The country is divided into districts, each administered by a Governor.

The modern history of Saudi Arabia began with the Wahhab movement begun in the 18th century by Mohammed Ibn Abdul Wahhab and which flourished under the auspices of Mohammed Ibn Saud, founder of the Saudi dynasty.

The Hejaz contains the holy cities of Islam—Medina where the Mosque of the Prophet enshrines the tomb of Mohammed, who died in the city June 7, 632, and Mecca, his birthplace, containing a great mosque sheltering the sacred shrine the Kaaba, in which is the black stone given by Gabriel to Abraham. Approximately 500,000 of the faithful make the pilgrimage annually. Medina is 820 miles from Damascus. Mecca the capital, is 200 miles farther south and is 55 miles from Jeddah, the chief port of the Red Sea.

Education and Religion. Elementary, secondary and higher education are free, but not compulsory. The population is almost entirely Moslem.

Defense. Saudi Arabia's defense force consists

of a regular army maintained by levels, now in process of expansion and modernization, with a military academy to train officers. Its defense is pooled with that of Egypt since 1954.

KUWAIT

The State of Kuwait with an area of 3,650 square miles, and population (est. 1953), 205,000, extends along the northern end of the Persian Gulf from Mesopotamia to Nejd. Its capital, Kuwait, is an important port on the Persian Gulf. The principality has one of the world's richest proven oil reserves—15 billion bbls. Production is handled by the Kuwait Oil Co., jointly owned by British and American oil companies. Under a royalty agreement 50% of the profits go to the Sheikh. An extensive program of economic and cultural improvement is financed by oil profits.

The ruler is Sheikh Adullah Al-Salem Al Sabah.

MUSCAT AND OMAN

The Sultanate of Muscat and Oman occupies the southeast portion of the Arabian peninsula with a coast line about 1,000 miles long, extending from El Katat on the Persian Gulf to Ras Sajir of the Arabian Sea. It has an estimated area of 82,000 square miles and a population estimated at 550,000, chiefly Arabs except for the towns of Muscat and Matruh. Capital: Muscat.

The Sultan of Muscat and Oman is Saiyid Said bin Taimur (born Aug. 13, 1910).

BAHRAIN ISLANDS

The Bahrain Islands lie off the Arabian Coast in the Persian Gulf and have an area of 250 square miles and a Mohammedan population of 120,000. Except for the northern fertile tip, it is a barren rocky plateau. Petroleum and pearl fishing are the chief industries. The petroleum resources are being developed with American companies participating.

Bahrain is an independent Arab State under British protection. The capital and commercial center is Manamah. The ruler is H. H. Shaikh Sulman bin Hamad al Khalifah (born 1895).

TRUCIAL SHEIKHDOMS AND QATAR

The Trucial Sheikhdoms, semi-independent, occupy a 400-mile strip from Sha'am to Khor el Odeid at the S.E. end of Qatar on the Persian Gulf. Total population is about 95,000.

Argentina

REPUBLICA ARGENTINA

Capital: Buenos Aires. Area: 1,078,769 square miles. Population (U.N. estimate 1954): 18,742,000. Flag: blue, white and blue horizontal bars with a rising sun on the white bar. Monetary unit: Peso (U.S. 20c).

Descriptive. Argentina extends from Bolivia 2,300 miles to Cape Horn and from the ridge of the Andes to the South Atlantic, occupying the greater part of southern South America. Its greatest breadth is about 930 miles. It is bounded by Bolivia on the North, Paraguay on the Northeast, Brazil, Uruguay and the South Atlantic Ocean on the East and Chile on the West.

There are five great river systems in Argentina: the River Plata, Central Cordillera, Pampa and Patagonia systems. The Plata system is second only to the Amazon system, largest in the world.

The mountains of the Republic are grouped into four isolated and perfectly defined systems: the Andean, Central, Misiones and Southern. Aconcagua is the highest peak in South America (altitude 23,081 feet). The southern part of the Andes is a beautiful lake district. There are glaciers, trout and salmon streams and skiing.

East of the Andes are great plains, heavily wooded and called the Gran Chaco in the North, and vast treeless pampas, given over to wheat and cattle raising, stretching south down to the plains of Patagonia.

The climate in the center and most thickly settled part is temperate, with slight variations. The northern tip of the republic is within the tropics and therefore hot, and the southern extremity is very cold. Rainfall is heaviest in the northeast and slightest in central west and south.

Buenos Aires, the capital, is the largest city of Latin America and the second largest Latin city in the world. It lies on the banks of the Rio de la Plata, which is here 28 miles wide, 170 miles from the Atlantic Ocean. It is a city of broad, straight streets. There are about 200 parks and plazas.

Ushuaia, capital of the Argentine Territory of Tierra del Fuego, is the southernmost location of organized government in the world.

Resources and Industries. The mountains of Argentina contain deposits of silver, copper and gold. Petroleum is exploited by the government and by private companies; the wells in the Comodoro Rivadavia region ranking highest.

Wheat, corn, barley, rye, linseed, and oats are the principal crops. The sugar, wine, cotton and fruit industries are large. Alfalfa is cultivated in huge quantities. Sheep, cattle, horses, goats and pigs form the chief wealth on the ranches. Packing houses have been established on a large scale and meat refrigeration has become the country's chief industry. Flour milling ranks second.

Textiles, oils and chemicals, iron, agricultural implements and machinery, glassware and crockery, are the principal imports.

Argentina's merchant fleet, 950,000 gross tons in 1950, grew to 2,073 ships totaling 1,411,000 tons in 1952. Civil aviation has developed rapidly.

The country in effect has been gradually informally socialized by a series of government decrees since 1945 until less than 50% of the nation's economy remained in private hands by 1955.

Present Argentine policy aims at restricted consumer goods in favor of home production—textiles, liquor, tobacco, etc.

Foreign trade (in pesos):

	Imports	Exports
1952	8,361,000,000	4,392,000,000
1953	5,667,000,000	7,190,000,000
1954	7,112,000,000	6,721,000,000

History and Government. Discovered 1515-16 by Spanish explorers headed by Juan Diaz de Solis, Argentina remained under Spanish domination until the provinces, in a successful revolt May 25, 1810, established an independent republic. In 1853 a liberal constitution was adopted.

There are 16 provinces, with a high measure of home rule electing their own Governors and Legislatures, and eight territories administered by Governors appointed by the President, also a Federal District, Buenos Aires (area 72 square miles), whose Mayor is appointed by the President and who is assisted by a deliberate council elected by the tax-paying inhabitants. Argentina's 16th and newest province became the Eva Peron Province Jan. 25, 1952. Previously another former territory became the Presidente Peron Province.

Argentina's present constitution, effective March 16, 1949, gives the government great economic powers. The President and Vice President must be Roman Catholic and Argentine by birth. They are elected for six-year terms by direct popular vote. Congress consists of a Senate of 34, elected for six years, one-third retiring every three years; and a House of Deputies who serve a similar term, one-half retiring every three years.

Voting is compulsory and women may vote in presidential and congressional elections.

The President is Juan Domingo Peron, elected Feb. 24, 1946, reelected Nov. 11, 1951. Peron controls a majority of the seats in the Chamber of Deputies and the Senate.

A virtual state of martial law has prevailed since an uprising against the regime in Sept. 1951. A government decree, Dec. 30, 1954, reversed a 1937 ban on prostitution. Greatly increased tension between the government and the Roman Catholic Church, the formal state religion, culminated in a vote of Congress, May, 1955, for a referendum to disestablish the Church. Rioting during June, 1955, ended in armed attack against the capital by rebellious elements, June 16, 1955, assertedly led by elements of the Navy. An est. 156 were killed and many wounded. President Peron and his top aides were excommunicated. He blamed Communists for excesses against churches and religious objects. Peron promised a less martial regime, but ordered a state of siege Sept. 1, 1955, as unrest continued.

Education and Religion. The population is about 90% Roman Catholic, the constitutional religion from 1810 until 1955, when measures were begun to disestablish it. Primary education is free, secular, and compulsory. There are national universities in Cordoba (founded in 1613), Buenos Aires, Eva Peron (La Plata), Tucuman, Litoral and Cuyo. The language is Spanish.

The population is largely European in origin, chiefly from Spain and Italy.

Defense. Service in the Army is compulsory from 20 years to 45. In addition to the army of about 105,000, there is a trained reserve of 300,000, of whom 215,000 are members of the National Guard and 70,000 the Territorial Guard.

Argentina has a Navy of two battleships, five cruisers, four coast defense ships, 11 destroy-

ers, three submarines, 14 patrol ships and minor craft. The personnel is approximately 11,500 men.

Austria

REPUBLIK OESTERREICH

Capital: Vienna. **Area:** 32,369 square miles. **Population (U.N. estimate 1953):** 6,954,000. **Flag:** three horizontal bars, red-white-red. **Monetary unit:** Schilling (100 groschen) (U.S. \$3.846c).

Descriptive. Austria is a republic of Central Europe bounded on the North by Czechoslovakia, on the East by Hungary, on the South by Italy and Yugoslavia and on the West by Germany, Switzerland and Liechtenstein.

Resources and Industries. There are rich deposits of iron ore, magnesite, oil, salt, graphite, talc and gypsum. Forests are plentiful and timber forms an important asset, as does a vast hydroelectric potential. The principal agricultural products are wheat, rye, barley, oats, potatoes, sugar, corn, wine, livestock, dairy products, and fruit.

Austria's economy is predominantly industrial. The chief industries are iron and steel, textiles, paper and pulp, building materials, aluminum, machine tools and chemicals. The country achieved a balanced budget, firm currency and increased productivity and trade during 1952-53. Index of industrial production (1937-100) rose from 165.5 in 1951 to 193.7 in 1954. In 1954, lignite production was 6,284,832 tons; pig iron, 1,353,542 tons; crude steel, 1,652,988 tons. Farm production in the same year reached 85% of requirements.

History and Government. Austria was the dominant power in the dual monarchy of Austria-Hungary before World War I, when Francis Joseph of the Hapsburg house was emperor of Austria and king of Hungary. The country had an area of 261,259 sq. mi., population c. 51,000,000. It contained Austria, Hungary, Bohemia, Transylvania, Polish Galicia, Trentino, Slavonia, Croatia, Bosnia, Herzegovina, Banat. It was dismembered after World War I; became a republic in 1918; was occupied by Germany during World War II, and re-established as a republic in 1945. When its territory of 1937 was restored it consisted of 32,369 sq. mi., and the following provinces: Burgenland, Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Tyrol, Vorarlberg, and the city of Vienna.

Between the two world wars Austria had a turbulent political history, with socialists introducing socio-economic changes. These were checked by Chancellor Engelbert Dollfuss, along corporative lines, 1934. Dollfuss was murdered in his office by Nazi conspirators July 25, 1934. Kurt Schuschnigg, his successor, was forced into a subservient position by Adolf Hitler, German Fuehrer, and resigned in protest, Mar. 11, 1938. He was succeeded by the Austrian Nazi, Arthur Seyss-Inquart, and on March 13, 1938, Hitler occupied Austria and proclaimed its union with Germany (Anschluss).

A provisional government headed by Dr. Karl Renner was established after Austria's liberation by the Allies. After the elections of 1945, Dr. Renner was elected president by Parliament (died 1950). Theodore Koerner, socialist, was chosen president in Austria's first popular presidential election May 6, 1951, made final May 27, 1951.

Following Parliamentary elections Feb. 22, 1953, seats were distributed as follows, compared with 1949:

	1953	1949
People's party	74	77
Socialists	73	67
Independents	14	16
Communists	4	5

Chancellor: Dr. Julius Raab, conservative, sworn in April 2, 1953, succeeding Dr. Leopold Figl.

After Austria's liberation at the close of World War II, the Inter-Allied Command of Britain, France, Soviet Union and the United States established four zones of occupation. Efforts to negotiate an Austrian state treaty of independence, drafted in 1949, were long hampered by Soviet delaying tactics, but in a reversal of attitude, the U.S.S.R., Feb. 25, 1955, proposed a conference to hasten negotiations and adopted a conciliatory policy toward Austria.

The state treaty was signed by the Big Four and Austria in Vienna, May 15, 1955, ending a total of 17 years of occupation. It recognized Austria's independence within the frontiers existing Jan. 1, 1938, provided for parliamentary resolutions of military neutrality, prohibited economic or political union with Germany, required it to uphold democratic institutions, dissolve Nazi-type organizations and prevent a Hapsburg restoration.

The treaty provided that the four occupation

armies be withdrawn within 90 days after ratification, at the latest by Dec. 31, 1955, and that no formal reparations be exacted. A separate agreement between Austria and the Soviet modified Article 35 of the treaty under which the U.S.S.R. received ownership of seized former German assets in Eastern Austria, 60% of Austria's oilfields and refinery output, and the Danubian Steamship Co. This agreement provided that, in lieu of the terms of Article 35, the Soviet would surrender the oil assets in return for 10,000,000 tons of oil, return the steamship company for \$2,000,000, and return the confiscated former Germany industries for \$150,000 worth of goods to be delivered during the next six years. With final ratification July 27, 1955, Austria formally regained sovereignty.

Austria is a member of the European Payments Union and in June, 1951, joined the Geneva Tariffs and Trade Agreement with the West European nations. Already a member of all U.N. specialized agencies, Austria is expected to join the organization proper.

Education and Religion. The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of six and 14. There are universities in Graz, Vienna and Innsbruck. The language is principally German.

Defense. Under the terms of the state treaty ending occupation of the country, Austria was not to possess atomic weapons or other offensive weapons of destruction. The country has no armed forces of its own since its occupation.

Belgium

ROYAUME DE BELGIQUE—KONINKRIJK BELGIE

Capital: Brussels. **Area:** 11,775 square miles. **Population (U.N. estimate 1954):** 8,819,000. **Flag:** three vertical bars, black-yellow-red. **Monetary unit:** Franc (U.S. 2c).

Descriptive. Belgium is bounded on the North by the Netherlands and the North Sea, on the East by Germany and Luxemburg, on the South by France, and on the West by France and the North Sea. It has a frontier of 831 miles and a seaboard of 62 miles. The Scheldt (Escaut) and the Maas (Meuse) are the principal rivers. Below Antwerp the Scheldt flows to the North Sea through the Netherlands and the Belgian Government has dredged the channel as far as Flushing and improved the port of Antwerp. The western part is low, level and fertile; the eastern, the tabieland of the Ardennes, has a poor soil. The cities of Bruges, Ghent, Brussels, Liège, and Antwerp are noted for art and architecture.

Belgium is the second most densely populated country in Europe, with 720 per square mile.

Resources and Industries. Coal is abundant; iron, zinc, lead and copper also are found. Although Belgium is essentially a manufacturing country, agriculture and forestry are important industries. The principal crops are oats, rye, wheat, potatoes, barley and sugar beets.

Important industries are mining, steel manufacture, glassware, diamond cutting, food and beverages, fishing, textiles and chemicals.

Belgium lives by its foreign trade; about 35% of its entire production is sold abroad (75% of steel and glass).

Trade in thousands of francs:

	Imports	Exports
1952	123,022,796	125,550,071
1953	121,128,000	112,966,000
1954	126,737,000	114,976,000

History and Government. Belgium, land of the Belgae conquered by Julius Caesar, has a 2,000-year history during which it was ruled by the Romans, Merovingian Franks, Burgundy, Spain, Austria and France. After the fall of Napoleon, 1815, Belgium was made a part of the Netherlands. Its citizens demanded separation from the Dutch in 1830. Belgium became an independent constitutional monarchy Oct. 16, 1830, ratified Feb. 17, 1831, and in June chose Prince Leopold of Saxe-Coburg as King, as Leopold I.

By the treaty of London, Apr. 19, 1839, Austria, France, Great Britain, Netherlands, Prussia and Russia guaranteed the inviolability of Belgium; this was the "scrap of paper" repudiated by Germany when its troops entered Belgium, Aug. 2, 1914. After World War I the Treaty of Versailles gave Belgium the cantons Eupen, Malmédy and Moresnet, 382 sq. mi., 64,250 population, added to the province of Liège in 1925.

Leopold II, son of Leopold I, was King 1865-1909, succeeded by his nephew, Albert I. Albert

was killed while mountain climbing, Feb. 17, 1934; Leopold III, his son, succeeded. Leopold surrendered to Germany, May 28, 1940, to avoid further bloodshed. His cabinet formed a government-in-exile in London. Parliament in Sept., 1944, declared Prince Charles Regent. A plebiscite in 1950 gave Leopold III 57% of all votes, but following a second and less favorable vote, Leopold transferred his powers to his son, Aug. 11, 1950, who became King Baudouin I upon Leopold's abdication, July 16, 1951.

King Baudouin I (born Sept. 7, 1930) is the son of Leopold's first wife, Princess Astrid (died Aug. 29, 1935), daughter of Prince Carl Bernadotte of Sweden.

Universal suffrage is in force and those who fail to vote are fined. Women vote since 1950.

Parliament consists of a Senate with members elected for four years, partly directly and partly indirectly; the number elected directly is equal to half the number of members of the House of Deputies. The Deputies are directly elected, for four years, by proportional representation (one for every 40,000 population). Premier: Achille van Acker, Socialist, appointed Apr. 23, 1954.

Education and Religion. The population is divided into two well defined groups, the Flemings and the Walloons. Roman Catholic is the religion of the great majority, but religious toleration prevails. Part of the income of the ministers of the Catholic, Jewish, Church of England and Protestant Evangelical religions is paid from the national treasury. Belgium has four universities in Ghent, Liege, Brussels and Louvain. French and Flemish are official languages, as is German in some districts.

Defense. Universal military training has been in force since World War I. Voluntary service begins at 17 years of age with five years of service, under 18 four years and over 18 three years. Conscription service term is 18 months since May, 1954. The Military Law of 1937 establishes the period of military obligation at 25 years, 15 to be served in the Regular Reserves and 10 in the Territorial Army. The Navy has been reorganized since World War II and comprises small warcraft. Belgium is a member of the North Atlantic Treaty Org. It approved membership in the proposed E.D.C. organization, Nov., 1953 and Mar., 1954.

BELGIAN CONGO

CONGO BELGE—BELGISCH CONGO

Capital: Leopoldville. Area (estimated): 904,757 square miles. Population (1953): 11,788,711. Monetary unit: Congo franc.

The Congo Free State had its origin in the vision of King Leopold II of Belgium. Aroused by the discoveries of Henry M. Stanley, he founded the International Association of the Congo, which sent Stanley back in 1879. Stanley founded the first station, Vivi, in 1880, and 23 others. The territory, founded as a free state, was formally ceded to Belgium by treaty in 1908. It is administered by the Minister of the Colonies at Brussels, and a Colonial Council of 14 members. The governor-general at Leopoldville is assisted by a Government Council of nominated members.

Belgian Congo has a short coast line on the South Atlantic at the mouth of the Congo, where is situated the port of Banana on a fine natural harbor. French Equatorial Africa lies to the north and west and Angola (Portuguese) to the south; to the east Tanganyika and Uganda (British); to the north it also touches the Sudan. Vast tropical forests fill the upper reaches of the river, covering about 25,000 square miles.

The Congo has vast water power potential, est. at 130,000,000 kilowatts, largely unexploited. The principal agricultural products are palm oil, cotton, palm-nuts, coffee, cocoa, rubber, copal gum, sugar and ivory.

The mineral ores found in the Katanga region in the S. E. are among the richest in content, including copper, gold, tin, cobalt, columbium, cadmium, tantalum, silver and radium. The Belgian Congo ranks high among copper producing countries. The diamond fields in the southwestern district produce more than 12,000,000 carats a year, mainly industrial diamonds of which the Congo is the world's largest producer. The rich Shinkolobwe mine, 100 miles northwest of Elisabethville, produces nearly 60% of the world's supply of uranium ore, chiefly for the United States, and 90% of its radium. Important links in a trans-Africa railway are under construction.

Rapid progress has been made in industrial and social fields, with U.S. aid and investment. Congo's

first university, open to all, is to be situated in Leopoldville.

Ruanda and Urundi, districts formerly in German East Africa, ceded to Belgium as mandatory of the League of Nations, now are U.N. trusteeships. The total area is 19,536 square miles. The population is 4,005,811 (1952), largely native. Both districts are united administratively with Belgian Congo, under a vice-governor at Astrida. The Ruanda, Plateau is one of Africa's best cattle countries. Several peaks of the Birunga range reach an altitude of 14,000 ft.

Bhutan

DRUK-YUL

Capital: Punakha. Area: 18,000 square miles. Population (estimated): 300,000.

The kingdom of Bhutan is a semi-independent native state in the eastern Himalayas, between Tibet on the North and West Bengal and Assam on the South, with Sikkim on the West. It is 190 miles long from east to west and 90 miles wide at its widest point. Punakha is a fortress of great natural strength. The inhabitants of Bhutan are Mongolians and adhere to a form of Buddhism.

Agriculture is the chief industry. The principal products are rice, Indian corn, millet, lac, wax, cloth, musk, elephants, ponies and chowries.

The ruler of the kingdom is Maharajah Jig-me Dorji Wan-chuk (born 1929), who ascended the throne Oct. 27, 1952. By a treaty signed with India, Aug. 8, 1949, Bhutan receives an annual cash subsidy of 500,000 rupees and transportation rights through India, the state's only avenue to the outside. India controls its external relations.

Bolivia

REPUBLICA BOLIVIANA

Capital: La Paz. Area (estimated): 416,040 square miles. Population (U.N. estimate 1954): 3,162,000. Flag: three horizontal bars, red-yellow-green. Monetary unit: Boliviano (U.S. \$0.526c).

Descriptive. Bolivia is bounded by Peru and Chile on the West, Brazil on the North and East, Paraguay on the East and Argentina on the South. It lies across the Andes, and its chief topographical feature is the great central plateau at an altitude of 12,000 ft., over 500 miles long, lying between two great cordilleras having three of the highest peaks in America. More than 50% of the population are Indians speaking their own dialects, 13% are white, and 25% are of mixed blood.

Lake Titicaca, on the Peruvian-Bolivian border, is the highest lake in the world on which steamboats regularly ply (12,500 ft.), and is the largest lake in South America (4,000 sq. mi.).

The legal capital is Sucre, but La Paz, a city more accessible, is the actual seat of government. La Paz lies in the heart of a gigantic canyon about three miles wide, 10 miles long and 1,500 ft. deep, at an altitude of about 12,700 ft., and framed with high Andean peaks. Its huge cathedral seating 12,000, begun 1835, was dedicated 1933.

Bolivia has 3,495 miles of airlines. It is served by Pan American-Grace Airways (Panagra), Braniff Airways, and Lloyd Aero Bolivia (LAB). It has the Pacific terminus of the only railroad that crosses the continent to the Atlantic in Brazil.

Resources and Industries. Agricultural products include potatoes, cacao, coffee, barley, coca, highland rice, rubber and cinchona bark. The country is a large exporter of rubber.

The most important industry is mining. There are large deposits of tin, silver, copper, lead, zinc, antimony, bismuth, wolfram, gold and borate of lime. More than 15% of the world's output of tin is produced in Bolivia, running to 30,000 tons or more annually. The three largest tin producers—Patio, Hochschild and Aramayo companies were nationalized Oct. 31, 1952. The country ranks high in the mining of antimony and tungsten. The 10,000 bbls. a day in 1955, became an exporter of oil for the first time. An agrarian reform program has parceled out large estates to the peasants.

History and Government. Once part of the ancient Incan empire, Bolivia was under Spanish domination for centuries before it gained independence in 1825, naming itself after Simon Bolivar, famed liberator. The republic's political history has been stormy. By the constitution of 1947 the president is elected for four years by direct popular vote. He is not eligible for reelection until four years after his term has ended. Universal suffrage was decreed July 21, 1952, at age 21 single, 18 married. Women voted for the

first time in municipal elections Dec. 14, 1947. Congress is composed of a Senate of 27 members elected for six years, one-third retiring every two years; and a House of Deputies of 120, elected for four years, one half retiring every two years.

The president is Victor Paz Estenssoro, elected May 6, 1951. Inauguration was delayed until April 16, 1952. Despite constitutional limitations he remained in office in 1954-1955 by popular acclaim.

Education and Religion. Primary education is free and compulsory. Adult illiteracy, estimated at 85%, is being lowered. There are seven universities, in Sucre, Cochabamba, Oruro, Santa Cruz, Potosi, Tarija and La Paz. Roman Catholic is the recognized state religion but other forms of worship are permitted. Spanish is the language.

Defense. There is compulsory military service beginning at 19 years of age.

Brazil

ESTADOS UNIDOS DO BRASIL

Capital: Rio de Janeiro. Area: 3,288,050 square miles. Population (U.N. estimate, 1954): 57,226,000. Flag: green, with 21 white stars forming Southern Cross on blue circle superimposed on gold diamond in center. Monetary unit: Cruzeiro (U.S. 53c, official rate).

Descriptive. Brazil is the largest independent nation in South America in area and population. It has a coast line on the Atlantic Ocean of 4,889 miles, and extends approximately 2,676 miles from North to South and 2,694 miles East to West. It is bounded on the North by Venezuela and Dutch, British, and French Guianas; on the East by the Atlantic Ocean; on the South by Uruguay, Argentina and Paraguay; on the West by Bolivia, Peru and Colombia. The northern part is the great heavily wooded basin of the Amazon (1,465,637 square miles in Brazil) which rises in the Peruvian Andes and empties into the Atlantic at the Equator.

Amapa Territory borders on French Guiana and Surinam (Dutch Guiana). Rio Branco Territory borders on Venezuela and reaches almost over to Colombia and northern Peru. Guapore Territory abuts on southern Peru and Bolivia.

The Amazon basin has a network of rivers which are navigable for 15,814 miles. The Amazon river by itself is navigable for 1,700 miles, the extent of its course in Brazilian territory. In all its rivers, Brazil possesses 27,318 miles of navigable waterways. The majestic falls of the Iguassu, one of the natural wonders of the world, are on the border of Parana, a southern state. Tallest mountains are Pico da Bandeira, 9,482 ft., and Roraima, 9,433 ft., on the Venezuela-Guiana border.

Belo Horizonte (Beautiful Horizon), first of Brazil's planned cities and capital of Minas Gerais state, near Rio de Janeiro, is a tourist attraction because of its beauty and modern design.

Resources and Industries. The mineral wealth of Brazil is vast but comparatively little developed. Manganese ore is now exported exclusively to the United States. The country possesses enormous deposits of monazite, main source of thorium, alternate to uranium as a supplier of fissionable material. Gold production is about 130,000 oz. Troy annually. Other principal minerals are mica, oil, nickel, quartz, tantalite, tungsten, iron, coal.

Brazil produces more than 1,000,000 tons of steel annually, about 50% deriving from the great Volta Redonda national mills. Hydroelectric power, approx. 2,500,000 kwts. annually, has an estimated potential of 80,000,000 kwts. Manufacturing now comprises about 62% of total production, against 35% for agriculture.

Oil has been a state monopoly since 1952. In 1955 an important oil discovery at Nova Olinda on the Madeira River opened 500,000 sq. mi. to further exploration. Hydroelectric plants are government projects. The Paulo Afonso dam on the São Francisco river, opened 1955, serves 8 states.

Brazil, world's greatest coffee grower, supplies 60 to 70% of coffee consumed in the U. S., over 12,000,000 bags of 132 lbs. each annually. Santos, Rio and Victoria are the great coffee ports. There are also large crops of cotton, oranges, bananas, pineapples, corn, manioc and sugar-cane.

Brahman (zebu) cattle of India thrive in Brazil, which raises Guyerati, Gir and Nelliare and has developed Indubrasil and Indu-Uberabas strains. About 50,000,000 hd. are raised annually. It is second in the world's hog production.

Rice, cocoa, pinewood, castor beans, tea and officinal oil are important agricultural exports. The country is the only producer of Carnauba wax, used for insulation and phonograph records.

Aluminum and cement are produced in quantity.

Airways reach all parts of Brazil; Natal to Dakar (1,600 mi.) is the shortest trans-Atlantic route. The Brazilian International Airlines connects with other South American cities and Miami, Fla. Many railways are electrified. In January, 1955, the Corumba-Santa Cruz Rail link between Bolivia and Brazil was opened, completing the Atlantic-Pacific railway of 2,300 mi.

Foreign trade (in cruzeiros):

	Imports	Exports
1952	37,179,000,000	26,065,000,000
1953	25,152,000,000	32,047,000,000
1954	55,239,000,000	42,968,000,000

History and Government. Brazil, discovered in 1500 by Pedro Alvares Cabral, a Portuguese navigator, was developed as a colony of Portugal until the royal house of Braganca, fleeing from Lisbon before Napoleon's army in 1807, transferred the seat of government to Rio de Janeiro, March, 1808. Brazil thereupon became a kingdom under Dom Joao VI. After his return to Portugal, his son Pedro I, proclaimed the independence of the country, Sept. 7, 1822, and was acclaimed emperor, Oct. 12, 1822. The second emperor, Dom Pedro II, was driven from the throne Nov. 15, 1889, by a revolution which established a republic, the United States of Brazil.

There are 20 states, with limited autonomy, a federal district and five territories: Acre, bought from Bolivia in 1903; the island of Fernando de Noronha, Amapa, Rio Branco and Guapore.

Brazil took part in World Wars I and II on the Allied side. It is associated with the U.S. in the Mutual Security Agreement for Hemisphere Defense (1953) and the Inter-American Treaty of Reciprocal Assistance (1947). In 1948 it cancelled mandates of Communists holding elective offices.

A charter adopted in 1946 pledges Brazil to have recourse to war only if arbitration fails, and never for conquest; gives the government power to make social and economic changes "to conform to the principles of social justice, conciliating free enterprise with appreciation for the value of human labor." It also authorizes the government to intervene in the management of private industry if it is in the public interest. It prohibits any party whose program or activities are contrary to the democratic form of government based on plurality of parties and on the fundamental rights of man. The new charter reaffirms the principles of universal suffrage and the secret ballot, and grants the right to vote to all citizens, men and women, on reaching the age of 18. The President is elected for a term of five years and may not be elected for a second consecutive term.

There is a bicameral legislature, Senators being elected for 8 years, Deputies (Representatives) for 4 years. Since 1930, when a military junta took control, Brazil has fought depression, inflation and economic crises. Getulio D. Vargas (Labor Party) became provisional president until 1933, when he was elected president under a new constitution. Out in 1945, he was reelected in 1950. He pursued nationalization of certain industries and products, but relaxed this later. He adopted severe controls to support the price of coffee. Forced by the army to retire, he shot himself to death Aug. 24, 1954, blaming "international" and other opposition to his policies. Vargas was succeeded by the vice president, Joao Cafe Filho (Progressive).

Education and Religion. The country is largely Catholic, but freedom of worship is guaranteed. The Protestant population, the second most important, was 1,470,000 in 1950.

Divorces are forbidden.

The University of Brazil, formerly Univ. of Rio de Janeiro, was founded in 1920. Other universities are in Bahia, Parana, Recife, Porto Alegre (state of Rio Grande do Sul), São Paulo (state of São Paulo) and Belo Horizonte (state of Minas Gerais). Brazil has approximately 70,000 primary schools, 913 high schools, 217 colleges and 3,500 other schools. Primary education is free and compulsory. The language is Portuguese.

Defense. All males between the ages of 21 and 45 are subject to military duty under a selective service system. There is one year of service in the first line and eight years in the reserve. In January, 1955, objectives were raised to: Army, 235,793; Navy, 50,400; Air, 28,400.

The Navy consists of one battleship, 2 cruisers, 25 units in the destroyer, escort and chaser classes, 3 submarines, 3 transports, 3 hydrographic ships and a number of tankers, gunboats and training vessels. The independent air force is equipped with American-built planes.

Bulgaria

BLGARIYA

NARODNA REPUBLIKA BULGARIA

Capital: Sofia. Area: 42,796 square miles. Population (govt. estimate 1950): 7,160,000. Flag: horizontal bars, white-green-red, with coat of arms in the canton. Monetary unit: Lev (est. 6.8 to U.S. \$1).

Descriptive. The Republic of Bulgaria is bounded on the North by Rumania, on the West by Yugoslavia, on the South by Greece, on the East by the Black Sea, and on the Southeast by Turkey.

The chief seaports are Stalin (Varna) and Burgas (Bourgas).

Resources and Industries. The principal crops are wheat, rye, barley, oats, corn, potatoes and tobacco. Fruit is abundant. Agriculture claims a large percentage of the population, but the country is being industrialized under a planned economy system which emphasizes electric power, coal, machinery, metals, textiles, building materials, fur and leather goods, shoe industry, etc.

In 1954 Bulgaria produced for the first time its own penicillin and calcinated soda, and began mass production of combine-harvesters. It completed the modern two-story Danube bridge, a link with Rumania, and the Alexander Stamboliski dam and reservoir, supplying irrigation for 40,000 hectares.

History and Government. The Bulgars, a Slavic people, settled Bulgaria in the 7th century and became Christians in the 10th. The Turks conquered Bulgaria in 1393. It revolted in 1875 and in 1878 was made a principality. In 1908 it became an independent kingdom under Czar Ferdinand I of Saxe-Coburg-Gotha. It expanded after the first Balkan war but lost Dobruja, Thrace and the Aegean coastline in World War I, when it helped the Axis. The Treaty of Lausanne, 1923, fixed the boundary with Turkey just west of Adrianople.

Under the influence of King Boris III Bulgaria joined the Axis in World War II, occupying considerable Balkan territory. It withdrew from the war in 1944 under a pro-Ally government. The Soviet Union declared war and after an armistice occupied the country. It supported the Communist-dominated Fatherland Front. In a one-ticket plebiscite Sept. 8, 1946, the monarchy was abolished and a republic voted, which was established one week later. A Regency had ruled for Simeon II, born 1937, who succeeded on the death of King Boris in 1943. Dimitrov, Communist party leader, became premier. Petrov, leader of the opposition, was executed in 1947.

The Armistice provided for a tripartite control of Bulgaria under an Allied Commission, with the Soviet Union as chairman. But after the Communists took charge difficulties were placed in the way of the West. The treatment of members of the American legation caused the United States to break off diplomatic relations with Bulgaria Feb. 24, 1950.

The constitution of Dec. 4, 1947, modeled after that of the U.S.S.R., provides that the unicameral National Assembly shall be the supreme organ of government. The National Assembly is elected for a four-year term and chooses the Presidium and Prime Minister. The Permanent Bureau of the Fatherland Front directs the activities of that organization. Private enterprise and belongings earned by labor and savings are protected by the state. Much of Bulgaria's industry has been nationalized, and more than half the arable land is incorporated in cooperative farms.

The Premier is Vulko Chervenkov, Communist, elected Feb. 1, 1950.

Bulgaria signed an agreement with Austria Mar. 10, 1955, facilitating trade between the two via free and open traffic on the Danube.

Education and Religion. Bulgaria's language is Slavonic. The main religion is Orthodox Greek. Elementary education is obligatory from seven to 14 years of age. There are 11 universities and colleges, including the University of Sofia.

Defense. Army service is compulsory between the ages of 17 and 65 and usually is for two years.

Burma

PYEE-DAUNG-SU MYANMA-NAINGGAN
UNION OF BURMA

Capital: Rangoon. Area: 261,789 square miles. Population (U.N. est. 1954): 19,242,000. Flag: red with dark blue canton bearing large white five-pointed star with five smaller stars between its

points. Monetary unit: Kyat (100 pyas) (U.S. 21c).

Descriptive. The Union of Burma, a republic, is bounded on the North by Tibet and China, on the East by China, Indo-China and Siam, on the South by the Bay of Bengal and on the West by the Bay of Bengal and East Pakistan.

The sub-continent of the Indo-Chinese peninsula of which Burma forms a part comprises a series of great river valleys running approximately North and South, divided from one another by mountain ranges and plateaus. The Irrawaddy Valley constitutes Burma proper.

The Irrawaddy River is navigable for 900 miles and its tributary, the Chindwin, for 300.

The 800-mile Burma Road figured prominently in World War II as an Allied supply line.

Resources and Industries. The principal products are teakwood, rice, cotton, maize, tobacco, tin, silver and petroleum. The rubies, sapphires and jade found in Burma are unsurpassed in quality. Many British and other foreign companies still are operating in Burma on a reduced basis.

An eight-year economic development plan for 1953-1960, to cost 7,500 million kyats (\$1,575 million), is expected to double the national output of approx. 3,500 million kyats. Large expenditures are being made for agriculture, water resources, mining, power, transport, and communications.

History and Government. Under British influence since about 1612 under the East India Company, Burma was administered as part of British India from 1885 to 1937.

Under the Government of India Act of 1935, Burma, which had long sought release, was detached from British India (April 1, 1937), made a self-governing unit of the British Commonwealth, and received a constitution.

Burma became an independent nation completely outside the British Commonwealth by a treaty signed in London Oct. 17, 1947, effective Jan. 4, 1948, and became the 58th member of the United Nations April 19, 1948. A Constituent Assembly, elected April 9, 1947, unanimously passed a constitution Sept. 24, 1947, which recognizes the special position of Buddhism as the faith of the majority of citizens. Private property and enterprise are guaranteed, but monopolies are forbidden and provision is made for nationalization of branches of national economy or single enterprises. The Union Parliament, elected for four-year terms, consists of the Chamber of Deputies, comprising about 250 members, and a Chamber of Nationalities of 125 members. The President is elected by Parliament for a five-year term and reelection is permitted only once. He lacks power to veto bills. The Shan, Kachin, Karen and Karenni States and the Special Division of the Chins, outlying regions, are represented in the Union government by ministers from their own Parliaments and enjoy a large measure of autonomy.

President is Ba U; premier is U Nu (formerly styled Thakin Nu). The first permanent cabinet replacing the provisional government was installed Mar. 16, 1952, following serial-form elections, June 1951 to April 1952.

Since 1948 Burma has been hampered by civil strife by Communist groups and the Karens who make up about 6% of the population. A new state, Karen, about 1,800 sq. mi. in East Burma, was proclaimed June 1, 1954.

Education and Religion. The indigenous races of Burma are of Mongoloid stock, allied to the Chinese, Japanese, Koreans, Tibetans, Malays and others of eastern Asia. Burmese or one of its variants is spoken by nearly three-fourths of the population. Higher education is provided at the University of Rangoon and constituent colleges. A state-controlled and homogenous system of schools was introduced after World War II. The chief religion is Buddhism.

Chile

REPUBLICA DE CHILE

Capital: Santiago. Area: 286,397 square miles. Population (U.N. estimate 1954): 6,238,000. Flag: white and red horizontal bars, with white star in a blue canton. Monetary unit: Peso (U.S. 0.5c).

Descriptive. The Republic of Chile lies on the West coast of South America, occupying the strip of land between the Andes and the South Pacific, from Peru to Diego Ramirez Island 56°32'S., having an extreme length of about 2,620 miles, with a coast line of 2,900 miles. In the Antarctic, Chile claims ownership of a sector between 53° and 90° W. The average breadth north of 40° is 100 miles.

The Andes have many lofty peaks, notably Aconcagua (23,081 ft.) in Argentina near the Chilean

border the highest peak in the Americas, Tupungato (23,510 ft.), Tocopuri (22,162 ft.), Llullall-laco (22,057 ft.), and others.

Easter Island, 2,000 miles west of Chile, with its hundreds of stone figures, and the two Juan Fernandez Islands, less than 500 miles west, are national parks of the Chilean Government.

Punta Arenas, in the Straits of Magellan (pop. 37,990) is the southernmost city in the world, the center of a sheep industry. Ushuala, the capital of the Argentine Territory of Tierra del Fuego (pop. 1,600) lies southeast and is the world's southernmost settlement.

Valparaiso, chief seaport, was founded in 1543; Santiago, the capital, three hours inland, in 1541.

Resources and Industries. The land in the north part is arid, but two provinces there, Tarapaca and Antofagasta, produced 95% of the world's nitrate supply until the process of obtaining nitrate from the air was made commercially profitable. Mining industries account for about 75% of Chile's exports. There are 152 nitrate works, but only about 25 are in actual operation, producing about 100,000 metric tons a month. About 70% of the world's supply of iodine is a by-product of Chilean nitrate oficinas. Chile is the world's second largest producer of copper. The provinces of Atacama and Coquimbo have enormous iron deposits estimated at a billion tons. South of Valparaiso are coal reserves est. at 2 billion tons. Other minerals are gold, silver, cobalt, zinc, manganese, borate, mica, mercury, iodine, salt, sulphur, marble and onyx.

Agriculture is an important industry. There are many large dairy farms. Wheat, rice, barley, oats, beans, lentils, apples, melons, peaches, plums, nectarines, peas and potatoes are grown in abundance. Chile ranks high among wine producing countries with vineyards covering 250,000 acres.

Manufacturing industries have developed greatly. With the creation of the Corporacion de Fomento de la Produccion (Corporation for the Promotion of Production) with a capital of \$40,000,000, production of agriculture and manufactures has vastly increased. Huachipato, steel plant near Concepcion, is second only to Brazil's Volta Redonda plant in Latin America.

Chilean imports consist mainly of machinery, petroleum, sugar, newsprint, automobiles, coffee, tea and maté and textiles. Besides minerals and wool the exports are chiefly meats, barley, oats, beans, lentils and fresh fruits.

Chile has about 6,000 miles of railroads, over half being state owned. There are 2,308 miles of airlines and 28,964 miles of roads.

History and Government. Chile became independent from Spain from 1810-1818.

Under the constitution, amended 1943, the President is elected for six years, the 45 senators for eight, and 147 deputies for four, all by direct popular vote. The President is Gen. Carlos Ibanez, elected Sept. 4, 1952 for a six-year term. Suffrage is universal for literate persons over 21.

Education and Religion. Education is free and compulsory between 7 and 15. A National Library, the University of Chile and a Catholic University are in Santiago. There is a university in Concepcion and a technical university in Valparaiso. The Roman Catholic religion is dominant though not maintained by the state since 1925 and all religions are protected. The language is Spanish.

Defense. All able-bodied citizens from 19 years to 45 are liable for army service. Service in the reserve of active Army is for 12 years and with the second reserve to the end of the 45th year. The Navy consists of one battleship, two cruisers, six destroyers, seven submarines and auxiliary vessels. The personnel is 15,000 men in normal times. There is an Air Service of four brigades.

China

Republic of China CHUNG-HUA MIN-KUO

Capital: Nanking; Provisional Capital: Taipei, Formosa. Area, including outlying territories: 3,760,339 sq. mi.; China proper, 2,279,134 sq. mi. Population (census 1953): 601,912,371. Flag: red with white sun in blue dexter canton. Monetary unit: New Taiwan dollar.

Descriptive. China, with about one-fourth of the world's population, occupies a territory in the eastern part of Asia about one-third larger than continental United States.

On the North Manchuria extends up into the Siberian regions of the U.S.S.R.; west of Manchuria and north of China the Mongolian

Republic lies between it and Siberia; at the West Sinkiang has a northeastern frontier with Mongolia and a northwestern frontier with the U.S.S.R. In the South China borders on the Vietnamh part of Indo-China, Burma, India, Bhutan, Nepal, the Kashmir-Jammu section of India and a bit of Afghanistan. On the East China has the Soviet Siberia extending down to Vladivostok and the Republic of Korea, the Yellow Sea and the East China Sea. South of China lies the South China Sea, with the Philippines to the Southeast. The country is of rolling topography, rising to high elevation in the North in the Kihngang Mountains, separating Manchuria and Mongolia; the Tarabagata Mountains in Sinkiang; the Himalayan and Kunlun Mountains in the Southwest in Tibet. Its length from North to South is 1,860 miles and its breadth from East to West more than 2,000 miles.

China proper occupies the fertile southeastern part of the country, an area nearly twice the size of the United States east of the Mississippi. This is one of the best watered countries of the world. From the mountains on the west three great rivers run in general course stretching for hundreds of miles. These rivers, the Yangtze, the Hwang ho (Yellow), and the Si-Kiang, drain four-fifths.

Since the fall of 1949 the authority of the National government has been supplanted on the mainland by the Communists, who organized a Peoples' Republic. The National government has been limited to Formosa and a number of smaller islands, as described below.

A census taken by the People's Republic gave a population total, including Nationalist Formosa, of 601,912,371 on June 30, 1953 as compared with the 1948 Nationalist census figure of 463,493,418.

Resources and Industries. China is essentially agricultural. Total arable land is estimated (1950) at 192,000 sq. mi. Wheat, barley, corn, kaoliang, and millet and other cereals, with peas and beans, are produced in the North; rice, sugar and indigo in the South. Rice is the staple food of the Chinese. Fruit is grown in abundance. Fiber crops are important and include abutilon, hemp, jute, ramie and flax. Cotton is produced mostly in the Yangtze and Yellow River valleys. Tea is cultivated principally in the West and South. One of the most important industries of prewar China was silk culture which has flourished 4,000 years. Livestock is raised in large numbers. In years before World War II flour and rice milling had become extensive, together with tanning, cement and glass manufacture.

China is one of the foremost coal countries in the world, with reserves estimated at 244,489,000 tons. Other minerals are iron ore, tin, antimony, petroleum, tungsten, molybdenum, bismuth and salt.

Chief peacetime exports were animal products, oils, tallow, wax, seeds, raw cotton, raw silk, hides, skin, leather, tea, chemicals, metals, minerals, piece goods, paper, cereals, beans and peas. Imports included cotton, wool, metals, fishery products, tobacco, chemicals, dyes, paints, coal, coke, machinery and armaments. Trade was principally with the United States, Japan, Germany and Great Britain.

History and Government. One of the oldest of monarchies, with a history reaching back to 2205 B.C., China became a republic Jan. 1, 1912, following the Wuchang Uprising inspired by Dr. Sun Yat-sen, begun Oct. 10, 1911.

For a period of 50 years after the Sino-Japanese War, 1894-95, China was involved in conflicts with Japan. On Sept. 18, 1931, Japan seized the North-eastern Provinces (Manchuria) and set up a puppet state called Manchukuo. The border province of Jehol was cut off as a buffer state in 1933. Japan invaded China in the vicinity of Peiping, July 7, 1937, precipitating war. During 1937-45, Japan set up puppet regimes in Peiping and Nanking. Under the terms of surrender in World War II Japan returned all seized territories, including Formosa and the Pescadores, annexed by Japan in 1895.

The United States and Great Britain signed treaties with China, Jan. 11, 1943, abolishing extraterritorial and other special rights enjoyed for approximately 100 years. The treaty ended special rights enjoyed by the United States in the treaty ports, in Peiping and in international settlements in Shanghai and Amoy.

A new constitution became effective Dec. 25, 1947. The National Assembly is the supreme organ of the people. Members are elected on the basis of

territorial and professional representation. They serve for a six-year term, subject to recall. The Assembly elects the President and Vice President, who likewise serve six-year terms; it also has the power to amend the Constitution.

Under the constitution a Legislative Yuan (Council), elected on the basis of regional and vocational representation, serves as the legislature. The cabinet, appointed by the President, is responsible to the Legislative Yuan.

A coalition was formed April 16-17, 1947 of the Kuomintang dominant political party which came into power in 1925 following the Nationalist Revolution; the Young China Party, the Democratic Socialists and a group of non-partisans.

Generalissimo Chiang Kai-shek, except for a period of semi-retirement, has been virtual ruler since 1927. He was elected President for a six-year term in April, 1948; reelected in March, 1954. The premier since May 25, 1954 is O. K. Yui. The Nationalist government is a member of the United Nations, which does not recognize the Communist regime.

China concluded a treaty of friendship and alliance with the U.S.S.R., Aug. 14, 1945, providing for joint ownership of the Chinese Changchun Railroad by China and Russia; joint use of the ports of Dairen and Port Arthur, with the U.S.S.R. responsible for the defense of Dairen. After the Chinese Communists overran the mainland in 1949, the Soviet Union repudiated the treaty, withdrew its recognition of the Nationalist government, and signed a new treaty with the Communist regime, Feb. 15, 1950.

After more than seven years of war with Japan—July 7, 1937-Aug. 5, 1945—internal disturbances arose involving the Kuomintang, Communists and other factions. Manchuria was lost to the Chiang regime Oct. 30, 1948, and China proper came under domination of Chinese Communist armies during 1949-1950. The Nationalist government moved to Taipei, Formosa, 110 miles off the mainland, Dec. 8, 1949.

Education and Religion. China has all the important religions of the world, but none of its own. Confucianism and Taoism are considered by the Chinese more as political philosophies and teachings. Buddhism was introduced from India and has the most followers, though its influence has declined. Mohammedanism and Christianity came from Europe. It is estimated that there are 50,000,000 Mohammedans with more than 42,000 mosques; 3,280,000 Catholics and 700,000 Protestants and others.

In 1946-1947 there were 290,617 primary schools in China with an enrollment of 23,813,705. Secondary schools numbered 5,892 in 1947 with 1,878,523 pupils. Universities and colleges totaled 207 in 1948, with 148,000 students. The People's Republic reported 219,700 students officially enrolled in institutions of higher education in 1953.

Defense. China has a national army with compulsory universal service of 16 months. There is also the regular army with voluntary and obligatory service for 6 years and with extended service up to the ages of 20 and 25. The Nationalist armies had an estimated strength of about 600,000 on Formosa and adjacent islands in 1954-55. There are also a navy and an air force, largely equipped by the United States. The U. S. Navy maintains a peace patrol in Formosa waters.

The Nationalist government signed a mutual defense treaty with the United States Dec. 2, 1954.

FORMOSA (TAIWAN)

Formosa, last stronghold of Nationalist China since 1950, is an island 110 miles off the mainland, between the Philippines on the South and Japan to the North with the China Sea on the West and Pacific Ocean on the East, but the term Formosa is used by the Nationalist government to designate 13 other islands forming the Taiwan group and 63 others comprising the Pescadores (Peng-hu) group. A range of mountains from the North forms the backbone of the island. The eastern half is exceedingly steep and craggy but the western slope is flat, fertile and well cultivated, yielding two rice crops each year. The area is 13,800 square miles and the population (Oct. 1954) 8,438,016. Principal harbors are Keelung and Kaohsiung. The Penghu island group provides naval bases. The principal crops, besides rice, are tea, sugar, sweet potatoes, ramie, jute, tumeric and camphor. Minerals include gold, silver, copper and coal, largely undeveloped.

Index of industrial production (1951 = 100) has been 1952, 129.1; 1953, 175.3; 1954 (6 months), 175.7.

Formosa was ceded by China to Japan in 1895, after the Sino-Japanese War and was returned to China as a province, 1945, after the surrender of Japan. Japan renounced all claims to Formosa and the Pescadores in the Treaty of Peace, Sept. 8, 1951. China did not take part in the treaty, signing a separate treaty with Japan Apr. 27, 1952.

The Pescadores (Peng-hu) a group of islands with an area of approximately 50 square miles and a population (Oct. 1954) of 82,636, are between Formosa and the coast of China, by which they were ceded to Japan in 1895. The islands remained under Japanese rule until restored to China, 1945, and are administered as a part of Formosa. Sugar cane is produced.

People's Republic of China CHUNG-HUA JEN-MIN KUNG-HO KUO

The People's Republic of China (Communist) was proclaimed in Peiping (Peking) Sept. 21, 1949, by the Chinese People's Political Consultative Conference under Mao Tze-tung, Communist leader. Chou En-lai was named premier and foreign minister Oct. 1, 1949. By defeating the Nationalist armies, the Chinese mainland, the islands of Hainan and Chusan, and the principal cities, including Shanghai and Canton, fell to the Communists.

The Communist regime and the U.S.S.R. established close relations. Mao and Chou En-lai visited Moscow and signed a 30-year treaty of "friendship, alliance and mutual assistance," Feb. 15, 1950, repudiating the 1945 treaty between the Soviet Union and Nationalist China authorized by the Yalta Agreement, and substituted the People's Republic for the Nationalists in administration of the Changchun Ry., Dairen and Port Arthur. The two parties agreed to join no coalition against each other and to consult on mutual interests. Great Britain offered recognition of the People's Republic Jan. 1, 1950, but was ignored. Recognition also was granted by Afghanistan, Burma, Czechoslovakia, Ceylon, Denmark, Finland, Israel, India, Indonesia, Netherlands, Norway, Pakistan, Sweden, Switzerland. The United States refused recognition, and, after its consular officers had met with abuse, withdrew consular representatives. The U.S. opposes Communist China's entry into the U.N. With U.S. aid about 10,000 Nationalist troops and 14,500 civilians were evacuated to Formosa and 4,000 guerrillas to Quemoy and Matsu from the Tachen Islands near the mainland, Feb. 6-10, 1955.

The People's Republic sent armies into Tibet and forced its "protection" on that government. Its armies intervened as "volunteers" in the Korean war Nov. 26, 1950, using some Soviet equipment and Soviet-built planes. Thus it became the chief enemy of the U.S. and the U.N. contingents. An Armistice was signed July 27, 1953.

Following United States' demands and prolonged negotiations between the U.N. and the People's Republic, four of 15 American fliers the Communist regime acknowledged holding since their capture in 1952-53, were released May 31, 1955, 11 others Aug. 1, and 9 civilians Sept. 6, 1955.

The People's Republic divided up large land holdings; began rebuilding Manchurian industries; established controls for imports and exports; took over finance and tried to stop inflation; ousted foreign missions and religious schools; revised education to teach the Marxian economy; gave women equal rights with men, prohibiting bigamy and concubinage. It pursues a program of thought control and maintains forced labor camps.

In 1953 Peiping began the first of its five-year economic plans with the aid of Soviet advisors and technicians, largely concentrated in areas bordering on the Soviet Union, with stress on food and heavy industries. A revision, July 6, 1955, slowed collectivization plans and reduced grain goals. Overall goals for 1957 compared with 1952: steel, 4,120,000 tons (1,350,000); electricity, 15,920,000 kwh (7,260,000,000); coal, 113,000,000 tons (63,500,000); cement, 6,000,000 tons (2,860,000). It has begun large-scale development of transportation, power and industry in Western China. Actual economic strength in 1954 was estimated at about the level of 1937.

The government concluded an eight-year mutual non-aggression pact with India, April 29, 1954, and other treaties with Soviet satellites.

The regular army is estimated at approx. 3,000,000, including 2,500,000 in 70 first-line divisions; also 1,500,000-2,000,000 regional district troops; 600,000-1,000,000 public security troops, and a

poorly equipped home guard militia believed to total 13,000,000. Air force equipment and training have been furnished by the U.S.S.R. The air force numbers 75,000 with 2,000 planes. It is known to possess many MIG-15 jet planes and a number of MIG-17s and 14-28 bombers. The navy has 50,000 men.

MONGOLIA

Inner Mongolia consists of three provinces: Suiyuan, Chahar and Ninghsia. Under the pressure of Japanese militarists an autonomous government was set up in Pallingmiao, Apr. 23, 1934, to handle local affairs. An autonomous Republic was set up by Chinese Communists, May 12, 1947. Capital: Kweisui.

Outer Mongolia: For data concerning the People's Republic of Mongolia, see page 366.

SINKIANG (Chinese Turkestan)

Sinkiang (New Dominion), in Central Asia, comprising Chinese Turkestan, Kulja and Kashgaria, fell under Communist control in 1949. Its area is 633,802 square miles; population (est. 1948), is 4,047,450, including Turks, Mohammedans and Chinese, largely nomadic. Tihwa (Urumchi) and Kulja are the chief cities.

Claimed by China for 2,000 years and under sporadic control for 500, Sinkiang has come under Soviet influence in recent years. During the period 1930-1940 their geologists proved it to be China's richest region in strategic materials, including tungsten, wolfram, molybdenum, copper, zinc, coal, uranium and oil. The province was declared an autonomous region, similar to Inner Mongolia, late in 1953.

TIBET

Tibet is bounded on the North by Sinkiang and on the South by Nepal, Burma, India and Pakistan. The country is situated between the Himalaya and Kunlun Mountains and hitherto practically closed to strangers. The trade is with India mostly, being carried on through lofty passes, some of which are 14,000 to 18,000 ft. high, which are impassable in winter. The capital is Lhasa. The area of Tibet is 475,000 square miles with wide areas unexplored. Its average altitude is 16,000 ft. Population was estimated 1,000,000 in July, 1948. The religion is Lamaism, form of Buddhism.

With only token resistance, Tibet accepted suzerainty of the Chinese Communist regime under a pact signed May 23, 1951. A communist Tibetan Autonomous Government was announced Dec. 20, 1953, revising the quasi-religious administration of the rival Dalai and Panchen Lamas.

MANCHURIA (NORTHEASTERN PROVINCES)

Manchuria, the former Manchu state, with an area of 404,428 square miles; population (1940) including Jehol Province, 43,233,954, is bounded on the North by Siberia (U.S.S.R.), on the East by Siberia and Korea, on the South by the Yellow Sea and China, and on the West by China, Siberia and Mongolia.

Manchuria is divided from Korea by the Yalu river, the line U.N. airplanes were not permitted to cross during the Korean war, 1951-53.

Wrested from China by Japan in 1931, Manchuria was proclaimed an independent nation Feb. 18, 1932, and came into existence Mar. 1, 1932, at Mukden when it was renamed Manchukuo. At the close of the Sino-Japanese war, 1945, the territory was returned to China.

The soil of Manchuria is one of the richest in the world with about 32,736,000 hectares arable. The principal crops are soy beans, kaoliang, millet, corn, wheat and rice. Lumber is an important product. The land possesses great mineral wealth, including iron, gold, coal, magnesite, and oil shale. It is becoming heavily industrialized.

KWANTUNG

Kwantung is the southern part of the Liaotung peninsula, the southernmost portion of Manchuria, bounded on the East by the Bay of Korea, on the South by the Yellow Sea and on the West by the Liaotung Gulf. The capital is Dairen. The area is 1,438 square miles; the population (1935), 1,656,726.

Russia leased Kwantung from China and constructed the strongly fortified city of Port Arthur and the nearby commercial ice-free port of Dairen (Dairen), chief seaport of Manchuria.

Japan seized Port Arthur in 1905, and at the close of the Russo-Japanese War took over the lease in the Treaty of Portsmouth. It was restored to the U.S.S.R. by the Yalta Agreement, Feb. 11, 1945, which agreement also internationalized Dairen. Russia has not permitted free access to the ports.

Return of the Chang-chun railroad, Port Arthur and Dairen to (Communist) China was specified in the 1950 Soviet-Chinese Communist treaty of friendship and mutual assistance, and implemented by subsequent agreements.

Colombia

LA REPUBLICA DE COLOMBIA

Capital: Bogota. Area (estimated): 439,617 square miles. Population (U.N. estimate 1954): 12,381,000. Flag: wide yellow horizontal band above narrow blue and red bands. Monetary unit: Peso (U.S. 40c).

Description. The Republic of Colombia, situated in the extreme northwest of South America, extends up the Isthmus of Panama to the Republic of Panama. It has a coast line of 913 miles on the Pacific Ocean, and 1,094 miles on the Caribbean Sea. It has as neighbors Venezuela and Brazil on the East, and Ecuador and Peru on the South.

Three great ranges of the Andes, the Western, Central and Eastern Cordilleras, run through the country from North to South. The eastern range consists mostly of high table lands, cool and healthful, and densely populated. The Magdalena River, in the East, rises in the high Andes and flows north into the Caribbean Sea, 12 miles from Barranquilla. It is navigable for over 800 miles.

Snow-crested mountains standing almost directly over the equator are one of many examples of scenic splendor in Colombia. Tourists are also attracted by the famous Tequendama Falls, a natural wonder near Bogota.

Bogota, the capital founded in 1538, is situated in the Andes 8,660 ft. high. To reach it by the Magdalena River and rail requires nearly a week; but a daily airplane service makes it in 2½ hours. There is daily airplane service to the U. S.

Resources and Industries. The soil of Colombia is fertile and agriculture is a growing industry. Mild coffee is produced extensively, accounting for 80% of export trade. Rice, tobacco and cotton are cultivated, besides cocoa, sugar, tagua, wheat and bananas. Dyewoods are important commercially. Rubber, tolu balsam and copaiba trees are being exploited.

The country is rich in minerals. Seventy-five miles from Bogota are the Muzo emerald mines which have been in operation for four centuries. Near Somondoco are the Chivor emerald mines. Other minerals are gold, silver, copper, lead, mercury, cinnabar, manganese, platinum, coal, iron, limestone, salt and petroleum.

The 235-mi. Magdalena Valley Railroad, begun in Jan. 1953, to run N. from La Dorada to Capulco, will integrate transportation and open 44,000 sq. mi. of territory for colonization. An extensive TVA-type regional development in the Cauca River Valley in the southwest is projected under a decree of 1954.

Colombia's principal imports are textiles, metallic products, transport materials, food, chemicals and machinery.

History and Government. The country, conquered and ruled by Spain for 300 years, won its freedom in the revolt of the Spanish-American colonies 1810-1824, the liberator, Simon Bolivar, establishing the Republic of Greater Colombia in 1819 from which Venezuela and Ecuador withdrew in 1829-1830. From the remainder of the confederation evolved New Granada, Confederation Granadina, and finally the Republic of Colombia under a constitution dated Aug. 5, 1886. Panama withdrew, Nov. 3, 1903, becoming a separate republic.

The Congress consists of a Senate of 63 members, elected for a term of four years, and a House of Representatives (one to every 90,000 pop.), elected directly by the people every two years. Women 21 and over received the right to vote and hold office Aug. 25, 1954. The President is elected by direct vote for four years and is ineligible for the following term.

President Laureano Gomez, Conservative, elected Nov. 27, 1949, was deposed June 13, 1953, in a coup led by Lieut. Gen. Gustavo Rojas Pinilla who was elected president for a four-year term Aug. 3, 1954.

Education and Religion. The population is mainly whites and half castes with only 105,807 Indians. Education is free but not compulsory. The National University, founded 1572, is in Bogota. There are four other universities. Roman Catholic is the prevailing religion and although others are tolerated officially, there are frequent complaints of harassment of Protestant organi-

languages. Spanish is the language of the country.

Defense. Military service is compulsory between the ages of 21 and 30 with actual service for one year. The Navy consists of two destroyers and frigates, gunboats and others. The Air Force comprises fighting and training squadrons.

Costa Rica

REPUBLICA DE COSTA RICA

Capital: San Jose. **Area** (estimated): 19,653 square miles. **Population** (U.N. estimate 1954): 915,000. **Flag:** five horizontal stripes, blue, white, red (wide), white, blue; emblem in red stripe. **Monetary unit:** Colon (U.S. 17.64c).

Descriptive. Costa Rica, a Republic, in the southern part of Central America, has Nicaragua for its neighbor on the North and Panama on the South. The lowlands by the Caribbean have a tropical climate. The interior plateau, with an altitude of about 4,000 ft., is temperate.

San Jose, the capital, situated inland—103 miles by rail from Puerto Limon on the Atlantic Ocean; 93 by rail from Puntarenas on the Pacific Ocean—is the country's industrial and cultural center. The crater atop Poas Volcano is the largest in the world. Puerto Limon occupies one of the sites where Columbus landed on his fourth and last visit to America.

Costa Rica is well served by steamship and airplane services. There are international airports at La Sabana and El Coco, the latter inaugurating the country's first four-engine service in 1955.

Resources and Industries. Coffee of a high quality is the chief crop and export, followed by bananas, cocoa and abaca. Corn, sugar cane, rice, tobacco and potatoes are cultivated. The distillation of spirits is a government monopoly.

The forests are extensive, and lumber industry is becoming important. Gold and silver are mined on the Pacific slope. Other minerals are quartz, alabaster, granite, oil, alum, slate, onyx, mercury, sulphur and copper.

Chief imports are flour, textiles, sugar, rice, industrial machinery, gasoline, leather, hardware and tools. Three-fourths of foreign trade is with the United States.

History and Government. Although once a part of the Confederation of Central America, 1824-1829, Costa Rica has been independent since 1821.

The Constitution presently in force was adopted Nov. 8, 1949. It abolishes the Army as a permanent institution. The legislative power is vested in a Chamber of Deputies, 45 in number, with four-year terms, under universal suffrage. The President, elected for four years, appoints a Cabinet of eight. The President cannot be re-elected during the two succeeding terms. Voting is compulsory in Costa Rica.

President: Jose Figueres, elected July 26, 1953. **Religion and Education.** Primary education is compulsory and free. Institutions of higher education include the University of Costa Rica and National School of Agriculture, both in San Jose; Inter-American Institute of Agriculture Sciences in Turrialba. The language of the country is Spanish. English is taught in the public schools. Roman Catholicism is the religion, but the nation has religious liberty.

Defense. Order within the country is kept by a Civil Guard force of 500, trained by a United States Army mission.

Cuba

REPUBLICA DE CUBA

Capital: Havana. **Area:** 44,206 square miles. **Population** (1953 census): 5,814,112. **Flag:** three blue, two white stripes, alternated, with large white star in red triangle at mast. **Monetary unit:** Peso (U.S. \$1).

Description. Cuba, the "Pearl of the Antilles," largest island of the West Indies, lies among the Greater Antilles. It has the Gulf of Mexico and the Strait of Florida to the North, the Atlantic to the Northeast, the Caribbean Sea to the South. Key West, Fla., is about 90 miles distant. The Windward Passage, 50 miles wide, separates it from Haiti to the East, and Jamaica (British) lies 85 miles to the South. Yucatan is 130 miles to the West. Its length is 730 miles, and the breadth averages 50 miles with a maximum of 160 miles. The coast line including the larger keys, is about 2,500 miles in length. It has numerous harbors, notably that of Havana, one of the finest and safest in the world, also Guantanamo, and Bahia Honda. Guantanamo was leased in 1903 to the United States for a naval base. The Isle of Pinos (Pines), 1,180 sq. mi., belongs to Cuba.

Mountains rise in Pinar del Rio Province in the West, and in Oriente in the East, where they reach a general elevation of about 3,000 ft., with Pico Turquino (8,320 ft.) as the highest point. Santa Clara is rough and broken, but Matanzas and Havana are flat and rolling.

The soil is alluvial and under the tropical heat and humidity the vegetation is of rare richness. It is estimated officially that 8,628,434 acres are covered with dense forest. The royal palm tree dominates every landscape. All tropical fruits and vegetables flourish. At Havana the mean temperature is 76 and the mean rainfall 40.6 inches.

Resources and Industries. Chief barometer of the nation's economy is the sugar industry which accounts for about one third of national income and 75% of total exports; and provides about three-fourths of its rail traffic. United States citizens have furnished much of the estimated billion-dollar investment in the industry.

Largest cane sugar producer in the world, the nation devotes some 2,285,000 acres to this crop. The amount of sugar exported to the United States is in accordance with a quota established by the Washington government. It supplies about 40% of U.S. sugar requirements.

Tobacco raising and the manufacture of cigars and cigarettes rank second in importance. Tobacco is cultivated chiefly in the famous Vuelta-Abajo district. Other agricultural products are molasses, coffee, pineapples, bananas, citrus fruit and coconuts. Cabinet woods (mahogany and cedar), dyewoods, fibers, gums, resins and oils are important commercially. Iron, copper, manganese, nickel and salt are some of the minerals.

There are more than 9,000 miles of railroads, with a main trunk line running across the Island from Guantanamo Bay to Guane, a distance of more than 700 miles. Havana, Camaguey and San Antonio de los Baños are important air bases. The first steel plant was erected in 1954 at Guanabacoa near Havana.

The Blanquita Theater in Havana, built 1949, is one of the world's largest, seating 6,500.

History and Government. Cuba was discovered by Columbus, Oct. 28, 1492, on his first voyage and originally called Juana. Cuba is its Indian name. Except for a period, 1762-63, it was a Spanish colony until 1898. Mistreatment of the natives by Spanish governors led to frequent demands for annexation to the U. S. in the 19th century. In 1898 the U. S. intervened and after the short Spanish-American war gained its liberty by the Treaty of Paris, Dec. 10, 1898. *See Memorable Dates.* Cuba became a republic in 1902, after the U. S. withdrew. A treaty put into force the Platt Amendment, 1903, giving the U. S. the right to intervene in Cuban internal affairs. A new treaty, 1934, relinquished this right.

A new constitution providing for social security, wages and hours regulations and other reforms went into effect Oct. 10, 1940, replacing an earlier one. Voting is compulsory. The president, elected for a 4-year term, cannot succeed himself. The president is Maj. Gen. Fulgencio Batista y Zaldívar who took over the government by a coup d'état, Mar. 10, 1952, from Dr. Carlos Prío Socarras, elected 1948. Gen. Batista was formally elected to the presidency Nov. 1, 1954.

In 1955 the cabinet, which can act when the legislature is not in session, banned propaganda and support of international communism by organizations or persons.

Education and Religion. Education is compulsory between the ages of seven and 14. Among the higher institutions of learning is the University of Havana, founded in 1721. The Roman Catholic religion is predominant. The language is Spanish with English widely understood.

Defense. Compulsory military service was established Jan. 5, 1942.

Czechoslovakia

ČESKOSLOVENSKÁ REPUBLIKA

Capital: Prague (Praha). **Area:** 49,381 square miles. **Population** (1950 census): 12,340,000. **Flag:** white and red horizontal bands, with blue triangle extending from mast to midpoint. **Monetary unit:** Koruna.

Descriptive. Czechoslovakia lies athwart the heart of Europe from East to West and, like Switzerland, Austria and Hungary, is a landlocked country without direct access to the sea. Its boundaries are, in the North, Germany and Poland; in the South, Austria, Hungary and Ukrainian S.S.R.; in the West, Germany, and in the East, Poland. Its extreme length is about

600 miles and its width varies from 50 to 100 miles.

There are two extensive mountain systems in Czechoslovakia: the Carpathian in the Eastern parts of Moravia and Slovakia and the Sudeten in the West on the German border. Forests are famous for hunting and are the habitat of the bear, the chamois, the ibex, wildcat and wild boar.

Resources and Industries. Czechoslovakia possesses one of the richest territories in Europe, both in the matter of natural resources and industrial development. Agriculture and forestry claim 40% of the population. Wheat, rye, barley, oats, potatoes, sugar beets, corn and hops are grown in abundance. The Skoda munition factories in Pilsen, among the most extensive and efficient in the world, have been renamed Stalin Works. There are also numerous textile and paper mills, glass, furniture, stone, metal and chemical factories. Mineral wealth is great and comprises both soft and hard coal, iron, graphite and garnets, silver, copper, lead, and rock-salt. Large-scale mining for uranium is reported under compulsion.

The nationalized economy is closely coordinated with that of the U.S.S.R. Trade with other Communist countries accounts for 70% of imports, 68% of exports.

History and Government. Czechoslovakia is a Communist republic with a Soviet-type constitution, nationalized industries, and one-party elections. The Czechs and Slovaks are of Slav origin. In the 9th century they formed the Moravian empire, destroyed by Magyar invasions. Bohemia, the Czech state, became a kingdom. Its crown was at different times seized by Polish and Austrian rulers. In 1612 Prague was the capital of Austria. In the Thirty Years war Bohemia lost its independence and its leaders were crushed. In the Revolution of 1848 it wrung concessions from the peasants from the Hapsburgs.

In 1914-1918 Thomas G. Masaryk and Eduard Benes led a provisional government in western capitals preparing a republic upon Austrian defeat. It proclaimed Czech independence in Washington Oct. 18, 1918. When Austria fell Oct. 28, 1918, the republic of Czechoslovakia was proclaimed, and the Slovaks adhered Oct. 30. Masaryk was president, 1918-1935, when he retired at 85 and was succeeded by Benes. Demands by Hitler of independence for the Sudeten Germans caused Britain and France to agree to the dismemberment of Czechoslovakia at Munich Sept. 30, 1938. Parts were given to Poland and Hungary. Dr. Emil Hacha became president. In the war Hitler abolished the republic. In 1944-45 Czechoslovakia, which had suffered severely during the war, was freed by Russian and American armies. Dr. Benes returned as president May 8, 1945. In the elections of 1946 the Communists proved the strongest party and Klement Gottwald, Communist, was made prime minister. Part of the former republic was returned, but the Ruthenian portion (Carpatho-Ukraine) was ceded to Soviet Russia, 1945.

The Communists forced nationalization of many industries, muzzled the press, suppressed national minorities and expelled 2,000,000 Germans from the Sudetenland. A Soviet-type constitution was adopted Feb., 1948. It gives supreme legislative power to the Czech National Assembly of 300 elected for 6 years, and on Slovakia to a similar assembly of 100 and executive power to a board of commissioners. Gottwald, as premier, forced a Communist cabinet on Benes, with the exception of Jan Masaryk, foreign minister. Masaryk died in a fall from a window Mar. 10. Benes resigned June 7, 1948 and died Sept. 3. Gottwald was named president and Antonin Zapotocky premier June 14, 1948.

A reorganization of the government, announced Feb. 2, 1953, placed chief power in the hands of a presidium. Its president is Antonin Zapotocky, elected by Parliament Mar. 21, 1953, to succeed Klement Gottwald (died March 14). Premier: Viliam Siroky.

The budget for 1955-56, announced Mar. 22, 1955, called for about \$12 billion, with 12% for defense, an increase of 35%; 32.9% to agriculture and 51% to economic and industrial projects.

Since 1949 the government has harassed American businessmen and diplomats. Spectacular escapes by Czechs to American lines have disclosed the unrest in their country.

In January, 1955, the International Bank dropped Czechoslovakia from membership for nonparticipation. But the country was included in the American food grants of 1954-55.

Education and Religion. An estimated 75% of

the population is Roman Catholic, the rest Protestant and other faiths. A government decree dated July 14, 1950, abolished private theological schools for state-controlled.

Institutions of higher learning are the Czech University in Prague, founded in 1348; the Universities of Brno and of Bratislava and a number of technical universities.

Defense. Universal military service for all between 20 and 50 was re-established in 1945; with service for two years. With the Communist coup, the army was purged of unsympathetic leaders and believed reorganized by U.S.S.R. advisers. Its strength is estimated at 230,000.

Czechoslovakia was one of the 8 Communist nations signing the 20-year Mutual Defense Pact at Warsaw May 14, 1955, providing for a unified military command.

Denmark

KONGERIGET DANMARK

Capital: Copenhagen. **Area:** 16,576 square miles. **Population** (govt. estimate, 1953, including Faroe Islands and Greenland): 4,408,400. **Flag:** white cross on red field (Dannebrog). **Monetary Unit:** Krone, pl. Kroner (U.S. 14.48c).

Descriptive. Denmark, a kingdom, occupies the peninsula of Jutland, thrusting out to the North from Germany, which is its only land neighbor, between the North Sea and the Baltic Sea, with the adjacent islands. The Skagerrak separates it from Norway, and Kattegat from Sweden. The country consists of low undulating plains.

Resources and Industries. One third of the population lives by agriculture on more than 70% of the usable land. Denmark normally exports more butter and produces more bacon than any other country except the U.S. Fisheries are valuable.

The first cooperative consumers' society was established 1866 and today the system has 1,884 affiliated societies and includes 420,000 households, about 45% of the whole population. Danish farmers operate more than 1,300 cooperative dairies, 60 cooperative bacon factories and numerous slaughterhouses.

Annual foreign trade in million kroner:

	Imports	Exports
1952	6,645	5,874
1953	6,880	6,100
1954	8,024	6,549

History and Government. The origin of Copenhagen (Köbenhavn) dates back to ancient times, when the fishing and trading place named Havn (port) grew up on a cluster of islets in the Sound, but Bishop Absalon (1128-1201) is regarded as the actual founder of the city. On one of the islets he built a stronghold against the pirating Wends and the remnants of this still exist underground in front of Christiansborg. Elsinore (Helsingør) contains the reputed grave of Hamlet, the Danish prince immortalized by Shakespeare. A great attraction here is the castle of Kronborg which once commanded the Sound when duties were exacted from every passing vessel.

Denmark has public assistance, health insurance, disability and old-age pensions, workmen's compensation and unemployment insurance.

The King and Parliament jointly hold legislative power. A new constitution, adapting the Constitution of 1849 to modern needs, was signed June 5, 1953. Denmark's Constitution Day. It made women eligible to succeed to the throne, substituted a unicameral Parliament (the Folketing) of 179 members for the former two-chamber Rigsdag, lowered the voting age from 25 to 23 years, changed the status of Greenland from that of a colony to a full member of the Danish Commonwealth with representatives in Parliament, and made legal provisions for Denmark's full cooperation in projects of international scope through a clause ceding Danish sovereignty rights in certain cases, if approved by five-sixths of the Folketing members or by plebiscite majority.

The King of Denmark is Frederik IX (born March 11, 1899) who succeeded to the throne on the death of his father, King Christian X, April 20, 1947. He married Princess Ingrid of Sweden and they have three daughters: Princess Margrethe, heir-presumptive (born April 16, 1940), Princess Benedikte (born April 29, 1944), Princess Anne-Marie (born Aug. 30, 1946). The King has one brother, Prince Knud (born July 27, 1900).

Prime Minister: H. C. Hansen, appointed Feb. 1, 1955.

Education and Religion. The Evangelical Lutheran is the established religion, but there is com-

plete religious tolerance. Education is compulsory. The University of Copenhagen was founded in 1479.

Defense. The army is composed of conscripts with compulsory training between the ages of 19 to 25. The navy comprises fleet and coast defense forces. The air force, reorganized in 1948, is being expanded. Estimated strengths are: Army, 100,000 plus local defense units of about 25,000; navy, 20,000; air force, 8 fighter and fighter-bomber squadrons totaling 15,000. Seven airfields have been approved under the NATO program.

The Faroe Islands in the North Atlantic, about 300 miles northwest of the Shetlands, area 540 sq. mi., pop. 32,000, have extensive home rule.

GREENLAND

Greenland, a huge island between the North Atlantic and the Polar Sea, is separated from the North American continent by Davis Strait and Baffin Bay. It extends northward from 60°-86° N. lat. Its total area is 827,300 square miles, 705,234 of which are ice-capped. Most of the island is a lofty plateau 9,000 to 10,000 ft. in altitude. The average thickness of the ice cap is 1,000 ft. The population (1951) was 22,890 natives and 1,269 Europeans. The capital is Godthaab.

The deposits of cryolite are the largest in the world. Fish, fur and graphite are the other exports. It is Denmark's only colony.

Dominican Republic

REPUBLICA DOMINICANA

Capital: Ciudad Trujillo. Area (est.) 19,333 square miles. Population (U.N. est., 1954): 2,347,000. Flag: four alternating red and blue squares quartered by white cross. Monetary unit: Peso (U.S. \$1).

Descriptive. The Dominican Republic occupies the eastern two-thirds of the Island of Hispaniola (called La Española by Columbus), second largest of the Greater Antilles, situated between Cuba on the West and Puerto Rico on the East. The boundary between it and the Republic of Haiti, which occupies the western part of the island, is 193 miles long. It has a coastline of 1,017 miles. Climate is generally sub-tropical.

Resources and Industries. The land is very fertile, about 15,500 square miles being cultivable; agriculture and stock raising are the principal industries. Sugar, cacao, molasses, coffee, rice, corn and tobacco are the chief products.

The country contains deposits of silver, platinum, copper, iron, salt and petroleum and the mining industry is under development.

Chief manufactures are rum, alcohol, chocolate, molasses, textiles and apparel, chemicals, shoes, furniture.

History and Government. The Republic was formed after the successive expulsion of the Spanish, French and Haitians. Santo Domingo was long the center of Spanish power in America.

The country was occupied by American Marines from 1916 until 1924, when a constitutionally elected government was installed. The country now is governed under the constitution of Jan. 10, 1947.

The President is elected by direct vote every five years. The National Congress consists of a Senate and a Chamber of Deputies. All persons over 18 have the right of suffrage. The President: Hector B. Trujillo, elected May 16, 1952.

Education and Religion. The population is composed of whites, mulattoes, and a 19 percentage of negroes. The State has no religion and there is toleration for all faiths. The population is almost wholly Roman Catholic. Education is free and compulsory. The language is Spanish, but English is widely spoken. The University of Santo Domingo was established 1538 by the Dominicans.

Defense. The armed forces comprise approximately 12,000 officers and men. The Navy operates a coastal patrol. There is an air corps.

Ecuador

REPUBLICA DEL ECUADOR

Capital: Quito. Area (govt. est.): 116,270 square miles. Population (U.N. estimate 1954): 3,567,000. Flag: broad yellow bar above narrower blue and red bands respectively with coat of arms in center. Monetary unit: Sucre (U.S. 66¢).

Descriptive. Ecuador, on the northern Pacific Coast of South America, extends from about 100 miles north of the Equator to 400 miles south of it. It is bounded by Colombia on the North and Peru on the East and South. Two cordillera of the Andes mountains cross the country from north to south, dividing it into three natural zones—coastal,

highlands, and the orient extending to the border with Peru. Included among Ecuador's 22 peaks are a number of South America's highest volcanoes, including Chimborazo (20,577 ft.), Cotopaxi, Iliniza, Cayambe, and Altar.

Included in the area of Ecuador but not the population are the Galapagos (Tortoise) Islands with an area of 3,028 miles. The chief islands in the archipelago are San Cristobal (Chatham), Santa Maria (Florena), Santa Cruz (Indefatigable), San Salvador (James) and Isabella (Albemarle).

Guayaquil, on the southwest coast, is the chief seaport, and also serves Panagra and Braniff Airlines from the United States. Otavalo, Quito, Ambato and Cuenca are popular with tourists.

Resources and Industries. The country is rich in undeveloped minerals. Rich silver ore is found at Pillzhu in Cañar. Petroleum output is increasing. Large deposits of copper, iron, lead, coal and sulphur are known to exist. Modern farm methods have redoubled Ecuador's agricultural growth since 1948. Rice exports have doubled, bananas quadrupled. Other agricultural products are cereals, potatoes, fruits, cocoa, coffee. Cacao ranks first in exports by value. Others include kapok, rubber, mangrove bark, coffee and alligator skins. The so-called Panama or "Jipijapa" hats, made of Toquilla straw, are manufactured in Ecuador.

Ecuador is the chief source of the supply of balsa, a light wood, half as heavy as cork but very strong and used in aircraft and ships.

The chief imports are cotton goods, metals, jewelry, foodstuffs, liquors, drugs, chemicals; woolen, silk, rayon and linen goods. The United States ranks first as the source of imports.

History and Government. Following three centuries of Spanish rule, the Presidency of Quito (Ecuador) was united to the Republic of Colombia, Dec. 17, 1819, from which it seceded May 13, 1830 and became a republic.

Under the republic's new constitution (promulgated March 6, 1945, effective Dec. 31, 1946), the President is elected directly by the people for a four-year term and the Congress consists of a Senate and Chamber of Representatives.

The president is Dr. Jose Maria Velasco Ibarra, elected June 1, 1952.

Education and Religion. Roman Catholic is the chief religion. Primary education is compulsory.

Defense. Military service is compulsory.

Egypt

JAMHURIYAT MISR

Capital: Cairo. Area: 386,198 sq. mi. (est.). Population (U.N. est. 1954): 22,469,000. Flag: White crescent and three five-pointed stars on green field. Monetary unit: Egyptian pound, 100 piastres (U.S. \$2.87).

Descriptive. Egypt, a republic since 1953, occupies the northeast corner of Africa on the Mediterranean sea. On the East lie Israel and 1,200 mi. of Red Sea separating Egypt from Saudi Arabia. Libya is on the West and Sudan is south of 22° N. Lat. The peninsula of Sinai extends into the Red Sea, with the Gulf of Aqaba on the East and the Gulf of Suez inside Egypt, and the Suez Canal connecting the Gulf of Suez with the Mediterranean. Jurisdiction over a 28-mi. wide strip of Asia Minor west of Israel, including Gaza, was given Egypt by an armistice commission as a refuge for displaced Arabs.

Alexandria is the chief port. Cairo, largest city, is rich in archaeological treasures, cafes, bazaars. Excursions for tourists are conducted to the pyramids, Sphinx, temple ruins at Karnak and Luxor, and other ancient monuments.

Resources and Industries. Productive acreage lies in the Valley of the Nile and its delta, or Lower Egypt, north of Cairo. The Nile flows through 960 mi. in Egypt and covers 2,850 sq. mi. with waters and marshes. About 13,000 sq. mi. are cultivated for cereals, vegetables, cotton and sugar cane, and 1,900 sq. mi. have canals and fruit plantations. The Nile rises in June and reaches its peak by October, regulated by dams. The land is divided into rectangular basins protected by banks; water is admitted to a depth of 3 ft., and left 40 days; it is then run off and seed is broadcast. Fruit is plentiful and includes grapes, dates, lemons, pomegranates, peaches, apricots, oranges, lemons, bananas and olives.

A 5-year land reform, begun Sept., 1952, limited land holdings to 200 acres and enables peasants to acquire them on 30-year payments. Large holdings were requisitioned but owners were reimbursed.

The dams conserving Nile waters are among the largest in the world. Aswan, at the First Cataract, is 176 ft. high, creating a reservoir 230 mi. long. Gabel Awila dam is over 3 mi. long. The High Dam project to be constructed in southern Egypt just south of the present Aswan dam will back up 140 to 216 billion cu. yds. of water, add 2,000,000 acres to arable land and create hydro-electric power of 10 billion kw. annually. It will cost \$500,000,000 and be exceeded in size only by Fort Peck Dam (U.S.).

A variety of minerals is found in Egypt, principally phosphate rock and petroleum. Others are ochres, sulphate of magnesia, talc, building stones, gypsum, natron, salt, gold, iron, alum, copper, beryl, granite and sulphur.

Egypt has textile plants, yarn factories, cement and fertilizer factories, and a thriving film industry supplying the Arab world.

The principal imports are wheat, textiles, mineral, chemical and pharmaceutical products; wood and cork articles; paper; metals; machinery and motor vehicles. Exports are chiefly agricultural products and cotton.

History and Government. Archaeological records of ancient empires in Egypt go back to 4,000 B.C. A high civilization of rulers and priests dominated the lowly serfs. Assyrians, Persians, Greeks (Alexander of Macedon), Romans, Saracens, Turks, French (Napoleon) and British invaded Egypt. Under Turkish sultans the khedive as hereditary viceroy had wide authority but repeated insolvency led to regulation by European powers. Britain, which supervised the administration after 1882, made Egypt a protectorate in 1914 to defend it when Turkey joined Germany in war, but ended it Feb. 28, 1922. Britain then recognized Egypt as a sovereign state but reserved defense, security of British communications and nationals, and the Sudan.

The sultan became King Fouad I Mar. 15, 1922, and a constitution was adopted 1923. King Fouad I died Apr. 28, 1936, and was succeeded by his son, Farouk I, who did not come of age until July 29, 1937. Farouk was married to (1) Farida Zulfikar, divorced 1943; children, Princess Ferial, b. 1939, Princess Fawzia, b. 1940, Princess Fadia, b. 1943; (2) Narriman Sadek, May 6, 1951, divorced Feb. 2, 1953; Son: Prince Ahmed Fouad II, b. Jan. 16, 1952. King Farouk abdicated July 26, 1952, and left the country. His son was named nominal ruler under a regency council, Aug. 5, 1952. The crown was abolished when Egypt was declared a republic, June 18, 1953.

A movement for complete national independence, expansion of territory and closer association with the Arab world in Near East aims developed powerfully in the 1930's.

In 1936 an Anglo-Egyptian treaty of alliance revised the conditions of association. Britain agreed to a condominium over the Sudan, with British and Egyptian troops cooperating, and obtained the right to retain 10,000 soldiers and 4000 airmen to defend the Suez Canal for 20 years until Egypt could take over, and also held naval bases in Alexandria and Port Said.

Egypt became a charter member of the U.N. and in 1945 led in organization of the Arab League. In 1947 Egypt brought before the Security Council, U.N., a demand for unification of Egypt and Sudan and evacuation of all British troops from the Suez. In October, 1951, Egypt abrogated its 1936 treaty with Britain. Parliament amended the constitution Oct. 16, 1951, to provide for a separate Sudanese constitution. The Sudan, with U.N. support, moved toward independence, but a strong pro-Egypt party developed in the Sudan. See Sudan.

Negotiations over the Suez resulted in frequent clashes on the border. A 7-year Anglo-Egyptian agreement was signed in Cairo, October, 1954, providing for withdrawal of all British troops from the Suez Canal zone by June 18, 1956. Consult Suez Canal.

Delays in reforms, corruption in public office and royal extravagance led to an uprising July 23, 1952, when Maj. Gen. Mohammed Naguib (b. 1901), seized Cairo with the help of the army, and forced King Farouk out. Royalists and leaders of the Wafdist (extreme nationalist) party were arrested. The constitution was cancelled and a transition government instituted. Naguib became premier Sept. 7, 1952. When the republic was proclaimed June 18, 1953, Naguib became its first president and premier. Lt. Col. Gamal Abdel Nasser succeeded Naguib as premier Apr. 18, 1954. An attempt to kill Nasser was made Oct. 26, 1954, by

members of the Moslem Brotherhood, and when Naguib's name was linked with the Brotherhood the military junta removed Naguib from the presidency. Nasser assumed the duties but not the title. The transition government comprises the premier and a cabinet of 10 Revolution Command Council members and 8 civilian experts; the judiciary is independent. A republican constitution is planned and parliamentary elections tentatively scheduled for 1956.

A social security law, passed in 1950, first in any oriental country, was put in preliminary operation May 1, 1951. The Ministry of Health maintains over 200 hospitals, works for sanitation with help of the Rockefeller Foundation.

Education and Religion. Moslems form 91.40% of the population. Christians 8.19% and Jews 0.40%. Education is compulsory for all children between the ages of 7 and 12 and free through high school. There is a famous seat of Moslem learning in the University of Al-Azhar in Cairo, founded about 968 A.D. Three modern universities are Cairo University, Alexandria Univ., and Heliopolis Univ. There are two American centers: American University, Cairo, and an American College for women, Assiut, Upper Egypt.

Defense. Military service is compulsory for all. The Army and Air Force have been expanded.

A Navy program comprising frigates, torpedo boats, minesweepers and other vessels is under way.

THE SUEZ CANAL

The Suez Canal, 103 mi. long, joins the Mediterranean and the Red Sea. Its minimum width is 196 ft., 10 in., and maximum draft for vessels 35 ft. It was begun April, 1859, by a French corporation under Ferdinand de Lesseps and opened Nov. 24, 1875. Benj. Disraeli, British prime minister, obtained control for Britain Nov. 24, 1875, by buying 176,752 shares from the Khedive Ismail of Egypt for £3,976,582 (nearly \$20,000,000). Britain increased its holdings to 295,026 shares out of 652,932. The canal was to revert to Egypt in 1968, but prolonged nationalist agitation with clashes led to an agreement July 27, 1954, by which Britain agreed to withdraw all troops (est. 80,000) within 20 mos. after signing pact on Oct. 19, 1954. For 7 years British troops may return if Egypt, any Arab nation or Turkey is attacked. Freedom of navigation, agreed 1888, was guaranteed to all nations, but Israel complained to the U.N. that its ships were being barred, leading to a directive to Egypt to yield passage.

El Salvador

REPUBLICA DE EL SALVADOR

Capital: San Salvador. Area (prov. est.): 8,259 square miles. Population (U.N. est. 1954): 2,122,006. Flag: three horizontal bars, blue-white-blue, coat of arms on white. Monetary unit: Colon (U.S. 40c).

Descriptive. El Salvador, smallest of the six Central American or Middle American republics and only one without an Atlantic seacoast, is bounded on the West by Guatemala, on the North and East by Honduras and the Gulf of Fonseca, and on the South by a Pacific coastline of about 160 miles. A country of mountains, hills and upland plains, it is entirely within the tropics, but tropic heat is modified by the elevation.

San Salvador, the capital, is connected by rail or highway with all towns of importance. Three seaports, La Libertad, Acajutla and La Union (Cutuco) are the principal means of entry.

The three racial types are white, mestizo (of mixed white and Indian blood) and Indian, the latter comprising about 20% of the population. About 62% is rural.

Resources and Industries. The coffee plantations on the mountain slopes are the country's economic mainstay, furnishing 80% of its exports. Henequen, gold, sugar and balsam are also exported. Imports include cotton textiles, iron and steel manufactures, automobiles and trucks, wheat and flour, drugs and pharmaceuticals.

History and Government. El Salvador became independent of Spain in 1821; member of the Central American Federation until 1839. The constitution provides for a unicameral legislative system, the National Assembly of Deputies, elected by popular vote. Voting is compulsory for males over 18. Married women more than 25 and unmarried women more than 30 are allowed franchise. Women with a professional degree are entitled to vote when they are 21. Executive power is vested in the president who is elected by direct, popular vote and is ineligible for immediate re-

lection. The president is assisted by a Council of Ministers who are named by him.

President: Oscar Osorio, elected March 26, 1950. Education and Religion. Education is free and compulsory and the language is Spanish. The dominant religion is Roman Catholic.

Defense. There is military instruction between the ages of 18 and 40. There is one Aviation Corps.

Estonia

EESTI VABARIIK

ESTONIAN SOVIET SOCIALIST REPUBLIC

Capital: Tallinn. Area (1940): 18,353 square miles. Population (1940): 1,134,000.

Descriptive. Estonia comprises the one-time Russian Empire province of Estonia (Eestimaa), the northern part of Livonia, parts of the former Põhja-Eesti Kriis and a number of islands in the Baltic Sea. It is bounded on the East by the U.S.S.R., Latvia on the South, the Gulf of Riga and the Baltic on the West, and the Gulf of Finland on the North. The Estonians are of Finnish-Ugrian origin. The country is a low plain interspersed with a series of rolling hills.

Resources and Industries. Chief occupations are agriculture and dairy farming. Crops include rye, oats and barley. About 22% of the territory is covered by forests which furnish material for furniture, match and pulp industries. Textiles, agricultural machinery, precision instruments also are manufactured. Mineral resources include shale, peat, phosphorites.

By 1950 over 80% of all peasant farms had been collectivized.

History and Government. Estonia declared its independence from Russia Feb. 24, 1918. It was overrun and incorporated by the U.S.S.R. in June 1940. This action has not been recognized by the United States. Estonia was known as a country of quaint medieval towns. Tallinn was founded by King Valdemar II of Denmark in 1219; Narva, founded in the 13th century, contained a fortress built by the Russian Grand Duke Ivan III in 1492.

Education and Religion. Before the occupation, 78.6% of the population were Lutherans, 19% Greek Orthodox. Compulsory school attendance was extended to seven years in 1945; in 1950 there were 150,000 pupils. In 1949 there were 8 institutions of higher education, including Tartu (Dorpat) University, founded in 1632.

Ethiopia

ABYSSINIA

YEITIOPIA NEGUSE NEGUEST MENGIST

Capital: Addis Ababa. Area: 350,000 square miles (398,350 including Eritrea). Population (Govt. estimate 1953): 18,180,000. Flag: three horizontal bars, green-yellow-red, with lion in yellow bar. Monetary unit: Ethiopian dollar.

Descriptive. Ethiopia (or Abyssinia), a kingdom, one of the oldest Christian nations in the world, is a mountainous volcanic country in Northeast Africa, bounded by Eritrea, French Somaliland and British Somaliland on the Northeast, Italian Somaliland on the Southeast, Kenya Colony (British) on the South and the Sudan on the West.

Its principal rivers are the Abba (Blue Nile), Baro, Gibe, Didessa, Wabi, Awash, Juba, and Wabi Shebell. The climate is largely temperate, with a rainy season from June to September.

Resources and Industries. Economy is mainly agricultural but industrial resources are potentially great. After agriculture Ethiopia's most important resource is vast hydroelectric power, surveys of which are under way with aid of the International Bank. Modern industrial enterprises are conducted by American and other firms.

Fertile soil and abundant rainfall produce two crops annually. Wheat, barley, millet, tobacco, sugar and coffee are principal crops. Cattle, sheep, goats and mules are raised in great numbers. The horses are small but sturdy and popular as polo ponies. Coffee of extremely high quality, used for blending, from the Province of Kaffa, accounts for half of the country's foreign exchange. Hides and skins of domestic and wild animals also are exported. Mineral resources include platinum, gold, silver, manganese, tin, copper, asbestos, potash, sulphur, mica, cement, and salt. There are known deposits of coal and iron; tests are in progress for petroleum.

Of the country's 683 mi. of railroad, 486 mi. connect Addis Ababa with Djibouti, French Somaliland. The highway system, 4,000 mi., three-fourths of which are all-weather roads, is under

expansion, as are radio, telephone and telegraph communications.

History and Government. Ethiopia is an ancient empire comprised of a number of earlier kingdoms. Italy invaded the country in 1935 without declaring war and partially occupied it. Emperor Haile Selassie fought until forced to withdraw, leaving for Europe to appeal to the League of Nations for help. The League applied sanctions against Italy, which proved ineffective. Mussolini added Ethiopia to Italy with Victor Emmanuel III emperor. British forces occupied Ethiopia, 1941, and freed it. Eritrea, former Italian colony, was federated with Ethiopia in 1952.

The present Emperor, Haile Selassie I, 225th consecutive Solomonic ruler, was born July 23, 1892, crowned Nov. 2, 1930. He voluntarily established a Parliament and judiciary system, July 16, 1931. Members of the Senate, provincial governors and judiciary are appointed by the King and Council of Ministers; those of the Lower House are elected.

Education and Religion. Ethiopians are of Semitic and Hamitic descent; culture has been influenced by Greece and Egypt. Christianity is the predominant religion, embraced in 330 A.D.; the Coptic, Monophysite branch is practiced. Until 1952 the Egyptian Coptic Patriarch was the head of the Church, but the Emperor now appoints the Ethiopian Archbishop. The estimated religious population follows:

Christians (Amhara and Tigreans)	10,340,880
Mohammedans	3,368,880
Jews and others	4,470,240

There are a number of training colleges, including a university college at Addis Ababa, and secondary and elementary schools. The official language is Amharic; English is widely taught. Forty-six hospitals and 150 clinics operate; epidemic prevention is under direction of Ethiopian Pasteur Institute.

Defense. The Emperor commands the Army, Navy and Air Force. High-ranking officers are trained in the United States and Great Britain.

ERITREA

Eritrea, an Italian colony for 67 years, stretches for 670 miles along the African coast of the Red Sea from Cape Kasar to Cape Dumereh, bordered on the west by the Sudan, on the south by Ethiopia and French Somaliland. Its area is 48,350 sq. mi., population, est. 1951, 1,080,000.

The lowlands along the coast are hot and malarial, but the uplands are often cold. Agriculture and stock raising are the chief industries. A railroad 75 miles long connects the seaport Massawa with the capital, Asmara, and Cheren and Agordat. Gold is mined in Hamassen and petroleum has been found.

The U.N. General Assembly, regulating Italy's former colonies, voted Dec. 3, 1950 that Eritrea, administered since World War II by Great Britain, be federated with Ethiopia. Eritrea chose a 68-member Assembly in March, 1952, which approved, July 9, a constitution drawn up by a U.N. commission establishing the region as an autonomous unit federated with Ethiopia, effective Sept. 11, 1952, when the Emperor signed the act of federation. Eritrea is represented in the Ethiopian Parliament and Federal Council.

Finland

SUOMEN TASAVALTA—REPUBLIKEN FINLAND

Capital: Helsinki. Area: 130,165 square miles. Population (U. N. estimate, 1954): 4,190,000. Flag: Extended blue cross on white field. Monetary unit: Markka (U.S. 0.4348¢).

Descriptive. The Republic of Finland is bounded on the North by Norway, on the East by the U.S.S.R., on the South by the Gulf of Finland, and on the West by the Gulf of Bothnia, Sweden and Norway.

Seventy percent of the land is forested. The lake and canal waterways are navigable for 3,000 miles.

Resources and Industries. Although extending far north into extremely cold latitudes, with rugged climate and topography, Finland is an agricultural country. Lumbering is the most important industry. The principal crops are rye, wheat, barley, oats, potatoes and hay. Other chief industries in the order of their importance are—paper and pulp; iron and mechanical works; textiles, leather, rubber, fur and chemicals.

The country's economy recovered remarkably from effects of World War II. The index of industrial production (1948—100) reached 142 in

1954. Production rose 13% over 1953. Chemical pulp increased 37%, cardboard 21%; export industries 25%.

Finland's merchant marine reached an all-time record of 675,544 tons at end of 1953.

The cooperative system has worked throughout Finland for nearly 40 years with marked success.

Foreign trade (in markkas):

	Imports	Exports
1952	182,186,000,000	156,829,000,000
1953	121,860,000,000	131,555,000,000
1954	152,137,000,000	156,618,000,000

History and Government. Finland formed part of the Kingdom of Sweden, 1154-1809, then became an autonomous Grand Duchy of the Russian Empire. The country declared its independence Dec. 6, 1917, and became a republic July 17, 1919.

Finland was attacked by the Union of Soviet Socialist Republics Nov. 30, 1939 and made peace after three months of fighting. Through the peace (March, 1940) Finland ceded to the U.S.S.R. 16,173 square miles of territory. All this was recovered in 1941 when Finland joined Nazi Germany against U.S.S.R. After its defeat Finland Sept. 19, 1944, ceded to the U.S.S.R. the Petsamo area and leased the Porkkala headland for 50 years to the U.S.S.R.

On Apr. 6, 1948 Finland signed a ten-year friendship and mutual assistance pact with the U.S.S.R. It also signed 5-year trade pacts in 1950 and 1954. Finland completed reparations payments in goods valued at \$226,500,000 (1938 prices) in Sept. 1952.

The President is chosen for a term of six years by an Electoral College of 300 named by direct vote; he appoints the Cabinet. Juho K. Paasikivi was elected President by Parliament March 9, 1946; re-elected Feb. 1950. The Premier is Dr. Urho Kekkonen, appointed Oct. 20, 1954.

There is a single legislative chamber, the Diet (Eduskunta), and the voting system is designed for proportional representation.

In general elections March 7-8, 1954, the 200 seats in the Diet were distributed: Social Democrats, 54; Agrarians, 53; People's Democrats, 43; Conservatives, 24; Swedish People's party, 13; Finnish People's, 13.

Education and Religion. The Evangelical Lutheran Church is the state religion, although there is absolutely free worship. Literacy rate is highest in the world—99%. There are three major universities—one in Helsinki and two in Turku, and 3 colleges of technology and commerce in Helsinki.

Defense. Universal military service prevails from 17 years to 60. Males reaching 21 are summoned to service for a period of approximately a year for training. There is also an Air Force and a Coast Defense. Finland's peace effective force is limited by the Peace Treaty, Feb. 10, 1947, at 41,900, all arms.

France

LA REPUBLIQUE FRANCAISE

Capital: Paris. Area: 212,659 square miles. Population (1954 census): 43,041,000. Flag: three vertical bars, blue-white-red. Monetary unit: Franc (U.S. 0.2857c).

Descriptive. The Republic of France, most westerly country of Central Europe, extends from 42° 20' to 51° 5' north latitude, and from 7° 45' East longitude to 4° 45' West longitude.

On the East and Northeast lie Belgium and Luxembourg, the Saar and Germany. The Jura mountains and Lake Geneva separate it from Switzerland and the Graian Alps and the Maritime Alps from Italy on the Southeast. On the South are the Mediterranean Sea and Spain, with the Pyrenees for the boundary line. On the West are the Bay of Biscay and the Atlantic Ocean, and on the North the English Channel and the Straits of Dover separate it from England. From the North to the South its length is approximately 600 miles, and from the western extremity near Brest to Strasbourg on the Rhine it is about 560 miles long; the coastline on the North is 700 miles long; along the Atlantic and the Bay of Biscay, 865; on the Mediterranean, 384 miles.

The island of Corsica, which lies in the Mediterranean off the West coast of Italy and North of Sardinia, forms an integral part of France. It has an area of 3,367 square miles and a population (1954) of 244,266. The capital is Ajaccio, birthplace of Napoleon.

France has the highest mountain in Europe west of the Caucasus; Mont Blanc is 15,781 ft. On the French side of the Pyrenees are several peaks exceeding 10,000 ft. in height.

There are four important rivers, the Seine, the Loire, the Garonne and the Rhone, the left bank of the Rhine from Basle, Switzerland, to Lauterbourg, and a dozen others, all of great value because of canalization, which binds them together. The waterways total 7,543 miles in length, of which canals cover 3,031.

Resources and Industries. Agriculturally, France is a country of small diversified farms occupying 30% of the employed, producing wheat, corn, rye, barley, oats, potatoes, grapes, apples, pears, plums, peaches, apricots, nuts and cherries. The agrarian structure is under modernization. The fishing industry is extensive.

The country is rich in minerals, and the basins of Pas de Calais and Lorraine are noted for their huge coal deposits. Subterranean products, besides coal, include lignite, iron ore, bauxite, pyrites, mineral oils, auriferous ore, asphalt, rock salt and potash salts. The iron ore deposits in eastern France and the bauxite deposits in central France are among the richest in the world.

Seven power stations built since 1945 produce over 1 billion kwh annually. Projects are under way to develop the Rhone River Valley and the Rhine between Basel and Strasbourg.

French railways, totalling 26,417 miles, and formerly owned and operated under seven great railway systems, two of which were State-owned, were merged Jan. 1, 1938 into one French National Railway system, the Société Nationale des Chemins de Fer Francaise. The merchant marine has increased by 860,000 tons since 1939 to 734 ships totaling 3,591,030 tons in 1955.

Manufactures occupy a predominant position in the economic life of the nation, and chief among these are the making of chemicals, silk and cotton textiles, perfumes, automobiles and iron products. Industrial production (1938-100) reached 166 in Dec., 1954, averaging 153 for the year. Some of basic principles of atomic energy were discovered by French scientists. It has Saclay pile and planned to have atomic power plants in operation at Marcoule by July, 1956.

Numerous small units, many of the family type, are characteristic of French economic activity. The National Institute of Statistics found that 54.2% of industrial and commercial establishments in 1953 had no salaried workers, but were operated by the owner and often with his wife. Of the 45.8% employing salaried workers, over half employed only one worker, while those with 51 to 100 or more workers were only 1.1% of the total. At the end of 1953 only 2,000 establishments had more than 2,000 workers, mostly metallurgical, with 17 producing motor vehicles and bicycles. The most numerous small units, 343,552, distributed farm products and foodstuffs.

Foreign trade, including overseas territories (in dollars):

	Imports	Exports
1948	2,510,000,000	1,082,000,000
1949	2,426,000,000	1,574,000,000
1950	3,064,942,857	3,064,635,714
1951	4,591,900,000	4,225,000,000
1952	4,547,000,000	4,047,085,717
1953	4,166,000,000	4,020,000,000
1954	4,348,800,000	4,321,000,000

Trade with the United States (in dollars):

	Imports	Exports
1948	591,000,000	73,000,000
1949	497,000,000	61,000,000
1950	370,300,000	124,800,000
1951	545,400,000	311,200,000
1952	499,600,000	225,700,000
1953	385,714,285	182,057,142
1954	380,914,000	154,629,000

The next international exposition in Paris will be held in 1961 (originally scheduled for 1957).

History and Government. The monarchical system was overthrown by the French Revolution (1789-1793) and succeeded by the First Republic; thereafter successively followed by the First Empire under Napoleon (1804-1814), a monarchy (1814-1848), the Second Republic (1848-1852), the Second Empire (1852-1870), the Third Republic (Sept. 4, 1870).

France, after a four-year interlude of totalitarian government following her conquest in 1940 by the Nazi war machine and two years of political changes, adopted, Oct. 13, 1946, a new Constitution establishing the Fourth Republic.

France was invaded by the Nazi armies in May, 1940 and Paris was occupied June 14, 1940. An armistice was signed and Marshal Henri Philippe Petain was empowered by the National Assembly to become chief of state and revise the constitution.

His government functioned at Vichy in unoccupied territory.

With the liberation of France by the Allied Armies in Sept., 1944, a Provisional Government, headed by Gen. Charles de Gaulle as President of council was established by the French Committee of National Liberation which had been formed in Algiers, 1943. This government resigned Jan., 1946. Felix Gouin was elected president-premier, but resigned June 11, and Georges Bidault was made president-premier June 24, 1946. A new constitution was effective Dec. 24, 1946. It provides for a parliament consisting of the National Assembly of Deputies (currently 627) and a Council of the Republic with 320 members. Legislative powers are vested exclusively in the Assembly, with the Council acting in an advisory capacity. A constitutional act, Dec. 7, 1954, restored broader powers to the Council. The President has wider powers than under the Third Republic but he cannot dissolve the Assembly. He is recognized as the head of the French Union, and serves for seven years. He may be reelected only once.

The President is Rene Coty, Independent, elected Dec. 17, 1953, at a joint session of Parliament by a vote of 477 out of 947, succeeding Vincent Auriol. Premier: Edgar Faure, Radical, chosen Feb. 23, 1955, succeeding Pierre Mendes-France, resigned Feb. 5.

Under the Constitution the French Union consists of 90 Departments of Metropolitan France, seven Overseas Departments, and a number of Overseas Territories, Trust Territories and Associated States. The Overseas Territories are endowed with a special statute with respect to their particular interests within the framework of the Republic. Among the 97 Departments into which France is divided for administrative purposes, the three northern Departments of Algeria in Northern Africa—Algiers, Oran and Constantine—have been treated as an integral part of France since 1881. The former colonies of Martinique, Guadeloupe, Reunion and Guyane (French Guiana) were given the status of Overseas Departments Jan. 1, 1947.

Each of the Overseas units is represented in the National Assembly and Council of the Republic. Overseas Departments have at their head a Governor (Prefet) and an elected General Council; their towns have elected municipal councils. The Overseas Territories have local assemblies and, according to their development, their towns have elected municipal councils and mayors.

Following National Assembly elections June 17, 1951, seat strength of the six main parties exclusive of affiliates was: Reunion of the French People (Gaullist), 118; Socialist, 105; Communist, 99; Popular Republican, 83; Radical Socialist, 66; Independent Republican, 43.

Both employers and employees contribute to the old-age pension fund. There is provision for family allowance, and compulsory social insurance for illness, maternity, disability and death.

Since its liberation, France has put into effect a program of progressively nationalizing industries, banks, coal mines, air lines, and other utilities.

The Assembly granted Premier Faure temporary economic powers in an effort to expand agriculture, industrial production and foreign trade, and to reform the tax system in 1955.

The budget in francs:

1950	2,217,000,000,000
1951	2,648,000,000,000
1952	3,498,000,000,000
1953	3,631,400,000,000
1954	3,327,000,000,000
1955	3,369,400,000,000

Education and Religion. Primary, secondary and higher education are free and instruction is compulsory between the ages of six and 14. There are 17 universities in the country.

The country is predominantly Roman Catholic, only about 1,000,000 being Protestants. The state recognizes no religion and tolerates all.

Defense. Compulsory service for 20-year-olds was raised from 12 to 18 months Oct. 28, 1950. Compulsory military training has existed since 1798. An extensive rearming program is under way, with the help of American funds. France supports the North Atlantic Treaty Organization, voting ratification of Western European Union treaty authorizing rearmament of West Germany, Mar. 27, 1955. It also is a member of the Western European Coal and Steel Community, and has a long-term pact with the Saar for lease of the latter's mines and other economic relations.

ALGERIA L'Algerie

Algeria is in the northern part of Africa, extending for 650 miles along the Mediterranean Sea, between Tunisia on the East and Morocco on the West. Both neighbors are French Protectorates. The northern territory extends inland approximately 350 miles; beyond, the four southern territories extend southward indefinitely into the Sahara Desert, merging into French West Africa. On the coast is an area, the Tell, from 50 to 100 miles wide, of very fertile plains with valleys running out from the hills. The two chains of the Atlas Mountains, reaching to altitudes of 7,000 feet, divide the country from the Sahara. Algeria has a population of 9,251,000 (est. 1952) and area of 847,552 square miles. The capital is Algiers. The natives are Moslems.

The Northern Territory, area 80,117 square miles is divided into three Departments: Algiers, population, 2,765,898; Oran, 1,990,729; and Constantine, 3,102,396. Each Department sends senators and deputies to the National Assembly.

The Southern Territories of Ain-Sefra, Ghardaia, Tougourt and the Saharan Oases have 767,435 square miles; population (1948) 816,993.

Under the revised statute of 1947 there is an Algerian Assembly, of two colleges of 60 members each and a government council to assist the governor general. The Southern Territories are administered by the governor general.

Agricultural products include wheat, barley, oats, corn, potatoes, artichokes, flax and tobacco. Wine and olive oil are produced. Dates, pomegranates and figs grow abundantly. Cattle raising is paramount. There are large deposits of iron, zinc, lead, mercury, copper and antimony.

The unit of currency is the Algerian franc, equivalent to the French franc.

The principal imports are textiles, machines, automobiles, petroleum, sugar, coal, iron and steel, cereals and coffee. Exports consist chiefly of wines, cereals, sheep, olive oil, alfalfa, spirits. Trade is mainly with France.

TUNISIA Afrikiya; Tunisie

Tunisia, a Protectorate, one of the former Barbary states under the suzerainty of Turkey, is situated on the northern coast of Africa, with the Mediterranean Sea on the North and East, Libya on the Southeast, the Sahara Desert on the South and Algeria on the West. The capital is Tunis. The country has an area of 48,313 square miles and a population (1953) of 3,500,000, including 123,000 aliens. The native population is composed of Arabs and Berbers. The titular ruler (Bey of Tunis) is Sidi Mohammed el Amin Pasha.

France sent a military force into the country in 1881 to protect Algeria from the raids of the

Khroumer tribes, which resulted in a treaty, signed May 12, 1881, placing Tunisia under the protectorate of France.

Reforms introduced since 1947 insured a large measure of self-government and led to an agreement, signed June 3, 1955, approved Aug. 4, which restored internal sovereignty and provided for an elected Tunisian Assembly.

There are large fertile valleys in the mountainous north, excellent land for fruit culture in the northeast peninsula, high tablelands and pastures in the center, and famous oases and gardens in the south, where dates grow in profusion. The chief industry is agriculture, and wheat, barley, oats, olives, grapes and dates are produced in abundance, besides almonds, oranges, lemons, shadocks, pistachios,alfa grass, henna and cork. Lead, iron, phosphate and zinc are the most important minerals.

Textiles, manufactured metals, and minerals comprise the chief imports; agricultural products, olive oil, and minerals are the principal exports.

MOROCCO

(For the French Protectorate in the Monarchy of Morocco, commonly called French Morocco, see page 366.)

FRENCH WEST AFRICA

French West Africa, federation of overseas territories, reaches from the Atlantic Ocean at about 17° west longitude across Africa to the Sudan at about 15° east longitude and from the southern desert boundaries of Morocco, Algeria, Tunis and Libya to the Gulf of Guinea and the indeterminate boundary of French Equatorial Africa. It has been formed by consolidation of seven colonies. The capital is Dakar.

The territories export fruits, palm nuts and oil, rubber, cotton, cacao, coffee, woods, and peanuts. The chief imports are foodstuffs, textiles, machinery and hardware, and spirits. Trade is mainly with France.

Colony	Sq. mi.	Pop., 1951
Senegal, incl. Dakar dist.	80,600	2,092,700
Guinea	105,200	2,260,600
Ivory Coast	123,200	2,170,000
Upper Volta	105,900	3,108,600
Dahomey	45,900	1,534,600
French Sudan	450,500	3,346,900
Mauritania	415,900	566,870
Niger	494,500	2,127,330
Total	1,821,600	17,207,600

FRENCH EQUATORIAL AFRICA

French Congo

French Equatorial Africa, federation of overseas territories, is in the heart of Africa and has a seacoast on the South Atlantic Ocean between Spanish Guinea and the Belgian Congo.

Its other neighbors are the Cameroons, Sudan, Libya, French West Africa and Nigeria. French acquisition began in 1841 and its territory has since been extended by exploration and settlement. That part (107,270 square miles) ceded to Germany as compensation for acknowledgment of the Morocco protectorate, 1911, was restored to France in the Treaty of Versailles and incorporated in this territory. The capital is Brazzaville. The constituent territories are:

Territory	Sq. mi.	Pop., 1951
Gabun	103,000	407,400
Middle Congo	132,000	694,800
Ubangi-Shari	238,000	1,081,600
Chad	496,000	2,252,700
Total	969,000	4,436,500

There are 300,000 square miles of tropical forests, rich in timber. Precious stones, gold, copper, lead and zinc are found. Manganese of high grade was discovered in 1953. Commerce is chiefly with France. Exports include diamonds, gold, crude and finished ivory goods.

CAMEROONS AND TOGOLAND

French Cameroons is part of the former German colony, Kamerun, in western Africa. It consists of 166,489 square miles and was allotted to France as a Mandate by the Treaty of Versailles, constituted an autonomous territory by decree, March, 1921, and made a U.N. Trusteeship Dec., 1946. It is governed by a Commissioner. The capital is Yaounde. Its population (estimated 1953) is 3,065,000 including several thousand Europeans.

The colony has two seaports. Its chief products are palm oil, groundnuts, almonds, hides, cacao and ivory. Trade is principally with France.

Of Togoland, pre-World War I, German colony, France received 21,893 square miles, about two-thirds, which was attached to French Dahomey. It now is a U.N. Trusteeship with a population of 1,029,945 in 1952.

FRENCH SOMALILAND

French Somaliland lies between Eritrea, Ethiopia and British Somaliland and is separated by the Straits of Bab-el-Mandeb from Aden (British).

The area is 9,071 square miles and population (est.), 61,625; the capital is Jibuti, its port on the Gulf of Aden, acquired in 1862.

The Territory has few industries, except fishing and livestock. Salt is its most valuable resource and export.

MADAGASCAR

Madagascar, an Overseas Territory, is an island off the East coast of Africa from which it is separated by the Mozambique Channel (240 miles wide at its narrowest part). It is about 980 miles long and 360 miles wide at its greatest breadth. The area is 241,094 square miles; population (1953), 4,369,500. The capital is Tananarive. To Madagascar is attached for government the prosperous archipelago of the Comoro Islands with an area in all of about 790 square miles, and a population (1953) of 187,933.

Madagascar came under a French protectorate, 1885, and was declared a French colony in 1896. More than 3,000,000 acres are under cultivation, the chief crops being rice, manioc, beans, vanilla, maize, sweet potatoes, corn, coffee, cloves, tobacco, sugar cane and cacao. The forests are rich in cabinet wood and tanning bark, raffia, resins, gums and beeswax.

Agriculture and stock-raising are the chief industries. Minerals found include graphite, mica, precious and industrial stones, kaolin, nickel ore, phosphate, gold, uranium and radium.

REUNION

Reunion, a Department, is an island in the Indian Ocean, about 420 miles east of Madagascar, and has belonged to France since 1643. Reunion is entitled to representation in Paris by two Senators and three Deputies. The area is 969 sq. mi.; the population (1954) of 274,370 is 30% of French extraction. The chief products are sugar, rum, coffee, manioc, tapioca, vanilla and spices. The chief imports are rice and cereals.

INDO-CHINESE ASSOCIATED STATES

	Capital	Area, sq. mi.	Pop. (est. '49)
Viet Nam	Saigon	127,380	22,614,000
Cambodia	Phnom-Penh	88,780	3,227,000
Laos	Vientiane	69,480	1,189,000

The Indo-Chinese Associated States situated in the southeastern part of Asia now comprise the three states listed above. Viet Nam consists of the former states of Tonkin, Annam and Cochinchina. Cambodia and Laos are constitutional monarchies. The group is bounded on the North by China, on the East and South by the South China Sea, and by Thailand on the West. The population (est. 1949) is 27,030,000, including 43,000 French.

The chief minerals are coal, tin, lead and zinc. The chief exports are rice, rubber, fish, coal, lumber, pepper, cattle and hides, corn, zinc and tin. The principal imports are cotton and silk cloths, metal articles, kerosene and automobiles.

The nationalist movement in Indo-China gained impetus during World War II, but attempts to foster it were hampered by guerrilla warfare. Bao Dai, former Emperor of Annam, was recognized as Chief of State of Viet Nam by an agreement signed Mar. 8, 1949, which provided for an independent Viet Nam within the French Commonwealth. Cambodia and Laos concluded separate agreements with France the same year. Accords of Dec. 29, 1954, granted the three states full economic independence. The King of Cambodia is Norodom Suramarit, who succeeded his son, Norodom Sihanouk, resigned Mar. 2, 1955. King of Laos is Sisavang Vong.

France opposed the forces of Ho-Chi-Minh, Communist leader, with an Expeditionary Corps and native Viet Nam troops, 1945-1954. A cease-fire accord signed in Geneva July 21, 1954, effective by sectors from July 27 to Aug. 11, divided Viet Nam roughly along the Ben Hai River and approximately coinciding with the 17th parallel, with a buffer zone. It provided for a phased 300-day withdrawal of French troops from Northern Viet Nam and elections to determine Viet Nam's future scheduled between July 1955 and July 1956. Under

the agreement the Communists gained control of the northern portion, about 77,000 sq. mi. and 12,000,000 population; South Viet Nam to comprise about 50,000 sq. mi. and 10,000,000 population. The Communist forces agreed to recognize the French-sponsored regimes of Laos and Cambodia.

An estimated 500,000 refugees moved from Communist-controlled sections to South Viet Nam by March, 1955. The regime was torn by serious civil strife in 1954-1955 and the South Vietnamese government of Premier Ngo Dinh Diem was menaced by armies of political rebels, religious sects and others. See *Chronology*.

GUADELOUPE

Guadeloupe, a Department, consisting of two large islands, Basse-Terre and Grande Terre, separated by a narrow channel and five smaller islands, is a group of the Leeward Islands in the West Indies between Antigua and Dominica. They have been in the possession of France since 1634 and are represented in Parliament at Paris by two Senators and three Deputies. The government consists of a Governor (Prefet) and an elected General Council. The soil is very productive. The area of the entire group of islands is 583 square miles; population (1954 census) is 229,120. Basse-Terre is the capital.

The principal exports are sugar, coffee, rum, cacao, vanilla, bananas.

MARTINIQUE

Martinique, one of the Windward Islands, in the West Indies, has been a possession since 1635, and a Department since Jan. 1, 1947. It is represented in the French Parliament by two Senators and three Deputies. It is administered by a Governor, a General Council, and elective Municipal Councils. In Martinique is located the famous volcano, Mt. Pelee which in eruption on May 8, 1902, destroyed the city of St. Pierre with more than 30,000 inhabitants. The island is the birthplace of the Empress Josephine.

Martinique has a population (1954 census) of 239,130, and an area of 380 square miles. The capital is Fort-de-France.

The chief exports are sugar, rum, bananas, pineapples and cacao beans. Trade is mainly with France and the United States. The franc is the monetary unit.

ST. PIERRE AND MIQUELON

St. Pierre and Miquelon are two groups of rocky barren islands close to the southwestern coast of Newfoundland, inhabited by fishermen. An administrator, assisted by a council, rules the islands. The exports are chiefly cod, dried and fresh, and other fish products. Imports consist of textiles, salt, wines, foodstuffs and meat. A regular boat service is maintained with North Sydney and Halifax. A telegraph cable connects St. Pierre with Europe and the American continent.

The St. Pierre group has an area of 10 square miles; Miquelon, 83 square miles. Total population (1951), 4,600. The capital is St. Pierre.

FRENCH GUIANA

French Guiana, a Department, is on the North coast of South America in the Atlantic Ocean with Dutch Guiana on the West and Brazil on the East and South. The population (1954 census) is 27,863, including the hinterland of Inini, separated territorially from Guiana July 6, 1930. The area of Guiana is 34,740 square miles. The area of Inini is 30,301 square miles. Guiana sends one Senator and one Deputy to the Chamber at Paris. The colony has a Governor and a Council General of 16 elected members. The capital is Cayenne.

In 1944 France ordered the famous penal colony, Devil's Island, to be liquidated and its 2,800 inmates repatriated.

Immense forests of rich timber cover the territory. Very little of the land is cultivated. The principal crops are rice, corn, manioc, cacao, bananas, and sugar cane. Placer gold mining is the most important industry. Exports comprise cacao, bananas, various woods, gold, fish glue, rum, rosewood essence, lumber and hides.

OCEANIA—SOCIETY ISLANDS (TAHITI, ETC.)

The French possessions, widely scattered in the southern Pacific Ocean, were grouped together in 1903 as one homogeneous colony under one Governor with headquarters at Papeete, Tahiti, one of the Society Islands. The other groups are the Marquesas, the Tuamotus Group, the Leeward Islands, the Gambier, the Tubuai, and Rapa Islands. Tahiti is picturesque and mountainous with a productive coastland bearing coconut, banana and orange trees, sugar cane, vanilla and other tropi-

cal fruits. Preparation of copra, sugar and rum are the chief industries.

The area of the islands administered at Tahiti is 1,520 square miles; population (est.), 63,000.

New Caledonia, with an area of 8,548 square miles and a population (est.) of 62,000, is 248 miles long and has an average breadth of 31 miles. It is about half way between Australia and the Fiji Islands. Its dependencies are: The Isle of Pines, the Wallis Archipelago, the Loyalty Islands, the Huon Islands, Fortuna, and Alofi. The group was acquired by France in 1854. A penal colony was maintained on Nou Island until 1896.

The colony is administered by a governor and an elective council general. Capital: Noumea.

Mining is the chief industry. Chrome, cobalt, nickel and manganese abound. Other minerals found are antimony, mercury, cinnabar, silver, gold, lead and copper. Agricultural products include coffee, copra, cotton, manioc (cassava), corn, tobacco, bananas and pineapples.

The New Hebrides, 250 miles Northeast of New Caledonia and 500 miles West of Fiji, is a group with an aggregate area of 5,700 square miles, having a native population estimated at about 50,000 and a small white population. The group has been a Condominium since 1906 and administered jointly by High Commissioners of France and Great Britain. Chief products are copra, cotton, cacao and coffee.

Germany

DEUTSCHLAND

Area (Oct., 1946): 143,200 sq. mi. Population (1946): 67,032,242; (1955 estimate): 71,581,249. Now divided into two opposing units: Federal Republic of Germany (West Germany), and German Democratic Republic (East Germany).

Descriptive. Germany, in Central Europe, is bounded north by the North Sea, Baltic Sea, and Denmark; east by Poland, Czechoslovakia, and Austria; south by Austria, Liechtenstein and Switzerland; west by North Sea, Netherlands, Belgium, Luxembourg and France. Final boundaries have not been established pending a peace treaty for the whole of Germany.

The German Empire reached its peak before World War I in 1914. At that time the homeland comprised 208,780 sq. mi., and German East Africa had 1,035,086 sq. mi. After the war Germany ceded Alsace-Lorraine to France; Eupen and Malmédy to Belgium; parts of Silesia to Poland and Czechoslovakia; part of Schleswig to Denmark; lost all of its colonies as well as the ports of Memel and Danzig. The Saar, industrial region, went to a League of Nations commission for 15 years, after which it was returned to Germany by plebiscite. In 1938 Germany had 186,627 sq. mi.; population (census 1939), 69,022,213.

The climate and terrain are varied. West Germany includes large parts of the Rhine basin, with hilly sections adjoining both banks of the Rhine river filling center of the country. North of Bonn are the plains of the upper Rhine and lowlands of Cologne. The climate ranges from oceanic in the northwest to continental east of the Weser river and Bavaria. East Germany is composed largely of the region of the Elbe River and its tributaries and part of the Oder basin. Most of the territory is level, except for the hilly Erzgebirge region in the south. Its climate is cooler than that of West Germany, with long, cold winters and short summers.

Resources and Industries. Agriculture is a highly specialized industry. Some of more important crops are wheat, rye, barley, oats, potatoes, sugar beets and hay. Other commercial products are grapes, hops, apples, pears, plums, cherries, apricots, tobacco, peaches and walnuts.

Principal minerals are coal, lignite, iron, zinc, lead, copper, salt, potash and petroleum. Bulk of mining is in North Rhine-Westphalia, Central Germany, the Harz, and Westerwald. Oil comes chiefly from Emsland near Netherlands border, and Lower Saxony. Iron and steel production is greatest in the Ruhr and Saar; also in Sieg, Lahn and Dill districts.

Approximately 75% of German industries survived World War II, but activity was almost at a standstill. ECA aid prompted a spectacular recovery in West Germany, toward which the economic center of gravity of the country continues to shift.

History and Government. Germanic tribes were defeated by Julius Caesar, c. 50 B. C. and wiped out the Romans under Varus 9 A. D. Charlemagne, ruler of the Franks, consolidated Saxon, Bavarian,

Rhenish, Frankish and other lands; after him the eastern part became the German Empire. *Consult Rulers of Middle Europe.* The Thirty Years' War, 1618-1648, split Germany into small principalities and kingdoms. After Napoleon, Austria contended with Prussia for dominance, but lost the Seven Weeks' War to Prussia, 1866. Otto von Bismarck, Prussian chancellor, formed the North German Confederation, 1867.

In 1870 Bismarck maneuvered Napoleon III into declaring war. After the quick defeat of France Bismarck formed the German Empire (*Deutsches Reich*) and on Jan. 18, 1871, in Versailles, proclaimed King Wilhelm I of Prussia German Emperor (*Deutscher Kaiser*). This reich collapsed in World War I when Wilhelm II abdicated Nov. 9, 1918. By the Treaty of Versailles Germany lost part of its homeland, all of its colonies and was subjected to partial occupation and reparation payments.

Republic of Germany, 1919-1934, adopted the Weimar constitution.

Third Reich, 1933-1945. Adolf Hitler, born in Braunau, Austria, 1889, led National Socialist German Workers' party after the war. In 1923 with the help of Gen. Erich Ludendorff he attempted to unseat the Bavarian government in the "Beer Hall putsch," and was imprisoned. He wrote *Mein Kampf* while in prison. President von Hindenburg named Hitler chancellor Jan. 30, 1933; on Aug. 3, 1934, day after Hindenburg's death, the cabinet joined the offices of president and chancellor and made Hitler Fuehrer (Leader). The National Socialist party (Nazi) controlled. Hitler abolished freedom of speech and assembly, prohibited marriage between non-Jews and Jews, began a long series of persecutions climaxed by mass extermination of Jews in concentration camps. Over 5,000,000 (est.) were murdered.

Hitler repudiated the Versailles treaty and reparations agreements. He recovered the Rhineland and annexed Austria (*Anschluss*, 1938). At Munich he made an agreement with Neville Chamberlain, British prime minister, enabling him to annex Sudetenland of Czechoslovakia. He signed a non-aggression treaty with the Soviet Union, 1939. He declared war on Poland Sept. 1, 1939, precipitating World War II. With total defeat near Hitler committed suicide in Berlin Apr. 29, 1945. The victorious Allies voided all acts and annexations of Hitler's Reich. See *Yalta and Potsdam Treaties*.

Postwar Allied Zones

U.S.S.R.—Former states of Saxony, Saxony-Anhalt, Thuringia, and Mecklenburg, and the former Prussian provinces of Saxony and Brandenburg.

Great Britain—North-Rhine-Westphalia (which contains the Ruhr), Lower Saxony, Schleswig-Holstein, city-state of Hamburg.

France—The left bank of the Rhine, including the Palatinate and the Saar, and the districts of Trier and Coblenz; right bank of the Rhine, including the areas of South Baden, South Wurttemberg-Hohenzollern and the Bavarian district of Lindau.

United States—Territory bounded on the East by the Russian zone and Czechoslovakia, on the North by the British zone, on the West by the French zone, and on the South by Austria, including Bavaria (except Lindau district), Wurttemberg (northern portion), Baden (northern portion), most of Hesse and Hesse-Nassau, and Bremen.

There also was created the area of Greater Berlin, within but not part of the U.S.S.R. zone, administered by the Inter-Allied governing authority with representatives of each of the four powers. The population of Berlin exceeds 3,000,000.

The territory east of the Oder-Neisse line within 1937 boundaries comprising the provinces of Silesia, Pomerania, West Prussia and the southern part of East Prussia, totaling about 40,000 square miles, population 9,600,000, is at present under Polish administration; northern East Prussia is under U.S.S.R. administration. The United States has not recognized these changes as permanent.

A series of conflicts between the Western occupying powers and the U.S.S.R. over the economic and political administration of Germany culminated in 1948 in the partition of Germany into two well defined zones under rival political and economic control. The U.S.S.R. repudiated all cooperation with its allies and began a blockade and other harassments against them. The Western powers utilized a gigantic air lift program to supply blockaded Berlin during 1948-1949.

Germany still lacks a World War II peace treaty, although the United States and other Western allies ended the state of war in 1951. The U.S.S.R. did not do so until Jan. 26, 1955, after the other powers had initiated moves to grant complete sovereignty to West Germany and permit it to rearm and join the NATO and Western European Union nations, which took place in 1955.

A heavy movement of the population westward, beginning in 1945, has taken place. Refugees from eastern parts of Germany were estimated in 1955 to number 13,000,000.

Helgoland, an island of 130 acres in the North Sea, was taken from Denmark by a British Naval Force in 1807 and later ceded to Germany to become a part of Schleswig-Holstein province in return for rights in East Africa. The heavily fortified island was surrendered to Great Britain, May 23, 1945, demilitarized in 1946, and returned to West Germany, Mar. 1, 1952.

West Germany

FEDERAL REPUBLIC OF GERMANY

Bundesrepublik Deutschland

Capital: Bonn. **Area (est.):** 94,723 sq. mi. **Population (U.N. estimate 1954):** 49,516,000. **Flag:** Black, red, gold horizontal bars. **Monetary unit:** Deutsche Mark (U.S. 23.81c).

The Federal Republic of Germany was proclaimed May 23, 1949 (effective Sept. 1, 1949), in Bonn, after a constitution had been drawn up by a constituent assembly formed by representatives of the 11 Laender (states) in the French, British and American zones. They were Bavaria, Wurttemberg-Baden, Hesse, Bremen (U. S. zone); Schleswig-Holstein, Hamburg, Lower Saxony, North Rhine Westphalia (British zone); Rhineland-Palatinate, South Baden, Wurttemberg-Hohenzollern (French zone). Its cities include also Munich, Frankfurt, Cologne, Essen, Dortmund, Stuttgart, Dusseldorf, Duisburg.

The constitution provides for a parliament with two houses, the Bundstag of representatives elected by direct vote and the Bundesrat (upper house), representing the state governments. A special assembly chooses the president for 5 years. The president nominates the chancellor, subject to approval by the Bundestag. Theodor Heuss, Free Democrat, was chosen first president Sept. 12, 1949, reelected July 17, 1954, and Dr. Konrad Adenauer, Christian Democrat, was made chancellor Sept. 15, 1949 and reelected Oct. 9, 1953.

In general elections, Sept. 6, 1953, Chancellor Adenauer's Government coalition won 306 of the 487 Bundestag seats.

The occupying powers, France, Britain and U. S., restored the civil status, Sept. 21, 1949. The U. S. resumed diplomatic relations July 2, 1951. The powers lifted controls and gave numerous economic and industrial concessions, 1953. I. G. Farben and Ruhr steel trusts were decentralized and Krupp was decontrolled, with the Krupp family out.

The Republic is a member of the European Coal and Steel Community and the Council of Europe. It also has been admitted to UNESCO, International Monetary Fund and other international organizations.

The United States, Great Britain and France concluded peace contract agreements with Western Germany in Bonn, May 26, 1952, restoring nearly complete independence and making it a member of the free European community. Further protocols, signed in Paris, Oct. 23, 1954, by West Germany and 14 other Western nations gave the Federal Republic virtual sovereignty, opened the way for it to enter NATO and the Brussels Treaty Organization (Western European Union), and contribute an estimated 12 divisions to the armies of the two defensive groups composed of the 15 countries. The agreements included one making the Saar semi-autonomous and increasing French economic control. Following ratification of the instruments, the Republic became officially independent at noon, May 5, 1955.

The new German armed forces, to be known as "Streitkraefte" (military forces), visualize an estimated 400,000 regulars and perhaps 400,000 trained reserves, divided into three principal elements: Army, about 300,000, in 12 divisions; an air force, about 86,000 with 1,300 aircraft; and a navy, approximately 50,000.

The Lufthansa resumed airplane flights Apr. 1, 1955, first time since the war, using U. S.-built Convairs.

Resources and Industries. West Germany's economic recovery since the end of World War II

was rapid, aided by the currency reform of June, 1948, ECA assistance, and lenient treatment of industry during the occupation period. Industrial production reached an average of 89% of the 1936 mark in 1949, and nearly doubled the 1936 level at the end of 1954. With the economy rising at a higher rate than in 1952 and 1953, gross national production in 1954 rose 8% in volume, worth an estimated 145 billion DM. Index of industrial production reached 199 in April, 1955 (1936=100).

The Ruhr's open-hearth steel production potential is estimated at 20,000,000 tons annually (17,400,000 in 1954.) West Germany produces more than 120,000,000 tons of coal per year. The oil industry, with refining capacity of more than 10,500,000 tons annually, is most important.

Other principal products are chemicals, textiles, machinery, vehicles, machine tools, optical goods, and electrical equipment. West Germany was second largest European producer of motor vehicles in 1954, increasing production 39% over 1953, to a total of 518,190 vehicles.

Exports of machinery in 1954 rose 8% from DM 3.96 billion in 1953 to DM 4.25 billion, accounting for 18.7% of world's machinery exports and 33% of Germany's total exports for the year. Machinery included paper and printing machines, textile, generators, agricultural, cranes, iron and steel plant equipment, mining, office equipment.

West Germany lost most of its merchant marine during World War II. Present merchant fleet totals over 2,100,000 gross registered tons, compared with pre-war fleet of 4,492,708 gross tons.

Bremen, West Germany's second-ranking deep-sea port, is being restored and will surpass its former cargo capacity by 1962. The Ministry of Transport planned in 1955 extensive projects to improve canalization in the West, raise Emden port to international rank, and improve the water connections of Hamburg and Bremen with the Ruhr and the Rhine. In the South, the Neckar Canal will reach the Stuttgart industrial area and the Main River Canal while Danube canalization will eventually link the Danube basin with the Rhine. Inland waterways make up approx. one-third of West German traffic.

Education and Religion. There are 16 universities in the Federal Republic, the oldest being Heidelberg, founded in 1386.

Major educational reforms designed to make the German school program more democratic have been made in Western Germany.

In 1954 West Germany stood next to the United States in daily newspapers, 1,403, with a daily circulation of over 16,000,000.

Complete religious freedom is guaranteed by the constitution.

East Germany

GERMAN DEMOCRATIC REPUBLIC

Deutsche Demokratische Republik

Capital: Berlin (Soviet Zone). Area (est.): 42,112 sq. mi. Population (est. 1955): 17,600,000. Monetary unit: Deutsche Mark (East.).

The German Democratic Republic was proclaimed in the Soviet sector of Berlin Oct. 7, 1949, after the provisional People's Council, which had been formed by the Socialist Unity Party (SED-Communist) became the Volkskammer, or lower house of a parliament. Wilhelm Pieck was named President, reelected Oct. 7, 1953; Otto Grotewohl Minister-President, or prime minister; Walter Ulbricht, strongest Communist leader, deputy prime minister. A ministry of state security, the SSD, and a militarized People's Police were organized, leading to protests by the Western Allies, May 23, 1950.

Treaties of friendship and trade were negotiated with other satellite nations of the Soviet Union. Walter Ulbricht negotiated a treaty with Poland placing Poland's boundary on the Oder-Neisse line. The United States registered its disapproval June 8, declared it violated the Potsdam agreement and that no boundaries could be settled "unilaterally or bilaterally" outside a peace treaty. The Republic also ratified an agreement with Czechoslovakia, accepting the expulsion of over 2,000,000 Germans from Sudetenland, as "permanent and just." Its industry was integrated with that of the Soviet Union.

Parliament abolished, 1952, the five traditional provinces of East Germany as administrative units in favor of 14 districts of 217 counties. Brandenburg, Mecklenburg, Saxony and Thuringia were divided into three districts each, Saxony-Anhalt into two.

Coincident with the entrance of West Germany into the European Defense Community, May 27, 1952, the East German Government decreed a prohibited zone three miles deep along its 600-mile border with West Germany, separated Berlin's telephone system into two sections and cut many of its lines to the West. Berlin was further divided in 1953 by alterations in its rail lines, but the exodus of refugees from the Republic into West Berlin continued to increase, totaling 305,737 in 1953 (1.7% of the population).

The Soviet Union proclaimed it a sovereign republic Mar. 26, 1954, but said Soviet troops would remain temporarily in connection with security and the four-power Potsdam agreement. Offices of the High Commissioner were reduced by two-thirds in June 1954.

Following the Soviet failure to avert West German rearmament, the Soviet Union invited Chancellor Adenauer to Moscow to discuss diplomatic and trade ties, June 7, 1955.

East German armed strength was estimated, 1955, to include an army of 85,000, a para-military police force of 55,000, 12,000 security police, 25,000 border guards, 6,000 so-called sea police, and an air force of 7,500 equipped with Russian planes. East Germany joined the 8-nation Soviet defense group Mar. 21, 1955.

East Germany was expected to reach 80% of its goal of doubling former output in 1955, fifth year of its first Five Year Plan which stressed power output and light industries. During 1954-55 it was troubled by critical food shortages, production lags, and shortages of raw materials.

In East Germany the school system has been reorganized on a Communist basis, with centralized control over education. Religious instruction no longer is part of the public school curriculum, but is imparted by the churches.

Saar

The Saar (Fr. Sarre) is an industrial and mining area north of Lorraine, originally 736 sq. mi., now extended to about 991 and population (1955) of 960,000. It produced 16,800,000 tons of coal in 1954, and has iron, steel and ceramic industries. The population is mostly German. Saarbrücken is the capital. It was separated from Germany after World War I and administered by the League of Nations through a commission. The French had the sole right to work the coal mines for 15 years in recompense for the destruction of the coal mines in North of France. The Saar was returned to the Reich by the League of Nations, Mar. 1, 1935, but in the first post-World War II election, Oct. 5, 1947, the population voted overwhelmingly for an economic union with France.

An autonomous Saar government was granted by France Jan. 3, 1948, subject to French economic and financial legislation. A series of agreements was signed by France and the Saar. March 3, 1950, giving the Saar a larger measure of autonomy and France a 50-year lease on coal mining. The lease was protested by the West German government. The Saar became an associate member of the Council of Europe July 19, 1950. In legislative elections of Nov. 30, 1952, 87.3% of votes favored Europeanization and continued economic union with France.

Paris protocols of Oct. 23, 1954, effective May 5, 1955, coincident with West Germany's independence, established a semi-autonomous status for the region pending a peace settlement for all of Germany, and subject to referendum by Saarlanders. A Franco-Saar agreement, Mar. 21, 1955, formed a monetary and customs union, increasing French influence.

President: Johannes Hoffman.

Greece

VASILON TIS ELLADOS—KINGDOM OF HELLAS

Capital: Athens. Area: 51,246 square miles. Population (U.N. estimate 1954): 7,900,000. Flag: navy blue ground quartered by white cross. Monetary unit: Drachma (U.S. \$3.333c).

Descriptive. Greece occupies the southern peninsula of the Balkans, stretching down into the Mediterranean Sea, with the Ionian Sea on the West and the Aegean Sea on the East. On the Northwest lies Albania, on the North Yugoslavia and Bulgaria, and on the Northeast Turkey. The Findus Mountains, a continuation of the Balkans, run through the country from North to South. The coastline is broken by many gulfs and bays. Islands account for 8,819 square miles of its total area and include the Cyclades, Corfu, Chios, Lesbos, Samos, Dodecanese and Crete. Largest of the islands is Crete (3,234 sq. mi.).

Resources and Industries. Greece proper is chiefly agricultural, with little manufacturing. Only one-fourth of the total area is arable; 13,350,000 of the total of 16,074,000 acres are covered by mountains and lakes and rivers. The forests have been denuded, but reforestation is going on; four-fifths are state-owned. The chief agricultural products are wheat, rye, barley, oats, corn, tobacco, olives, citrus fruits, cotton, pulses, currants, raisins, and figs.

Under American aid programs Greece's industrial and agricultural potential has been restored, surpassing former levels. Hydroelectric development is remedying the lack of coal. Chief exports are tobacco, currants, olives and olive oil, wine, brandy, figs, rosin, sponges, citrus fruits, cotton yarns and leather. Iron, copper, zinc, lead, magnesite, lignite, marble, bauxite, commercial earths are exploited. Livestock is led by sheep and goats; cattle, pigs, horses and mules also are raised and wool produced.

History and Government. In classical times Greece produced city states, kingdoms and democracies and its achievements in learning are the flower of civilization. It was strongest in the 5th century B.C., became a province of the Roman empire 46 B. C., and was ruled from Byzantium, which fell to the Ottoman empire in 1453. It won its war of independence, 1821-1829, and became a kingdom under guarantee of Britain, France and Russia, 1830. A republic was established 1925; the monarchy was restored, 1935, and George II, King of the Hellenes, resumed the throne. In Oct., 1940, Greece rejected an ultimatum from Italy and when attacked Greece threw the Italians back into Albania. Nazi support resulted in the defeat and occupation of Greece by Germans, Italians and Bulgarians. By the end of 1944 the invaders withdrew. A plebiscite recalled the king. King George died April 1, 1947, and was succeeded by his brother, Paul. King Paul I was married 9, 1938 to Princess Frederika Louise of Hanover (born April 18, 1917). They have three children: Princess Sophia, born Nov. 2, 1938; Princess Irene, born May 11, 1942; and Crown Prince Constantine, born June 2, 1940.

Greek women were granted national suffrage and the right to run for national office in 1952. The first woman in Greek history was elected to the Chamber of Deputies in Salonika, Jan. 18, 1953. The Premier is Field Marshal Alexander Papagos, Jan. 19, 1952.

At the end of World War II Communists tried to seize power and civil war resulted, lasting until 1949. Yugoslavia's break with the Cominform led to resumption of relations with Greece and the repatriation of Greek soldiers and some children. However, the bulk of the children, sent to Soviet states, was not recovered and the International Red Cross was refused entry.

Education and Religion. Greek Orthodox is the official church. Education is compulsory. There are six schools of university rank in Athens, and one in Thessaloniki.

The rocky promontory of Mount Athos (121 square miles) is occupied by 20 monasteries of the Greek Orthodox Church, each a sort of little republic in itself. The monks number 4,800. No females are allowed to enter the territory.

Defense. Military service is compulsory between the ages of 21 and 50. There is a small Air Force and a Navy of light craft. Greece belongs to NATO and sent troops to U. N. armies in Korea. Greece is a member with Turkey and Yugoslavia, of a Balkan defense group formed by a treaty signed Feb. 27, 1953. A 20-year military aid pact among the three was signed Aug. 9, 1954.

DODECANESE ISLANDS

The Dodecanese are a group of about 50 islands and islets in the southeastern portion of the Aegean Sea, 14 of which are permanently settled. They were occupied by Italy during the war of 1912 with Turkey and though claimed by Greece were retained by Italy. The inhabited area is 1,586 square miles and population (1951 census), 121,100. Rhodes is the capital.

After World War II the islands were ceded to Greece at the Paris Conference of Foreign Ministers, June 27, 1946, and formally annexed, March 7, 1948.

Guatemala

REPUBLICA DE GUATEMALA

Capital: Guatemala City. **Area:** 42,042 square miles. **Population (U.N. estimate 1954):** 3,149,000. **Flag:** three vertical bars, blue-white-blue, with

emblem in white bar. **Monetary unit:** Quetzal (U.S. \$1).

Descriptive. Guatemala, the most northerly state of Central or Middle America, has Mexico for its neighbor on the North and West, British Honduras (Belize) on the East, Honduras and Salvador on the East and South and the Pacific on the Southwest. A range of mountains containing many volcanic peaks runs from Northwest to Southwest near the Pacific. The narrow west slope is well watered, fertile and the most densely settled part. More than 50% of the population is pure Indian and most of the remainder is of mixed Spanish and Indian blood.

There are famous Mayan ruins in Uxactun (pronounced Wa-shock-tune) in Peten, northern Guatemala, about 25 miles south of the Mexican and 20 miles west of the British Honduran boundaries. Other famous Maya ruins, consisting of temples and monoliths covered with inscriptions of Maya chronology are at Quirigua, about 140 miles from Guatemala City.

Resources and Industries. Agriculture is the most important industry, the Guatemalan soil being exceedingly fertile. Coffee accounts for 80% of the exports. Other important crops are bananas, sugar, rice, cotton, beans, corn and wheat. Chicle gum is exported to the United States. Silver, gold, copper, iron, lead and chrome are found. The principal imports are cotton textiles, wheat, flour, cotton yarn, petroleum, medicines, hardware and motor cars, and silk textiles. The main port of entry is Puerto Barrios on the Atlantic, 800 miles south of New Orleans. A railroad connects the port with the capital, Guatemala City, and San Jose, a port on the Pacific. The other chief Pacific port is Champerico.

History and Government. The Old Maya empire flourished in what is today Guatemala during the first 1000 years of the Christian era. For reasons unknown they abandoned several of their important cities and joined the empire in Yucatan.

The Republic of Guatemala was established in 1839. The 1945 Constitution provides for a semi-parliamentary government and establishes freedom of the press, speech and assembly, women's suffrage and protection for workers.

Following an armed revolt begun June 17, 1954, by anti-Communist forces opposing the government, President Jacobo Arbenz Guzman, elected in 1950, relinquished office June 28 and the government was taken over by a military junta. A cease-fire agreement was reached June 29, after a purge of Communist officials was begun, meeting the demands of Col. Carlos Armas, insurgent leader who was elected president Sept. 1. Communism was outlawed Aug. 25, 1954. An attempted Communist coup was defeated Jan. 20, 1955.

Education and Religion. Roman Catholic is the prevailing religion but all creeds are tolerated. Education is compulsory. The University of Guatemala is in Guatemala City. The language of the country is Spanish.

Defense. Military service is compulsory between the ages of 18 and 50. The strength of the Army is approximately 7,000 plus a 3,000-man police force and a small Air Force.

Haiti

REPUBLIQUE D'HAÏTI

Capital: Port-au-Prince. **Area:** 10,714 square miles. **Population (Gov't. estimate, 1951):** 3,112,000. **Flag:** two horizontal bars, blue and red; in center a white and brown rectangular field with coat of arms. **Monetary unit:** Gourde (U.S. 20c).

Descriptive. Haiti, only French-speaking republic in the Americas, occupies the western third of the island known as Hispaniola, the second largest of the Greater Antilles, lying between Cuba on the West and Puerto Rico on the East. The boundary which separates it from the Dominican Republic to the East is about 193 miles long.

Negros form the majority of the population, the remainder being mulattoes descended from former French settlers.

Resources and Industries. The minerals, largely undeveloped, include copper, gold, silver, iron, antimony, tin, sulphur, coal, nickel, porphyry and gypsum.

Coffee is the chief product, along with sisal, cotton, raw sugar, bananas, cocoa, and tobacco. Rice is grown for domestic consumption. There also is a large production of molasses. Logwood and many other valuable woods are exported. In recent years cattle breeding has increased.

With favorable winter climate and only 2½ hours by air from Miami, the tourist industry is

growing, with expenditures estimated at \$3,500,000 in 1954. It is served by several major American and foreign airlines.

History and Government. Haiti, discovered by Columbus, 1492, and a French colony from 1677, attained its independence, 1804, following the rebellion headed by Toussaint L'Ouverture. From 1910 to 1915 there were seven presidents; the last, Gen. Sam, assumed office March 4, 1915, took refuge in the French Legation, July 26, 1915, after 167 political prisoners had been massacred in jail, and at the funeral of the victims was dragged out and killed. United States forces occupied the country and restored order.

The American occupation terminated Aug. 14, 1934. A fiscal representative appointed by the President of Haiti on recommendation of President Franklin D. Roosevelt remained to supervise the customs until 1941.

The National Assembly consists of two houses, a Senate of 21 members, and a Chamber of Deputies of 37 members. Senators are elected for six years and Deputies for four. The constitution provides that members of the Assembly must own property. Women who are 30 years old have the right to hold public office but vote only in municipal elections.

President: Col. Paul Magloire, elected 1950.

Education and Religion. Roman Catholicism is the state religion and the clergy are French (most ly Bretons). Education is compulsory. There are approximately 1,075 schools with 1,250 teachers and an enrollment of 115,000 pupils. French is the official language of the country, but French Creole, a dialect, is spoken by the majority. The teaching of English in the schools is obligatory.

Defense. The only military force is an armed constabulary (Armée d'Haiti) consisting of 5,000 officers and men.

Honduras

REPUBLICA DE HONDURAS

Capital: Tegucigalpa. Area (revised 1953): 43,227 square miles. Population (U.N. estimate 1954): 1,608,000. Flag: three horizontal bars, blue-white-blue, with five blue stars arranged saltire-wise in white bar. Monetary unit: Lempira (U.S. 50c).

Descriptive. Honduras is a republic of Central or Middle America, bounded on the North by the Caribbean Sea, on the East and South by Nicaragua, on the South and West by Salvador and on the West by Guatemala.

The coast line on the Caribbean is 500 miles long, the chief ports being Truxillo, Tela, Puerto Cortez, Omoa, Roatan and La Ceiba. On the Pacific side it has a coast line of 40 miles on the Gulf of Fonseca; Amapala is the chief port. The country is mountainous, very fertile, though mostly uncultivated, and covered with rich forests. The inhabitants are of Spanish and Indian extraction.

Resources and Industries. Mineral resources are abundant but undeveloped, and include gold, silver, copper, lead, zinc, iron, antimony and coal. The chief export (65%) is bananas, grown on the Caribbean coast. Coconuts, hardwoods, coffee and tobacco and cattle raising are important.

Trade is chiefly with the United States and United Kingdom.

History and Government. Honduras became independent after freeing itself from Spain, Sept. 15, 1821, and from the Federation of Central America, 1838. The country is divided into 17 departments containing 31 districts and smaller units.

The unicameral legislature, Congress of Deputies, consists of 49 members with six-year terms. A decree of Jan. 24, 1955, gave women the vote and right to hold public office.

Presidential elections of October, 1954, were inconclusive and after Congress failed to elect a President, powers of state were assumed Dec. 6 by Dr. Julio Lozano Diaz, Acting President since Nov. 16, 1954.

Education and Religion. Education is compulsory. There is a university in the capital and 2,637 public schools throughout the country. Roman Catholic is the prevailing religion. The language is Spanish.

Defense. Military service is compulsory from the age of 18 with eight months' service in the Army and in the reserve from 32 to 55. The size of the Army is fixed at 2,500. There is a small Air Force.

Hungary

MAGYAR NEPKÖZTARSASÁG

PEOPLE'S REPUBLIC OF HUNGARY

Capital: Budapest. Area: 35,902 square miles. Population (govt. estimate 1955): 9,750,000. Flag:

horizontal bands, red-white-green, with coat of arms in center. Monetary unit: Forint (U.S. c. 8½c).

Descriptive. Hungary, a republic in Central Europe is bounded by Czechoslovakia and the U.S.S.R. on the North, Yugoslavia on the South, Rumania on the East and Austria on the West.

Resources and Industries. Hungary is primarily agricultural. The Alföld, or Great Plain, area is most fertile. The principal Hungarian crops are wheat, rye, barley, oats, corn, potatoes, sugar beets. Near Tokay, in the northeast, the best Hungarian wines are vinted. Another important wine district is situated along the north shore of Lake Balaton.

Hungary's bauxite deposits are very large. The output of coal is extensive, particularly from the Mecsek Mountains in the district of Pecs. About three-quarters of its oil requirements are found in the wells drilled by American interests in the southwest corner of Trans-Danubia.

Since nationalization, it claims industry contributes 64% of national income. Industries include iron and steel, machines, machine tools, chemicals, vehicles, railway rolling stock. Other industries are milling, distilling, sugar, hemp, flax.

History and Government. Hungary is a Communist republic. An independent kingdom since 1001, it came under Austrian domination and the Emperor of Austria ruled as King of Hungary in the Austro-Hungarian Monarchy of the 19th century. Defeated with the Central Powers in 1918, it lost Transylvania to Rumania, Croatia and Backa to Yugoslavia, Slovakia and Carpatho-Ruthenia to Czechoslovakia. A republic was proclaimed Nov. 13, 1918, under Michael Karoly. A Bolshevik revolt under Bela Kun lasted less than a year in 1919-20. A new government was elected in 1920. It voted for a monarchy and named Admiral Horthy regent.

Hungary joined Germany in World War II; Horthy was removed and Nazi supporters put in power, 1944. Russian troops captured most of the country, 1945. By terms of an armistice with the Allied powers Hungary agreed to give up territory acquired by the dismemberment (1938) of Czechoslovakia and to return to its borders of 1937.

Hungary declared for a republic and elected Zoltan Tildy president, 1946. In 1947 the growing strength of the Communists forced Tildy out.

Parliament since 1953 consists of 298 deputies (one for each 32,000 pop.). In single-list elections May 17, 1953, the regime won 98.2% of votes.

Since Communism gained control, all industries have been nationalized and an intensive campaign has been conducted to collectivize farms, establish cooperatives, and increase farm production. Farmers who opposed it were deported to Soviet Russia.

Hungary has in recent years confiscated American property and abused officials and citizens. It withdrew from UNESCO Dec. 31, 1952.

Premier Imre Nagy was ousted for his policy of favoring consumer production, April 18, 1955; succeeded by Andras Regedus. President of Presidential Council: Istvan Dobi, appointed Aug. 14, 1952.

Education and Religion. There is no state religion and all are tolerated. In the 1941 census 65.7% of the population was Roman Catholic.

State attempts to control the church came to a head in Feb., 1949, when the Communist government convicted Joseph Cardinal Mindszenty on charges of treason, espionage and black market dealings, and sentenced him for life. His release from prison and a conditional reduction in sentence was announced July 16, 1955.

Public school education is compulsory and free for eight years. Church schools, largely Roman Catholic, were nationalized, June 16, 1948. There are six universities maintained by the state, including the University of Budapest and Technical University.

Defense. All males at age 21 are liable for military service. Hungary has denied reports it has exceeded treaty limits of 65,000 army personnel.

Iceland

LYDVELDID ISLAND

Capital: Reykjavik. Area: 39,758 square miles. Population (U.N. estimate 1954): 154,000. Flag: blue with red cross superimposed on white cross. Monetary unit: Krona (U.S. 6.14c).

Descriptive. The Republic of Iceland is an island of volcanic origin, close to the Arctic Circle in the North Atlantic. It has many geysers and hot springs. The climate is modified by the Gulf Stream. There are no railroads.

Natural hot water from many of Iceland's volcanic springs is piped into Reykjavik and provides heat for office buildings, homes and hot houses.

Keflavik is an important civilian airport along the northern trans-Atlantic air routes.

Resources and Industries. Agriculture engages about 35 per cent of the population. About six-sevenths of the land is unproductive and only about 65,000 acres are under cultivation, producing potatoes, turnips and hay. The fishing industry is important. The catch, including cod, haddock, and herring in salted, smoked, canned or frozen form, once accounted for 95% of the exports.

Iceland's largest industrial plant, a \$7,000,000 modern ammonium nitrate factory near Reykjavik was completed in 1954, part of the country's program for economic development.

The principal imports in the order of their value are coal and petroleum, textiles, timber and wooden goods, machinery, metals and hardware, cereals and paper. Exports are fish, herring oil and meal, conserved goods, skins and wools.

History and Government. Iceland was an independent republic, 930-1262, when it joined with Norway. The two came under Danish rule in 1380. When Norway separated from Denmark, 1814, Iceland remained under Denmark. Denmark acknowledged Iceland as a sovereign state, 1918, united with Denmark only in that the Danish King Christian X, was also King of Iceland.

Iceland celebrated the 1,000th anniversary of the Althing, the oldest parliamentary assembly in the world, June 23-28, 1930.

The Althing (Parliament) voted, May, 1941, to cancel the union with Denmark, declaring Iceland independent; resolved to elect a regent to assume the function of the King and to introduce a republican constitution as soon as the union ceased.

Sveinn Björnsson was elected regent for one year and re-elected in 1942 and 1943 for one-year terms.

The people of Iceland voted in May, 1944, by 70,536 to 365 to complete the establishment of an independent republic. About 98% of the eligible voters participated. The Althing formally severed the union with Denmark and proclaimed a republic, June 17, 1944.

The president is Asgeir Asgeirsson, elected June 29, 1952, succeeding Sveinn Björnsson who died Jan. 25 during his third term.

Premier: Olafur Thors, Independent Party, appointed Sept. 11, 1953. Communists are excluded from the Cabinet.

The Althing is composed of varying numbers of members not exceeding 52, of whom 41 are elected in constituencies, each electing one or two members except the capital which elects eight. The representatives of the capital and the six double-member constituencies are elected by proportional representation, while a necessary number of supplementary seats—not exceeding 11—are distributed among the political parties which have received too few members in proportion to their voting strength. The Prime Minister and his cabinet are responsible to the Althing. Men and women over 21 enjoy suffrage.

Education and Religion. The Icelandic language has maintained its purity, as in Eddas and Sagas, for 1,000 years. Danish and English also are taught. Eight years of elementary education is compulsory. There is no illiteracy. There is a University in Reykjavik. The national church is Evangelical Lutheran, but there is complete religious freedom.

Defense: Iceland has no army, navy or forts.

Republic of India

BHARAT

Capital: New Delhi. **Area:** 1,221,880 square miles. **Population (U.N. est., 1954):** 377,000,000. **Flag:** three horizontal stripes, saffron, white and dark green, with 24-spoke wheel of Asoka in center of white band. **Monetary unit:** Rupee of 16 Annas (U.S. 21c).

Descriptive. India, an independent republic since 1950, occupies the larger geographical and population division of the subcontinent of India. Like a gigantic peninsula it extends south into the Indian Ocean, with Cape Comorin at its extreme tip and Ceylon southeast across the Gulf of Mannar; the Bay of Bengal to the East and the Arabian Sea to the West. Pakistan now separates India from Afghanistan on the Northwest; the disputed state of Kashmir and Jammu extends up through the Himalayas and Karakorums with Pakistan on the West, Sinkiang, China, on the

North and Tibet on the East. The northern border turns southeast along the Himalayas and Nepal and continues north of the Pakistan part of Bengal, separated from India by the Ganges river on the East. India continues into the state of Assam, with a spur of India separating Nepal and Bhutan; its northeastern tip then follows the Brahmaputra river valley and touches China, then follows the western border of Burma south almost to the sea, enclosing Pakistan Bengal.

Politically, the republic consists of the predominantly Hindu provinces and the majority of the 562 former independent princely (native) states. Included are the former provinces of Bombay, Madras, Uttar Pradesh, Madhya Pradesh, Bihar, Orissa, eastern half of the Punjab, western half of Bengal, Assam (minus Sylhet district), and the Chief Commissioner's provinces of Delhi, Ajmer and Coorg. The larger of the former princely states have acceded, while the majority of remaining smaller states have been merged into six new states. India also possesses:

Andaman Islands. 204 in number, in the Bay of Bengal, 800 miles east of Madras on the mainland with an area of 2,508 square miles and a population, including Nicobar, of 39,963 (exclusive of aborigines). Timber wealth is large.

Nicobar Island. 75 miles from Andaman Islands, have an area of 635 square miles.

India's climate varies from the tropical heat of Southern India to the nearly Arctic cold of the Himalayas. Approximately 20% of the area is forested, including sandalwood, teak, ironwood, deodar, satinwood, date palm, cocoanut, sago, banyan and acacia.

By the census of 1951, total population numbered 356,829,485. Main communities reported:

Hindus	303,200,000
Moslems	35,400,000
Christians	8,200,000
Sikhs	6,200,000

Resources and Industries. Agriculture occupies 70% of the people and is being helped by government planning to reach eventual self-sufficiency in food. Construction of reservoirs and irrigation canals and wider use of fertilizers and farm machinery are raising production.

Construction of dams and reservoirs for irrigation and hydroelectric power proceed apace in India. Bhakra dam on the Sutlej river is one of the world's tallest, 680 ft., with 5,120,000 cu. yds. volume and holding when fully completed 7,400,000 acre ft. of water. The Bhekhda dam is 550 ft. tall. The Wainganga reservoir will have top capacity of 33,300,000 acre ft., while Hirakud will hold 6,750,000 acre ft. Sixteen major projects built or building are expected to add 6,500,000 acres to farming.

Principal food products are rice, corn, millet, gram, wheat, barley, coffee, sugar cane, spices, tea, cashew nuts. Other important products include cotton, copra, coir, jute, linseed, rubber.

Chief industries are textiles, with a wide variety of woolen, cotton and silk products; steel and cement. The Tata Iron & Steel works in Jamshedpur, is the largest in Asia. Crude steel production, for January, 1955, as reported to the U.N., was 160,000 metric tons; pig iron and ferro alloys, 173,000. Cement in January, 1955, reached nearly 400,000 metric tons.

Industrial production index (1946 = 100) reached a new high of 152 in Sept., 1954. Production in 1954:

Cotton cloth, yards	4,950,000,000
Cotton yarn, lbs.	1,520,000,000
Handloom industry, yards	1,450,000,000
Jute, tons	950,000
Steel, tons	1,230,000
Pig iron, tons	1,900,000

Also manufactured were rayon yarn, plywood, cement, ammonium sulphate, soda ash, caustic soda, sheet glass, ball bearings, transformers, sewing machines, bicycles. Flour milling is increasing. Important to the economy also are coal, petroleum, aluminum, antimony, chromite, copper, iron, lac, mica, magnesite, manganese.

Industrial production, distribution and prices are regulated by law since May, 1953.

A new thermal electric plant for Bombay is being financed by a \$16,200,000 loan from the World Bank. Practically all utilities are state-owned, including railroads and air lines. The Imperial Bank was nationalized and converted into the State Bank of India, effective July 1, 1955. Fifty airlines operate inside the republic.

Foreign trade, in rupees, for fiscal years beginning April 1:

	Imports	Exports
1952	6,355,000,000	5,595,000,000
1953	5,428,000,000	5,235,000,000
1954	5,860,000,000	5,570,000,000

Exports include tea, raw and processed jute, cotton, tanned hides and skins, manganese ore, pepper, tobacco. Imports: Mineral oils, machinery, millwork, food grains, raw cotton, metals. Largest trade is with the United States, which takes tea, spices, minerals, burlap, wool, psyllum seed, gum, nuts, hides and skins.

History and Government. India has one of the oldest civilizations in the world. Excavations trace the Indus Valley civilization back for at least 5,000 years. Beautiful paintings in the mountain caves of Ajanta in South India, richly carved temples, the Taj Mahal in Agra, and the Kutab Minar are a few relics of the glorious past.

The first British venture in India was conducted by Sir John Mildenhall in 1599 when, on orders from Queen Elizabeth he persuaded the Moghul emperor, Akbar, to grant trading rights to the British. The fortress at Surat, built by the British in 1612 by one of James I's sea captains, was the point from which the original East India Company spread out, eventually enabling Great Britain to control all of India. Warren Hastings, first governor-general of British India (1774-1785), set up the empire's civil government system.

Following more than 40 years' active struggle for freedom by both Hindus and Moslems, the British government announced Feb. 20, 1947, its intention to partition India into two Dominions and set June, 1948, as the deadline for complete British withdrawal from India. Announcement on June 3, 1947, designated Aug. 15 as Indian Independence Day. The Union of India on that date became a self-governing member of the British Commonwealth of Nations. The new Dominion automatically took over the charter membership India under British rule had held in the United Nations. The Dominion thus created became a sovereign democratic republic under a constitution adopted Nov. 26, 1949, effective Jan. 26, 1950, but elected to remain a member of the Commonwealth of nations, the word British being omitted.

The constitution is modeled after that of the United States and contains a similar bill of rights. It provides for a president, elected for a five-year term by an electoral college consisting of members of both houses of Parliament (Council of States and House of the People), and elected members of the lower houses of the federating states. A vice president elected by members of both houses presides over the Council of States. A Council of Ministers (cabinet) headed by a prime minister, aids and advises the president. The federating states have governors, appointed by the president, at the head of state organizations similar to the federal system.

In India's first general election, 1952, the Congress Party, headed by Pandit Jawaharlal Nehru, won 364 out of 489 seats in the lower house, 74% of the total. Eight additional seats were nominative by the president; 6 from Kashmir-Jammu, one from Andaman and Nicobar Islands; one from tribal areas of Assam. In the Council of States an additional 16 Council seats also were nominated by the president (4 from Jammu-Kashmir, 12 for special knowledge or skill).

The Council of States is a permanent body, not subject to dissolution but one-third of its members retire at the end of every second year. The House of the People may be dissolved by the President and new elections called.

Dr. Rajendra Prasad, interim president since 1950, was elected president by the electoral college May 13, 1952. Jawaharlal Nehru, in office since August, 1947, was renamed Prime Minister.

Untouchability, the age-old stigma imposed by India's caste system, is abolished under the constitution. Called Harijans or "children of God" by Mahatma Gandhi, the untouchables are being provided with special educational and economic advantages by the government.

A Hindu marriage bill, signed May 19, 1955, prohibits bigamy and legalizes divorce.

The budget for 1955-56, a record, estimated revenues at 4.69 billion rupees (\$985,000,000); expenditures at 4.99 billion rupees (\$1,048,000). A constitutional amendment, 1955, empowers state and federal legislatures to set payment for expropriated property.

Second Five-Year Plan (1956-1961) draft envisages expenditures of approx. 60 billion rupees, allocated about 2 to 1 between public and private

economy; an increase of jobs to 12,000,000, increase in steel output, real income of agricultural population, small industries, construction and housing.

India nationalized the Imperial Bank as the State Bank of India, June, 1955. The original bank was capitalized at 11,812,000 rupees in 1921 and will pay 42,000,000 in compensation to shareholders. Loans to farmers will be made uniform, thus curtailing the exactions of private moneylenders. Land distribution is a policy of a number of states.

Political units (states) of India:

State	Capital	Area (sq. mi.)	Population (1951)
Governors' States			
Assam	Shillong	54,084	9,129,442
Bihar	Patna	70,368	40,218,916
Bombay	Bombay	115,570	35,943,559
Madhya Pradesh (Central Prov.)	Nagpur	130,323	21,327,898
Madras	Madras	60,568	36,950,000
Orissa	Cuttack	59,369	14,644,293
Punjab	Simla	37,428	12,638,611
Uttar Pradesh (Un'd Prov'es)	Lucknow	112,523	63,254,118
West Bengal	Calcutta	29,476	24,786,683
Rajpramukhs' States			
Hyderabad	Hyderabad	82,313	18,652,964
Jammu-Kashmir	Srinagar	82,258	4,370,000
Madhya Bharat	Gwalior-Indore	46,710	7,941,642
Mysore	Bangalore	29,458	9,071,678
Patiala and East Punjab States Union	Patiala	10,099	3,468,631
Rajasthan	Jaipur	128,424	15,297,979
Saurashtra	Rajkot	21,062	4,136,005
Travancore-Cochin	Trivandrum	9,155	9,265,157
Vindhya Pradesh	Rewa	24,600	3,577,431
Chief Commissioners' States			
Ajmer	Ajmer	2,425	692,506
Bhopal	Bhopal	6,921	838,107
Coorg	Coorg	1,593	229,255
Delhi	Delhi	574	1,743,992
Himachal Pradesh	Simla	10,600	989,437
Kutch	Bhuj	8,461	567,825
Manipur	Manipur	8,620	579,058
Tripura	Agartala	4,049	649,930
Bilaspur	Bilaspur	453	110,000
Andhra	Vijayawada	67,200	20,000,000

Sikkim, a border state, area 2,745 sq. mi.; population 135,646, became a protectorate in 1950. India's 28th state, Andhra, first to be formed on a linguistic basis (Telugu) was formed in 1953 from a large coastal area of Madras. India has absorbed (1952-1954) former French India, five colonies totaling 196 sq. mi. and 346,000 population. They included Pondicherry, Karaikal, Mahe, Yanam (Yanam), and Chandernagor.

A dispute between India and Pakistan over the administration of Kashmir-Jammu has been before the U.N. since 1948. It is 77% Moslem. The two countries agreed, Aug. 20, 1953, to hold a plebiscite, but terms have not been decided.

Education and Religion. Approximately 82% are illiterate. The constitution provides for future free, compulsory education through age 14. Technical curricula are supported. There are now 28 universities and more than 650 colleges. Two new research institutes are in Kharagpur (West Bengal) and Hiji, near Calcutta.

There are 14 main languages, 12 originating from Sanskrit, with more than 200 different variations in dialect. The state language is Hindi, but English still is in general use.

More than 85% of the population follow the Vedas (Hindu) religion, but the constitution guarantees complete freedom of worship to all. The remainder are Moslems, Christians, Jains, Buddhists, Sikhs and Parsees.

Defense. All recruitment for India's armed forces is voluntary. Army, navy and air force are headed by chiefs of staff under the Defense Minister. The navy consists of one cruiser, three destroyers, four frigates, six minesweepers and a number of small vessels. The air force is being enlarged.

Republic of Indonesia

REPUBLIK INDONESIA

(Former Netherlands Indies)

Capital: Jakarta (Djakarta). Area: 905,522 sq. mi. Population (U.N. est., 1954): 81,100,000. Flag: two horiz. bands, red and white. Monetary unit: Rupiah (U.S. 8.72c).

Descriptive. Indonesia, world's largest archipelago, formerly known as the East Indies (Neth.),

lies along the Equator from about 6° N. latitude to 10° S. latitude, between the Asiatic mainland and the Philippines, and Australia. Indonesia comprises about 3,000 islands, the five largest being Java (one of the most densely populated areas in the world with 1,000 to the square mile), Sumatra, western Borneo (Kalimantan), Celebes (Sulawesi) and western New Guinea (Irian). Other large islands in the group are Bangka, Billiton, Madura, Bali, Lombok, Sumbawa, Sumba, Timor.

Many races are included, the principal ones being Achinese, Bataks, Menangkabaus, Javanese, Sundanese, Madurese, Balinese, Sasaks, Menadonese, Buginese, Dayaks, and Papuas.

Areas and population of the principal divisions:

	Area (sq. mi.)	Pop. (est. 1953)
West Borneo (Kalimantan)	208,300	3,586,602
Sumatra	182,870	12,000,000
Java and Madura	51,000	52,000,000
Celebes (Sulawesi)	73,000	5,930,251
Flouw Archipelago	4,000	200,000
Bangka	4,550	230,000
Billiton	1,870	80,000

Lesser Sunda Is. (Bali, Lombok, Sumbawa, Sumba, Flores, Timor, others) 35,000 5,128,444

Moluccas (Buru, Ceram, Hal-mahera, Morotai, others) 191,680 683,416

The capital is Jakarta (Djakarta), the former city of Batavia, on the island of Java.

Resources and Industries. Indonesia is one of the richest countries in natural resources. There are vast supplies of tin, oil and coal, and sizable deposits of bauxite, manganese, copper, nickel, gold and silver.

Crude oil is recovered by American and other oil companies; annual production is over 10,000,000 metric tons. It also refines oil from Iraq, Kuwait and Serawak. It ranks second only to Malaya in tin production with over 30,000 tons annually, approx. one-fifth of the world's production. Bangka, Billiton and Singkep, between Sumatra and Kalimantan, are main tin centers.

The country's large economic potential, is only slightly developed; 80% of its population is agrarian. Agricultural products include rice, maize, casava, ground nuts, soya beans, tobacco, coffee, rubber, cinchona, pepper, kapok, fibres, coconut products, palm oil, tea, sugar and indigo. Many Dutch enterprises still exist—banking, shipping, coffee, tea, rubber, cinchona, sisal. Government-encouraged cooperatives aid small business. Five-year plans stress increase in rice production, the staple food.

Indonesia's national airways system covers 17,000 route miles, linking 30 cities, with service extended to Singapore, Bangkok and Manila.

Foreign trade (In rupiahs has been:

	Imports	Exports
1952	10,424,900,000	10,405,600,000
1953	8,584,000,000	9,303,000,000
1954	7,172,000,000	9,759,000,000

History and Government. Until March, 1942, Indonesia was a Netherlands overseas territory. Following Japanese military occupation (1942-1945), Indonesian nationalists, led by Dr. Soekarno and Dr. Hatta proclaimed a republic Aug. 17, 1945. Four years intermittent warfare between Netherlands and Indonesian forces were terminated by agreements signed Nov. 2, 1949, transferring sovereignty over all Indonesia, except Netherlands New Guinea (Irian) to the new interim government known as the Republic of the United States of Indonesia, effective Dec. 27, 1949. Dr. Soekarno, veteran campaigner for Indonesian independence, was elected President, Dec. 16, 1949. On July 20, 1950, the member states agreed to form a strongly centralized government and accordingly a unitary state with an amended constitution, was proclaimed Aug. 15 and its name formally changed to Republic of Indonesia. The republic became the 60th member of the U.N. by unanimous vote of the General Assembly, Sept. 29, 1950.

Legislative power is in the hands of a House of Representatives numbering about 212.

The Netherlands-Indonesian Union with Queen Juliana at its head, created in 1949, began to dissolve Aug. 10, 1954, when new protocols governing future relationship were signed. Status of the Netherlands-held portion of New Guinea has not been determined.

Premier: Burhanuddin Harahap, Moslem Mas-jumi party, appointed Aug. 11, 1955.

Education and Religion. 90% of the inhabitants are Moslems, the remainder Christians, Hindus and Buddhists. A sweeping educational program was begun in 1950 to eliminate illiteracy (20,000,000

between 16 and 40). Program envisages compulsory primary education for children 6 to 12, plus optional secondary training and higher education. Primary school attendance was 6,129,152 in 1952-53. Major institutions of higher education are Univ. of Indonesia (Djakarta and Bandung), Gadjah Mada Univ., National Academy, Islam Univ., Pantijsila Univ. Many languages are spoken; official language is Bahasa Indonesia, derived from Malay.

Defense. Indonesia has an army, navy and air force. Service is not compulsory.

Iran PERSIA

Capital: Tehran. Area: 628,060 sq. mi. Population (est., 1954): 20,662,000. Flag: three horizontal bars, green-white-red, with golden lion insignia in white portion. Monetary unit: Rial (U.S. 1.33cs).

Descriptive. The Kingdom of Iran occupies the western and larger half of the great Iranian plateau between the rivers Indus and Tigris in Southwestern Asia. It is bounded on the North by the U.S.S.R. and the Caspian Sea; on the East by Afghanistan and Pakistan; on the South by the Arabian Sea and the Persian Gulf; on the West by Iraq and Turkey.

Across the plateau, which lies at an altitude of 4,000 to 8,000 ft., in the north central part, from Northwest to Southeast, stretches a desert, 800 miles long, varying from 100 to 200 miles wide. There are many peaks from 9,000 to 10,000 ft.

Resources and Industries. Fine forests cover the maritime plains and mountain slopes. Mineral deposits in addition to oil, are known to be considerable. Other minerals include iron, coal, copper, lead, manganese, borax, nickel and cobalt. Turquoise mines are worked in Nishapur.

Agriculture is a prime industry, wheat, barley, rice, fruits, gums, drugs, wool, tobacco and cotton being the chief products. Some wines are famous. Persian carpets, all made on hand looms, are produced in Tabriz, Araq, Meshed, Isfahan, Kashan and Kerman. Khurasan is famous for the quality of its wool. The chief exports are petroleum, cotton, carpets, fruits, gums, hides, wool, opium and rice; the chief imports are textiles, sugar, tea and manufactures of metals.

The Iranian oil field in the southwest territory at the head of the Persian Gulf is the richest single field in existence. Eight American, British, Dutch and French companies now operate the Abadan refinery under terms described below.

History and Government. One of the oldest of countries, Iran was called Land of the Persians and the Medes in the Bible; Elam was a part of Iran. Iran's government was similar in form to that of Turkey until 1906.

Constitutional government, established in 1906 comprises an executive with power vested in the cabinet and government officials who act in the name of the Shah; a judiciary; a legislature consisting of a national assembly (Majlis), elected for 2 years, and a Senate of 60, 30 elected and 30 nominated by the Shah. Legislative bills require the Shah's signature. The 1906 constitution was amended May 9, 1949, to empower the Shah to dissolve Parliament.

The Shah is Mohammed Riza Pahlavi (born Oct. 26, 1919). He married Princess Fawzia, eldest sister of Farouk I of Egypt, March 15, 1939; divorced Nov. 19, 1948. A daughter, Princess Chahinaz, was born in 1940. The Shah married his second wife, Soraya Esfandiary, Feb. 12, 1951.

British and Russian forces entered Iran Aug. 25, 1941, withdrawing later. Britain and the U.S.S.R. signed an agreement Jan. 29, 1942, to respect Iran integrity and give economic aid.

Economic difficulties were created when the Tudeh (Masses) and Communists agitated for nationalization of the oil industry. When Premier Hussein Ala resigned the Shah appointed Dr. Mohammed Mossadegh, leader of the national front, premier, Aug. 29, 1951. Parliament voted nationalization of oil and this led to the closing of the Abadan refinery of the Anglo-Iranian Oil Co., in which the British government had an interest. Closing led to wide unemployment and a financial crisis in Iran. Diplomatic relations were broken off by Britain, 1952 (resumed 1953).

Mossadegh's policy favored closer relations with the U.S.S.R. Intensification of the economic crisis led the Shah to attempt Mossadegh's removal; the latter's supporters staged a brief uprising, Aug. 16-19, 1953, during which the monarchy was endangered and the Shah compelled to leave the

country. The royalist faction recovered control and the Shah returned. Mossadegh was arrested and eventually sentenced to 3 years in prison and the Tudeh and Communists were held in check.

American negotiation brought about order in the oil situation. On Aug. 5, 1954, Iran and 8 oil companies (British, American, Dutch, French) signed a contract for 25 years, plus 15 optional, to operate the former plant of Anglo-Iranian Co., the latter to get \$70,000,000 compensation, and the companies to pay Iran 50% of their earnings.

In 1954 Iran instituted a five-year plan of economic development to cost \$500,000,000, to be financed by oil revenues and loans from the U.S. and the International Bank, involving hydro-electric projects, cement mills and others.

An increase in direct taxation on hitherto privileged landholders and people of high incomes is being developed to insure greater social security and welfare to the masses.

Education and Religion. The Islamic religion predominates. Education is compulsory.

Defense. Two years' service is compulsory.

Iraq

AL MAMLAKA AL IRAQIA MESOPOTAMIA

Capital: Baghdad. **Area:** 171,600 sq. mi. **Population** (est., 1954): 4,948,000. **Flag:** black-white-green horizontal bars; vertical red trapezoid near hoist, containing two white stars. **Monetary unit:** Dinar (U.S. \$2.80).

Descriptive. Mesopotamia is the name applied to the areas between the Euphrates and the Tigris Rivers. Iraq is the Arab name for this territory which includes the former Turkish Vilayets of Basra, Baghdad and Mosul. It is bounded on the North by Turkey; on the East by Iran; on the South by the Persian Gulf, Kuwait and Saudi Arabia; on the East by Jordan and Syria.

The country is mostly alluvial plain. The temperature varies widely: 120°F in the shade is common, contrasted with severe frosts in the winter.

The soil is of extraordinary fertility, but since destruction of an intricate system of canals during invasions, 700-1258, the Tigris and Euphrates rivers have caused recurring damage.

The Baghdad railway line links Iraq and Turkey, connecting the cities of Iraq, Mosul, Baghdad and Basra. Baghdad and Basra have modern airports.

Resources and Industries. Wheat, barley, rice, millet and cotton are the chief crops, with tobacco in the Kurdish hills. Dates are grown in the tidal stretches of the Shatt el Arab and beyond. From Fao to Qurna the river flows through a continuous date grove. Large flocks of sheep are raised in the north and wool and skins are exported. Exclusive of oil, barley and dates constitute 78% of Iraq's exports.

Iraq is one of the great oil-producing countries of the world. Production by native companies and American and other interests comprising the Iraq Petroleum Co. operating the rich Kirkuk field rose from an annual rate of 7½ million tons in 1950 to an approx. scheduled annual rate of 30,000,000 tons in 1955. The Iraq Development Board handles national improvements paid for by oil royalties. The five-year economic plan of 1955-1960 authorizes expenditures of \$1 billion, with stress on a large irrigation and flood control program in the Tigris-Euphrates valley, to bring an estimated additional 5,500,000 acres into production, multiplying farm income many times.

History and Government. The Tigris-Euphrates valley is the legendary cradle of the human race, regarded by some Biblical scholars as the original Garden of Eden. It was here that the ancient cities of Nineveh and Babylon flourished. Ur, the most ancient city in the world as yet discovered, was built more than 6,000 years ago.

Iraq, then known as Mesopotamia, was taken from Turkey in World War I. The League of Nations gave a mandate to Britain, which ended in 1932 when Iraq was recognized as a sovereign state and member of the League of Nations. It is now a member of U.N.

Emir Faisal, then King of the Hejaz, was chosen ruler by a referendum, 1921. On his death, Sept., 1933, he was succeeded by his son, Ghazi Ibn Faisal. King Ghazi was killed in an automobile accident April 4, 1939, and was succeeded by his son, King Faisal II (born May 2, 1935). Emir Abdul Ilah, his maternal uncle, acted as regent until the King reached his 18th birthday May 2, 1953.

At the Constituent Assembly, 1924, a Constitutional Monarchy, hereditary in the family of King Faisal, was created with a Chamber of Deputies

of 142 members, elected for four years, and a Senate, which may not exceed one-fourth the number of Deputies, appointed by the King. Prime Minister: Nuri al-Said.

Education and Religion. Elementary education is free and nominally compulsory. Arabic is the language of the majority. The people are preponderantly Mohammedan, divided between the Sunni and Shi'ah sects. Christians number more than 90,000. Of the 100,000 Jews in 1947 many have migrated to Israel.

Defense. Military service is compulsory between the ages of 18 and 25. The Iraq army comprises three divisions; plains, mountains and training, organized along modern lines. There is a small air force and a navy consisting of a river flotilla. Iraq signed a mutual defense pact with Turkey, Feb. 26, 1955.

Ireland

POBLACHT NA H'EIREANN REPUBLIC OF IRELAND

Capital: Dublin. **Area:** 27,137 sq. mi. **Population** (U.N. estimate 1954): 2,933,000. **Flag:** vertical bars, green-white-orange. **Monetary unit:** Irish pound (U.S., \$2.80).

Descriptive. Ireland, an island in the Atlantic Ocean near the European mainland, is a sovereign, independent republic, separated from Great Britain on the East by the Irish Sea and the North Channel and on the Southeast by St. George's Channel.

Ireland, The Emerald Isle, consists mainly of a central plateau surrounded by isolated groups of hills and mountains, the coast of which is much indented by the sea, affording many inlets and coves. The mean annual temperature ranges from 48°F. in the North to 52°F. in the South. Dublin has an average temperature of 39 in the coldest month and 60 in the warmest. There are numerous lakes (called loughs), the best known of which is the Shannon, about 250 miles long. Some mountains attain an altitude in excess of 3,000 ft. Wildlife is scarce, and there are no known snakes existent.

The famous Blarney stone is located in an old castle in the village of Blarney, four miles Northwest of Cork and is said to confer oratorical powers on those who kiss it.

Resources and Industries. The country is chiefly agricultural, the ranking crops being wheat, oats, barley, rye, potatoes, turnips, mangels, sugar beets, cabbage, flax and hay. Agricultural employment has fallen by 88,000 since 1947, the workers going into manufacturing and trade.

A land rehabilitation project was introduced in 1949 to reclaim 4,000,000 acres of under-productive land. A Turf Board is in action to drain the bogs which cover one-seventh of the country's surface, utilize the fuel which is used domestically, and cultivate the land.

Food processing is the chief industry, followed by tobacco, fabrics, clothing, distilling and lumber.

History and Government. A rising against British rule took place in April, 1916, when a republic was proclaimed, but failed. The Dail Eirean, or Irish parliament in Dublin, demanded independence in Jan., 1919. Britain offered dominion status to Ulster (6 counties) and southern Ireland (26 counties), Dec., 1921, which Northern Ireland accepted. The Irish Free State held authority up to the northern border and Northern Ireland became associated with Great Britain, 1925.

The constitution, which came into operation Dec. 29, 1937, restored the former name of Ireland (Eire) and declared Ireland is a sovereign, independent, democratic state.

Under the terms of a treaty concluded April 25, 1938, with Ireland, Great Britain surrendered its treaty rights over the Irish ports of Cobb (Queens-town), Bere Haven and Lough Swilly and their equipment.

Ireland became completely free from England April 18, 1949, following repeal Dec. 21, 1948, of a law requiring credentials of Irish diplomats to be signed by the British king.

In the Ireland Act, 1949, the British Parliament re-asserted its claim to incorporate the six northeastern counties (Antrim, Armagh, Derry, Down, Fermanagh and Tyrone) in the United Kingdom. This claim has not been recognized by the Republic. (See *United Kingdom—Northern Ireland.*)

The government of Ireland is bicameral with a President elected directly by the people for a term of seven years; a House of Representatives called Dail Eireann, consisting of 147 members elected by the people; and a senate (Seanad

Eireann). The Senate consists of 60 members, eleven of whom are appointed by the Taoiseach, (Prime Minister) who is the head of government. Of the remaining 49, the universities elect six and the balance are elected from five panels of candidates established on a vocational basis, representing the following public services and interests—(1) national language and culture, literature, art, education and other professional interests; (2) agriculture and allied interests, and fisheries; (3) labor, organized or unorganized; (4) industry and commerce, including banking, finance, accountancy, engineering and architecture; (5) public administration and social services, including voluntary social activities.

The Senate considers and amends legislation but has no veto power. The government exercises the executive power. The President, on the advice of the Taoiseach, summons and dissolves Dail Eireann. He signs and promulgates laws. On the nomination of Dail Eireann he appoints the Taoiseach and on the nomination of the Taoiseach with the previous approval of Dail Eireann he appoints the other members of the government.

The President is Sean T. O'Kelly, elected June 14, 1945, reelected, 1952, without opposition.

In the general election, May 18, 1954, seats were distributed as follows, compared with the previous Parliament:

	1951	1954
Fianna Fail	69	65
Fine Gael	40	50
Clann na Poblachta	2	3
Labor	16	19
Clan na Talmhan	6	5
Independent	14	5

Prime Minister is John A. Costello, elected June 2, 1954, succeeding Eamon de Valera.

Education and Religion. Roman Catholic is the prevailing religion with an enrollment of (1946 census) 2,786,033. Chief sects are: Protestant Episcopalians 124,829, Presbyterian 23,870, others 20,375.

Elementary education is free and compulsory, and the Irish language is a required study in all national schools. Institutions of higher learning include the National University, founded 1908, comprising the Constituent Colleges of Dublin, Cork, Galway and St. Patrick's, Maynooth; Trinity College, Dublin, founded 1591; the Dublin Institute for Advanced Studies, the Royal Irish Academy.

Defense. Recruitment is voluntary. Personnel of army, navy, and air force is set at 13,000 in the permanent force, and 23,500 in first and second line reserves. Navy consists of small vessels.

Israel

MEDINAT ISRAEL STATE OF ISRAEL

Capital: Jerusalem. Area (est., 1954): 1,717,834. Flag: two horizontal blue bands on white field, with Star of David composed of narrow blue bands in center of field. Monetary unit: Israeli pound (U.S. 55.6c).

Descriptive. The State of Israel, a republic created in 1948, occupies the major portion of Palestine, the Holy Land. It lies on the western edge of Asia bordering on the Mediterranean Sea. It is bounded on the North by Lebanon and Syria, on the East by Jordan and on the South by Sinai, Egypt.

On the West is the coastal plain 120 miles long and 15 wide, fertile and well watered. In the center is the plateau of Judea. A triangular-shaped semi-desert region, the Negev, extends from south of Beersheba to an apex at the head of the Gulf of Elath (Aqaba). The eastern border drops sharply into the depressed valley of the River Jordan and the Dead Sea, 46 miles long, with an average width of 8 miles, 1,268 ft. below sea level.

Exact frontiers have not yet been defined. Israel's area, as defined by armistices with the Arab nations, includes all the land assigned to it under the 1947 partition resolution of the U.N. General Assembly, as well as Western Galilee and a corridor to Jerusalem. By the terms of the armistice with Syria, July 20, 1949, last of the Arab states to conclude military action, demilitarized zones were set up in Mishmar Hayarden, Dardara on the eastern edge of Lake Hule, and the south-eastern shore of Lake Galilee, site of Israel's Ein Gev settlement on the Syrian border.

With establishment of the new state, all restrictions on Jewish immigration which had been in effect during British rule were abolished and by Dec., 1954, Israel had received 735,394 immigrants. Arab population remaining, (est.) 185,000.

Resources and Industries. Citrus fruit is the most valuable agricultural product. Other principal crops include wheat, barley, durra, olives, melons, grapes, figs, tomatoes and bananas. Wine making is an extensive industry. Minerals found are limestone, sandstone, gypsum, copper, iron, phosphates, magnesium, manganese, ceramic clays. The valley of Jordan and the Dead Sea yield rock salt, sulphur and potash.

The chief ports of Israel are Haifa and Tel Aviv-Jaffa. Haifa has an important oil refinery.

Large-scale development of the state's postal and telephone service is under way. Telephones, numbering 58,200 in 1955, will be increased to 67,000 by 1957. The Negev area will continue to be served by radio-telephone.

There has developed considerable trade in manufactured commodities, both in local and imported raw materials. Small scale industries and handicrafts still predominate although there has been a flow of capital equipment for industrial enterprises, including automobiles, tires, electrical appliances, building materials, paper, textiles.

The Beit Natufa dam north of Nazareth, completed in 1952, will be the center of the 20-year water scheme linking the nation's water resources. A 66-mile pipeline diverting water from Yarkon river to the Negev region was opened in 1955.

Israel's main exports are citrus fruits, polished diamonds, autos, textiles and fashion goods, building materials, tires and pharmaceutical products.

Its imports include grain, meat, industrial and agricultural machinery, chemicals, textiles, timber, hides and other raw materials.

History and Government. The Zionist movement for a homeland in Palestine, led by Dr. Chaim Weizmann (born in Motile, Russia, Nov. 27, 1847) caused the cabinet of Great Britain to give its support in the Balfour Declaration, Nov. 2, 1917. The open opposition of the Arab world led to indecision in Britain, although it protected the immigration of Zionists. When the Nazi persecutions began in Germany great numbers of Jews set out for Palestine. The General Assembly, U. N. voted Nov. 29, 1947, to partition Palestine into two independent states by Oct. 1, 1948. The Arab state would have 4,500 sq. mi. A separate enclave of Jerusalem, area 289 sq. mi., was to be administered by a governor appointed by the U. N. British troops were to be withdrawn and separate governments elected. Great Britain gave up its mandate and withdrew May 15, 1949.

A new Zionist state, the Republic of Israel, was proclaimed May 14-15, 1948. It occupied the territory designated by the U. N., but also laid claim to Jerusalem. Israel took charge of the New City in Jerusalem and Jordan held the Old City. The U. N. adopted a resolution to internationalize Jerusalem, but was unable to get support from the two states.

Israel was elected to the U. N. May 11, 1949.

From the start Israel met with the opposition of the Arab League, which established hq. in Damascus to enforce an economic boycott. Armed interference or attacks were also begun by Syria, Egypt, Iraq, Lebanon, Saudi-Arabia, Jordan.

Separate armistices with the Arab nations were signed in 1949, but no general peace settlement was obtained and border clashes continued into 1955, particularly with Egypt in the Gaza area in the Southwest. United States Secretary of State John Foster Dulles proposed Aug. 27, 1955, a program to end hostilities, calling for an international guarantee of Israeli-Arab borders. Israel and Egypt accepted a U.N. truce proposal Sept. 4.

The future of more than 868,000 Arab refugees who have fled to neighboring states since the new republic was formed remains uncertain. They receive U. N. aid.

The first constituent assembly (Knesset), was formed Feb. 14, 1949, with 120 members, including several Arabs. The assembly elected Dr. Chaim Weizmann, who had been provisional president from the start, first president of Israel Feb. 17, 1949. The President is Yitzhak Ben-Zvi (born in Russia, 1884), elected Dec. 8, 1952, to succeed Dr. Weizmann who died Nov. 9.

In elections to the third Knesset, July 26, 1955, based on proportional representation, the Mafai party won 40 seats and retained dominance. Premier Moshe Sharett and his coalition cabinet resigned Aug. 15.

Education. A unified education system exists in the Jewish schools, with religious schooling optional. At the end of 1954 there were approx. 340,000 pupils in all types of schools. Higher edu-

education is provided by Hebrew University, founded 1925, Israel Institute of Technology in Haifa, Weizmann Institute of Science in Rehovot (research in pure science); Bar-Ilan Univ. in Ramat Gan, opened in 1955; and School of Law and Economics in Tel Aviv and Haifa.

Defense. There is compulsory 2½-year service between 18 and 26 and 2-year conscription in the 27-29 age group. The navy includes 5 frigates, one training ship, 2 minesweepers and other vessels.

Italy

REPUBBLICA d'ITALIA

Capital: Rome. **Area:** 117,471 sq. mi. **Population** (govt. estimate, 1954): 48,000,000. **Flag:** three vertical stripes, dark green-white-red. **Monetary unit:** Lira, pl. lire (U.S. 0.16c).

Descriptive. The Republic of Italy occupies the entire Italian peninsula, stretching from the Alps southeast into the Mediterranean, with the islands of Sicily, Sardinia, Elba and about 70 smaller ones. On the East is the Adriatic Sea; on the South, the Mediterranean, on the West between the mainland and Sicily and Sardinia is the Tyrrhenian Sea, and farther North the Ligurian Sea. The Maritime Alps on the West separate it from France, the Swiss Alps on the North from Switzerland, and the Dolomite Alps from Austria, and the Carnac and Julian Alps on the East from Yugoslavia. The great plain shut in by these huge mountains, and the Ligurian Apennines, and watered by the River Po (220 miles long) and the Adige, shared by the regions of Piedmont, Lombardy, Emilia and Venetia, stretches across the top from the Maritime Alps to the head of the Adriatic. The Ligurian Mountains, circling the Gulf of Genoa, run down the middle of the peninsula as the Apennines, through the southern province, Calabria, to the "toe of the boot" at Cape Spartivento.

Across the narrow Strait of Messina the mountain range continues through the Island of Sicily with its famous volcano, Mt. Etna (10,755 ft.) having a record of more than 120 eruptions. The active volcano, Mt. Vesuvius (3,891 ft.) with a record of 50 known eruptions rises on the Bay of Naples. North of the Strait of Messina is the volcano of Stromboli (3,022 ft.).

The length of the peninsula is 760 miles, while its breadth nowhere exceeds 150 miles and does not generally measure more than 100 miles.

Two rivers having the greatest historic importance, rise in the Apennines, and flow west to the sea—the Tiber, which moves through Rome, and the Arno, which waters the Florentine plain. Between the spurs of the Alps lie seven beautiful lakes, especially noteworthy being Como, Lugano, Maggiore and Garda, the largest. Both Maggiore and Garda are more than 30 miles long.

The Adriatic coastline is flat and has four major ports: Venice, Ancona, Bari and Brindisi.

The climate of Italy is sunny, although northern Italy has a cold winter; snow is rarely seen in Naples, and olives, oranges, lemons, figs, cotton, almonds, and pomegranates flourish in southern Italy. In the plains the soil is fertile, but in the mountainous regions, which cover a large part of the Peninsula, cultivation is difficult. Italy is one of the most densely populated states in Europe, having over 408 to the square mile (1955).

Resources and Industries. Agriculture is the chief industry, with a cultivable and forestal area (1950) of 68,552,568 acres with 8,756,000 persons so engaged. The principal crops are wheat, corn, rice, barley, oats, rye, beans, potatoes, sugar beets, grapes and olives. Dairy farming and cheese making are important in Northern Italy.

Land reclamation work covers 10,250,000 acres. A five-year economic development plan, 1953, aims at an increase of 40% in industrial production and 500,000 tons of additional shipping. A \$70,000,000 World Bank loan, approved June 1, 1955, will finance economic expansion of South Italy and Eastern Sicily.

A land reform program, begun in 1951, contemplates eventual expropriation of 3,500,000 acres.

Italy is not rich in mineral deposits, and is especially lacking in coal, although it is a large producer of sulphur, chiefly in the volcanic regions of Sicily. Other minerals are iron, manganese, mercury, lead, zinc, antimony and bauxite.

Italy has more than 1,000 hydro-electric and 225 thermo-electric power installations which supply energy to its industrial centers. Annual production of electricity is approximately 20 billion kilowatts in normal times.

Italy's merchant marine, shattered in World

War II, has revived, reaching a record 4,009,964 tons in Oct., 1954.

The largest and most important industry, aside from agriculture, is the manufacture of textiles. Silk culture is carried on extensively in Lombardy, Piedmont and Venetia. Other principal manufactures are chemicals (sulphuric acid, superphosphate and copper phosphate); electrical goods, automobiles and heavy machinery; sugar, cheese and macaroni.

In 1954, index of industrial production rose 10% from 1953 to reach 183 (1938=100). Crude steel production exceeded 4,000,000 tons; vehicle production increased 30% over 1953.

Foreign trade (in millions of lire):

	Imports	Exports
1952	1,459,734	866,537
1953	1,512,686	941,789
1954	1,500,611	1,022,487

History and Government. Divided and dismembered for centuries, Modern Italy began to develop when, following the war of 1859, Lombardy came under the crown of King Victor Emmanuel II, of Sardinia of the house of Savoy. By plebiscite in 1860, Parma, Modena, the Romagna and Tuscany joined, followed by Sicily and Naples, and by the Marches and Umbria. The first Italian Parliament declared Victor Emmanuel King of Italy Mar. 17, 1861. Mantua and Venetia were added in 1866 as an outcome of the Austro-Prussian war. The Papal States were taken possession of by Italian troops, Sept. 20, 1870, after the withdrawal of the French garrison in the Franco-Prussian war, and were annexed to the kingdom by plebiscite. The King entered Rome July 2, 1871. Italy recognized the State of Vatican City as independent June 7, 1929.

Fascism appeared in Italy March 23, 1919 when the original Fascisti—called Black Shirts because of their garb—organized into an association against Communism and Socialism under the guidance of Benito Mussolini. They marched on Rome and took over the government at the invitation of the King Oct. 28, 1922.

As leader of the Fascisti and head of the government, Mussolini acquired dictatorial powers and was called Duce (Leader). He made war on Ethiopia (Abyssinia) and proclaimed Victor Emmanuel III emperor; defied the sanctions of the League of Nations; joined the Berlin-Tokyo axis; sent troops to fight for Franco against the Republic of Spain; joined Germany in war after the defeat of France. World War II ended in the defeat of Italy, surrender of conquered lands, loss of colonies. Part of Venezia Giulia went to Yugoslavia and Trieste was made a free territory. Mussolini was put to death by a firing squad of Partisans in the village of Dongo on Lake Como, Apr. 28, 1945.

King Victor Emmanuel III abdicated and his son took the title Humbert II. In the general elections, June 2-3, 1946, the people voted 12,718,641 for a republic, 10,718,502 for a monarchy. King Humbert departed and Premier Alcide de Gasperi became head of the government. Victor Emmanuel went to Egypt where he died Dec. 28, 1947.

The Constituent Assembly elected Enrico de Nicola, ex-member of the Liberal party, president of the Republic. He was succeeded by Luigi Einaudi, elected by a joint session of the Senate and Chamber of Deputies for a seven-year-term May 11, 1948. Present incumbent: Giovanni Gronchi, Christian Democrat, elected April 29, 1955.

Under Italy's new constitution effective Jan. 1, 1948, the Senate is composed of 237 elective Senators and six appointed for life; the Chamber of Deputies numbers 590 members. Italy is described by the constitution as a "democratic republic founded on work." Re-organization of the Fascist Party is forbidden. Women of 21 and over vote.

Despite persistent Communist opposition Premier De Gasperi and former Foreign Minister Carlo Sforza brought Italy into the West European orbit. The U.N. authorized Italy to administer Italian Somaliland as a Trust Territory. A proposal to seat Italy in the Trusteeship Council was vetoed by the Soviet Union. Italy is a member of the North Atlantic Treaty group.

In the general elections of June 7-8, 1953, the Center party coalition won by a margin of 14 seats in the Senate and 16 in the Chamber. The Christian Democrats party won 10,859,554 votes (40.09%). Communists ran second with 6,122,638 (22.6%). Premier De Gasperi was re-appointed and announced his eighth Cabinet July 15, 1953, but resigned July 28. (Died Aug. 19, 1954).

Premier: Antonio Segni, appointed July 5, 1955.

Education and Religion. Roman Catholic is the state religion, made so, March 26, 1947, when the Lateran agreement between Italy and the Holy See was made an integral part of the constitution. The census of 1936 returned 41,017,369 Catholics (99.6%), 83,618 Protestants and 47,825 Jews.

Italy has 27 universities, with ten of them dating from the 13th century or the first years of the 14th. Famous among these are Bologna (founded 1088); Genoa (1243); Naples (1224); Padua (1222); Pisa (1338); Rome (1303), and Turin (1404). Primary education is compulsory between 6 and 14.

Defense. Portions of the peace treaty limiting the Army to 185,000, the Navy to 67,500 tons, the Police to 65,000 were repudiated by the U.S. and 10 other nations, Dec. 21, 1951.

The Navy consists of 2 battleships, 3 cruisers, 5 destroyers and numerous smaller vessels. Two large destroyers with special equipment, 2 frigates and 4 gunboats are under construction.

TRIESTE

Trieste, Italian Department bounded East and South by Yugoslavia, was organized as a Free Territory by the Big Four in the peace treaty with Italy, Feb. 10, 1947, placed under jurisdiction of the U.N. Security Council, garrisoned by troops of the United States and Great Britain in the northern section (Zone A), and by Yugoslavia in the south (Zone B). Following prolonged negotiations, an agreement was signed Oct. 5, 1954 by Italy and Yugoslavia which gave Italy the northern section and the seaport of Trieste, and Yugoslavia the southern section it had occupied and emergency access to the port. The territory has an area of 320 sq. mi. and population (1953) of 297,000.

SOMALIA TRUSTEESHIP

Somalia, once part of Italy's colonial empire, extends along the Indian Ocean from the Gulf of Aden to the Juba River in Africa. Its area is 194,000 sq. mi. and population 1,255,000 (1952). The coastline extends in a northeast-southwest direction for 1,100 miles, with no indentation of importance. The capital, Mogadisho, is the only seaport.

The U.N. General Assembly approved, Nov. 21, 1949, creation of Somalia and Libya as sovereign states, tentatively scheduled Somalia's independence for 1960, until then to be administered under Italian-U.N. trusteeship. Consult Index *Ethiopia, Libya*.

Somalia is the source of half the world's supply of incense. Other exports are oil, gum, hides, kapok, resin and ivory.

Japan

NIPPON—LAND OF THE RISING SUN

Capital: Tokyo. **Area:** 142,644 sq. mi. **Population** (govt. est., 1954): 88,500,000. **Flag:** white ground with red sun. **Monetary unit:** Yen (U.S. 0.2778c).

Descriptive. Japan consists of four main islands: Honshu (mainland) with an area of 88,942 square miles; Hokkaido, 30,303; Kyushu, 15,712; and Shikoku, 7,248. A fifth, Amami Oshima, 438, was returned to Japanese administration in 1953. The islands lie in the North Pacific Ocean off the coast of China. By the terms ending World War II, Japan was forced to surrender its other seized lands, including Manchuria (Manchukuo) with an area of 404,428 square miles and a population of 43,233,954; the southern half of Sakhalin Island, the Kuriles, Korea, Formosa, and the mandated islands in the Pacific, the Marshalls, the Carolines, the Ladrões and the Palaus, once German.

The Japanese coast is deeply indented, its coastline measuring 16,565 miles. The northern islands are a continuation of the Russian Karafuto chain running down through Hokkaido and the mainland. The continuation of the Kunlun mountain range of China appears in the southern islands, the ranges meeting in the grand Japanese Alps. In the vast transverse fissure crossing the mainland from the Sea of Japan to the Pacific rises a group of volcanoes, mostly extinct or dormant, with the mountain Fujiyama lifting its white cone 60 miles west of Tokyo to an altitude of 12,425 ft. The earthquake zone—where the average is said to be four slight ones a day, with serious ones every six or seven years—has its greatest center along the Pacific Coast near the Bay of Tokyo.

Separating the islands of Shikoku and Kyushu from the mainland is the famous Inland Sea, opening both into the Sea of Japan and the Pacific. It is 255 miles long and 56 wide, with a coastline of 700 miles and a surface expanse of 1,325 sq. mi.

The streams are short and swift, of little value for transportation, offering a vast supply of hydroelectric power. Numerous waterfalls enhance the magnificent scenery. Kegon waterfall at Nikko makes an unbroken plunge of 350 ft.

Most important ports open to foreign trade include Yokohama, Kobe, Nagoya, and Osaka on the Pacific Coast of the main island.

Resources and Industries. More than half the arable land is used for growing rice, the chief food of the country. Wheat, barley, sweet and white potatoes, tobacco, tea, beans, peaches, pears, apples, grapes, persimmons and mandarins are also produced. Minerals include gold, silver, copper, lead, zinc, chromite, white arsenic, coal, sulphur, salt and petroleum.

After agriculture and the making of silk, the principal industries before World War II were fishing, manufacture of woollens, cottons, paper, pottery, vegetable oil, leather and matting.

The general industrial production index (1934-36: 100) was 148.9 in 1953, or 18% above 1952; a postwar high of 166.8 was reached Dec., 1953. In 1954 it produced 5,812,000 metric tons of steel, more than Belgium and less than France.

Textiles exports have increased with the general postwar expansion of trade and remain the most important segment, accounting for over half of Japan's merchandise sales abroad. Metal and machinery are increasingly important as sources of foreign exchange. The fishing industry has regained much of its former importance, est. 5,265,000 tons annually.

Foreign trade has been:

	Imports	Exports
1950	969,900,000	820,000,000
1951	2,046,800,000	1,354,500,000
1952	2,028,000,000	1,273,000,000
1953	2,410,000,000	1,275,000,000
1954	2,399,000,000	1,629,000,000

History and Government. According to Japanese legend, the empire was founded by Emperor Jimmu Tenno 660 B.C. Temporal power was exercised by successive families of Shoguns, 1186-1867, until recovered by the Emperor Meiji in 1867. The feudal system was abolished 1871 marking the rise of the upper middle classes and trading families.

The Emperor is Hirohito, the 124th of his line, born April 29, 1901, and crowned Nov. 10-14, 1928. Married Jan. 26, 1924, to Princess Nagako Kuni. The Crown Prince is Akihito Tsugu No Miya, born Dec. 23, 1933. Other children are Princess Shigeo, born Dec. 6, 1925; Princess Kazuko, born Sept. 30, 1929; Princess Atsuko, born March 7, 1931; Prince Masahito, born Nov. 28, 1935. A daughter, the sixth child, was born March 2, 1939, and christened Takako Suganomiya (Princess Suga).

By the terms of the surrender, Aug. 14, 1945, Japan agreed to a democratic government and free elections. The Potsdam declaration specified that freedom of speech and religion and thought as well as respect for the fundamental rights of humanity be established.

Gen. Douglas MacArthur was appointed Supreme Commander for the Allied Powers and occupied Japan. Baron Kijuro Shidehara, a former ambassador to the United States, was named Premier. One of the first acts of the cabinet was to grant suffrage to women and to lower the voting age for men from 25 to 20. The vast family trusts (Zaibatsu) and corporate trusts were dissolved.

A new constitution became effective May 3, 1947. In it the Japanese people renounce the right to wage war or maintain armed land, sea or air forces. It strips the Emperor of all claims of divinity and derives his position from the will of the people, but recognizes the hereditary rights of his family. It creates a parliamentary regime in which the Diet is the sole law-making authority, and replaces the House of Peers by a House of Councillors whose members are elected by popular ballot, and a House of Representatives of 467 members directly elected for not more than four years. The constitution prohibits the government from giving support to Shintoism, religious education or any other form of religious activity.

Gen. MacArthur ordered the government June 6, 1950, to ban members of the Central Committee of the Japanese Communist party from public affairs for "perversion of the truth and incitation to mass violence." Japan has been admitted to the International Wheat Org., UNESCO, World Court, Econ. Comm. for Asia and the Far East, Colombo Plan, and International Monetary Fund, but kept out of U.N.

The United States and 48 other non-Communist nations signed a peace treaty and the U.S. a bilateral defense agreement with Japan, in San

Francisco, Sept. 8, 1951; ratified by the Senate, March 20; signed by President Truman, April 15, granting Japan sovereignty April 28, 1952. The Senate, in approving the treaty, Feb. 5, advised repudiation of the section of the Yalta agreement that gave to the U.S.S.R. South Sakhalin, the Kurile Islands, and Habomai and Shikotan Islands. Under the treaty, Japan was reduced territorially to the four main islands, but it would have an opportunity eventually to regain the Ryukyus and Bonin Islands. Japan signed a separate treaty with Nationalist China, April 27, 1952, and one with India, June 9. A 9-point mutual security pact with the United States was announced Aug. 7, 1953, which would allow rebuilding of Japan's munitions industry.

The Diet, following elections to House of Councillors, April 1953, and those to House of Representatives, April 1955, is composed:

	Representatives	Councillors
Democrats	185	20
Liberals	112	91
Green Breeze Society	0	49
Left-wing Socialists	89	44
Right-wing Socialists	67	26
Independent Club	0	11
Pure Independent Club	0	3
Labor-Farmer	4	0
Communists	2	0
Others	8	4
Vacancies	0	2

Premier Shiguru Yoshida, appointed Oct. 15, 1948, resigned Dec. 7, 1954, and was succeeded by Ichiro Hatoyama, Dec. 9.

Education and Religion. Japan has no state religion and all faiths are tolerated. The principal forms of religion are Buddhism, with 12 sects, and Shintoism (13 sects). There are more than 100,000 Shinto shrines, 106,634 Buddhist temples and 2,104 Christian churches. The Roman Catholics have an archbishop and three suffragan bishops.

Nine years of education is compulsory, consisting of six years of elementary and three years of lower secondary education. There are 220 colleges and universities including the seven main national universities: Tokyo (founded 1877), Kyoto (1897), Tohoku at Sendai (1907), Kyushu at Fukuoka (1910), Hokkaido at Sapporo (1918), Osaka (1931), and Nagoya (1939). Illiteracy is less than 10% in the nation. English is the language of commerce and a required study in the high schools.

Defense. Legislation effective July 1, 1954, established a new national Army, Navy and Air Force, with an initial force of 130,000, expected to reach 150,000 during 1955. Japan had had no armed forces since the close of World War II. A mutual assistance pact with the United States was signed March 8, 1954.

Jordan

AL-MAMLAKAH AL HASHIMIYAH

AL URDINIYAH

HASHEMITE KINGDOM OF JORDAN

Capitals: Amman, Jerusalem. Area (est.): 37,500 sq. mi. Population (govt. est., 1950): 1,500,000. Flag: three horizontal bars, black-white-green, red triangle at staff with seven-pointed white star. Monetary unit: Jordan dinar (U.S. \$2.86).

Descriptive. Jordan, formerly known as Transjordan, is an independent state in Western Asia, formerly an Arab State in the Palestine Mandate. The country's popular name, Transjordan, was banned April 26, 1949, in favor of the constitutional name, Hashemite Kingdom of Jordan.

Two areas comprise the country: Western Jordan, fertile but eroded; and Eastern Jordan (Amirate), part fertile, part arid steppe. The boundaries of Jordan have not been finally determined, particularly its western boundary with Israel. It is bounded on the North by Syria, on the East by Iraq, on the South by Saudi Arabia.

Places of religious and historical importance: Jerusalem (enclave), Bethlehem, Amman, Jericho, Dead Sea, Samaria, Hebron, Jerash and Petra.

Resources and Industries. The country is largely desert, but the fertile western portion has a high agricultural potential. Phosphate and potash mines are being rapidly developed, and petroleum deposits are being surveyed. Roads, many of them metalled, are being built. Railways connect Amman with Aqaba on the Red Sea and with Syria. Industries include tobacco, flour milling, distilling, building materials, olive oil, soap, mother-of-pearl, and textiles. Rock phosphate is the main export.

History and Government. Jordan was set up within the Palestine Mandate Sept. 1, 1922, but gained its independence in 1946. Emir Abdullah

was proclaimed King May 25. Jordan signed a mutual assistance treaty with Great Britain, March 22, 1946, revised March 15, 1948.

Under the new constitution of Jan. 8, 1952, legislative power is vested in Parliament; the cabinet is responsible to the House of Representatives. The Senate (House of Notables) consists of 24 members nominated by the King; the House of 40, elected by the people.

King Abdullah Ibn Al-Hussein, born 1882, second son of Hussein Ibn Ali, King of Jordan since May 25, 1946, was assassinated by an Arab extremist July 20, 1951. His eldest son was proclaimed King Talal I, Sept. 5, 1951. Parliament removed King Talal on medical advice, installing his son King Hussein I, May 2, 1952.

Jordan's population has been sharply increased since 1948 by an influx of approximately 600,000 Arab refugees from the Palestine conflict. Since the Arab nations' armistice agreements with Israel, Jordan has administered about 2,500 square miles of Arab Palestine, including the Old City portion of Jerusalem, and made that city the administrative center for western Jordan, July 27, 1953.

Religion. The population is chiefly Arabs of whom over 1,400,000 are Arab Moslems, 90,000 Arab Christians, and 10,000 Moslem Circassians. The official language is Arabic.

Defense. Jordan's military forces comprise an Arab Legion, an air force, and a frontier force.

Republic of Korea

DAEHAEN-MINKUK; CHOSUN

Capital: Seoul. Area (total) 85,266 sq. mi. Population (U.N. est., 1949): 29,291,000. Monetary unit (South Korea): Hwan (500 to U.S. \$1).

Descriptive. Korea, "Land of the Morning Calm," occupies a mountainous peninsula in Northeastern Asia dividing the Yellow Sea from the Sea of Japan. The boundaries on the mainland are the Yalu River and the Tumen (Tamean) River. Its coastline is more than 6,000 miles long. Southern Manchuria lies along its Northwest frontier for 500 miles and it touches Siberia for a few miles, 100 miles to Vladivostok. Its highest peak is Mt. Kwannio, 8,337 ft.

Resources and Industries. Korea is chiefly an agricultural country, with a cultivated area of approximately 11,000,000 acres.

More than 80 percent of all heavy industry, including munitions, is concentrated in the northern sector where Japan built modern industrial plants valued at approximately a billion dollars before World War II. The bulk of industry is located in Sinuiju, Pyongyang, Wonsan, Hungnam, and Chongjin. The forests in the North are of great value. Gold, silver, zinc, copper, lead, iron, tungsten, graphite, coal and kaolin are present.

Silkworm culture was much encouraged by the Japanese and the quality of the cocoons improved. Rice is an important crop. Barley, wheat, tobacco, and beans also are grown. There was development of cotton spinning, cotton, silk and rayon weaving.

History and Government. Korea, formerly the Hermit Kingdom, has a recorded history since 57 B.C. and was united in a kingdom 668 A.D. It was at various times associated with the Chinese empire and the treaty that concluded the Sino-Japanese war of 1894-95 recognized Korea's complete independence. After Russia obtained a leasehold on Port Arthur and developed also its big port of Vladivostok, Korea, lying between them, was subject to Russian penetration and became to Japan "a dagger pointed at her heart." This helped bring on the Russo-Japanese war of 1904-1905. Japan occupied Korea; Russia recognized Japan's paramount interest there. In 1910 Japan annexed Korea as Chosen.

At the Cairo conference, November, 1943, President F. D. Roosevelt, Prime Minister Churchill and Generalissimo Chiang Kai-shek agreed that Korea should be "free and independent." At the Potsdam conference, July, 1945, the 38th parallel of latitude was designated as the line dividing the Soviet and the American occupation. Russian troops entered Korea Aug. 10, 1945; U. S. troops entered a week later. The Russians occupied 48,468 sq. mi., population, c. 9,000,000; the Americans 36,760 sq. mi., pop. c. 21,000,000. The Soviet military organized Socialists and Communists into a People's Interim Committee, which the American commander, Lieut. Gen. John R. Hodge, refused to recognize. He formed the Korean Advisory Council with the help of Syngman Rhee and other democratic leaders. Although the Soviet Union, at a foreign ministers' conference in Moscow, Dec., 1945, agreed to a joint trusteeship for Korea,

it thwarted all efforts to put this into effect. After repeated rebuffs the U.S. submitted the problem to the U.N. A commission appointed by the U.N. to supervise elections in Korea in 1948 was denied admission to North Korea.

The South Koreans formed the Republic of Korea in May, 1948, with Seoul as the capital. Dr. Syngman Rhee was chosen president July 20 and the republic was formally proclaimed Aug. 15, 1948, when the U.S. turned over the administration. By June 29, 1949, the U.S. had withdrawn its troops, leaving behind a Korean constabulary, trained to keep order but not to fight. President Rhee was reelected to a four-year term Aug. 5, 1952. On May 1, 1948, the Communists formed the People's Democratic Republic of Korea in North Korea, with the capital at Pyongyang. The U.S. did not recognize this organization. The Russians withdrew by the end of the year, leaving behind a fully equipped army of peasants and workers.

The North Korean Army invaded South Korea June 25, 1950 (Far Eastern time). The Security Council, U.N., demanded immediate withdrawal and asked support of its members. (The Soviet Union was absent.) The U.S. ordered Gen. MacArthur to send aid. On July 7 the U.N. asked President Truman to name a commander in chief; he appointed Gen. MacArthur. On Nov. 26, 200,000 troops of the People's Republic of China (Communist) entered the war.

An armistice was signed by the United Nations and Communist delegates in Panmunjom at 10:01 a.m., Monday, July 27, 1953 (9:01 p.m. EDT, Sunday, July 26). Hostilities ceased 12 hours later (9 a.m., EDT, Monday, July 27), and troops began to set up a neutral buffer zone. President Eisenhower immediately asked Congress to authorize a \$200,000,000 initial emergency rehabilitation fund to rebuild the economy of South Korea. The armistice continued into 1954, and prisoners were exchanged, but a Big Four meeting in Geneva in April and May, 1954, failed to resolve the conflict. For 1955 events consult *Index on Korea*; also *Chronology*.

Education and Religion. Christianity, Confucianism, Buddhism and Chondokyo are the principal religions. A modern school system was encouraged by the Japanese, including an imperial university in Seoul. Christian missionaries established seminaries and higher institutions of learning. The Republic of Korea has compulsory primary education.

Defense. The South Korea Army numbers about 600,000, and there is a small Navy and Air Force.

Latvia

LATVIJAS REPUBLIKA LATVIAN S.S.R.

Capital: Riga. **Area** (1940): 25,305 sq. mi. **Population** (est., 1940): 1,994,506. **Flag:** blue and white.

Descriptive. Latvia, an imperial Russian province before World War I, became an independent republic Nov. 18, 1918, with two other Baltic countries, Estonia and Lithuania. It is bounded on the North by the Gulf of Riga and Estonia, on the East by the U.S.S.R., on the South by Lithuania and Poland, on the West by the Baltic Sea. Riga, founded in 1201, is the principal city and second largest Baltic port, after Leningrad.

In 1940 Latvia was overrun by the U.S.S.R., which incorporated it into the Soviet Union as the Latvian Soviet Socialist Republic. This act has not been recognized by the United States.

Resources and Industries. Latvia was mainly agricultural but is becoming increasingly industrialized with gross output said to be triple that of 1940. Under the Soviet regime, farming was extensively collectivized. In 1952 there were 50 state farms, 105 machine-tractor stations, 500 horse-hiring stations, and about 1,500 collective farms. Peat and gypsum deposits abound.

Education and Religion. Before the occupation Latvia was about 55% Protestant, and 25% Roman Catholic. School pupils numbered 282,000 in 1950. There were 10 colleges and universities, and 70 technical colleges. An Academy of Sciences was opened in 1945.

Lebanon

LUBNAN

Capital: Beirut. **Area** (govt. est.): 4,000 sq. mi. **Population** (U.N. est., 1954): 1,383,000. **Flag:** three horizontal bars, red-white-red; the white twice the width of red bars, with green cedar in center. **Monetary unit:** Lebanese pound (U.S. 30.94c).

Descriptive. The Republic of Lebanon, in the Levant, occupies a strip along the Mediterranean

coast about 120 miles long and 30 to 35 miles wide, extending from the Israeli frontier on the South to Syria on the North and East. Beirut is the chief seaport.

Resources and Industries. The country is primarily agricultural, the most important products being fruits, tobacco, olive oil, silk and cotton.

History and Government. Lebanon was formed from the five former Turkish Empire Sanjaks (districts) of North Lebanon, Mount Lebanon, South Lebanon, Beirut and Bekaa, and became, with Syria, an independent state Sept. 1, 1920. The states were administered under French Mandate 1920-1941. In 1944 France yielded its powers to the Syrian and Lebanese governments. Foreign troops were withdrawn in 1946.

The republic's constitution instituted a democratic parliamentary regime. There is a unicameral legislature (Chamber of Deputies), elected every four years.

The President normally is elected for a six-year term. Camille Chamoun was elected President by Parliament, Sept. 23, 1952, succeeding Beshara al-Khoury who resigned.

Lebanon is a member of the United Nations and the Arab League.

Education and Religion. Christians form the majority, Moslems of various sects most of the remainder. There are four universities in Beirut, American, French, Lebanese, and the private Academy of Arts. Arabic is the principal language.

Liberia

Capital: Monrovia. **Area:** 43,000 sq. mi. **Population** (govt. est., 1953): 2,750,000. **Flag:** 11 horizontal red and white alternating stripes; in upper corner nearest staff a blue square with five-pointed white star. **Monetary unit:** U.S. dollar; also Liberian silver and copper coinage.

Descriptive. The Independent Negro Republic of Liberia lies on the southwest (Guinea) coast of Africa between Sierra Leone (British) on the West and the French colony of the Ivory Coast on the East, with a coast line on the South Atlantic of about 350 miles. It extends inland 75 to 190 miles. Most of the country is covered with tropical forests, rich in timber and oil nuts.

Monrovia's harbor, developed with United States aid, was opened as a free port, July 26, 1948. Air service in Liberia is maintained by Air France, Pan American Airways, and Liberian International Airways, using Robertsfield Airport and James Spriggs Payne field.

Resources and Industries. The chief products are fibre, palm kernels, crude rubber, rice, cassava, coffee, cocoa, and sugar. Mineral resources include gold, iron ore. Diamonds have been found in some districts. U.S. technical and financial aid is developing Liberia's resources. Iron ore from the Bomi Hills mines is rated as highest now mined (68.8% pure). Production, now more than 1,000,000 tons annually, is exported chiefly to the United States. It provides 10% of U.S. rubber imports.

History and Government. The population is entirely of the African race. The number of American Negroes is estimated at 20,000. Liberia was founded in 1822 when a settlement was made at Monrovia by Negro freedmen from the United States with the assistance of American colonization societies. It was declared a republic July 26, 1947. Its constitution is modeled on that of the United States. Electors must be of Negro blood and owners of land. The government rests with a President elected for one 8-year term (thereafter for 4-year terms); a Senate of 10, elected for six years, and a House of Representatives of 31, elected for four years. The President is William V. Tubman, elected for 8 years, May 4, 1943, reelected to 4-year terms, May, 1951, and May 3, 1955.

Education and Religion. Christianity predominates. Public schools are entirely maintained by the government; all others receive subsidies. There are 500 schools of various types (1955); also two colleges. English is the official language.

Defense. All citizens between the ages of 16 and 45 years are liable for service for defense.

Libya

AL MAMLAKA AL LIBIYYA AL MUTTAHIDA

Capitals: Tripoli and Benghazi. **Area** (est.): 679,358 sq. mi. **Population** (est., 1952): 1,340,000. **Flag:** red, black, green horizontal, white crescent and star in center. **Monetary unit:** Libyan pound, 100 piastres (U.S. \$2.80).

Descriptive. Libya, first country to receive independence fully under United Nations auspices,

is a constitutional monarchy comprising the states of Tripolitania, Cyrenaica, and Fezzan. It is situated along the northern coast of Africa, bounded on the North by the Mediterranean Sea; East by Egypt; West by Tunis and Algeria; South by French West Africa, Equatorial Africa and the Sudan. Geographically it consists of three zones: The Mediterranean, about 17,230 square miles, most heavily populated and the only section well suited to agriculture; a sub-desert area, which produces chiefly the alfalfa plant; a desert zone containing some fertile oases (Ghadames, Ghat, Soena, Sebha, Brak). Tripolitania, in the northwest, contains 69% of the population, while Cyrenaica has 27%, and the Fezzan 4%. Native transportation and communication are elementary. Military bases are maintained by the United States, including the large air force base at Wheelus, near Tripoli, and Great Britain.

Resources and Industries. Economically one of the world's poorest and most backward regions (Est. per capita income \$35 in 1952), Libya has date palm orchards, olive groves, lemon, almond and fig trees; and vineyards. Other products include tobacco, esparto grass (a reed-like plant), matting, carpets, leather articles, and fabrics embroidered with gold and silver. Minerals were nationalized in 1953.

The country receives aid from the U.S. and Great Britain to finance the government, provide equipment and raise economic and educational standards. Britain's ties with Libya were formalized by a treaty, July 30, 1953, granting rights to maintain military bases for 20 years in exchange for financial aid.

History and Government. Libya's strategic position has caused it to come under the domination successively of Carthage, Rome, the Vandals, the Ottoman Empire and Italy. After World War II Tripoli and Cyrenaica were placed under British administration, the Fezzan under French.

Emir Mohammed Idris El Senussi, spiritual and temporal ruler of the Senussi tribesmen, was recognized by Great Britain as Emir of Cyrenaica, June, 1949. He promulgated a constitution and set up an interim government over internal affairs, Sept. 18, 1949. Libya, as a sovereign state, was approved by the U.N., 1949, effective Jan. 2, 1952. A pre-independence constituent assembly chose the constitutional monarchy form of government and named the Emir as King of Libya, Dec. 3, 1950. The monarchy was proclaimed by King Idris I in Bengazi, Dec. 24, 1951.

Parliament consists of a Senate of 24 members and a House of 55. In the first general elections, Feb. 19, 1952, the pro-Western Independence party won a majority of the 55 Parliament seats.

Premier: Mustafa Ben Halim, apptd. April, 1954. Libya was admitted to UNESCO Nov. 19, 1952; accepted March 28, 1953, as eighth member of the Arab League.

Education and Religion. Libya's population is 93% nomadic Arab Moslems, the remainder being Italians, Jews, and others. Only about 10% are literate. There are public elementary and secondary schools, and private Koranic, Greek, Italian and Jewish schools.

Defense. Status quo agreements with Britain and the United States allow each to maintain its military forces in Libya.

Liechtenstein

FURSTENTUM LIECHTENSTEIN

Capital: Vaduz. Area: 62 sq. mi. Population (census, 1950): 13,571. Flag: blue and red bars. Monetary unit: Franc (U.S. 0.2857).

Descriptive. Liechtenstein is a principality on the Upper Rhine between Austria and Switzerland. It was, until 1866, a member of the German Confederation, and was practically a dependency of Austria until the Diet declared its complete independence, Nov. 7, 1918. By treaty with Switzerland (1920) that country administers its posts and telegraphs, customs and foreign interests. There is no army, only a police force of 50.

Resources and Industries. The people are agricultural; stock raising is highly developed. Vaduz is noted for finely engraved postage stamps, its main industry.

History and Government. The monarchy is hereditary. By the Constitution of 1921, legislative powers rest in a Diet of 15 members, elected for four years by direct vote, on a basis of universal suffrage and proportional representation. The reigning prince is Franz Joseph II. He succeeded his uncle, Prince Franz I, on the latter's abdication

March 30, 1938. The Prime Minister is Dr. Alexander Frick.

The ruler of Liechtenstein makes an annual contribution to the public treasury (about \$110,000 a year). The country is virtually taxless, not only by reason of the ruler's contribution but through the fact that, because they are tax-exempt, large international corporations set up headquarters there, pay nominal fees for the privilege and escape the taxes in their own countries.

Education and Religion. The country is predominantly Catholic. There are 42 elementary and 20 continuation schools. German is the language.

Lithuania

LIETUVA

LITHUANIAN S.S.R.

Capital: Vilna (Vilnius). Area (1940): 24,500 sq. mi. Population (est., 1940): 2,879,070.

Descriptive. Lithuania, a Baltic state, is bounded on the North by Latvia, East by Poland, South by U.S.S.R. territory, and West by the Baltic Sea. Klaipeda (Memel) is the chief port.

Before occupation Lithuania was chiefly agricultural, with 76.7% so engaged. The chief crops are rye, wheat, barley, oats, potatoes and flax. The principal exports were meat, butter, flax and eggs. By 1952 industrial production accounted for 60% of national output and over 85% of peasant farms had been collectivized. Electric motors and appliances, lathes, agricultural and other heavy machinery are produced.

History and Government. An independent state since the 13th century and later a Grand Duchy under the former Russian Empire, Lithuania proclaimed its independence Feb. 16, 1918. It was recognized by most of the powers. Vilna and about 10,400 square miles were occupied by Poland in 1920. The city and part of the lost territory were reunited with Lithuania in 1939. Memel was temporarily occupied by Germany in 1939.

Lithuania was occupied by the U.S.S.R. in 1940 and incorporated into the Soviet Union as the Lithuanian S.S.R. The action has not been recognized by the United States.

Education and Religion. In 1939 more than 85% of the population were Roman Catholic. In 1952 there were 11 institutions of higher education with about 15,000 students, a number of music and art institutes and over 4,000 elementary and secondary schools.

Luxemburg

GRAND-DUCHÉ DE LUXEMBOURG

Capital: Luxemburg. Area: 999 sq. mi. Population (U.N. est., 1953): 304,000. Flag: three horizontal bars, red-white-blue. Monetary unit: Luxemburg franc (U.S. 2c).

Descriptive. Luxemburg is a European Grand Duchy, bounded by Germany on the East, Belgium on the North and West, and France on the South. It measures only 55 miles long by 34 miles wide.

Although the English spelling of this country's name is Luxemburg, its government favors *Luxembourg*, and this form is being used by U.N. and the U.S. State Dept.

Resources and Industries. Luxemburg is a country of small landowners; 430,000 of the 500,000 acres devoted to agriculture are farmed by resident owners. The principal crops are oats, wheat, rye, barley, and potatoes.

The mineral output of the country, despite its size, is enormous and includes iron, pig iron and steel.

History and Government. The integrity and neutrality of Luxemburg were guaranteed by the Treaty of London, May 11, 1867, having been previously (since 1815) a part of the Germanic Confederation. Overrun by Germany in 2 world wars, it abolished its unarmored neutrality April 15, 1948. Customs union with Netherlands and Belgium was adopted Jan. 1, 1948 as Benelux Customs Union, with inter-union regulation of debts and credits, tariff schedules, working toward full economic union. Luxemburg signed the North Atlantic Treaty; initiated the Schuman coal-steel plan and European Army plan.

As a Grand Duchy, Luxemburg is governed under the Constitution of 1868, with modifications. Legislative power rests with a Chamber of Deputies, 52 in number, elected by universal suffrage with executive power held by a Minister of State and a Cabinet of at least three Ministers. The country is ruled by Grand Duchess Charlotte (born Jan. 23, 1896) who succeeded on the abdication of her

sister, Marie Adelaide, Jan. 9, 1919, and was married (Nov. 6, 1919) to Prince Felix of Bourbon-Parma. They have a son and heir, Prince Jean (born Jan. 5, 1921), another son and four daughters. The Prime Minister is Joseph Bech.

The population is almost entirely Roman Catholic. Education is compulsory and military service obligatory.

Mexico

ESTADOS UNIDOS MEXICANOS

Capital: Mexico City. Area: 760,373 sq. mi. Population (U.N. est., 1954): 28,849,000. Flag: three vertical bars, green-white-red, with eagle and cactus emblem on white. Monetary unit: Peso (U.S. \$c).

Descriptive. Mexico, a Federal Republic, is bounded on the North and Northeast by the United States, on the East by the Gulf of Mexico, Gulf of Campeche and the Caribbean Sea; on the South by Guatemala and British Honduras, and on the West by the Pacific Ocean. The Gulf of California makes a huge indentation in the western coast, completely separating the narrow, mountainous sterile and sparsely inhabited peninsula of Lower California, 760 miles long, from the mainland. On the East the Yucatan peninsula juts out into the Gulf of Mexico. The coastline on the Pacific is 4,438 miles long and 1,774 on the Gulf and the Caribbean.

The Sierra Madre mountains run North and South near the western coast, turning near Colima and continuing nearly due East, paralleling the coast into the Central American countries. Near the Gulf Coast a continuation of the Rocky Mtns. runs down nearly to Vera Cruz.

Between the two ranges lies the vast tableland of Mexico, altitude from 5,000 to 8,000 feet, with a delightful climate and with the vegetation and products of the temperate zone varying with the altitude. The lowlands along the coast are tropical, rising to subtropical in the foothills, with a heavy rainfall on the Gulf side. Along the Pacific slope and in the interior irrigation is needed.

Mexico's population is composed of descendants of the aboriginal Indians and Spaniards who colonized the country. Aztec and Mayan stocks are absorbed in them.

Resources and Industries. Mexico is rich in mineral resources. Among them are silver (31.5% of world production), gold, copper, lead, zinc, antimony, mercury, arsenic, amorphous graphite, molybdenum, coal and opal. Value of annual mineral output exceeds 1.5 billion pesos. Petroleum production is huge, averaging 253,000 bbls. per day in 1954. The industry was nationalized in 1938.

Agriculture, stock raising and fishing are important. The land is rich, but the rugged topography and lack of sufficient rainfall are major obstacles. Arable land is estimated at 58,512,000 acres, of which 36,746,000 acres are farmed; pasture land 139,024,000 acres, and forests 95,000,000 acres of which 25,000,000 are estimated to be rich in pine, spruce, cedar, mahogany, rosewood and logwood. Some of the more important products are coffee (world's third largest producer), corn, rice, sugar, wheat, tomatoes, tobacco, cotton, garbanzos, cocoa, sisal, bananas. About 50% of the world's supply of sisal comes from Yucatan.

Industrial output annually is valued at over 24 billion pesos, principal products being vegetable oils, cotton yarn and clothing, sugar and flour, beverages, iron and steel, soap, cigarettes and cigars, rubber, paper, wool products, cement, shoes, glass, furniture and tiles. Mexico is famous for industrial and native handicraft in silver, pottery, leather, wood, fibers, and weaving. The U.S. takes three-fourths of its exports.

The tourist trade has become an important industry, tourists spending about 2 billion pesos annually. The resorts of Acapulco, Cuernavaca, Vera Cruz, and Taxco have become world famous.

There are 15,129 miles of railroads and 20,000 miles of highways connecting the different regions and linking the United States with Central and South America. Thirty-five Mexican airways companies serve the country, four operating international traffic. Additionally, two American and one Central American carriers provide international service. Eighteen steamship companies operate regular schedules from the 14 major ports.

Foreign trade (in pesos):

	Imports	Exports
1952	6,391,000,000	5,022,000,000
1953	6,350,000,000	4,637,000,000
1954	8,078,000,000	6,280,000,000

History and Government. Mexico was much torn

by civil war and insurrection after achieving its independence from Spain proclaimed Sept. 15, 1810, effected in 1821, but in recent years it has progressed in social, economic and cultural phases.

Mexico is a federal democratic republic of 29 states, with governor, legislature and judiciary elected by universal suffrage. The constitution provides for a president elected for 6 years and thereafter ineligible; 60 senators for 6 years and deputies for 3 years, ineligible for re-election until one term has intervened. The deputies are elected on a representative basis of one to every 150,000 pop. There are two territories with governors appointed by the president and a federal district containing Mexico City. The president appoints a cabinet of 13 department secretaries, 2 federal agency chiefs and the attorney general.

Since 1915 Mexico has pursued a policy of land distribution, seizing large estates and partitioning them among the landless peasants. The title rests in the government, but the peasants are allowed to use the lands for life. Between 1915-1945, 65,000,000 acres were distributed among 2,135,000 families, with the rural village (ejido) the unit of land holding.

The government regulates farm production and fixes maximum and minimum prices for farm products. The exportation and importation of agricultural products are under state control.

Mexico has a social security system for insurance to cover industrial accidents, diseases, maternity, incapacity, old age, involuntary unemployment at an advanced age and death.

The President is Adolfo Ruiz Cortines, elected July 6, 1952, succeeding Miguel Aleman.

Education and Religion. Primary education is free and compulsory up to 15 years of age. Government schools (1951) number 25,351. Vocational instruction particularly in agriculture is being promoted. There are normal schools of both sexes and many technical schools throughout the country. The National University of Mexico (founded 1551), is famous among Latin-American universities, and in the capital are many higher institutions of learning and culture and scientific institutions and societies. Education in primary, secondary and normal schools is democratic and divorced from all religious doctrines. Spanish is the language.

There is full religious freedom. The majority of the people are Roman Catholic. All church real estate is vested in the nation, but care of their buildings is entrusted to the clergy.

Defense. Military training is compulsory, draftees serving one year, then form part of the reserves. The peacetime force of the army is 51,000; average annual number of draftees is 100,000. There is a small Navy and Air Force.

Monaco

Principal towns: La Condamine, Monte Carlo, Monaco. Area: 0.59 sq. mi. Population (1951 census): 20,202. Flag: red and white horizontal bands. Monetary unit: French franc (U.S. \$0.2857c).

Descriptive. Monaco is a small principality on the Mediterranean surrounded on all but the sea side by the French Department of the Alps Maritimes. It is noted for an exceptionally mild climate and magnificent scenery.

Monaco is divided into three communes: Monaco-Ville, La Condamine and Monte Carlo, administered by a municipal body elected by vote. There is a local police force of 200.

Resources and Industries. Monaco's fame as a tourist resort and international conference city is widespread. Its revenues derive from indirect taxation, a tobacco monopoly, postage and the gaming tables of the Monte Carlo Casino. There is no tax on incomes. Monte Carlo is a town with a resident population of about 9,500.

History and Government. An independent principality for 800 years, the reigning Prince was dispossessed by the French Revolution. The line was re-established in 1814 and placed under the protectorate of France, of the Kingdom of Sardinia, 1815. King Charles III ceded his rights upon Menton and Roquebrune to France in 1861. The Prince of Monaco was an absolute ruler until a constitution was promulgated June 7, 1911. The legislature (National Council) consists of 18 members elected for four years.

The ruler of Monaco is Prince Rainier III who succeeded his grandfather, Prince Louis II, on the latter's death, May 9, 1949, formally ascending the throne Nov. 19, 1949.

Mongolia

BUGHUT NAIRAMDAKH MONGOL ARAT ULUS MONGOLIAN PEOPLE'S REPUBLIC

Capital: Ulan Bator (Urga). Area (est.): 1,750,000 sq. mi. Population (est.): over 1,000,000. Flag: vertical bars, red-blue-red, with gold 5-pointed star and emblem near hoist. Monetary unit: Tughrig (100 Mongo).

Descriptive. The Mongolian People's Republic dominates Mongolia, a large livestock region in northeastern Asia, once the Chinese province of Outer Mongolia. It is bounded on the North by the Siberian provinces of U.S.S.R., on the East by Manchuria and the Tarbagatai Mts., on the South by Sinkiang province and the Great Wall of China, on the West by the U.S.S.R. Turkestan provinces.

Northwest Mongolia is an elevated plateau, well watered by lakes and rivers; Southeast and South Mongolia include the Gobi Desert, with the Ordos Desert in the extreme Southeast. Travel and communication are relatively undeveloped.

Resources and Industries. It mines gold, coal and marble. There is little agriculture, but excellent pastures make livestock raising the principal industry, including cattle, sheep and transport animals, particularly camels and oxen. Other industry, under the planned economy system, includes wool-cleaning and building materials plants, shoe factories, tanneries and others.

History and Government. The former Chinese province, first "people's republic" to follow the Soviet pattern, first declared its independence Mar. 13, 1921, but the monarchy of Bogdo Gegen Khan persisted in limited form until the Khan's death in 1924, when the government proclaimed the country as the Mongolian People's Republic. China claimed a measure of suzerainty over it until it severed all ties by a plebiscite, Oct. 20, 1945, a treaty with Nationalist China, Jan. 5, 1946, and subsequent Sino-Soviet agreements. Part of Northwest Mongolia was incorporated in the U.S.S.R. as the Tannu Tuva autonomous province.

According to the Constitution of 1940, since amended, power is vested in Parliament (Great People's Khural), with one member for every 2,500 pop., elected for three-year terms by universal suffrage, and from which is drawn a 7-member Presidium.

Premier: Gen. Y. Tse Den Bal (May 28, 1952). **Education and Religion.** There are primary, secondary and technical schools, and a university in Ulan Bator. An Academy of Sciences was founded in 1953. Buddhist Lamaism is the leading religion.

Morocco

MOGHREB-EL-AKSA, i.e. THE FARTHEST WEST

Capital: Rabat. Area: 172,104 sq. mi. Population (est., 1950): 10,442,000. Flag: Red with green Seal of Solomon. Monetary unit: French franc; Spanish peseta.

Descriptive. The monarchy of Morocco, a French and Spanish protectorate, is a remnant of the great Shereefian Empire founded by the Arabs at the close of the seventh century which ruled all northwestern Africa and most of Iberian Peninsula. It is bounded on the East by Algeria, on the North by the Mediterranean, the extreme point opposite Gibraltar being Ceuta; on the South by Rio de Oro and Algeria, and on the West by the Atlantic Ocean.

Along the 200 miles of the Mediterranean littoral run the Rif hills. From Northeast to Southwest extend the Atlas Mountains in five great ranges rising to 12,000 ft. Between these ranges lie fertile well-watered plains.

The climate is healthy, especially on the Atlantic Coast, which is shielded from the hot winds of the Sahara by the Atlas Mountains, and where there is a "tell" or fertile region.

The French section encompasses the whole of Morocco except the Ifni enclave and the Cape Juby area from the Algerian frontier to the Atlantic Ocean and from the Sahara Desert in the South to the boundary of the Spanish zone in the North. The area is approximately 153,870 sq. mi.; population (census 1951-52), 8,003,985. The Spanish section is the northern strip that extends (except for the small international Tangier area) from a point in the Atlantic about 16 miles South of Larache to the river Moulouya. Spain also exercises jurisdiction over the Ifni enclave and the Cape Juby area on the Atlantic Ocean in the extreme Southwest of the country. Spanish-controlled territory totals approximately 18,009 sq.

mi.; population (est. 1953) 1,015,631. The United States completed four airbases in Morocco in 1955.

The most numerous of the inhabitants are the aboriginal Berbers. The plains are mostly occupied by Arabs and a mixture of the two races, known to foreigners as Moors. The third race is Jewish.

Resources and Industries. The people are agricultural and pastoral. Cereals rank first among agricultural products. Important exports are skins, hides, wool, beans, barley, linseed and wheat, almonds, cummin and gums. The chief imports are textiles, sugar, tea, machinery and hardware, candles and spirits. Fruit and vineyards are abundant and dates a regular crop. Carpets, leather goods, fezzes, woolen and silk stuffs are among the manufactures. Mineral deposits are rich, including phosphate, manganese, copper, lead, coal, tin, and petroleum. In 1954 phosphate production was 5,000,000 tons; manganese production is increasing. Modern industrialization has expanded the food, textiles, construction, chemical, machine and metallurgical industries.

History and Government. The state theoretically is an absolute monarchy, but the country is divided into three zones—French and Spanish zones and the neutral Tangier area. The Sultan resides in Rabat in the French zone, but Fez, Marrakesh and Meknes are capitals by tradition.

Morocco came under French influence because of its proximity to Algeria. A general rising of the tribes Oct. 1910, culminating in the siege of Fez, called out a French expedition of pacification, which occupied Fez in 1911. For two decades thereafter the country was restless, with frequent uprisings, and pacification was not completed until the exile of Abd-el Krim in 1926 and surrender of Sidi Ali Hocine, last die-hard chief, in 1933.

An elaborate French administration is headed by a Resident General who also acts as Minister of Foreign Affairs to the Sultan. There is agitation for a greater measure of home rule.

The reigning Sultan, Sidi Mohammed Ben Youssef, third son of Moulay Youssef (reigned 1912-1927), proclaimed Nov. 19, 1927, was deposed Aug. 20, 1953 and exiled, when violence threatened over Morocco's nationalistic aims. His uncle, Sidi Mohammed Ben Moulay Arafat, was selected by the Makhzen (governing council of Viziers) to succeed him. Terrorism resumed in July, 1955, with a high death toll and France proposed, Aug. 29, replacing the Sultan with a council of guardians of the throne.

Education and Religion. The native population is largely illiterate, but trade schools and agricultural training centers have been considerably developed since 1945. There are Koranic, Franco-Moslem and French schools. European-type elementary and secondary schools had 350,000 attendance in 1952. The most notable Islamic school is Kalroween University in Fez. The principal languages are Moorish-Arabic and the Berber dialects. French and Spanish are used for official and business purposes in their respective zones. The population is predominantly Moslem.

TANGIER INTERNATIONAL ZONE

Tangier, a seaport of 60,000 inhabitants, and surrounding territory, which occupies the extreme Northwest corner of Africa on the Atlantic, is internationalized. The Tangier Zone comprises 225 square miles and a population estimated at 100,000.

A convention was signed, Dec. 18, 1923, and a protocol, July, 1925, by Great Britain, France and Spain, providing for its permanent neutrality, security and internationalization. Spain, however, reopened the question in 1926 by a demand for full control and the incorporation of Tangier within the Spanish protectorate. A new accord was signed July 25, 1928, giving Spain control of policing.

A conference of French, British, United States and Russian experts agreed, Aug. 22, 1945, on the establishment of a provisional international regime based on the 1923 convention, and requested withdrawal of Spanish forces which had occupied the territory in June, 1940. The international administration went into effect Oct. 11, 1945. An eight-nation agreement Nov. 10, 1952, restored several administrative posts to Spain.

Nepal

Capital: Katmandu. Area: 54,000 sq. mi. Population (est., 1953): 8,596,000. Monetary unit: Nepalese rupee.

Descriptive. Nepal is a constitutional monarchy on the southern slope of the Himalayas, bounded on the North by Tibet, on the East by Sikkim and Bengal and on the South and West by India.

There are many fertile valleys lying in the slopes

of the bleak and lofty mountains, including Mt. Everest (altitude 29,002 feet). The capital is in a fertile valley, 15 miles long and 20 miles wide, which supports 450,000 inhabitants and is noted for its 2,700 Buddhist shrines, nearly all lavishly decorated examples of Nepalese art.

Deliberately isolated for centuries by its rulers, Nepal is emerging into the modern scene. Weekly air service between Katmandu and Calcutta, India, was started in 1950. The country's first motor road from Katmandu to the outside world was opened Dec. 11, 1953.

Resources and Industries. Nepal has rich forests and quartz deposits. A survey of mineral resources was authorized in 1948, following the visit of an American diplomatic mission. The country exports jute, rice, grain, cattle, hides, wheat and drugs, and imports textiles, sugar, salt, hardware, etc.

History and Government. Nepal was originally divided into numerous hill clans and petty principalities, the inhabitants of one of which—the Gurkhas, a Mongolic-Hindu strain—became predominant about 1769. The ruling family until 1951 was the Ranas, Hindu Rajputs. Maharajadhiraja Tribhubana Bir Bikram (born June 30, 1906), member of the Thapas family who formerly were figureheads in the government, returned from exile Feb. 18, 1951, ended the ancient system of rule by hereditary premiers, and established a popular government, sworn in Nov. 16, 1951. The Communist party was outlawed Jan. 25, 1952. The King and an interim government of councilors began attempts to curb economic and social ills and institute free elections.

King Tribhubana died Mar. 13, 1955, and was succeeded by his son, Mahendra Bir Bikram Shah Dev, crowned Mar. 14.

Religion: Hinduism is the main religion.

Defense. The army consists of about 20,000 regular infantrymen.

Netherlands

KONINKRIJK DER NEDERLANDEN

Capital: Amsterdam. **Area (land):** 12,850 sq. mi. **Population (govt. est. 1954):** 10,666,941. **Flag:** three horizontal bars, red-white-blue. **Monetary unit:** Gulden (guilder, florin) (U.S. 26.32c).

Descriptive. The Netherlands, a constitutional monarchy in northwestern Europe, is bounded by Germany on the East, Belgium on the South and the North Sea on the West and North. Its surface is flat, with an average height above sea level of 37 feet, and with about one-fifth of its land below sea level, reclaimed and protected by dykes, of which there are 1,500 miles. Drainage of half of the shallow Zuyder Zee, which covers 1,350 square miles, added 900 square miles to the cultivable land. Such areas are called "polder."

Disastrous floods early in 1953 gave impetus to plans to make the country floodproof by damming off the North Sea inlets in the Northwest.

The Hague is seat of government, but Amsterdam is the sole capital of the kingdom and the inauguration of the King or Queen is held there.

Resources and Industries. Forty per cent of the land is given to pasture, farming takes 30%, forest 7%, horticulture 3%. Of the land 90% is in holdings of fewer than 50 acres and more than 50 per cent of fewer than 10 acres. Cereals, potatoes, sugar beets and other crops are raised. Commercial fishing engages about 25,000 persons. Dairy products are an important industry; the cheese products are famous and the cattle high grade. On soil on the edge of the polders and the sand dunes tulips and other flowering bulbs and roots are grown. The Dutch bulb is not indigenous to Holland but originated in Persia, whence it was taken to Holland several hundred years ago. Aalsmeer is the most important flower center; Boskoop is best known for ornamental trees and shrubs.

The most important industries are shipbuilding, the manufacture of machinery, textiles (including rayon), and chemical products; also brewing and distilling and flour milling. Amsterdam is famous for diamond cutting; Delft for pottery. Eindhoven has the Philips electrical and radio factories. Coal, oil and salt are found.

The country is a member of the Benelux Customs Union (with Belgium and Luxembourg), which aims at full customs, tariff unity, and eventual complete economic union.

Canals, of which there are 4,817 miles, are most important in internal communications; elaborate systems are in the cities and feed the harbors. The Rhine, Meuse, and Schelde reach the sea

through the Netherlands and carry enormous traffic, the Schelde including that from Antwerp.

A new 20-mile segment of the Amsterdam-Rhine Canal, opened May 21, 1952, halves shipping time between the Rhine and Amsterdam. It has largest inland navigation lock in the world, 1,150 ft.

Rotterdam, important port of entry for Europe, annually handles over 16,000 vessels and foreign commerce of 45,000,000 tons.

Royal Dutch Airlines (K.L.M.) is one of the world's largest international airlines; now oldest air service still operated by same company.

Foreign trade in guilders:

	Imports	Exports
1952	8,329,000,000	7,933,000,000
1953	8,800,000,000	8,064,000,000
1954	10,688,000,000	9,059,000,000

History and Government. The first constitution after the reconstruction of the Netherlands as a sovereign state was promulgated in 1814, and revised, 1815, after the addition of the Belgian provinces. It assures a hereditary constitutional monarchy. Executive power rests exclusively in the Crown (the Queen and ministers). Legislative powers are exercised jointly by the Crown and Parliament (States-General) of two Chambers: First Chamber, 50 members, elected for six years (one half every third year) by the provincial legislatures, and the Second Chamber, 100 Deputies, elected for four years directly. Universal suffrage for citizens of both sexes over 23 years of age and proportional representation are in force. The sovereign exercises the executive authority through a Council of Ministers, the President thereof corresponding to a Prime Minister. There is a State Council named by the sovereign, of which she is president, to be consulted on all legislative and some executive matters.

In 1952 Parliament approved constitutional amendments making the Netherlands the first country to enact provisions for yielding authority to supranational organizations.

The reigning sovereign is Queen Juliana Louise Emma Marie Wilhelmina (born April 30, 1909), only daughter of former Queen Wilhelmina, who succeeded to the throne (Sept. 6, 1948) on the abdication and retirement of her mother (announced May 12, 1948). Queen Juliana was married (Jan. 7, 1937) to Prince Bernhard of Lippe-Biesterfeld (born June 29, 1911), Prince Consort, known as "The Prince of the Netherlands" since the accession of Juliana. They have four daughters, Princess Beatrix Wilhelmina Armgard (born Jan. 31, 1938), heiress-apparent; Princess Irene Emma Elizabeth (born Aug. 5, 1939), Princess Margriet Francisca (born Jan. 19, 1943) in Ottawa, Canada, and Princess Maria-Christina (born Feb. 18, 1947).

The House of the States-General are composed:

First Chamber (1952)—Catholic, 17; Labor, 14; Anti-Revolutionary, 7; Christian Historical Union, 6; Freedom and Democracy, 4; Communists, 2.

Second Chamber (1952)—Catholic party, 30; Labor, 30; Anti-Revolutionary, 12; Christian Historical Union, 9; Freedom and Democracy, 9; Communist, 6; State Reformed, 2; Catholic National, 2.

The Premier is Willem Drees (August, 1952).

A 1954 charter revision gave Surinam and Netherlands Antilles, one-time colonies, complete internal autonomy.

Sovereignty over the former Netherlands Indies was transferred to the Republic of the United States of Indonesia (now Republic of Indonesia), excepting Netherlands New Guinea, Dec. 27, 1949.

Education and Religion. Entire liberty of worship and conscience is guaranteed. The royal family belongs to the Netherlands Reformed Church. The state contributes to the support of several religious denominations.

Education is obligatory from ages 7 to 14. Instruction is free or subject to a small fee, in both public and denominational schools and teachers are paid by the state. There are universities in Amsterdam (two), Utrecht, Leyden, Delft (Engineering), Groningen, Wageningen (Agriculture), Rotterdam (Commerce), Nijmegen and Tilburg.

Defense. Army service is compulsory between the ages of 20 and 40. The Navy consists of one carrier, two cruisers, 12 destroyers, 17 frigates, 7 submarines and minor miscellaneous craft. The Netherlands also maintains an Air Force.

SURINAM AND NETHERLANDS ANTILLES

A revision of the Netherlands charter, promulgated Dec. 29, 1954, raised Surinam and the Netherlands Antilles to equality with the Netherlands homeland in the Kingdom of the Netherlands, with complete internal autonomy and a voice in

government of the kingdom. The kingdom is represented in each by the governor who also is head of government for his respective country. Local governments comprise the governor, council, ministers, and representative bodies (States), the latter elected by universal suffrage.

Surinam, also known as Netherlands Guiana, is situated on the north coast of South America, between French Guiana on the East and British Guiana on the West; forests and savannas on the South stretch to the Tumuc Humac Mountains. The area is approximately 55,400 sq. mi. The population (est. 1952), is 230,000. Paramaribo is the capital.

The chief export is aluminum ore "bauxite," and 65 per cent of the American consumption of this important raw material comes from Surinam. Other exports are citrus, rice, coffee, balata and high quality lumber. The Surinam guilder is the monetary unit.

The Dutch by the Treaty of Breda, 1667, gave New Netherland (New York) to England in exchange for Surinam.

The Netherlands Antilles consist of two groups of islands in the West Indies: Curacao, Aruba and Bonaire (Leeward Islands) are near the Venezuelan coast and St. Eustatius, Saba and the southern part of St. Martin (Windward Islands) are 500 miles to the northeast and belong to the Lesser Antilles. The area of the groups is 381.1 square miles, divided as follows: Curacao, 172.5 square miles; Bonaire, 111.9; Aruba, 69.9; St. Martin (Dutch part), 13.2; St. Eustatius, 11.8; Saba, 4.8.

The population (Dec. 31, 1952) was 175,631. Willemstad is the capital. The chief products are corn, pulse, salt and phosphates; the principal industry is the refining of oil. On Curacao the Royal Dutch Shell and on Aruba the Standard Oil Company of New Jersey have large oil refineries, refining the oil from Venezuela.

NETHERLANDS NEW GUINEA (Irian)

Western part of New Guinea, comprising about 151,000 sq. mi. and population (est. 1954), 775,000, was first claimed for the Netherlands by the Dutch East India Company which acquired a commercial monopoly in the Indonesian archipelago in 1602. Administration is under a governor and a council. Exports consist of petroleum and forest products.

New Guinea was not included in territory transferred to the new Republic of Indonesia when sovereignty was granted in 1949 and it has remained under Dutch control. The 9th U.N. General Assembly defeated a resolution calling for new negotiations.

Nicaragua

REPUBLICA DE NICARAGUA

Capital: Managua. Area (est.): 57,145 sq. mi. Population (U.N. est., 1954): 1,202,000. Flag: three horizontal bars, blue-white-blue, with coat of arms on white. Monetary unit: Cordoba (U.S. 12.67¢).

Descriptive. Nicaragua, largest of the Central or Middle America States, lies between the Caribbean Sea and the Pacific Ocean with more than 200 miles of coastline on each. The country is bordered by Honduras on the North and Costa Rica on the South. The Cordillera range of Mountains, including many volcanic peaks, runs from northwest to southeast through the middle of the country. Between this range and a range of volcanic peaks to the West lie Lake Managua, 30 miles long by 15 miles wide, and Lake Nicaragua, 100 miles long and 45 miles wide, of great importance in the transport system of the country. The government-owned Pacific railroad, running from Corinto to Leon and from Managua to Granada, 171 miles, is the principal rail line. There is daily air service (PAA) to U.S. and South America; TACA serves Central America.

Resources and Industries. The country has valuable forests, some gold is mined, but it is essentially an agricultural and stock raising community. On the broad tropical plains to the east coast, bananas and sugar cane are cultivated, and coffee is grown on the mountain slopes. The production of gold has attained first rank in the country, taking precedence over coffee.

Other products are mahogany and hides and skins. Chief imports are textiles, machinery, chemicals and flour. Trade is chiefly with the U.S.

History and Government. After gaining independence from Spain, 1821, Nicaragua was united for a short period with Mexico, then with the United Provinces of Central America, finally becoming an independent republic, 1838. Political

unrest has several times required intervention by the United States.

The constitution of 1939, amended, provides for a Congress of two chambers, a House of Deputies of 42 members elected for six years, and a Senate of 16 members elected for six years, all chosen by popular vote. Ex-presidents also serve in the Senate and are appointed for life. The President is elected for a period of six years. President: Anastasio Somoza, elected May 21, 1950.

Education and Religion. Roman Catholicism is the prevailing religion, but there is complete freedom of worship. The teaching of English in the public schools is compulsory.

A Central University of Nicaragua was established in 1941. The University of Leon, since 1947 called National University of Nicaragua, was founded in 1814.

Defense. The National Guard numbers roughly 3,600 officers and men with a trained reserve of 4,000. Aviation is being developed.

Norway

KONGERIKET NORGE

Capital: Oslo. Area: 125,064 sq. mi. Population (govt. est. 1955): 3,450,000. Flag: white-bordered blue cross on red field. Monetary unit: Krone, pl. kroner (U.S. 14¢).

Descriptive. Norway occupies the west part of the Scandinavian Peninsula in Northwest Europe from the Skagerrak, which separates it from Denmark, to the North Cape in the Arctic Ocean, where on the East it meets Finland and the U.S.S.R. The Kjoelen Mountains separate South Norway from Sweden to the East. The rocky coast is washed by the Arctic and North Atlantic Oceans, and cut deep by fjords of scenic grandeur.

The country's greatest length is 1,100 miles; its width varies from 270 to only 4 miles at the narrowest point. The coastline, including the fjords and greatest of the 150,000 islands, is 12,500 miles long. The climate is mild and moist on the west coast, but fairly cold and dry in the interior and eastern regions.

The midnight sun is a phenomenon of the North Cape area. The sun does not set from the middle of May until the end of July, nor does it rise above the horizon from approximately Nov. 20 to Jan. 24. The vari-colored Northern Lights are visible in winter.

Resources and Industries. Norway is essentially a maritime country. More than 72% is unproductive and only 4,300 sq. mi. are cultivated; rivers and lakes occupy 5,000; forests 29,455.

The country lacks sufficient coal but has become a great power producing country by utilizing water power, its greatest natural asset.

Forests are one of the principal natural sources of wealth. Huge quantities of cod, herring, whale, tuna, seal, mackerel and salmon are caught. Mining is an important industry and the country yields silver, copper, pyrites, nickel, iron, zinc and lead.

Important agricultural products are hay, potatoes and berries. A feature of farm economy is the combination of agriculture with fishing, or forestry and fur farming.

Norway's merchant marine now ranks third in the world, with more than 6,000 ships totalling 7,300,000 tons in 1955. About 53% are tankers.

The principal manufactures are food products, machinery and metal work, paper and pulp, textiles, wood, fish and whale oils, soap and electrochemical products, especially nitrates.

History and Government. Norway, under its constitution, adopted May 17, 1814, is a constitutional hereditary monarchy. Independent for centuries, Norway was united with Denmark, 1381-1814, and Sweden, 1814-1905. Norway and Sweden signed an agreement dissolving the union, Oct. 25, 1905.

The king of Norway is Haakon VII (born Aug. 3, 1872), second son of Frederick VIII, King of Denmark. He was elected King of Norway by the Storting, Nov. 18, 1905, and crowned June 22, 1906, married (July 22, 1896) to Princess Maud who died Nov. 20, 1938, third daughter of King Edward VII of Great Britain. The heir to the throne, Crown Prince Olaf (born July 2, 1903) was married March 21, 1929, to Princess Martha of Sweden (died April 5, 1954), daughter of Prince Charles. A son, Hereditary Prince Harold, was born Feb. 21, 1937, and two daughters, Princess Ragnhild Alexandra (June 9, 1930) and Princess Astrid (Feb. 12, 1932).

The legislative power is vested in the Storting, whose 150 members are elected for four years. The

Starting discusses and votes on all political and budgetary questions, but divides itself into two sections for questions of legislation.

Premier: Elmar Gerhardsen, Laborite, appointed Jan. 21, 1955.

Norway has an advanced health and social welfare system with insurance against sickness, accidents, and unemployment; and family allowances and old age pensions.

Education and Religion. The Evangelical Lutheran religion is endowed by the state and its clergy are nominated by the King. All religions are tolerated.

Education has been compulsory from 7 to 14 since 1860 and the school system is highly organized. The University of Oslo (founded 1811) and Bergen are subsidized by the state, as are the Technological Institute (Trondheim) and the Agricultural College (Aas).

Defense. Military service is universal and compulsory. Conscripts are drafted at 20, serve 16-18 months. The navy includes destroyers, frigates, submarines and other craft.

SPITSBERGEN (Svalbard)

Spitsbergen is a group of mountainous islands in the Arctic Ocean. The largest, West Spitsbergen, 15,000 square miles, lies about 370 miles due north of Norway, half-way to the Pole. Discovered by Norsemen in 1194 and rediscovered by Barents the islands had been the resort of whalers of several nations. Norway periodically asserted (since 1261) her claims to the islands. Following action by the Peace Conference in 1919 a treaty was signed in Paris, Feb. 9, 1920, by the major powers placing Spitsbergen under a Norwegian mandate. The area is about 23,957 square miles; the population, 3,200.

Coal resources are estimated at 9,000,000,000 tons; annual production is over 400,000. There are large deposits of low-grade iron ore and gypsum.

OTHER ISLAND POSSESSIONS

Jan Mayen, a desolate area of 147 square miles between Greenland and Northern Norway used as a weather station.

Bouvet Island, area 22 square miles, is an uninhabited tract in the Southern Atlantic. Great Britain relinquished its claim to the island, 1928.

Peter I Island, with an area of 97 square miles, lies in the Antarctic and is uninhabited.

Norwegian Antarctic Dependency (Queen Maud Land), lying between the Falkland Islands dependency and the Australian Antarctic dependency, was placed under Norwegian sovereignty Jan. 14, 1939.

Panama

REPUBLICA DE PANAMA

Capital: Panama. Area: 28,575 sq. mi. Population (U.N. est., 1954): 886,000. Flag: rectangle of four quarters, white with blue star, blue, white with red star, red. Monetary unit: Balboa (equiv. to U.S. \$1).

Descriptive. The Republic of Panama occupies the isthmus of Panama, connecting Central and South America. It has a north and east shoreline of 477 mi. on the Caribbean Sea and a south and west shoreline of 767 mi. on the Pacific Ocean, including the Gulf of Panama. Its width varies from about 37 to 110 mi. It is bounded on the East and South by Colombia, West and North by Costa Rica, and is bisected by the U.S. Canal Zone. Daily air services operate between Panama and the United States and connect with other Central and South American countries.

Resources and Industries. Panama has extensive forests, and exports mahogany. Only about half of the rich arable land is cultivated. It raises livestock, coffee and rice. Chief exports are bananas, pineapples, cocoa, coconuts, sugar, abaca fiber, shrimp, cement.

Due to easy shipping regulations and strictures in the U.S., merchant tonnage registered in Panama after World War II, became fourth in size, preceded only by Britain, U.S. and Norway.

History and Government. Spain discovered the coast in 1501; Columbus reached Almirante (Bocas del Toro), Porto Bello and Belan river, 1502-03. Balboa took possession of the Pacific Ocean for Spain Sept. 25, 1513. Panama was hq. for Pizarro in 1524, was ravaged by Francis Drake, 1572-95, and Henry Morgan, 1668-71. Morgan destroyed old city of Panama, founded in 1519. Panama left Spain for Colombia in 1821, was autonomous from 1855 to 1885, when it was again directly governed by Colombia. American capital built the first

railroad in 1856. U.S. troops were sent to keep order 7 times between 1856 and 1901.

Panama declared its independence from Colombia Nov. 3, 1903, with U.S. recognition. American naval vessels technically prevented Colombia from landing troops. On Nov. 18, 1903, Panama granted the Canal Zone to the U.S. by treaty, ratified Feb. 26, 1904. For terms consult *Canal Zone and Panama Canal*.

Panama adopted universal suffrage in 1945 and its third constitution in 1946.

President Jose Antonio Remon, elected in 1952, was assassinated Jan. 2, 1955. His successor, Jose Ramon Guizado, was impeached by the National Assembly, Jan. 15, and ordered arrested and tried for plotting the murder of his predecessor, Ricardo Arias Espinosa, second vice president, was sworn in as president.

Education and Religion. The Roman Catholic religion prevails but other faiths have representation. Education is compulsory for all children between the ages of seven and 15. The National University is in Panama City, Spanish is the official language and its use is compulsory.

Palestine

Palestine, the ancient Holy Land of the Christian, the Jew and, to some extent, of the Arab, lies on the western edge of Asia bordering on the Mediterranean Sea. It is bounded on the North by Lebanon and Syria, on the East by Jordan and on the South by the province of Sinai, Egypt.

The capital of Palestine was Jerusalem.

A new independent Zionist state, the Republic of Israel, was proclaimed May 14-15, 1948, coincident with British withdrawal in accordance with a decision of the General Assembly of the United Nations, Nov. 29, 1947, to partition Palestine into independent Jewish and Arab states. The proposed Arab state has not yet come into being and most of the boundaries still are in dispute, the Arab portions being held chiefly by the Hashemite Kingdom of Jordan and Egypt.

For information concerning the Republic of Israel, consult *Israel*, page 359.

Paraguay

REPUBLICA DEL PARAGUAY

Capital: Asuncion. Area (est.): 157,000 sq. mi. Population (U.N. est., 1954): 1,530,000. Flag: three horizontal bars, red-white-blue; white stripe bears on the obverse republic's coat of arms, on the reverse a lion and inscription "Paz y Justicia." (Only national flag having different obverse and reverse.) Monetary unit: Guarani (U.S. 4.76c).

Descriptive. Paraguay, one of the two inland countries of South America, is bounded on the North by Bolivia and Brazil, on the East by Brazil and Argentina, on the South by Argentina, and on the West by Argentina and Bolivia. The extensive plains are excellent for pasture and agriculture, and the mountain slopes are covered with luxuriant forests. It is one of the best watered countries in the world. The Paraguay River, the Republic's most important waterway, is navigable for vessels of 12-foot draft as far as Asuncion and Concepcion, and beyond for smaller craft for practically its entire length (1,800 miles). The country still is deficient in adequate roads.

Regular steamer service is maintained from Buenos Aires on the Parana-Paraguay rivers as far as Asuncion, where extensive port improvements have been made. There are air mail and passenger services between Asuncion and other South American cities.

Resources and Industries. The most important agricultural crops are corn, mandioca, cotton, beans, peanuts, tobacco and citrus fruits. The livestock industry is important. Paraguay has about 4,500,000 cattle and many hogs and other livestock. Several saladeros (beef curing establishments) are located near Asuncion.

The chief exports are oranges, yerba mate, timber, hides, tobacco, beef products, quebracho wood, cotton, tannin, lace and vegetable oils. Chief imports are textiles, foodstuffs, hardware, fancy goods, wines and spirits, pharmaceutical products, automobiles, ready-made clothing and hats.

History and Government. Paraguay gained its independence from Spain in 1811, was governed by a dictator from 1815-1840.

Shortly after the war with Brazil, Argentine confederation and Uruguay, 1865-70, a constitution, modeled after that of the United States, providing for a republican form of government, was adopted.

In 1940 a revision was designed to eliminate anti-social abuses, prevent monopolization of consumption goods and artificial price fixing.

Congress is composed of one Chamber, with the members elected one for each 25,000 inhabitants. A Council of State succeeds the Senate and the members are nominated by the government on a corporative basis. The President is elected for five years and appoints a cabinet which exercises all the functions of the government. It informs the Chamber and Council of State of its policies. Private property is guaranteed by the Constitution.

The Colorado party is only legal political party. President Federica Chaves, elected in 1950, resigned May 7, 1954. Administration was assumed by an army junta.

Education and Religion. The Roman Catholic religion is established, but others are tolerated. Primary education is compulsory between the ages of 7 and 14. In 1950 there were 1,477 government primary schools, a number of secondary and vocational schools, and eight universities. Spanish is the universal language, but Paraguayans also speak Guarani, an ancient Indian tongue.

Defense. All citizens from 18 to 20 years of age are subject to obligatory military service. A modernly equipped naval fleet patrols the rivers.

Peru

REPUBLICA DEL PERU

Capital: Lima. **Area:** 514,059 sq. mi. **Population** (U.N. est., 1954): 9,295,000. **Flag:** three vertical bars, red-white-red, with coat of arms on white. **Monetary unit:** Sol (U.S. \$2.47c).

Descriptive. Peru, situated on the Pacific coast of South America, is bounded on the North by Ecuador, on the Northeast and East by Colombia and Brazil, and on the Southeast by Bolivia; at its southernmost tip is the narrow Republic of Chile. Peru has a Pacific coastline of 1,410 miles and an extreme width, from coast to eastern jungle, of about 800 miles.

Here the Andes reach their highest altitudes, seven peaks towering above 19,000 feet. The uplands or western slopes of the Andes are well watered and also the eastern descent to the Amazon basin, which are fertile tropical lowlands.

Lima, the capital, is called City of the Kings. It is the most important commercial center of the country. Callao, important industrially and the chief seaport, is connected with the capital by two railroads and three highways.

The first trans-Andean highway to penetrate the Amazon basin of Peru was completed in 1947, extending from Lima to Pucallpa.

Resources and Industries. Though agricultural and pastoral products comprise only 40% of the value of the total exports, 85% of the population is dependent, directly or indirectly, upon them by agriculture and stock raising.

The chief crop and leading agricultural export is cotton, which averages 20% of the country's total exports. About 100,000 persons are engaged in the industry. Second only to cotton as a money crop is sugar. Wheat, rice, potatoes, beans, barley and quinoa are also raised. Corn, native to Peru, is grown throughout the country, forming a staple food for a large part of the Indian population.

The mountains are rich in minerals and many valuable mines, some dating back to the Incas, are being worked. The country is one of the largest producers in the world of vanadium.

The chief exports are crude petroleum and petroleum derivatives, sugar, copper bars and cotton; imports are machinery and vehicles, foodstuffs, textiles, metals, chemicals, dyes and paints.

There is airline service between Lima and other large foreign cities.

History and Government. For centuries Peru was the seat of political power on the continent; first as the center of the Inca empire; later as Spain's foremost viceroyalty in the New World, becoming independent 1821-24.

By the constitution of April 9, 1933, the government consists of a President and two Vice Presidents, elected by direct suffrage for a period of six years. National legislative authority is vested in a Congress composed of a Chamber of Deputies and a Senate elected for 6 years. Chamber members must be at least 25 years of age; Senate members at least 35 years of age, and all must be native-born Peruvians. The president is advised by an Economic Advisory Council of approximately 50 members, specialists in their fields.

Suffrage is granted to literate citizens, and, in municipal elections, to adult or married women.

Voting is compulsory for literate males between the ages of 21 and 60.

The President is Gen. Manuel A. Odria, sole candidate, elected July 2, 1950.

Education and Religion. Religious liberty prevails but the Roman Catholic religion is protected.

Education is free and compulsory between the ages of seven and 14. The University of San Marcos (founded May, 1551) is said to be the oldest institution of learning in the western hemisphere. There are four other universities.

About 60% of the population is Indian; the white (10%) is predominantly of Spanish descent. The remainder are chiefly Mestizos.

Spanish is the official language, but many Indians speak Quecha or Aymara.

Defense. Military service is compulsory with two years in the active army, five years in the first reserve, five in the second reserve and 20 years in the National Guard.

Philippines

REPUBLICA DE FILIPINAS

Capital: Quezon City (Luzon). **Area:** 115,600 sq. mi. **Population** (U.N. est., 1954): 21,440,000. **Flag:** blue and red horizontal bars; white canton with gold sun, three gold stars. **Monetary unit:** Peso (U.S. \$50c).

Descriptive. The Republic of the Philippines, largest island group in the Malay Archipelago (land area 115,600 square miles)—lies between 21° 10' and 4° 40' North latitude and between 116° 40' and 126° 34' East longitude. There are 7,100 islands extending 1,150 statute miles from North to South and 682 miles from East to West in the shape of a huge triangle, 7,000 miles from San Francisco. Of this number 2,773 are named and 4,337 unnamed, many with an area of less than a square mile.

Eleven of the islands comprise the bulk of the area. They are: Luzon, 40,420; Mindanao, 36,537; Samar, 5,050; Negros, 4,905; Palawan, 4,550; Panay, 4,446; Mindoro, 3,759; Leyte, 2,785; Cebu, 1,707; Bohol, 1,495; Masbate, 1,262.

Other groups in the Archipelago are the Sulu, or Jolo Islands in the South, the Babuyan and Batanes in the North, the Catanduanes in the East, and Calamianes in the west.

The Archipelago has a coast line of 14,407 statute miles. There are 21 fine harbors and eight land-locked straits. Manila Bay, with an area of 770 square miles, and a circumference of 120 miles is the finest harbor in the Far East. Manila, Cebu, Iloilo, Zamboanga, Jolo, Aparri, Davao, San Fernando (La Union), and Legaspi are main ports.

The extensive mountain system of the Philippines belongs to the succession of volcanic ranges of the Pacific system. There are 20 more or less active volcanoes. Mount Apo, 9,690 ft., in Mindanao, and Mayon Volcano, 7,943 ft. in Albay, are the most famous. Between the mountains and the sea lie great fertile, well-watered plains. About 63% of the archipelago is suitable for cultivation.

The average temperature during the four winter months is about 78° F.; in the three hot months, April to June, about 84; other months, about 80.

Quezon City, a suburb, replaced Manila as the official capital July 17, 1948, but most government offices remain in Manila.

Resources and Industries. Philippine economics rest on agriculture, livestock, mining, lumbering and fishing.

Forests provide cabinet and construction timber in large quantities; also gums and resins, vegetable oils, rattan and bamboo, tan and dye barks.

The islands are rich in mineral resources. Gold, silver, lead, zinc, copper, iron, coal, petroleum, chromite, asbestos and manganese are mined, as well as clay, marble, salt, etc. There are about 75 square miles of lignite and bituminous coal.

The chief agricultural products are unhusked rice ("palay"), Manila hemp from abaca, copra, sugar cane, corn and tobacco. The principal export fruit is the pineapple but there are also bananas, mangoes, papaya, lanzones, pilinut, chico, mandarins and oranges.

Manufacturing industries have been encouraged largely by the free-trade relations with the U.S. There is large-scale development of hydroelectric power.

Leading exports are copra, sugar, abaca, logs and lumber, desiccated coconut, coconut oil, iron ore, canned pineapples, chrome ore, leaf tobacco. Imports: textiles, petroleum products, machinery, base metals, transportation equipment, dairy products, cereals, metal products, paper, electrical

equipment. Three-fourths of trade is with the U.S.

History and Government. The Philippines were discovered by Magellan, 1521, and conquered by Spain 1565. The islands were ceded to the United States by the Treaty of Paris (Dec. 10, 1898), following the Spanish-American War, the U.S. paying for the territory.

Princess Hadji Piandao, niece and adopted daughter of the late Jamalul Kiram II, Sultan of Sulu, transferred (April, 1940) legal ownership of hundreds of islands in the Sulu Archipelago to the Commonwealth of the Philippines.

Japan attacked the Philippines Dec. 8, 1941 (Far Eastern time). Gen. Douglas MacArthur was put in command of the U.S.-Filipino forces (15,000 Americans, 40,000 in Filipino army, 100,000 Filipino reservists). Japan conquered the islands by May 2, 1942. The Japanese were cleared out by Sept., 1945. In 1951 the U.S. settled war claims for property losses for \$388,150,000.

On July 4, 1946, the independent Republic of the Philippines was proclaimed in accordance with the Tydings-McDuffie Act passed by the U.S. Congress in 1934, providing for Philippine independence in 1946. President Truman formally recognized the Philippines as a separate and self-governing nation, announcing the surrender by the United States of all rights of sovereignty.

The constitution provides for the Congress of the Philippines, consisting of a Senate of 24 members, elected at large, and a House of Representatives with a maximum membership of 120. The members of the House are apportioned among provinces according to population. Their term of office is 4 years. The Congress regulates capital and labor, utility franchise, and natural resources.

The term of the president and vice president is 4 years, and the president may be re-elected only once. The cabinet consists of 14 members.

President: Ramon Magaysay, Nationalist party, elected in November, 1953, assumed office Dec. 30.

The supreme court comprising a chief justice and 10 associate justices appointed by the president cannot declare a law or a treaty unconstitutional except by a two-thirds vote. Freedom of the press, religion, and the right of assembly are guaranteed in the Bill of Rights. Women have equal suffrage.

All natural resources of the Philippines belong to the state and their disposition, exploitation, development and utilization are limited to citizens of the Philippines or corporations and associations of which 60% of the capital is owned by such citizens subject to present leases and concessions. By an amendment to the constitution (1947), the right to develop Philippine natural resources and to own and operate public utilities for a limited period was extended to U.S. citizens.

Since the establishment of the Republic the government has fought the armed revolt of the Huk faction (Hukbalahap), Communist-supported extremists. Their leader, Luis Taruc, surrendered to the government, May 17, 1954.

Education and Religion. Education is free in the public schools, secular and coeducational. In 1955 there were 22,238 public schools with an enrollment of 4,133,725. The national language is Tagalog (a Malayan dialect) but English is the medium of instruction. Approximately 7,000,000 persons speak English and 500,000 Spanish. There are approx. 533 newspapers with a circulation of 3,094,800, printed in English, Spanish and other languages.

Institutions of higher education are numerous, among them the University of the Philippines, Quezon City; Manila, Los Baños; Far Eastern University, Univ. of Sto. Tomas, founded 1611, (both Manila), Ateneo, Quezon City. Among private educational institutions is the Silliman University in Dumaguete.

About 83% of the inhabitants are Roman Catholics and about 1,500,000 belong to the Independent Catholic Church, organized by a Filipino priest, Fr. Gregorio Aglipay. There are 444,491 Protestants, 791,817 Moslems (Moros).

Defense. The Philippines and the United States, on Mar. 14, 1947, signed a 99-year agreement for American military and naval bases in the islands. The agreement provides that in the interest of international security any of the bases may be made available to the Security Council of the U.N.

Poland

POLSKA RZECZPOSPOLITA LUDOWA

Capital: Warsaw. Area: 120,355 sq. mi. Population (govt. est., 1954): 26,500,000. Flag: two hori-

zontal bars, white and red. Monetary unit: Zloty (c. U.S. 25c).

Descriptive. Poland, a republic in Central Europe, is bounded on the North by the Baltic Sea, East Prussia and Lithuania, both occupied by the U.S.S.R.; on the East by the U.S.S.R.; on the South by Czechoslovakia, and on the West by East Germany (German Democratic Republic).

Resources and Industries. Forty-five per cent of the population engages in agriculture. Textiles, chemicals, woodworking and metal industries are important products.

Poland possesses great mineral wealth, particularly coal, besides iron, lignite, petroleum, natural gas, lead salt, potassium salts and zinc.

Coal reserves are estimated at 135 billion metric tons; production, aided by mechanization and training, is rising rapidly and expected to reach 100,000,000 tons in 1955.

Planned economy has been introduced; a Six-Year Plan (1950-1955) of economic and social development is in operation.

History and Government. Poland, whose history dates from 966 and a great power from the fourteenth to the seventeenth century, in four partitions (1772, 1793, 1795 and 1939) was apportioned among Prussia, Russia and Austria, and Germany and Russia. Overrun by the Austro-German armies in World War I, its independence, self-declared on Nov. 11, 1918, was recognized by the Treaty of Versailles, June 28, 1919, and Treaty of Riga.

Germany and Russia invaded and conquered Poland, Sept. 1-27, 1939. A treaty of partition (the fourth partition of Poland) was signed by Germany and the U.S.S.R., Sept. 29, by which they divided the country. It is estimated that Germany received 72,500 square miles with a population of approximately 22,500,000—all the territory ceded to Poland by the Treaty of Versailles. To the U.S.S.R. went some 78,000 square miles of territory with a population of 12,775,000. The territory gained by Russia comprised portions of White Russia and the Western Ukraine, all of which was annexed by the U.S.S.R.

Poland and Russia signed an agreement in London July 30, 1941, abrogating the 1939 German-Russian accord partitioning Poland.

Before World War II, Poland's population was 34,775,698 and its area 150,470 square miles. In compensation for 69,860 square miles of territory in the East ceded to the U.S.S.R. under a treaty signed in Moscow Aug. 16, 1945, Poland received approx. 40,000 square miles of German territory east of the Oder-Neisse line gained in World War II, comprising the provinces of Silesia, Pomerania, West Prussia and part of East Prussia. Pending a general German peace treaty, this is not regarded as permanent by the Western allies.

A Government of National Unity was formed June 28, 1945, including members of the wartime Provisional and London governments.

Elections to the first Sejm (Parliament) were held Jan. 19, 1947, and the Government bloc, Communists and Socialists, won 394 out of 444 seats.

A new constitution, replacing the interim charter of Feb. 19, 1947, effective July 22, 1952, describes Poland as a people's republic in which the highest authority is the Sejm, elected for 4-year terms by direct, secret ballot. The Sejm elects a Council of State and a Council of Ministers (cabinet). The Premier is Jozef Cyrankiewicz, appointed in March, 1954.

In the first Parliamentary elections under the new constitution, 425 candidates on the one-party National Front were elected Oct. 26, 1952.

Education and Religion. Education is free and compulsory in the Polish Republic. There are 79 institutions of higher learning (1953) with 121,000 students. Leading universities are at Warsaw, Lodz, Troum, Poznan, Krakow and Wroclaw (Breslau).

Roman Catholic is the chief religion. A law promulgated Feb. 13, 1953, requires government consent to high church appointments.

Defense. Military age extends from 20 to 50. In 1950 the army was reorganized along Soviet lines. Officers are required to learn Russian. Strength of the armed forces is estimated at 500,000. The navy has one cruiser, 6 destroyers, 6 submarines and other craft.

GDANSK (Danzig)

The former Free City of Danzig (Gdansk), once united with Poland, 1466-1793, while a member of the Hanseatic League and later a part of the German Empire, 1793-1919, is a port on the Baltic Sea through which runs the Vistula River. It has

an area of 754 square miles and population (city proper 1946), 117,894. Poland gained access to the port by the Treaty of Versailles in 1919 and Danzig was brought within the Polish customs frontier in 1922.

Danzig was proclaimed part of the German Reich Sept. 1, 1939; Russian troops captured the city March 30, 1945. Under the terms of the Potsdam Declaration, Aug. 1945, Danzig was placed under Polish administration, pending completion of a peace treaty with all Germany.

Portugal

REPUBLICA PORTUGUESA

Capital: Lisbon. Area: 35,466 sq. mi. Population: (U.N. est., 1954): 8,693,000. Flag: green and red vertical bars, with armillary sphere and shield in center. Monetary unit: Escudo (U.S. 3.478c).

Descriptive. Portugal occupies the western part of the Iberian Peninsula in Europe, being bounded on the North and East by Spain and on the South and West by the Atlantic Ocean. The Azores and Madeira Islands in the North Atlantic, are politically an integral part of the republic. The area of the Azores is 888 square miles with a population (1950) of 286,800. The area of the Madeira Islands is 308 square miles with a population (1950) of 280,000. The country is mountainous. About one-third of the land is cultivated.

Resources and Industries. Wheat, maize, oats, barley, rye and rice are important crops. Vineyards abound, and wines, olive oil and fruit are largely produced. Wine-making is the chief industry. Forests of pine, oak, cork and chestnut cover 19% of the country, and cork, of which the average annual production is 150,000 metric tons, is the second largest industry. Portugal has much mineral wealth (including coal, pyrites, lead, copper, tin, wolfram, kaolin, sulphur, lithium, titanium), which has not yet been fully developed. The sardine fisheries are important. Cork, wine, canned sardines, tuna fish, anchovies, and resins are exported.

A six-year improvement plan at home and in Mozambique and Angola was instituted in 1953, including hydroelectric and irrigation plants, improvement of railways and port facilities in Africa and creation of basic heavy industries.

History and Government. Portugal, an independent state since the twelfth century, was a kingdom until a revolution in 1910 drove King Manuel II, from the throne and a republic was proclaimed.

A new constitution adopted by a plebiscite (1933) and several times amended, provides some features of a corporative state. Two assemblies of 120 members each were chosen—the first, the National Assembly, to exercise legislative powers, by direct election by heads of families regardless of sex; the second, the Corporative Chamber, chosen through a system of guild or syndical representation. The Corporative Chamber deals with economic and social matters, and advises the National Assembly. The Assembly may override a Presidential veto by a two-thirds vote.

Suffrage is extended to males and females with educational or tax payment qualifications.

As in previous elections since 1934, the government's National Union party was overwhelmingly victorious in the 1953 elections.

President Marshal Antonio Oscar de Fragoso Carmona, elected in 1926 and re-elected for consecutive seven-year terms since 1928, died April 18, 1951. He was succeeded by Francisco Higinio Craveiro Lopez, elected July 22, 1951.

Premier: Antonio de Oliveira Salazar.

Education and Religion. The dominant religion is Roman Catholic; there is freedom of worship. Primary education is compulsory. In 1952-53 there were 11,127 primary schools. There are four universities, three university schools, 45 lycums, 77 technical schools and six art colleges.

Defense. Military service is compulsory between the ages of 20 and 45. There is a small Navy. Formation of a separate air arm was announced July 1, 1952. A 1951 agreement gives the United States additional rights in the Azores for defense purposes and integrates the islands into the framework of NATO.

PORTUGUESE OVERSEAS PROVINCES

The Cape Verde Islands in the North Atlantic, longitude 25°, latitude 15°, are 15 in number. The total area is 1,557 square miles and the population (census 1950), 147,328. Chief products are coffee, medicinal products, hides, fruit and grain.

Portuguese Guinea, on the coast of Senegambia,

has an area of 13,948 square miles and a population (1952) of 523,000. Chief exports are wax, oils, ivory and hides. Chief port: Bissau.

The Islands of San Tome and Principe about 125 miles off the West coast of Africa in the Gulf of Guinea, form a province under a Governor. The islands have an area of 372 square miles; population (census 1950), 60,159. Chief products are cacao, coffee, coconut, copra, palm oil and cinchona.

Angola, Portuguese West Africa, has a 1,000-mile coast line stretching South from the mouth of the Congo. It is governed by a Governor General with large powers. The Portuguese have owned it since 1575. Its area is 481,351 square miles; population (1952), 4,168,000, including 50,000 Europeans. The capital is Luanda.

Chief products are coffee, rubber, wax, sugar, oil seeds, coconuts, ivory, cattle, fish, tobacco, cotton. Diamonds are mined and exported principally to Belgium. There are large deposits of malachite copper, iron, manganese, mica, and salt, and gold has been found. Portugal supplies from 45% to 50% of the imports. Lobito is an important Atlantic seaport.

Mozambique, Portuguese East Africa, extends from Cape Delago (10° 40' south latitude) to the Union of South Africa. To the West lies the Union of South Africa and Rhodesia (British). On the North is Tanganyika. More than 400 square miles of former German East Africa, the Kionga Triangle, was transferred to Mozambique in 1919.

Mozambique has 297,731 square miles, and a population (1952) of 5,846,000. The capital is Lourenco Marques. Chief products are sugar, coconuts, cotton, copra, sisal, and beeswax. Coal deposits exist and samarskite, silver, uranium and asbestos were discovered in 1947. Belra's port is a relay point for important mineral ores.

Portuguese India includes Goa (capital, Nova Goa or Pangim), on the Malabar coast; Damao, near Bombay; and Diu, a small island 140 miles from Damao. There is a total area of 1,537 square miles and a population (1952) of 640,000. Salt is produced in Goa and Damao, and manganese near Marmugao, where there are 200 mines. Other exports are coconuts, fish, spices, caju-nuts, copra. Agitation for the cession of Portuguese enclaves to India has created unrest and some violence, but Portugal has strongly maintained its right to these possessions. As a result, India broke off relations with Portugal Aug. 19, 1955.

Goa has the shrine of St. Francis Xavier.

Macao, with an area of six square miles, is on an island of the same name at the mouth of the Canton River in China. Population (census 1950), 187,772. The trade, mostly transit, is handled by Chinese.

Portuguese Timor is the eastern part of the Malay island of that name, off the North coast of Australia, Netherlands having the western part. The area is 7,330 square miles and the population (1952), 453,000. Exports are coffee, sandalwood, sandal root, copra and wax. Capital, Dili.

Rumania

ROMANIA

REPUBLICA POPULARA ROMANA

Capital: Bucharest. Area: 91,584 sq. mi. Population (U.N. est., 1950): 16,100,000. Flag: three vertical bars, blue-yellow-red, with insignia in center. Monetary unit: Leu (pl. lei).

Descriptive. Rumania, a country of Europe, is bounded on the North by the U. S. S. R., on the East by the Ukrainian S.S.R., Moldavian S.S.R., and the Black Sea, on the South by Bulgaria, and on the West by Yugoslavia and Hungary. For 243 miles the Danube forms the southern boundary; for 190 miles, from Calarasi to the Black Sea, it flows through Rumanian territory. The Carpathian mountains extend southward from Bukovina to Buzau, thence westward to Orsova on the Danube.

Resources and Industries. Four-fifths of the population engage in agriculture and stock-raising, the most important agricultural products are wheat, corn, barley, rye, sugar beets and oats. Vineyards and orchards are plentiful. The country yields salt, petroleum, natural gas, lignite, gold, iron, copper, zinc and pyrites. Flour milling, brewing and distilling are important industries. The country's resources and most of its enterprises were nationalized June 12, 1948. It has close economic ties with the U.S.S.R.

History and Government. Rumania's history dates back to 101 A.D. with the Roman coloniza-

tion of the Dacian Kingdom. The modern nation was formed by the union, Jan. 24, 1859, of the principalities of Wallachia (Muntenia) and Moldavia; proclaimed its independence from Turkey, May 10, 1877, during the Russo-Turkish War.

Rumania fought with the Axis, invading Russia, 1941-44. It fought against Germany and Hungary, 1944-45.

The armistice terms of March, 1945 provided that the Soviet-Rumanian frontier of June 28, 1940 would be restored and that Northern Bako-win and Bessarabia, occupied by Rumania since 1918, would be recognized as part of the Soviet Republic. Rumania returned to Bulgaria in 1940, the two Southern Dobrudja counties won by the Treaty of Bucharest (1913) with an area of some 3,000 sq. mi., and a population (1940) of 408,900.

According to the constitution of 1886 (modified 1923, and restored by royal decree Aug. 31, 1944), Rumania was proclaimed a constitutional monarchy; Government was vested in a King, a Senate and a Chamber of Deputies. Basic freedoms of the individual, the secret ballot and rights of private property were guaranteed.

The United States and Great Britain recognized the Groza coalition government, Feb. 5, 1946, after the Cabinet had been reorganized and free elections, freedom of the press, speech, assembly and religion had been granted. Women voted for the first time in the national elections of 1946.

The exiled King of Rumania, Michael I (born Oct. 25, 1921), only son of ex-King Carol II (abdicated Sept. 6, 1940; died April 4, 1953) and Princess (now Queen-Mother) Helen of Greece; abdicated Dec. 30, 1947, but renounced his abdication March 4, 1948, blaming Communist domination of the government for his act. Michael married (June 10, 1948) Princess Anne of Bourbon-Parma.

Coincident with Michael's abdication, a People's Republic was proclaimed by the government. A new constitution on the Communist model, voted Sept. 24, 1952, replaced that of 1948. Members of the Assembly (1 to each 40,000 population) are elected for four-year terms. A Presidium legislates between Assembly sessions.

In general elections Nov. 30, 1953, a Parliament of 423 Deputies was elected, all members of the Rumanian Workers (Communist) party or front organizations.

The Premier is Gheorghiu-Dej, appointed June 2, 1952, replacing Dr. Petru (Peter) Groza who was proclaimed President by the Assembly, reelected Jan. 24, 1953.

Education and Religion. Primary education is free and obligatory. There are universities in Bucharest, Jassy, Cluj and Timisoara.

Liberty of worship is assured. Orthodox clergy are paid by the state, other clergy being subvented. Church and State are separated.

Defense. Military service is universal and compulsory between the ages of 21 and 50. Normal service is for two years. Rumania has a small Navy and Air Force.

San Marino

Area: 38 sq. mi. Population (census 1953): 13,500. Flag: Blue and red horizontal bars.

Descriptive. San Marino, smallest republic, is situated on the slope of Mount Titano in the Apennines near Rimini, in the heart of Italy. Agriculture and stock raising are practically the only industries. Chief exports are wine, cattle and building stone. San Marino has its own coinage and postage stamps, but Italian and Vatican City currency are in general use. There is no public debt.

History and Government. The Republic claims to be the oldest state in Europe and to have been founded in the fourth century. It has had a treaty of friendship with Italy since 1897.

San Marino is governed by a Grand Council of 60 members elected by popular vote, two of whom are chosen to exercise executive power for a term of six months. It has the only Communist-controlled government in Europe outside the Iron Curtain. It maintains a militia of 900.

Spain

ESTADO ESPANOL

Capital: Madrid. Area: 195,504 sq. mi. Population (U.N. est. 1954): 28,751,000. Flag: three horizontal bars, red-yellow-red, with coat of arms in center bar. Monetary unit: Peseta (c. U.S. 2.56c).

Descriptive. Spain, a nominal monarchy, occupies the entire Iberian peninsula in Western

Europe, except for Portugal. It is bounded on the West by Portugal and the Atlantic Ocean, on the North by France and the Atlantic, the Pyrenees separating it from France; on the East and South by the Mediterranean Sea, the British fortified station of Gibraltar being at the southernmost tip, guarding the entrance to the Mediterranean from the Atlantic. The Balearic Islands in the Mediterranean, area, 1,935 sq. mi.; population 386,173, and the Canary Islands, area 2,807 sq. mi.; population, 564,273, in the Atlantic are provinces of Spain; Ceuta, a fortified post in Africa, opposite Gibraltar, is in the Province of Cadiz.

The interior is a high inclosed plateau traversed east and west by mountain ranges and deficient in rainfall.

Resources and Industries. The productive land of Spain comprises nearly 114,000,000 acres, about 90% of the total area, but only about 56,000,000 acres are under cultivation, while 60,000,000 acres are pastures and mountains.

The principal agricultural products of Spain are wheat, barley, oats, rye, olives, grapes, lemons, oranges and other fruit, onions, almonds, esparto, flax, hemp, pulse and cork. Wine-making is important. Spain possesses an abundance of minerals, iron, copper, zinc, coal, cobalt, quicksilver, silver, sulphate and soda, sulphur and phosphates.

Spain has considerable manufactures in cotton and woolen goods, paper, cork and cement. Sardines, tuna fish and cod are most important fish catches. The tourist industry has regained importance, with 203,000 American visitors in 1954.

Spain now receives United States economic and technical aid. Industrial production is increasing; steel output in 1954 was 1,103,500 metric tons and was expected to reach 2,000,000 tons annually by 1958. Coal production rose to 10,428,726 tons; electric power was a record 3,853,573 kilowatts. The merchant marine is being expanded, with a present shipyard production capacity of 150,000 tons per year. Spain's 8,180 mi. of railroads are being modernized through a \$550,000,000 program.

History and Government. Spain is an ancient country and Cadiz claims to be one of the oldest cities in the world. The first Republic of Spain (1873-1875) was followed by a resumption of the traditional monarchy. The Second Republic was established in 1931 when, following the victory of the Republicans in the municipal (city, not national) elections, Alfonso XIII, King of Spain from his birth (May 17, 1886), and Queen Victoria, with the royal family, went into exile April 14, 1931. A self-formed provisional government headed by Niceto Alcala Zamora carried on. A Cortes, the first in eight years, was elected June 28, 1931 and formed itself into a Constituent Assembly with members elected by universal suffrage for four years. Zamora was elected President for six years, and a constitution adopted, Dec. 9, 1931, under which the church and state were separated, church property confiscated, education made entirely secular, provision made for the division of the large estates among the peasants and other socialistic plans made possible.

President Zamora dissolved the Cortes in 1934 and the new one elected Feb. 16, 1936 with a Leftist (Popular Front) majority, removed Zamora from the presidency and elected Manuel Azana, the Premier, President.

A revolution, led by army officers in Morocco, was begun July 19, 1936 by the political elements opposed to the Popular Front. The Nationalists set up a Government at Burgos under the leadership of Gen. Francisco Franco (born Dec. 14, 1892). The war continued until the surrender of Madrid March 28, 1939. The United States formally accorded recognition to the Franco government April 1, 1939. In the bitterly fought civil war Franco received military help from Italy and Germany, while Socialists, Communists, British Labor party members and other anti-Fascists fought with the Republican forces.

Gen. Franco announced his cabinet, Aug. 10, 1939, with himself as Chief-of-State, Commander in Chief of the Army, Prime Minister and head of the Falange party. The Cortes was re-established July, 1942, composed (March, 1943) of 438 members (procuradors), representing all phases of national life.

Gen. Franco in 1947 was given life tenure as Chief-of-State and set up a Regency Council, or Council of the Realm, which is to enthrone a king of his choosing as his successor if he dies or is incapacitated. The Council has 16 members.

Spain was neutral in World War II, but its relations with the Axis and its Fascist character alienated the Western Allies. Spain was excluded from the U. N., 1946, and the U. S., France and Britain recommended the withdrawal of Franco and suppression of the Falange. The major powers except Argentina withdrew their ambassadors.

After 1948 the West saw dangers to itself in Communist agitation. On the initiative of Latin American nations and the Arab League, the General Assembly, U. N., removed the ban on Spain, permitted its entry into organizations, including the Food & Agricultural Org. and UNESCO, and authorized a loan from the Export-Import Bank. In 1951 the U. S. and Spain exchanged ambassadors.

Education and Religion. Franco reestablished Catholicism as the State religion and made an agreement with the Vatican for state and church cooperation in appointing priests. Civil marriages contracted with non-Catholics were legalized June 18, 1955. Primary education is compulsory and free. A stringent campaign to eliminate illiteracy (25%) was begun in 1955.

Defense. Service in the Army is compulsory for two years. The Army has numerous divisions and the military forces get about one-third of the annual budget. The Navy has chiefly destroyers and smaller vessels and a personnel of about 40,000. The Air Force is independent. Under a 10-year defense agreement with the United States signed Sept. 26, 1953, Spain will receive arms and economic aid and will permit use of a number of air and naval bases on Spanish soil.

SPANISH COLONIES

Spanish Guinea, in Africa, comprises Fernando Po and several smaller islands, and Continental Guinea, with a total area of 10,852 sq. mi. and population (1950) of 198,663. The products include cocoa, gold, coffee, wood and wool. Capital: Santa Isabel.

Morocco and Ifni: see *Index, Morocco*.

Spanish Sahara includes the zones of Rio de Oro, 73,362 sq. mi., and Sekia el Hamra, 32,047 sq. mi.

Sudan

FORMER ANGLO-EGYPTIAN SUDAN

Capital: Khartoum. Area: 967,500 square miles. Population (govt. est. 1951): 8,764,000. Monetary unit: Egyptian pound (U. S. \$2.87).

Descriptive. The Sudan, former Anglo-Egyptian condominium, is bounded by Libya and Egypt on the North, the line being 22° North latitude; the Red Sea and Eritrea and Ethiopia on the East, Uganda (British) and the Belgian Congo on the South, and French Equatorial Africa and Libya on the West.

The northern zone consists of the Libyan desert, on the West, and the mountainous Arabian desert, extending to the Red Sea on the East, separated by the narrow valley of the Nile; the central zone has large areas of fertility, including the rainlands of Kassala and Bokar, the Gezira plain and the pastures and gum forests of Kordofan; and the southern equatorial belt where the soil is richest and watered by tropical rains.

The White Nile flows North through the middle of the country; the Blue Nile, rising in the mountains of Ethiopia, flows Northwest to its junction at Khartoum with the White Nile to make the Nile that flows on in a huge S curve to enter Egypt at Wadi Halfa. Khartoum is 1,345 miles south of Cairo, and 1,255 ft. above sea level.

Resources and Industries. The Sudan has copper, gold, salt and other as yet untapped mineral resources. The country is the principal source of the world's supply of gum arabic. Cotton is grown extensively. Other important products are sesame, senna leaves and pods, ground-nuts, dates, hides and skins, mahogany, dom nuts (vegetable ivory), chillies, semn (ghee), melon-seeds, beans, corn, trochus and mother of pearl shell, shea nuts, salt, ivory and gold. The staple food of the inhabitants is dura (great millet). Part of the Sudan is included in a vast British hydroelectric program.

History and Government. The Mahdist rebellion, 1884-85, culminating in the fall of Khartoum in 1885, forced the Egyptian Government to withdraw from the Sudan, retaining only Wadi Halfa on the Nile and Suakin on the Red Sea as frontier ports. The Dervish misrule that followed was overthrown by Lord Kitchener with an Anglo-Egyptian army at Omdurman Sept. 2, 1898. A treaty between Egypt and Britain, 1899, and later

acts, provided for a governor appointed by Egypt with consent of Britain. A constitution, 1948, provided for an executive council composed equally of British and Sudanese, a legislative assembly partly elective. British and Egyptian flags flew together.

In October, 1951, the Egyptian Parliament abrogated its 1899 and 1936 treaties with Great Britain, and amended the constitution, Oct. 16, to provide for a separate Sudanese constitution.

A compromise agreement was signed in Cairo Feb. 12, 1953, providing for liquidation of the dual administration and determination by the Sudanese on either union with Egypt or complete independence. Authority during the three-year transition is vested in the British Governor-General and a five-man commission. In the first Parliamentary elections, Nov.-Dec., 1953, the pro-Egyptian National Unionists party won 21 of the 30 elected seats in the 50-member Senate and 50 of the 97 seats in the House of Representatives.

Prime Minister: Ismail el Azhari, elected Jan. 6, 1954.

Education and Religion. Sudanese inhabitants are Arabs, Negroes and Nubians of mixed Arab and Negro blood; the Arabs and Nubians are Mohammedans. The educational system in the North is directed mainly by the government and in the South by church missions.

Defense. Sudan has its own defensive force.

Sweden

KONUNGARIKET SVERIGE

Capital: Stockholm. Area: 173,378 square miles. Population (govt. est., 1955): 7,234,664. Flag: extended yellow cross on medium blue field. Monetary unit: Krona; pl. kronor (U.S. 19.33c).

Descriptive. Sweden occupies the eastern and largest part of the Scandinavian peninsula in Northwest Europe. Its greatest North-South length is 977 miles; greatest width 311 miles. Sweden is separated from Norway on the West by the Kölen (or Kjölen) mountain range, and from Finland on the East by the Baltic Sea except in the North where the two meet along the Tornea River. The Baltic Sea also separates it from the Baltic States, Poland and Germany on the South-east and South and the Kattegat from Denmark on the Southwest.

Resources and Industries. Although of broken, mountainous topography, Sweden contains much productive land, well watered, on which the Swedes have attained high efficiency in agriculture. Of Sweden's total area, 9.1% is cultivated, 2.5% pasture, and 54.5% forests. About one-third is unreclaimable.

Many industries flourish in Sweden, whose main natural resources are forests, iron ore and water power. Coal and oil have to be imported. Industry employs 41% of the working population, agriculture 20%. About one-fifth of the national product is based on foreign trade. Sweden exports more iron ore than any other country and vies with Canada in wood pulp. About two-fifths of the exports come from pulp, lumber, paper and other forestry products. Other important products are steel, ships, airplanes, ball bearings, telephones, electrical goods. Chief agricultural industries produce cheese and butter.

The mining industry is extensive. Swedish steel is of especial value for tool making. Mining and metal industries employ 300,000; building, 190,000; textiles, 100,000.

Water power resources eventually may reach 80 billion kilowatt hours per year. In 1954, 23.7 billion kwh were produced and output is scheduled to reach 35 billion kwh in 1960. Work was begun in 1953 on the Stornorrforss hydroelectric plant, on the Ume River, which will have three to four generating sets with capacities of 130,000 kwh each.

Over 90% of the economy is in private hands; the government holds a large interest in water power production and runs the railways.

Shipping is privately operated and not subsidized. The merchant marine had a gross tonnage of 2,737,566 tons, Jan. 1, 1955.

Consumer cooperatives are in extensive operation, with more than 1,050,000 members served by 8,200 stores in 1953. Cooperatives also are important in agriculture and housing.

Foreign trade (in kronor):

	Imports	Exports
1952	8,947,000,000	8,134,000,000
1953	8,161,000,000	7,645,000,000
1954	9,174,000,000	8,220,000,000

History and Government. Sweden is a constitutional monarchy. The Riksdag (Parliament) has two chambers, the first of 150 members and the second of 230 members. All men and women over 21 are entitled to suffrage.

The King is Gustav VI Adolf, former Crown Prince Gustav Adolf (born Nov. 11, 1882), who succeeded to the throne on the death of his father, Gustav V, Oct. 29, 1950 (reigned since Dec. 8, 1907). The King married (June 15, 1905) Princess Margaret (died May 1, 1920), daughter of the Duke of Connaught and granddaughter of Queen Victoria. He has three living sons, two of them commoners through marriage, and one daughter, Queen Ingrid of Denmark. One son, Gustav Adolf, was killed in an airplane accident Jan. 26, 1947 and his son, Prince Carl Gustaf (born 1946), became heir apparent. The King's second wife (married Nov. 3, 1923) was Lady Louise Mountbatten, now Queen Louise.

A coalition of Social Democrats and Agrarians on Oct. 1, 1951, succeeded the Social Democratic-Labor cabinet, in power since 1945.

The Prime Minister is Tage Erlander, Social Democrat, appointed Oct. 9, 1946.

Under tax reforms instituted in 1952, a ceiling of 65% was set on income taxes; 80% on government and municipal taxes combined. About 10% of the national income is redistributed for social welfare. Its welfare system, already advanced, was expanded effective Jan. 1, 1955, to include general health insurance.

Sweden is a member with Denmark, Norway and Iceland of the Nordic Council, estab. Feb., 1953, an advisory body made up of delegates from parliaments, which discusses Scandinavian issues, such as patent rights, passports, economic development and capital investments for mutual advantages.

Education and Religion. The population is very homogenous, being entirely of the Scandinavian branch of the Germanic family, except about 30,000 Finns and 6,500 Lapps. Most of the people are Lutheran Protestant, which is the state religion. Religious laws were liberalized, effective Jan. 1, 1953. Education is compulsory.

Defense. Service in the Army is compulsory between the ages of 19 and 47. A first 10-month training period is followed by three one-month repetitions. There is an army of approximately 600,000, plus a voluntary Home Guard of 100,000. The air force of 16 groups is fourth largest in the world, after the U.S., U.S.S.R., Great Britain. It has 50 combat squadrons and 1,200 planes, including Swedish-built jets. The Navy has received two heavy cruisers, 18 destroyers and 23 submarines since the beginning of World War II. The Riksdag authorized, Feb. 1952, 46 new units, including destroyers, submarines and other light units. Completion is expected by 1961.

The coast artillery is largely dug into atom-bomb-proof rock shelters along nearly 700 miles of coast line. Five hundred military rock shelters and similar airplane hangars and civilian shelters were completed in 1953.

Switzerland

SCHWEIZ—SUISSE—SVIZZERA

Capital: Berne. **Area:** 15,944 sq. mi. **Population** (U.N. est., 1954): 4,925,000. **Flag:** white cross on red ground. **Monetary unit:** Franc (U.S. 23.33c).

Descriptive. Switzerland, in Central Europe, is bounded on the West by France, the North by Germany, the East by Austria and Italy, and the South by Italy.

The Alps constitute 61%, the midlands 27%, and the Jura 12% of Switzerland. The Alps constitute the most imposing mountains in the world. In the Swiss Alps there are no fewer than 70 peaks with an altitude ranging from 10,000 feet to approximately 15,000. Swiss lakes famous for their beauty are Lake Maggiore, Zurich, Zug, Lugano, Wallensee, Brienz, Thonne, Lucerne, Geneva and Constance. The Rhine, the Rhone and feeders of the Danube originate here.

The chief cities are Zurich, Basel, Berne, Geneva, Lausanne, St. Gall, Winterthur and Lucerne.

Resources and Industries. Dairy products form the chief agricultural industry, followed by cattle, pigs, fruit, poultry, tobacco, wheat, rye, oats and potatoes. The country is famous for its wine and cheese. The principal minerals are salt, iron ore, and manganese. Watchmaking, machinery, metals and precision instruments are important manufactures; also silk, wool and cotton articles; electrical products, iron and steel products; indus-

trial chemicals, clothing, perfumes, and pharmaceuticals.

Switzerland's abundant water power is exploited by more than 60 hydroelectric plants.

Merchant shipping aggregated 103,590 gross tons in 1955.

History and Government. Switzerland, the Helvetia of ancient times, is a confederation of 22 cantons, three of which once (1291) were members of a defensive league and later were joined by other districts. In 1648 the Swiss Confederation obtained its independence from the Holy Roman Empire. Three of the cantons are subdivided. The cantons are joined under a Federal Constitution of May 29, 1874, with large powers of local control retained by each canton. The national authority vests in a parliament of two chambers, a "ständerrat" or State Council to which each canton sends two members. The lower house, Nationalrat or National Council, has 196 members, one representative to each 24,000 population.

Executive power is vested in the Bundesrat (Federal Council) of seven members.

The President serves for one year and is succeeded by the Vice President. In 1955 the president was Max Petit-pierre; vice president, Markus Feldmann.

Switzerland enters into no military alliance and is not a member of the U. N. or North Atlantic Treaty. It is, however, a member of various international commissions of the U. N., the International Labor Org., the World Health Org., and supports the ECA work, but is not a beneficiary. The International Committee of the Red Cross has hq. in Geneva, and the International Postal Union in Berne.

Education and Religion. Primary education has been free and compulsory since 1874. There are seven universities; the oldest is Basle, founded in 1460. Swiss German dialects are spoken by a majority of the people in 16 of the cantons; other national languages are French, Italian, and Romansh.

There is complete freedom of worship. Of the population 57.6% are Reformed Protestants, 41.1% Catholics.

Defense. Service in the national militia is compulsory; liability extends from 19 to 60 years.

Syria

AL-JAMHOURIYA AS-SOURIYA

Capital: Damascus. **Area:** 72,234 sq. mi. **Population** (U.N. est., 1954): 3,670,000. **Flag:** three horizontal bars, green-white-black, with three red stars on white bar. **Monetary unit:** Syrian pound (U.S. 27.95c).

Descriptive. The Republic of Syria in the Levant is bounded on the North by Turkey, on the East by Iraq, on the South by Hashemite Jordan and Israel, and on the West by Lebanon and the Mediterranean Sea. It is traversed by the Orontes and Euphrates Rivers. Latakia is the chief seaport.

Resources and Industries. Mineral wealth is comparatively small, except for oil, found chiefly in the Deir-Ezzor region. The principal industries are agriculture and cattle breeding; the chief crops are wheat, barley, tobacco, citrus fruits, cotton, olives, grapes and sorghums. Industries include flour, oils, soap, textiles, cement, tanning, tobacco, knitwear, glassware, sugar, hosiery, footwear and brasswares.

In 1955 a \$530,000,000, five-year development program was outlined by a World Bank team, to be largely financed by Syria.

History and Government. One of the world's most ancient lands, the State (later Republic) of Syria was formed from the former Turkish Empire Sanjaks (districts) of Damascus, Aleppo, Hama, Homs, Latakia, the Hauran and Jebel Druze. Syria was made an independent State by the Treaty of Sevres, Aug. 10, 1920, and divided into the States of Syria and Greater Lebanon Sept. 1, 1920. Both were administered under a French mandate 1920-1941.

Syria was proclaimed a Republic by the occupying French authorities Sept. 16, 1941. An agreement signed Dec. 27, 1943 transferred nearly all powers hitherto exercised by France to the respective Syrian and Lebanese governments, effective Jan. 1, 1944. All foreign troops subsequently withdrawn April 17, 1946.

Syria is a member of the United Nations, and became a member of the Arab League by a pact signed in Cairo March 22, 1945.

President: Shukri al-Kuwatli, elected by Parliament, Aug. 18, 1955, effective Sept. 6.

Education and Religion. The population is composed mainly of Sunni Moslems but there is a large number of Christians. Arabic is the official language. There is about a score of Arabic newspapers published in Damascus. There is a public education system, also a number of private and foreign schools. There is a Syrian University in Damascus, agricultural colleges in Selemie and Bekaa and an engineering college in Aleppo.

Defense. The army consists of approx. 25,000 men, plus 10,000 recruits, the gendarmerie of 4,000, and others. There is a small air force and navy.

Thailand (Siam)

PRADES THAI OR MUANG-THAI

Capital: Bangkok. **Area:** 200,148 sq. mi. **Population** (U.N. est., 1954): 19,925,000. **Flag:** horizontal stripes, red-white-blue-white-red, the blue double width of others. **Monetary unit:** Baht (Tical) (U.S. 4.815c).

Descriptive. Thailand, constitutional monarchy, is situated in Southeastern Asia, with Burma on the Northwest and West; Laos on the North and East, Cambodia on the Southeast, and the Gulf of Thailand, which is part of the China Sea, on the South and East. It also occupies the neck of the Malay Peninsula as far as the Federation of Malaya. It is of rolling topography with large areas benefiting from irrigation.

The government voted July 20, 1948 to change the English name of the country to Thailand.

Bangkok, the capital, in the delta of the Menam, is a modern city. Don Muang airfield, Bangkok, is one of the largest and most modern in Southeast Asia, served by leading international airlines. The Port of Bangkok, through which passes about 80% of Thailand's imports and well over half its exports, lies approximately 25 miles inland from the sea on the Menam Chao Phraya. The port was opened to ocean-going vessels in 1954 after modernization and dredging.

Resources and Industries. There are many large forests, teakwood being an important article of export.

Mineral resources include coal, tin, iron, manganese, tungsten, antimony and mercury.

The chief crop is rice, the staple food of the people and heavily exported, accounting for 50% of total foreign exchange earnings. Other important exports are tin, rubber, teak and tungsten. Coconuts, tobacco, pepper and cotton are produced in quantity.

Royal State Railways have 2,000 miles of meter-gauge lines radiating from Bangkok to outer points. A modern highway system, including links to Malaya, Burma, Laos and Cambodia, is being built with United States assistance.

History and Government. Siam, an ancient monarchy, noted for picturesque architecture and pageantry, underwent a bloodless revolution in 1932. King Prajadhipok, a liberal, signed a new constitution, establishing a limited monarchy, but he refused to sign a measure abdicating the royal power of life and death and resigned. He was succeeded by his nephew, Prince Ananda, who was found dead of a bullet wound, June 9, 1946, and the legislature named his brother, Prince Phumiphon Aduldet (born 1927), to succeed him. A regency council ruled for him until King Phumiphon formally took the throne May 5, 1950.

The present constitution, adopted Mar. 8, 1952, provides for a unicameral National Assembly of 246 members, half elected and half appointed.

The Premier is Field Marshal Luang Pibul-Songgram, member of the Executive Council, a military junta.

Education and Religion. Education is compulsory between 8 and 15. There are 5 universities, 31 training colleges and many vocational schools. The language is Thai, an Indo-Chinese monosyllabic branch. Buddhism is the principal religion.

Defense. Of Thailand's total armed forces of 85,000, the militarized police force comprises 40,000; army about 30,000; air force 4,000. The Navy has 45 small ships and 8,000 personnel.

Turkey

TURKIYE CUMHURİYETİ

Capital: Ankara. **Area:** 296,503 sq. mi. **Population** (U.N. est., 1954): 22,949,000. **Flag:** white crescent and white five-pointed star on red field. **Monetary unit:** Lira (of 100 piastras) (U.S. 35.71c).

Descriptive. Turkey, a Republic, occupies territory in both Europe and Asia. European Turkey is bounded on the North by the Black Sea, Bulgaria

and Greece, on the East by the Black Sea and on the West by the Aegean Sea and Greece. Turkey in Europe is separated from Turkey in Asia by the Bosphorus at Istanbul and the Dardanelles (Hellespont), approximately 47 miles long with a width varying from one to four miles. Turkey in Asia is bounded on the East by the U.S.S.R. and Iran, on the South by Iraq, Syria and the Mediterranean and on the West by the Mediterranean and the Aegean.

	Turkish Area (Sq. Mi.)	Pop. (1950)
Europe	9,257	1,627,000
Asia	287,246	19,308,000

The terrain is in general a rugged plateau with hot dry summers and cold winters with snow remaining until May. High mountains ring the plateau to the South, North and East. More than 20 peaks top 10,000 ft. Fertile portions are in the South along the Aegean coast.

Izmir (ancient Smyrna) is the principal export outlet. Ports on the Black Sea under development include Samsun, Trebizond (classical Trapezus), Sinop, Amasra, and Ereğli. Istanbul is served by leading international airlines. The Istanbul Hilton hotel opened in June, 1955.

Resources and Industries. About half of Turkey's population derive their income from agriculture, the products including tobacco, cereals, olives and olive oil, wool, silk, cotton, figs, nuts, fruits of almost all varieties, opium and gums. About 20 million acres are in forests.

The country has 5,000 miles of railroad; an additional 1200 miles will be added and the system modernized with standard gauge track throughout.

There are large, relatively undeveloped deposits of coal, iron, copper, petroleum, and chrome (Turkey is world's largest producer of chrome). Other minerals include manganese, lead, zinc, antimony, silver, mercury, sulphur, molybdenum, magnesite and asbestos. Turkey denationalized her petroleum resources March 7, 1954, and offered incentives for development by foreign companies.

Turkey manufactures silk, cotton and woolen yarn, and cloth, iron and steel, cement, paper, and bottles and other glassware. The country has the largest arms industry in the Middle East, most of production coming from the state-owned Mechanical and Chemical Industries, Inc. Many American enterprises flourish.

Hydroelectric power stations costing over \$250,000,000 will add 2 billion kwh to the annual electricity output by 1956 to keep pace with Turkey's modernization and rapid industrialization.

History and Government. Up to the beginning of World War I, Turkey, or the Ottoman Empire, included European Turkey, Anatolia, Arabia, Syria, Palestine, Mesopotamia, Kurdistan, and parts of Armenia, also groups of islands in the Aegean Sea. The areas of the Turkish Empire, as late as 1916, totaled about 710,224 square miles, with about 21,273,900 population.

Under the Treaty of Sevres Aug. 10, 1920, imposed on Ottoman Turkey after World War I, various divisions of territory were made and a neutral zone set up on either shore of the Dardanelles, the Sea of Marmora, and the Bosphorus.

The republic was declared Oct. 29, 1923, with Mustafa Kemal Atatürk its first President. In 1924 the Caliphate was abolished. (Caliph was the spiritual leader of Islam.)

European powers signatory to the Treaty of Lausanne agreed, July 30, 1936, to the Montreux Convention which permitted Turkey to rearm the Dardanelles and Bosphorus and to close them if threatened by aggression, but permitted free passage through the straits for merchant vessels in peace or war. In 1946 the U.S.S.R. demanded revision of the treaty, with joint Turco-Russian control of military bases on the Dardanelles, but Turkey refused this and also a 1953 offer of a bilateral discussion of the subject with the U.S.S.R.

Changes in the basic law now provides for a single National Assembly of Deputies of 1 representative to every 40,000, elected by men and women over 22 with secret ballot. In the elections of May 2, 1954, the Democratic party remained in power, winning 504 of the 541 seats in the Assembly. The President is Celal Bayar (born 1884), elected in 1950 and reelected in 1954.

ECA and the International Bank have supported public works in Turkey. It is a member of the U.N., Council of Europe and North Atlantic Treaty Organization.

Education and Religion. Church and State now are separated. The vast majority of the Turkish population is Moslem.

Education is compulsory, free and secular between the ages of seven and 12, and optional, but free, through the university. There are primary, intermediate, secondary and vocational schools, and universities in Istanbul and Ankara. There is optional religious training in state-subsidized schools. Robert College (formerly Hamlin), founded 1865, is oldest American college abroad.

Defense. Military service is compulsory; the Air Force has been strengthened and the Navy is under reorganization.

Turkey is a member, with Greece and Yugoslavia, of a Balkan defense group by a treaty signed in Ankara, Feb. 27, 1953, and a 20-year military aid pact, Aug. 9, 1954. It also concluded pacts with Pakistan in 1954, and with Iraq, Feb. 24, 1955. Turkey condemned Communist aggression at the Afro-Asian conference at Bandung, April, 1955.

Union of Soviet Socialist Republics

RUSSIA

SOYUZ SOVIYETSKIKH SOTSIALISTICHESKIKH RESPUBLIK

Capital: Moscow. Area (est., 1947): 8,524,750 sq. mi. Population (govt. est., 1947): 193,000,000; (U.N. Economic Commission est., 1954): 216,000,000. Flag: red ground with gold hammer-and-sickle below five-pointed gold star in upper corner nearest staff. Monetary unit: Ruble (c. U.S. 25c).

Descriptive. The Union of Soviet Socialist Republics—in area the largest country in the world—stretches across two continents from the North Pacific Ocean to the Gulf of Finland. It occupies the northern part of Asia and the eastern half of Europe, from the Arctic to the Black Sea. Its western borders brush against Finland, the Baltic Sea, Poland, Czechoslovakia, Hungary and Rumania. On the South it is bounded by Rumania, the Black Sea, Turkey, Iran, Afghanistan, China, Mongolian People's Republic and Korea. In the far Northeast the Bering Strait separates the U.S.S.R. from Alaska.

The vast territory of the U.S.S.R., one sixth of the earth's land surface, contains every phase of climate, except the distinctly tropical, and a varied topography. The European portion is a vast low plain with the Ural mountains on its eastern edge, the Crimean and Caucasian mountains on the South and Southeast. The Urals, separating the European from the Asiatic portions of the country, stretch North and South for 2,500 miles. The Asiatic portion of the U.S.S.R. also consists largely of an immense plain, with mountain ranges on its eastern and southern borders.

The rivers in the European section include the Dnieper, flowing into the Black Sea, the Volga and the Ural, flowing into the Caspian Sea, the Don into the Sea of Azov; the Western Dvina into the Baltic and the Northern Dvina into the White Sea. The Asiatic section is drained by three great rivers, the Ob, the Yenisei and the Lena, each over 2500 miles long, which flow across Siberia into the Arctic Ocean, and contains several large rivers in the South, including the Amur, which flows into the Pacific Ocean.

The capital is Moscow where the Kremlin, ancient citadel of the Czars, forms the nerve center of the federated republics. Leningrad (formerly St. Petersburg and Petrograd), situated in the delta of the Neva River, was the Capital of the Russian Empire for 200 years and now is the second largest city of the Union. Kiev, the 1,000-year-old capital of the Ukrainian S. S. R., is the industrial center of the South. Since 1930 many new industrial cities have arisen in the Urals, Siberia and the Soviet Far East. The Crimea is the vacation-land of the U.S.S.R. and the highway from Sevastopol winds past Yalta, Mischor, Massandra and other health resorts along the shores of the Black Sea.

EXPANSION OF THE U.S.S.R.

The expansion of the U.S.S.R. in recent years was the result of numerous military and diplomatic actions: In Sept., 1939, after Hitler began war on Poland, the Soviet Union denounced its treaties with Poland, invaded its territory and divided Poland with Germany, approximately the eastern two-thirds going to the Soviet Union. A large part of this domain had been Russian imperial territory ever since the Polish kingdom was finally divided among Russia, Austria and Prussia in 1795. When the Polish republic was reconstituted after World War II, the Soviet Union still retained about 69,860 sq. miles, pop. est. 12,775,000.

The Soviet armies also occupied and incorporated the independent republics of Latvia, Lithuania and Estonia, former Russian imperial territory recognized as independent after the first World War. The Soviets also moved against Finland, defeating it twice (1939-1944) exacting large reparations and the cession of the Petsamo (Pechora) region, incorporating it in the Karelo-Finnish S.R., which has over 450,000 pop. Finland, from 1809 to 1917, was a grand duchy of the Russian empire. These Baltic lands added over 6,000,000 population.

In 1944 the Tuvian People's Republic in Outer Mongolia, at one time a Russian protectorate, was made a part of the central Russian Soviet Federal Socialist Republic; its area was given as 64,000 sq. miles, pop. about 65,000.

Subcarpathian Ruthenia was taken over in 1945 and united with the Ukrainian S. S. R. This region was a part of Hungary until 1918; then it was made part of Czechoslovakia; in 1939 it was re-occupied by Hungary; in 1944 it was taken by the Soviet Union and by agreement at the Potsdam Conference of Stalin, Truman and Churchill it was ceded to the Soviet Union. The Czech residents were allowed to transfer to Czechoslovakia if they wished. Pre-war pop. est. 800,000, 63% Ukrainian.

The Soviet Union also took over Moldavia and most of Bessarabia; the latter had been shuttled back and forth between imperial Russia and Rumania.

The Potsdam Conference also approved the transfer to the Soviet Union of most of East Prussia, including the Baltic port of Koenigsberg and about 7,000 sq. miles east of it; the southern part going to Poland. Koenigsberg was renamed Kaliningrad.

By the terms of the Yalta agreement, between Stalin, Churchill and President Roosevelt, the Soviet Union, upon entering the war against Japan three months after Germany's surrender, would establish its title to the Kurile Islands and the southern half of the island of Sakhalin. The Kuriles are 47 islands, area 3,944 sq. miles, pop. 350,000, stretching from Japanese Hokkaido to Kamchatka peninsula. They were once important seal and other hunting grounds. They were held by imperial Russia until 1875, when Japan acquired them. The southern half of Sakhalin was taken from Russia at the end of the Russo-Japanese war of 1904-05 and given to Japan by the Portsmouth Peace Conference. The island has forests and coal and covers 13,030 sq. miles.

POLITICAL ORGANIZATION

The U.S.S.R. is a federation consisting of 16 Union Republics, within certain of which are further subdivisions, such as Autonomous Soviet Socialist Republics, Autonomous Regions and National Districts. Four of the Union Republics contain 16 Autonomous Soviet Socialist Republics and 16 Autonomous Regions; the largest Union Republic, the R.S.F.S.R., has also 10 National Districts. The autonomous republics are:

The Russian Soviet Federal Socialist Republic (Soviet Russia proper), contains over 50% of the population of the Soviet Union and includes 74% of its territory. Its territories stretch from the Estonian, Latvian and Finnish borders and the White Russian and Ukrainian lines on the West, to the shores of the Pacific Ocean, and from the Arctic Ocean on the North to the shores of the Black and Caspian seas and the borders of Kazakhstan, S. S. R., Mongolia and Manchuria on the South. The capital is Moscow.

The capital is Moscow. The Russian Soviet Socialist Republic is the most densely populated of the constituent republics. It borders on the Black Sea, with Germany, Hungary and Rumania on the West and Southwest. The population is 80% Ukrainian. Capital: Kiev. The northern part of Bukovina was added to the Ukraine S. S. R. from Rumania in 1940. Carpatho-Ukraine (Subcarpathian Ruthenia), is a part of this republic. The Crimea an oblast (province) of the Russian Socialist Federated Soviet Republic since 1945 and formerly an autonomous republic, was transferred to the Ukraine Feb. 27, 1954.

The Ukraine contains the famous black soil belt, the chief wheat-producing section of the Soviet Union. Sugar beets and oil seeds are important crops and livestock breeding is rapidly advancing.

In the Donets Basin, industrial heart of the Union, the Ukraine has a huge storage of coal, iron and other metals. Here are produced 30% of the coal mined in the country, 50% of the pig iron, 48% of the steel and 35% of the manganese. There are heavily developed chemical and dye industries and salt mines.

Byelorussian Soviet Socialist Republic (White

Russia), situated on the western border of the U.S.S.R., was proclaimed Jan. 1, 1919.

Under the Czars, Byelorussia suffered greatly from periodical pogroms and from inter-racial struggles. Between 1914 and 1920 it was a field for military operations. The racial composition is Byelorussians 80.6%; Jews, 10%; others, Russians, Ukrainians, Poles. Minsk is the capital.

The country is agricultural. Much of the land is marshy, but modern drainage methods have increased the arable area. Principal crops are flax, grain and potatoes. Chief industries include agricultural machinery, woodworking, matches, linen, paper, leather, oil pressing, glass.

Azerbaijan has in the vicinity of Baku, the capital, the most important oil fields in the U.S.S.R. Before the second world war it produced more than 25,000,000 tons of oil a year. Its natural wealth includes deposits of pyrites, barites and fossil coal, as well as zinc, silver, gold, copper, tin, vanadium and molybdenum. Establishment of large irrigation projects has made cotton growing important (high quality Egyptian-type cotton). A high-yield winter wheat also is grown. Three-fifths of the population is composed of Azerbaijanians, a Turkish people.

Georgian S. S. R., situated in the western part of Transcaucasia, contains the largest manganese mines in the world. There are rich timber resources. Large coal deposits have recently been discovered. Output of industrial machinery has become increasingly important. Grain and wine grapes are principal crops. The capital is Tbilisi (Tiflis).

Armenian S. S. R., with its capital in Erevan, depends largely on irrigation. Cotton and tobacco are widely grown. Copper and lead mining have been developed. The population is 85% Armenian.

Uzbek Soviet Socialist Republic, most important economically of the Central Asia republics, contains the finest cotton lands in the Soviet Union. A high quality caracul fur is produced for export. Its mineral wealth includes coal, sulphur, copper and oil. Capital: Tashkent.

Turkmen Republic, in Central Asia produces cotton, grain and oil seeds. Mineral wealth includes oil, coal, sulphur, barite, lime, gypsum. The Kara Kum desert occupies four-fifths of the territory. Capital: Ashkhabad.

Tadzhik S. S. R. (Tadzhikistan), formed from the former regions of Bokhara and Turkestan, was admitted as a constituent republic on Dec. 5, 1929. Three-quarters of the population are Tadzhiks, mostly Sunnis, speaking an Iranian dialect. Chief occupations are farming, horticulture and cattle breeding. Cotton, grain, sugar cane and a variety of fruits are grown. Heavy industry, based on rich mineral deposits and hydroelectric power, has replaced handicraft. Stalinabad is the capital.

Kazakh Socialist Soviet Republic extends from the lower reaches of the Volga river in Europe to the Altai mountains on the Chinese border. Millions of acres of pasturage were converted to grain in 1953-54. It has vast deposits of coal, oil, iron, tin, copper, etc., and large quantities of non-ferrous metals. Fish for its canning industry are caught in Lake Balkhash and the Caspian and Aral seas. The capital is Alma-Ata (Father of Apples), which has several motion picture studios. Karaganda and Balkhash are large new centers.

Kirghiz Soviet Socialist Republic is located in the eastern part of Soviet Central Asia, on the frontier of Sinkiang (Western China). The people, once nomadic, breed cattle and horses and grow tobacco, cotton, rice, sugar beets. Capital: Frunze.

Karelo-Finnish Soviet Socialist Republic has been formed since World War II from the former Karelian S.S.R. and territory ceded by Finland. It has 26,000 lakes, covering about 15% of its domain. Pine, fir and birch forests cover two-thirds of the area; under-surface wealth includes granite, diabase, porphyry, sandstone, marble, mica, pigmatites, iron, tatanomagettes, nonferrous metals and peat. The capital, Petrazovodsk, was founded in the 18th century by Peter the Great.

Moldavian Soviet Socialist Republic, in the southwest part of the Union, is a fertile black earth plain between the Pruth and Dniester rivers. It was created from territory of the former Moldavian Autonomous Republic and Bessarabia. It is an agricultural region that grows wheat, barley, corn, plums, apples, peaches, walnuts, tomatoes, watermelons and garden truck. Capital: Kishinev.

Lithuanian Soviet Socialist Republic, on the Baltic sea, is an agricultural region, where dairy cattle and hogs are bred. The capital is Vilnius (Vilna). The Latvian Soviet Socialist Republic on

the Baltic Sea and the Gulf of Riga, has timber and peat resources estimated at 3,000,000,000 tons. In addition to agricultural products it produces rubber goods, dyes, mineral fertilizers and glassware. The capital is Riga, on the Western Dvina river. The Estonian Soviet Socialist Republic is located on the Baltic sea, between the gulfs of Riga and Finland. It has textiles, shipbuilding and railroad repair industries and its shale refining industry is reported to be the largest of its kind in the world. Tallinn is the capital. These three Baltic states were overrun by both sides during World War I. Eventually Russian armies occupied them, the regular governments were dispossessed and Communist-dominated parliaments were elected on one-party tickets.

POPULATION

Details about population changes in the U.S.S.R. are meager. However, the Population Reference Bureau, Inc., Washington, D. C., has drawn the following conclusions from available information: Estimated population, 1952, 207,000,000. Yearly increase, est., 3,000,000, or 15 per 1,000. Death rate, est., 10 to 12 per 1,000. An estimate of 216,000,000 at Dec. 31, 1954, was published by the U.N. Economic Commission for Europe.

The following table of the area and population of the 16 constituent republics, while not official, is believed to reflect the actual conditions of 1940:

Republic	Area sq. mi.	Pop. (1940)
Russian S. F. S. R.	6,372,860	109,279,000
(Soviet Russia proper)		
Ukrainian S. S. R.	215,600	40,200,000
Byelorussian S. S. R.	88,146	10,400,000
(White Russia)		
Armenian S. S. R.	11,580	1,253,985
Georgian S. S. R.	27,020	3,542,289
Azerbaijan S. S. R.	33,196	3,209,727
Uzbek S. S. R.	145,908	6,282,446
Turkmen S. S. R.	171,384	1,253,985
Tadzhikistan S. S. R.	55,584	1,485,091
Kazakh S. S. R.	1,059,184	6,145,937
Kirghiz S. S. R.	76,042	1,459,301
Karelo-Finnish S. S. R.	16,173	469,100
Moldavian S. S. R.	19,176	3,464,952
Lithuanian S. S. R.	22,959	2,879,070
Latvian S. S. R.	25,402	1,950,502
Estonian S. S. R.	18,353	1,134,000
Total	8,358,567	194,409,385

According to the census of 1939, the Russians formed 58.4% of the total population; the Ukrainians 16.6%; the Byelorussians 3.1%; the Uzbeks 2.9%; the Tatars 2.5%. Five nationalities, the Kazakhs, Jews, Azerbaijanians, Georgians and Armenians, each comprised between 1 and 2% of the total. The population added in 1940 by the acquisition of territory (officially styled "reuniting with the Motherland") was about 23,000,000.

Legislation since 1944 has re-emphasized importance of the family unit and sought to increase the birth rate. All marriages must be registered; divorce is discouraged. State payments are made to mothers with the birth of the third child. Paternity suits have been abolished, but small state payments are provided for the children. A Soviet ban on marriages to foreigners, in force since 1947, was lifted Dec. 2, 1953.

ECONOMIC SYSTEM

The economic foundation of the U.S.S.R. is the socialist system of economy and socialist ownership of the instruments and means of production. Socialist property exists in two forms: (1) State property; (2) Cooperative and collective farm property. State property includes the land, minerals, waters, forests, mills, factories, mines, rail, water and air transport, banks, communications, large agricultural enterprises (Sovkhozy), municipal enterprises and the bulk of dwellings.

The common enterprises of collective farms and cooperative organizations (Kolkhozy), their output and common buildings constitute the common, socialist property of the collective farms and cooperative organizations. Members of the Kolkhozy also have small plots of land attached to their dwellings for their own use. Peasants unwilling to enter a Kolkhoz may retain their individual farms, but are not allowed to exploit hired labor. Land occupied by collective farmers is secured to them in perpetuity as long as they use it in accordance with the law. A decree issued by the Presidium Aug. 29, 1948, gave citizens the right to buy or build dwellings of not more than 5 rooms.

Large-scale amalgamation of the Kolkhozy into larger farm settlement units (Poselok) was begun early in 1950, reducing 252,000 collective farms to

91,000-94,000 by 1953, averaging 1,693 hectares each (Hectare—2.471 acres), but resulting awkwardness of management prompted consideration of revision of the policy in 1955.

Of the 850,000,000 hectares devoted to agriculture, 476,000,000 belong to collectives in perpetuity, 184,000,000 on a long-term basis, and 101,000,000 leased to fisheries and industrial collectives. The cultivated area increased by 40,000,000 hectares, 1918-1954, with an additional 30,000,000 planned by 1956. The Soviet also plans to copy the United States corn-hog economy system, with an 800% increase in land planted to corn and corresponding increases in hog and other livestock production. The program called for a total production of 10 billion poods (164,000,000 tons) of grain by 1960. (Pood—36.1 lbs.)

Railroads total more than 66,000 mi., 30% double track, with more under construction; improved roads, over 220,000 miles; civil aviation routes (1948), 137,000 miles. Principal airlines: Moscow-Vladivostok (8,000 kms.); Moscow-Tbilisi; Trans-Siberian. Merchant shipping in 1952 included 2,261,000 tons of oceangoing ships, 500,000 tons in the Caspian Sea and many river craft.

Waterways of the U.S.S.R. have been heavily canalized. The new 63-mile canal running from Stalingrad to Kalach, joining the Don and Volga rivers, opened in 1952, links the Baltic and White Seas with the Caspian, Black and Azov Seas. In December, 1953, U.S. Navy officials reported the U.S.S.R. had completed a vast canal system from the Arctic Ocean to the Black Sea, providing increased seapower in protected waterways, ice-free six months of the year. A new inland sea was being created in April, 1954, to power a large hydroelectric project on the border of Mongolia and China's Sinkiang province, where the Irtysh river in eastern Kazakhstan will be dammed to form a reservoir nearly 12,000 sq. mi. in area.

Electric power output is growing rapidly and is expected to triple by 1965 to reach an estimated 500 billion kilowatt hours, with a unified high-tension grid linking major generating centers. Of many large hydroelectric developments, four are under construction on the Volga river and its tributary, the Kama, including the world's largest plant at Kuibyshev which will produce nearly 2,000,000 kilowatts. Others are the Stalingrad dam, north of the city of Stalingrad, 1,700,000 kw; Gorki, and Molotov. A fifth is planned at Cheboksary. When the group is finished, the Volga will develop more power than any other river. The Volga itself is traversed by fleets of diesel steamers and trains of tanker barges, with traffic governed by modern neon navigation light systems.

Siberia, particularly its southern regions, is growing industrially. A giant dam at Novosibirsk in western Siberia is one of a group planned to harness the Ob river system. The city has railroad works, metallurgical plants, machine-tool industries, fabricating and heavy industry installations.

The fifth Five-Year Plan (1951-1955), announced Aug. 1952, aims at increased output with a 10% to 12% annual increase in average production to attain an overall rise of about 70% in 1955 over 1950. Fulfillment of the 1955 goals would make U.S.S.R. production about half of that of the United States in 1951. Per capita production would be about one-third.

The Central Statistical Department announced Jan. 20, 1955, that industrial production in 1954 was 103% of the government's plan, an increase of 13% over 1953 and 65% over 1950. It is said most major industries exceeded their goals. Yields of grain and other crops increased. Cattle increased nearly 2,000,000 to 64,900,000 as against the 1928 total of 66,800,000. Increases were noted in consumer goods: TV sets, 300%; vacuum cleaners, 300%; washing machines, 1300%.

Western analysts believe the Soviet bloc's gross national product is growing at an annual rate of about 7%, compared with about 2% to 3% for the Atlantic treaty nations.

Government policy in 1955 appeared to renew stress on industrial production and food at the expense of consumer goods.

Industrial production in rubles:

	1937	1940	1950
95,500,000,000	137,500,000,000	240,000,000,000	
Production of vital materials (tons):			
	1953	1954	1955 (est.)
Steel	38,000,000	45,000,000	46,000,000
Pig Iron	33,000,000	33,000,000	33,200,000
Coal	320,000,000	380,000,000	390,000,000
Oil	52,000,000	58,240,000	67,000,000

Electric power production in 1954 was estimated at 142.5 billion kwh.

The Union produces at least \$140,000,000 worth of gold annually, or about 14% of the world total.

Soviet trade outside the satellite nations increased in 1954; imports doubled and exports increased 50%, the totals balancing at about \$1.7 billion. Trade within the Soviet bloc also has increased since 1948 to reach about \$6.4 billion in 1953.

GOVERNMENT

The first Russian state centered on Kiev in the 9th century. In the 13th century the Mongols overran the country. It recovered under the grand-dukes and princes of Muscovy, or Moscow, and by 1480 freed itself from the Mongols. Ivan IV, the Terrible, was the first to be formally proclaimed Czar in 1547. Peter the Great (1682-1725), extended the domain and in 1721 founded the Russian empire. The abortive Revolution of 1905 demonstrated the insecurity of the regime and led to mild concessions. The Revolution of 1917 led to the end of the empire (Nov. 7). The first provisional democratic government under Kerensky was in turn routed by the extreme Bolsheviks under Lenin. The first Soviet constitution was adopted in 1918 for the R.S.F.S.R.; the U.S.S.R. was formed in Dec., 1922, and the first Union constitution adopted in 1923. A new constitution, usually called the Stalin constitution, was adopted Dec. 5, 1936.

The 1936 constitution provides for universal direct suffrage with secret ballot. It was modified Feb. 1, 1944, to give each of the constituent republics the right to have separate commissariats for defense and foreign affairs. Right of the republics to withdraw from the Union was expressed in the 1936 constitution.

The highest legislative authority is the Supreme Soviet, consisting of two chambers, the Soviet of the Union and the Soviet of Nationalities. The first house is elected on the basis of one deputy for every 300,000 population; the second on the basis of 25 deputies from each Union republic, 11 from each autonomous republic, 5 from each autonomous region, and one from each national district. The Supreme Soviet normally meets twice a year, serves for a four-year term and chooses the Council of Ministers which has broad administrative powers between sessions of the Soviet.

In single-slate elections to the Supreme Soviet, March 14, 1954, Communist and non-party candidates for the first house polled 120,479,249 votes out of 120,727,826 cast (99.79%). Candidates for the Soviet of Nationalities received 120,539,860 votes (99.84% of the total).

The highest judicial organ is the Supreme Court, whose members are elected by the Supreme Soviet for five-year terms. Similar courts are elected within the constituent republics. The law courts of the R.S.F.S.R., which are exemplary of the other republics, are divided into People's Courts and Special Courts, the latter including a Labor Section of the People's Court, Rural Commissions, Arbitration Committees, Military Tribunals and Disciplinary Courts. Capital punishment in peacetime was revived for "traitors, spies and saboteurs," Jan. 12, 1950.

The highest executive and administrative organ of state power is the Council of Ministers (Premier and deputies) appointed by and theoretically responsible to the Supreme Soviet.

Politically active citizens belong to the All-Union Communist party, the only legal party. The highest authority in the party is the party congress which elects a central committee, organizational and political bureaus, and a secretariat. Divisions of the Communist party correspond to the territorial divisions of the state. According to the U.S.S.R. government, the Communist party (Bolsheviks) had 6,300,000 members in the autumn of 1947. The party's directive body is the Central Committee, elected by membership of the party congress.

The Communist International (Comintern) body, formed in 1919, was dissolved June 10, 1943. In its stead a Communist Information Bureau (Cominform) was set up in Belgrade, Yugoslavia, to coordinate the activities of the party in Bulgaria, Czechoslovakia, France, Hungary, Italy, Poland, Rumania, U.S.S.R., and Yugoslavia. Yugoslavia was expelled, June, 1948, and the bureau was transferred to Bucharest, Rumania.

A new Central Committee of 125 members and 110 alternates was elected at the 19th congress of the Soviet Communist party, Oct. 5-15, 1952, to replace the old 71-member committee. The Committee named a new Presidium of 25 full members

and 11 alternates, Oct. 16, to replace the 12-member Politburo (Political Bureau), which dictated the policies of the government, and a new Secretariat.

Premier Stalin died Mar. 5, 1953, after a four-day illness which followed a cerebral hemorrhage. He was born Dec. 21, 1879 in Gori, near Tiflis, Georgia, the son of a cobbler. His real name was Joseph Vissarionovich Djugashvili, but he was named Stalin (meaning man of steel) by Lenin.

Georgi Maximilianovich Malenkov was named Chairman of the Council of Ministers (Premier) Mar. 16, confirmed by the Supreme Soviet Mar. 15, 1953.

Malenkov resigned the Premiership Feb. 8, 1955, confessing to inadequate leadership. He was succeeded by Marshal Nikolai A. Bulganin. Premier Bulganin appointed Malenkov a deputy premier and Minister of Electric Power Stations, and Marshal Georgi K. Zhukov Minister of Defense, Feb. 9. The Communist party Secretariat is headed by Nikita S. Khrushchev, appointed Mar. 21, 1953.

ANNUAL BUDGETS In thousands of rubles.

	Receipts	Expenditures
1950	432,000,000	427,900,000
1951	458,716,500	451,503,000
1952	508,800,000	476,900,000
1953	543,357,000	530,500,000
1954	572,542,000	562,801,000
1955	589,600,000	562,900,000

The 1955 budget totaled 562,900,000 rubles of which 112,100,000 or 19.9% was for military purposes, an increase of 12% in this item over 1954. It stressed heavy industry, allocating to it 163.6 billion rubles; and 26 billion to food and light and local industries.

No accurate comparison with U.S. budgets is possible because of the different buying powers of the dollar and the ruble. In the U.S.S.R. the ruble is pegged at 4 to \$1.

EDUCATION AND RELIGION

Universal compulsory education was introduced in 1930, since 1944 starting at age 7. Instruction is given in more than 100 languages. The number of pupils in the 220,000 primary and secondary schools in 1950 exceeded 37,000,000; teachers 1,600,000. Institutions of higher education and technical schools in 1953 numbered 887, with 1,527,000 students. The Academy of Sciences has 61 institutes, 33 research stations, 3 observatories and 31 special laboratories.

Moscow's new University building is the largest of its kind; 38 stories, 161 classrooms, 800 laboratories; 12 departments, 14,200 students, 2,000 professors.

Over 8,000 newspapers were published in 1953 with total circulation of over 40,000,000, published in 70 languages. There were 18,700 movie theaters and 21,000 traveling movies.

Religious education is permitted but it must not violate the basic principle of separation of the church and state, established Jan. 23, 1918.

Seven branches of Christianity, and the Moslem, Jewish and Buddhist faiths are represented. In 1953 there were 20,000 Orthodox congregations, 32,000 priests and 75 bishops. Moslems are the second largest religious community.

MILITARY

The armed forces were consolidated in March, 1953, under a single Ministry of Defense. A separate Ministry of the Navy, created in 1950, was included in the merger. Military training begins in the schools at 12 (two hours a week). Compulsory service begins at 16.

The U.S.S.R. ratified the U.N. act outlawing genocide, May 3, 1954, with a reservation that would prevent its being unwillingly called before the International Court of Justice.

In 1955 Soviet armies were estimated to comprise 180 divisions, of which 60 were in European Russia, 42 in East Germany and eastern satellites, 26 in southern U.S.S.R. along Turkish and Iranian borders, 17 in central U.S.S.R. and about 35 in the Far East. The air force was estimated at 18-22,000 first line combat planes divided into 18 air armies, plus an equal number in reserve, and an est. annual production rate of 12-17,000 planes. Total air manpower was est. 650,000 to 800,000.

Aircraft types believed to exist in operational numbers include a Type 37 intercontinental jet bomber, a Type 39 medium bomber, a swept-wing turbo-prop bomber, a MIG-19 all-weather fighter, a MIG-17 (redesigned MIG-15), a Yak 21 rocket-powered interceptor. A number of experimental

planes appeared in 1955, including a tailless fighter, a double-delta wing plane capable of vertical climb, a twin-rotor troop-carrying helicopter, and a 4-jet transport.

In addition to its own vast military establishment, the U.S.S.R. dominates the military power of Rumania, Hungary, Poland, Czechoslovakia, Bulgaria, Albania and sovietized East Germany, and furnished training and material to the Chinese Communists, including planes that fought the USAF in Korea. The 8-nation bloc signed a 20-year mutual defense treaty in Warsaw, Poland, May 14, 1955, with a unified military command headed by Marshal Ivan S. Konev.

The active navy, now second only to that of the U.S., was believed to include about 700 ships comprised of 3 or 4 battleships, 20 cruisers, more than 100 destroyers, and 350-400 submarines. Planned new construction was said to include 3 battleships, 20 cruisers, 120 destroyers, 120 submarines (eventually 1,000) of four types. Personnel: (1955) approx. 85,000.

A new class of cruisers of which the Sverdlov is a prototype is believed under construction. They are 12,800-ton ships with a reputed speed of 35 knots. At least four of 12 Skory type destroyers also were commissioned through 1953.

The Soviet is believed to have at least 20 guided missile bases along Baltic Sea coasts, and to have made as many as 24 tests of hydrogen and other atomic weapons. It also participated in the U.N.-sponsored international conference on peaceful aspects of atomic energy in Geneva, August, 1955.

The Soviet announced Aug. 13, 1955, its decision to reduce its armed forces by 640,000 in view of "the relaxation of international tension." Czechoslovakia, Poland and Albania also announced reductions, followed by Hungary Sept. 7.

For policies of the Soviet Union and events of 1955 consult Index and Chronology.

Uruguay

REPUBLICA ORIENTAL DEL URUGUAY

Capital: Montevideo. Area: 72,172 sq. mi. Population (U.N. estimate 1953): 2,525,000. Flag: alternated four blue, five white horizontal stripes, rising sun insignia on white ground in upper corner nearest staff. Monetary unit: Peso (U.S. 31.90c).

Descriptive. Uruguay, the smallest and one of the most advanced republics in South America, is bounded on the North and East by Brazil, on the South by the South Atlantic Ocean and the River Plata, and on the West by Argentina, the boundary line being the River Uruguay, which is navigable from the Plata to Salto, 200 miles North. Lying between latitudes 30° and 35° South and consisting of rolling grassy plains, it enjoys an extraordinarily healthy climate with a uniform temperature.

Resources and Industries. Sixty percent of Uruguay's area is devoted to stock raising, 27% to ranches and farms; 13% is unproductive. The chief products are meat, wool, hides, corn, wheat, citrus fruits, rice, tobacco, oats and linseed. The textile and wine making industries are important.

History and Government. Uruguay, once a part of the Spanish Viceroyalty of Rio de la Plata and later a province of Brazil, declared its independence, Aug. 25, 1825, which was confirmed by a treaty with Brazil and Argentina, Aug. 27, 1828. The first constitution was adopted July 18, 1830. The present version was adopted in 1934 and since amended. The last amendment, voted Dec. 16, 1951, in effect since Mar. 1, 1952, replaced the office of president with a nine-man coalition council. The council chooses 9 departmental ministers. The constitution provides for a Chamber of Deputies and a Senate elected for four-year terms. Suffrage is universal, with proportional representation in operation. Foreigners may become naturalized without losing their former citizenship.

Much of the Uruguayan code of advanced social legislation was written into the constitution, which provides for old-age pensions, child welfare, State care of mothers, free medical attention for the poor, workmen's accident insurance, cheap dwellings for laborers, an eight-hour day and a six-day week, a minimum wage and special consideration for employed women and minors. It recognizes workmen's right to strike and form unions.

President of the National Council: Luis Batlle Berres, elected Nov. 28, 1954.

Education and Religion. Church and state are

separate and there is complete religious tolerance. The preponderant religion is Roman Catholic. Education, including college, is free; primary education is compulsory. There is a university in Montevideo. The language is Spanish.

Defense. The Army is composed of hired volunteers between the ages of 18 and 45. There is a small Air Force and Navy.

State of Vatican City

STATO DELLA CITTA DEL VATICANO

Area: 108.7 acres. Population: over 1,000. Flag: Two equal vertical stripes of yellow and white with Pope's tiara above 2 crossed keys, one gold, one silver, on white stripe.

The Popes for many centuries, with some slight interruptions held temporal sovereignty over mid-Italy (the so-called Papal States), extending from sea to sea, comprising an area of some 16,000 square miles, with a population in the nineteenth century of more than 3,000,000. This territory in the reign of Pius IX, was incorporated in the Kingdom of Italy, the sovereignty of the Pope being confined to the palaces of the Vatican and the Lateran in Rome and the villa of Castel Gandolfo, by the Italian law, May 13, 1871. This law also guaranteed to the Pope and his successors in the chair of St. Peter a yearly indemnity of 3,225,000 lire (\$622,425 at par of exchange), which allowance, however, remained unclaimed and unpaid.

Final settlement of the Roman question came when the Treaty of Conciliation, the Concordat and the financial convention were signed in the Lateran Palace, Feb. 11, 1929, by Cardinal Gasparri and Premier Mussolini. The Treaty and Concordat established the independent state of Vatican City, and gave the Catholic religion special status in Italy. The treaty (Lateran Agreement) was duly ratified by the Pope and by the Italian Parliament, May 14 and 25, and signed by the King, May 27, and became effective June 7 by exchange of ratification at the Vatican.

The Lateran Agreement was made an integral part of the Constitution of Italy (Article 7) March 26, 1947.

Vatican City includes St. Peter's, the Vatican Palace and Museum covering more than 13 acres, the Vatican gardens, and neighboring buildings between Viale Vaticano and the Church. Thirteen buildings in Rome, although outside the boundaries, enjoy extra-territorial rights; these include buildings housing the congregations or officers necessary for the administration of the Holy See.

The legal system is based on the code of canon law, the apostolic constitutions and the laws especially promulgated for the Vatican City by the Sovereign Pontiff or those to whom he may delegate legislative power. In all cases not covered the Italian law of Rome applies. The Secretariat of State represents the Holy See in its diplomatic relations. By the Treaty of Conciliation the Pope is pledged to a perpetual neutrality unless his mediation is specifically requested by both parties in political disputes. This, however, does not prevent the Church from defending its priests when persecuted, nor from excommunicating members whose political policies have injured it, as in Poland, Hungary and Czechoslovakia. Normally 42 nations maintain diplomatic representatives in Vatican City. President Truman, Oct. 20, 1951, nominated Gen. Mark W. Clark to be U. S. ambassador. Protests led Gen. Clark to withdraw before the Senate acted.

Police duties are carried out by the Pontifical Armed Corps which comprise the Noble Guards, the Swiss Guards, the Palatine Guards of Honor and the Pontifical Gendarmery.

The present sovereign of the State of Vatican City is the Supreme Pontiff, Pius XII, Eugenio Pacelli, born in Rome and elected Pope, 262nd, in succession to Pius XI, March 2, 1939.

Venezuela

REPUBLICA DE VENEZUELA

Capital: Caracas. Area: 352,150 sq. mi. Population (U. N. estimate, 1954): 5,605,000. Flag: three horizontal bars, yellow-blue-red; arc of seven white stars in blue portion. Monetary Unit: Bolivar (29.85c).

Descriptive. Venezuela is the northernmost state of South America and is bounded on the North by the Caribbean Sea, with a coastline of 1,750 miles, on the East by British Guiana, and Southeast by Brazil, and the West and Southwest by Colombia,

with maximum measurements of 923 miles from East to West, 790 miles from North to South. Seventy-two islands are included in the territory of Venezuela, the largest being Margarita (20 by 40 miles) which has been made the state of Nueva Esparta, and is an important pearl center.

The Orinoco River, with its tributaries, drains about four-fifths of the country. About 1,600 miles in length and 13½ miles wide at the apex of the delta, it is the second largest river system in South America, and is navigable for about 700 mi. Its headwaters near the Parima Sierra and the Venezuelan-Brazilian border were located in 1951.

Venezuela is entirely within the torrid zone, the southern boundary extending to less than one degree north of the equator. The northernmost point is 12° 11'. The spurs of the Eastern Andes and the foothills are covered with dense forests; the high plateaus provide excellent grazing. Angel Falls is highest in world, with overall height of 3,212 ft., located in jungle in eastern section. The climate is tropical in Central Llanos and in the coastal regions, becoming temperate between 1,800 and 6,000 feet, and cold in the higher sections.

The Trans-Andean highway extends from Caracas west to San Cristobal near the Colombian border, and to Cucuta, over the line, a distance of 790 miles through the richest parts of the country, crossing the Andes at an altitude of 14,100 ft. Venezuela has more than 7,000 miles of highways. Caracas has an international airport and airlines reach many cities in the interior.

Resources and Industries. Mining, agriculture and stock raising are the chief industries. Coffee is the major agricultural export, and is second only to petroleum in total export value. Other important exports are iron ore, cacao, balata, tonka beans, hides and rubber. Imports are textiles, machinery and hardware, foodstuffs, chemicals and drugs. Venezuela claims to be the second foremost petroleum country of the world. Concessions are held by foreign interests, with half of revenue going to the government. Other minerals are: iron, gold, copper, coal, salt, tin, manganese, asbestos, diamonds, mica. Iron production, 1954, was 5,390,000 tons.

History and Government. Visited by Columbus, Vespucci and others, Venezuela was under Spanish domination until about 1821. The republic was formed after secession from the Colombian Federation in 1830.

Venezuela has had many revisions of its constitution since the first was adopted in 1819. The present constitution promulgated April 15, 1953, provides for a President elected for a five-year term by direct universal vote; a Senate and Chamber of Deputies; and a Supreme Court.

The constitution recognizes and protects the rights of private property, guarantees to the individual the right of education, employment and health, and also embraces a basic labor law that calls for a degree of profit-sharing, the right to organize and strike, paid vacations, pensions, and dismissal indemnity. It guarantees a fair return to capital, prohibits monopolies, and allows formation of employer associations.

Voting is by secret ballot and is compulsory for all citizens between 21 and 65.

President Marcos Perez Jimenez was elected in April, 1953.

A resolution of the constituent Assembly, April 8, 1953, approved changing the nation's name from the United States of Venezuela to the Republic of Venezuela.

Education and Religion. The language is Spanish and Roman Catholic is the religion of the majority of the people, but religious freedom is guaranteed. All education, including college, is free. Primary and secondary education are compulsory.

Defense. Military service is obligatory for all persons, 18 to 45. The Navy consists of several destroyers, 4 frigates and other craft. It had 7 destroyers under construction in 1955.

Yemen

MUTAWAKELITE KINGDOM OF YEMEN

Capital: Sana. Area (est.): 75,000 sq. mi. Population (govt. est., 1953): 4,500,000. Flag: red, with sword and 5 white stars. Monetary unit: Maria Theresa dollar; rial.

Descriptive. The Imamate of Yemen, an ancient kingdom, mostly mountainous, is in the southwestern part of the Arabian peninsula between Asir and the Aden Protectorate. Its northern

boundary and political relations with Saudi Arabia was defined by the Treaty of Taif, June, 1934. The three principal ports are Hodeida, Mocha and Lohaiya.

Resources and Industries. On the plateau of El Jebel, the most fertile section of Arabia, coffee, barley and grain are grown. Mocha coffee, hides, charcoal, sesame, herbs and precious stones are exported.

History and Government. Yemen's ruler since 1948 is Imam Ahmed who recaptured Sana from the forces of Sayed Abdullah el Wazir, another claimant to the throne, following the assassination of Ahmed's father, the Imam Yahaya and two other sons, Feb. 17, 1948. A coup against the Imam Ahmed in early 1955 failed. The government promised the country its first consultative assembly and other reforms. The King formed a new cabinet with himself as premier, Aug. 30.

The United States formally established relations with Yemen, May 11, 1947. The kingdom was admitted to the United Nations Sept. 30, 1947.

Yugoslavia

FEDERATIVNA NARODNA REPUBLIKA JUGOSLAVIJA

Capital: Belgrade. **Area:** 95,558 sq. mi. **Population** (U.N. estimate, 1954): 17,288,000. **Flag:** three horizontal bars, blue-white-red, with red star in center. **Monetary unit:** Dinar (U.S. \$333c).

Descriptive. The Republic of Yugoslavia, composed of six republics—Serbia, Croatia, Slovenia, Montenegro, Bosnia-Herzegovina and Macedonia—is bounded by Austria, Hungary and Rumania on the North, by Hungary, Rumania and Bulgaria on the East, by Greece and Albania on the South and by Albania, the Adriatic Sea and Italy on the West. Mountains and plateaus occupy 75% of the land, and forests abound.

Resources and Industries. Agriculture is the basic industry, for Yugoslavia is a country of small peasant holdings, and it is closely followed by cattle raising and forestry. These furnish occupation for 68% of the population. Nearly one-third of the area is covered with forests (19,068,637 acres), about 60% (35,963,159 acres) is devoted to agriculture, and of this 80% is sown to cereals. The chief crops are wheat, barley, rye, oats, corn, hops and grapes. Since 1952, members are guaranteed a basic wage and share in cooperative profits. The principal minerals are coal, iron, copper, chrome-ore, antimony, lead, salt and bauxite.

Lead leads in processing, with copper and zinc next. The country is the second largest producer of copper in Europe. Coal and steel production has doubled since 1939; oil production many-fold. Many new metallurgical plants have been built to produce copper, aluminum and iron alloys. The state economic plan includes 21 hydroelectric-thermal stations, the largest at Jablanica, Herzegovina, to have a capacity of 450,000,000 kw. hrs.; 12 coal mines to yield 11,246,000 tons annually; coke plants at Zenica and Lukavade; 7 steel plants with 515,000 tons capacity of rolled steel and pipe; expansion of refineries.

History and Government. The scene of many historical events, the area of present-day Yugoslavia was part of the Empire of Alexander the Great, 336-323 B.C., and the Balkans divided the Roman Empire into its eastern and western parts. Serbia, which had since the Battle of Kosovo (1389), been a vassal principality of Turkey, was established as an independent kingdom by the Treaty of Berlin, July 13, 1878. After the Balkan wars its boundaries were enlarged by the annexation of Old Serbia and Macedonia, 1913. The government of Austria-Hungary lay the assassination of the Archduke-Franz Ferdinand, June 28, 1914, to a Serbian plot and by invasion brought on World War I, 1914-18.

When the Austro-Hungarian empire collapsed the Kingdom of the Serbs, Croats and Slovenes was formed from the former provinces of Croatia, Dalmatia, Bosnia, Herzegovina, Slovenia, Vojvodina and the independent state of Montenegro, with Peter I of Serbia as king. The name was later changed to Yugoslavia. Peter (d. 1921) was succeeded by his son Alexander I (assassinated at Marseilles Oct. 9, 1934), after which Prince Paul became regent until Crown Prince Peter, born Sept. 6, 1923, became of age. Germany invaded Yugoslavia, April, 1941, and King Peter II escaped to London.

A national liberation movement headed by

Joseph Broz, known as Marshal Tito, defeated the invaders, 1941-45, and suppressed dissident elements. The constituent assembly proclaimed Yugoslavia a republic Nov. 29, 1945, but the King refused to recognize it. Yugoslavia became a federated republic Jan. 31, 1946, and Marshal Tito, a Communist, became head of the government. King Peter II and his dynasty were deprived of power and property, 1947. By terms of a treaty with Italy the greater part of Venezia-Guilia, Zara, Pelagosa and adjacent islands were ceded to Yugoslavia. Yugoslavia laid claims to Trieste and was given control of a section, pending adjudication of the Free City by the major powers and U. N. An agreement between Yugoslavia and Italy was signed Oct. 5, 1954, giving Yugoslavia the southern Zone B section it had occupied, a small section of the Italian-held northern zone, and emergency access to the port of Trieste.

The Stalin policy of dictating the Communist line to all Communist nations was rejected by Marshal Tito. In June, 1948, the Communist Cominform denounced him and called on Yugoslavs to "raise from below a new internationalistic leadership." Tito disregarded the order and moved away from Kremlin influence. He accepted economic aid and military equipment from the U. S., and received aid in foreign trade also from France and Great Britain. He was given loans by the World Bank.

In May, 1955, Premier Bulganin and Party Secretary Krushchev of the Soviet Union formally apologized to Tito in Belgrade and signed an agreement for better relations, admitting the right of Yugoslavia to be independent in its policies. Tito assured the West Yugoslavia would continue to guard its own interests.

Under a revision of the constitution, adopted Jan. 13, 1953, the former Presidium, Cabinet and Ministries are replaced by the President and the Federal Executive Council, a committee of Parliament numbering about 30. The bicameral Parliament (Skupstina) consists of the Federal Council and the Council of Producers, with deputies representing the constituent republics and organized economic groups. The Federal Council also functions separately as a Council of Nationalities on proposals concerning constitutional changes or the federal economic plan. Each of the constituent republics is similarly organized. Marshal Tito was reelected President, unopposed, by Parliament to a four-year term Jan. 29, 1954.

The constitution enfranchises women, separates church and state, and lays down a number of economic principles, including the breaking up of large estates. The ballot is secret and freedom of worship is provided.

First step in a plan to assure a democratic socialistic state was government decentralization over heavy industries, Feb. 7, 1950. Others followed in 1951 and 1952, including transfer of direct control over heavy industry and other enterprises to the workers who elect their own managing staffs.

Dissolution of collective farms was begun in 1952 and only 1,258 of such cooperatives remained by end of 1953. The collective farming principle has not been abandoned, but 1953 decrees make participation voluntary. Private holdings under a law passed May 22, 1953, are limited to 10 hectares (24.7 acres).

Since 1953 foreign trade is decentralized, with trading enterprises operating independently. Social contributions (taxes) are no longer fixed in advance, but measured by actual production and profits.

Education and Religion. All education is free; elementary training is compulsory to age 14. There are universities in Belgrade, Zagreb, Ljubljana, Skopje and Sarajevo. All religions are recognized and enjoy equal rights. Serbia-Orthodox comprises 46%, Roman Catholic 36%, Moslem 11%.

Complete free social security is in force, including unemployment, medical, maternity benefits.

Defense. Army service is compulsory for men over 18. The air force is in process of reconstruction. The navy, formerly a small force comprised of torpedo boats, submarines and small craft, is being greatly increased. The country receives military aid and equipment from the United States, Great Britain and France.

Yugoslavia is a member, with Greece and Turkey, of a Balkan defense group under a treaty signed in Ankara, Turkey, Feb. 27, 1953 and a 20-year military aid pact, Aug. 9, 1954.

The Seasons

In the temperate zones, these are four in number: Spring, Summer, Autumn and Winter; beginning respectively at the Vernal Equinox, the Summer Solstice, the Autumnal Equinox and the Winter Solstice; for which, in the North Temperate zone, the approximate dates are March 21, June 21, September 23, and December 21.

In the South Temperate zone, the Vernal Equinox or the beginning of Spring is September 23, the Summer Solstice or the beginning of Summer is December 21, and so on.

The Earth's axis continually points in the same direction, and if the axis were perpendicular to the plane of the Earth's orbit around the Sun there would be no change of seasons. Day and night would everywhere be of equal length and equable conditions of temperature would prevail.

But the axis is tilted 23° 27' away from a perpendicular to the orbit, and only in March and September is the axis at right angles to the direction of the Sun.

In those months occur the equinoxes, when day and night are equal the world over.

In June, the North Pole is tilted 23° 27' toward the Sun and the days in the northern hemisphere are longer than the nights; at the same time, the

days in the southern hemisphere are shorter than the nights.

In December the North Pole is tilted 23° 27' away from the Sun, and the nights in the northern hemisphere are longer than the days; at the same time the nights in the southern hemisphere are shorter than the days.

The heating influence of the Sun increases with the length of the day and with the Sun's altitude at noon. The greatest daily accession of heat is, therefore, at the time of the Summer Solstice.

In June, in the North Temperate zone, the heat received by day far exceeds the loss through radiation by night, and it is not until July or August that the two become equal and the maximum temperature of the year is experienced.

In December, the heat received by day fails to make good the loss by night, and it is not until January or February that gain and loss become equal and the thermometer ceases to show a downward tendency.

The seasons in 1956 (Eastern Standard Time) begin as follows: Vernal Equinox (Spring), March 20, 10:21 A.M.; Summer Solstice (Summer), June 21, 5:24 A.M.; Autumnal Equinox (Autumn), September 22, 8:36 P.M.; Winter Solstice (Winter), December 21, 4:00 P.M.

Perpetual Calendar

Source: Smithsonian Institution, from Ninth Edition, Smithsonian Physical Tables, by permission.
Prepared by G. M. Clemence, U.S. Naval Observatory.

This calendar gives the day of the week for any known date from the beginning of the Christian Era down to the year 2400.

To find calendar for any year of the Christian Era, first find Dominical letter for the year in the upper section of table. Two letters are given for leap year; the first to be used for January and February, the second for other months. In the lower section of table, find column in which the Dominical letter for the year is in the same line with the month for which the calendar is desired; this column gives the days of the week that are to be used with the month.

E.g., in the table of Dominical Letters we find that the letter for 1951 is G; in the line with July, this letter occurs in the first column; hence July 4, 1951, is Wednesday.

Standard Time Calendar for U. S. Cities

(How to ascertain the same time for United States cities from Local Mean Time Calendar on the monthly calendar pages 386-399)

Directions: For New York City subtract 4 minutes from the calendar for that city and the result is in Eastern Standard Time; for other cities, use the calendar named at head of column and add or subtract the given number of minutes; this gives the required standard time, which is Eastern, Central, Mountain or Pacific, according as the letter E, C, M or P is found in the table. A small letter indicates that in case of sunrise and sunset, a correction for latitude is advisable, which correction is to be found in the table below, in the column headed by the small letter and on line with the date.

Military Time

The United States Army on July 1, 1942, adopted the 24-hour clock system, a system long in effect in the Navy and which is patterned on the English system of beginning the day at midnight and numbering the hours around the clock. Thus 8 A.M. is written as 0800 and 8:25 A.M. as 0825. Under this system 4 P.M. becomes 1600 and the time of 7:52 P.M. becomes 1952 or 19 hours and 52 minutes past midnight. Under the new system the common time standard is divorced from the local time area in the handling of messages from one time zone to another. Within time zones messages are timed according to local reckoning. For long distance messages Greenwich time is the standard.

Standard Time and Daylight Saving Time

STANDARD TIME

Standard time is reckoned from Greenwich, England, recognized as the Prime Meridian. The world is considered as being divided into 24 zones, each 15° of arc, or one hour in time apart. The meridian of Greenwich (0°) extends through the center of the initial zone, and the zones to the eastward are numbered from 1 to 12 with the prefix "minus" indicating the number of hours to be subtracted to obtain Greenwich time.

Zones westward are similarly numbered, but prefixed "plus" showing the number of hours that must be added to get Greenwich time. While these zones apply generally to sea areas, it should be noted that the standard time maintained in many countries does not coincide with zone time. A graphical representation of the zones is shown on the Standard Time Chart of the World (H.O. 5192) published by the U. S. Navy Hydrographic Office, Washington, D. C.

The United States is divided into four standard time zones, each approximately 15° of longitude in width. All places in each zone use, instead of their own local time, the time counted from the transit of the "mean sun" across the meridian which passes through the approximate center of that zone.

These time zones are designated as Eastern, Central, Mountain, and Pacific, and the time in these zones is reckoned from the 75th, 90th, 105th, and 120th meridians west of Greenwich, respectively. The time in the various zones is slower than Greenwich time by 5, 6, 7, and 8 hours, respectively.

Apalachicola, Fla. located on the boundary between the Eastern and the Central Time zones is considered as within the Eastern zone.

The following municipalities located on the boundary between the Central and the Mountain Time zones use Central Standard Time:

Murdo Mackenzie, S. D.; Phillipsburg, Kans.; Stockton, Kans.; Plainville, Kans.; Ellis, Kans. All other places on this boundary use Mountain Standard Time.

All municipalities on the boundary between the Mountain and the Pacific Time Zones use Mountain Standard Time except Huntington, Oreg., which uses Pacific Standard Time.

The adoption of Standard Time by any State has no official bearing on the time zone boundaries, as the control of these boundary lines rests with the Interstate Commerce Commission.

In 1936 the Eastern Zone limits were redrawn to include the Lower Peninsula of Michigan and all of Ohio; in 1941 to include all of Georgia; and in 1947 to add the western portions of Virginia and North Carolina and additional portions of eastern Kentucky and Tennessee. In 1949 a further extension included Hamilton and Rhea counties, Tennessee.

Effective April 30, 1950, the limits of the Mountain zone were extended to include Arizona.

Speed of Sound; Sound Barrier; Supersonic Flying

The speed of sound is generally placed at 1088 ft. per second at sea level at 32° F. It varies in other temperatures and in different media. Sound travels faster in water than in air, and even faster in iron and steel. If in air it travels a mile in 5 seconds, it does a mile under water in 1 second, and through iron in $\frac{1}{3}$ of a second. It travels through ice-cold vapor at approximately 4,708 ft. per sec., ice-cold water, 4,938; granite, 12,960; hard wood, 12,620; brick, 11,960; glass, 16,410 to 19,690; silver, 8,658; gold, 5,717.

When an airplane flies faster than the speed of sound it passes the sound barrier. At this point listeners inside the sound area hear thunderclaps, but the pilots do not hear them. The plane becomes uncontrollable until the pilot exerts control by maneuvers learned from experience. Planes

By Greenwich Time, official Alaska time is 10 hours slower; Guam, 10 hours faster; Hawaii, 10 hours slower; Panama Canal Zone, 5 hours slower; Philippines, 8 hours faster; Puerto Rico, 4 hours slower; Samoa, 11 hours slower; Virgin Islands, 4 hours slower.

Alaska time, by act of Congress in 1918 was fixed as that of the 150° meridian west, 10 hours slower than Greenwich. Actually, however, four times are used in the territory 120°W, 135°W, 150°W, 165°W, 8 hours, 9 hours, 10 hours, and 11 hours slow, respectively.

STANDARD TIME SIGNALS

Standard time signals are transmitted from the U. S. Naval Observatory through NSS (Annapolis) and over wires to various points using this service.

The National Bureau of Standards' broadcasting stations WWV (near Washington, D. C.) and WWVH at Maui, Hawaii, continuously transmit standard time signals and seconds signals of very high precision. The call letters WWV and Eastern Standard Time are given in voice every five minutes following each telegraphic code announcement, on frequencies of 2.5, 5, 10, 15, 20 and 25 megacycles. The call letters WWVH and Universal Time are given in telegraphic code every five minutes on frequencies of 5, 10 and 15 megacycles. The time announced at each station is with reference to return of the tone signal. Inquiries concerning WWV and WWVH should be addressed NBS Boulder Laboratories, Boulder, Colorado.

DAYLIGHT SAVING TIME

Daylight Saving Time means advancing the clock by one hour during the summer, in the United States, usually, from 2 a.m. on the last Sunday in April until 2 a.m. on the last Sunday in September, when the clock is turned back one hour.

During World War II Standard Time was advanced one hour, from Feb. 9, 1942 to Sept. 30, 1945. It was called War Time.

The U. S. Navy Hydrographic Office reports that Summer or Daylight Saving Time may be expected to be observed in these foreign countries:

Albania, the Azores, Barbados, Bermuda, Brazil, Canada (varies locally), Channel Is., China (varies), Cyprus, Czechoslovakia, Falkland Is., Fernando Noronha, Formosa, Friendly Is., Great Britain, Greece, Grenada, Hong Kong, Hungary, Iceland, Northern Ireland, Irish Republic, Israel, Macao, Madeira, Mexico (Northern District of Lower California only), French Morocco, Newfoundland, Nicaragua, Philippines Is., Poland, Portugal, Tangier, Trinidad, Tripolitania, Turkey.

The following countries keep Daylight Saving time during the winter: British Honduras, Dominican Republic, El Salvador, Gold Coast Colony.

that break the sound barrier often do so when diving at high speed.

When a plane hits supersonic speed, its speed is measured by the prefix Mach. Mach was the name of Ernst Mach, a Czech-born German Physicist, who contributed to the study of sound. When a plane proceeds at the speed of sound it is going at Mach 1. If it is moving at twice the speed of sound it is Mach 2. When it nears Mach and is still below it, it can designate its speed as less than Mach, such as Mach .10. At the same time the plane must register its height, since the speed of sound varies according to heights. Mach is defined in the New Military and Naval Dictionary as: "In jet propulsion, the ratio of the velocity of a rocket or a jet to the velocity of sound in the medium being considered."

Latitude and Longitude

Latitude of a place is its angular distance from the equator and is measured by an arc of the meridian between the zenith and the equator.

Longitude of a place is measured by the arc of the equator, intercepted between the prime meridian and the meridian passing through the place, or by the angle at the pole between these two meridians.

Standard Time Differences—United States Cities

Standard Time Differences—Foreign Cities

Source: U. S. Navy Hydrographic Office

By government decree or proclamation Spain, France, Netherlands, Belgium and the U.S.S.R. have advanced their time from the standard meridian by one hour throughout the year. The time indicated in table is fixed by law and is called the legal time, or, more generally, standard time.

At 12 o'clock noon Eastern Standard Time (New York City) the standard time in foreign cities is as follows:

Alexandria.	7.00 P.M.	Cape Town.	7.00 P.M.	Lisbon	5.00 P.M.	Singapore.	12.30 A.M.*
Amsterdam.	6.00 P.M.	Caracas	12.30 P.M.	Liverpool.	5.00 P.M.	Stockholm.	6.00 P.M.

State	County	Locality	State	County	Locality
United States—Kansas, Smith County, Latitude 39°50', Longitude 98°35'.			State Capital, Trenton.		
STATES			New Mexico—Torrance, 12 miles W. of S. of Willard.		
Alabama—Chilton, 12 miles southwest of Clanton.			New York—Madison, 6 miles E. of S. of Oneida.		
Arizona—Yavapai, 55 miles southeast of Prescott.			North Carolina—Chatham, 10 miles N.W. of Sanford.		
Arkansas—Pulaski, 12 miles N. of W. of Little Rock.			North Dakota—Sheridan, 5 miles S.W. of McClusky.		
California—Madera, 35 miles northeast of Madera.			Ohio—Delaware, 25 miles E. of N. of Columbus.		
Colorado—Park, 30 miles northwest of Pikes Peak.			Oklahoma—Oklahoma, 8 miles N. of Oklahoma City.		
Connecticut—Hartford, at East Berlin.			Oregon—Crook, 25 miles E. of S. of Prineville.		
Delaware—Kent, 11 miles south of Dover.			Pennsylvania—Centre, 2½ miles S.W. of Bellefonte.		
District of Columbia—Washington, near Corner of Fourth and 'L' Streets, N. W.			Rhode Island—Kent, 1 mile W. of S. of Crompton.		
Florida—Citrus Co., 12 miles W. of N. of Brooksville.			South Carolina—Richland, 13 miles S.E. of Columbia.		
Georgia—Twiggs, 18 miles southeast of Macon.			South Dakota—Hughes, 8 miles N.E. of Pierre.		
Idaho—Custer, 24 miles south of west of Challis.			Tennessee—Rutherford, 5 mi. N.E. of Murfreesboro.		
Illinois—Logan, 28 miles northeast of Springfield.			Texas—McCulloch, 15 miles northeast of Brady.		
Indiana—Boone, 14 miles W. of N. of Indianapolis.			Utah—Sanpete, 3 miles north of Manti.		
Iowa—Story, 5 miles northeast of Ames.			Vermont—Washington, 3 miles east of Roxbury.		
Kansas—Barber, 15 miles northeast of Great Bend.			Virginia—Appomattox, 11 miles S. of E. of Amherst.		
Kentucky—Marion, 3 miles W. of N. of Lebanon.			Washington—Chelan, 10 miles S. of W. of Wenatchee.		
Louisiana—Avoyelles, 3 miles S.E. of Marksville.			West Virginia—Braxton, 4 miles east of Sutton.		
Maine—Piscataquis, 18 miles north of Dover.			Wisconsin—Wood, 9 miles southeast of Marshfield.		
Maryland—Anne Arundel, 3 miles E. of Collington.			Wyoming—Freemont, 58 miles N. of E. of Lander.		
Massachusetts—Worcester, northern part of the city.			Alaska—The geographic center is difficult to determine, for the outline of the Territory is very irregular, but if the outlying islands are included in the determination it is not far from a point 95 miles south of Fort Gibbon, in latitude 63°46' longitude 152°20'.		
Minnesota—Crow Wing, 10 miles S.W. of Brainerd.			North American Continent—The geographic center is in Pierce County, North Dakota, a few miles west of Devils Lake, latitude 48°10', longitude 100°10'W.		
Mississippi—Leake, 9 miles N. of W. of Carthage.					
Missouri—Miller, 20 miles S.W. of Jefferson City.					
Montana—Fergus, 12 miles west of Lewistown.					
Nebraska—Custer, 10 miles N.W. of Broken Bow.					
Nevada—Lander, 23 miles southeast of Austin.					
New Hampshire—Belknap, 3 miles east of Ashland.					
New Jersey—Mercer, 5 miles southeast of the					

The Sun

The Sun has a diameter of 864,100 miles, and is distant, on the average, 92,900,000 miles from the earth. It is supposed to be about one-and-a-half times as dense as water. The light of the Sun reaches the earth in 498.6 seconds or slightly more than eight minutes. The average surface solar temperature has been measured by several indirect methods which agree very closely on a value of 6,000 degrees, Centigrade, or about 10,000 degrees, Fahrenheit.

When sunlight is analyzed with a spectroscope, it is found to consist of a continuous spectrum composed of all colors of the rainbow, in order, crossed by dark lines. These "absorption lines" are produced by the gaseous materials in the atmosphere of the Sun. Of these materials, almost all have been identified. More than 60 of the 92 known terrestrial elements have been identified in the Sun, all in vaporous form because of the intense heat of the Sun.

The radiating surface of the Sun is called the photosphere, and just above it is the chromosphere, which is a kind of atmosphere in a constant state of agitation as if stirred by spouting gases. The chromosphere is visible to the naked eye only at times of total solar eclipse, appearing to be a pinkish-violet layer sometimes with great flame-like masses which are called prominences projecting above its general level. With proper instruments the chromosphere can be seen or photographed whenever the Sun is visible without waiting for an eclipse. Above the chromosphere is the corona, also visible to the naked eye only at times of total

eclipse, but instruments have been developed to permit the brighter portions of the corona to be studied at certain high mountain observatories without waiting for an eclipse. Its pearly light surges, in places, as far as 1,000,000 miles or more. The corona, in the opinion of astronomers, probably always is visible at points outside the atmosphere of the earth.

While it was believed for a while that the corona might consist of materials unknown on the earth, the increasing knowledge of the composition and behavior of matter made it certain that materials in the corona would be found to be familiar, but conditions in the corona would be quite unlike those in terrestrial laboratories. In 1942, theoretical studies indicated that iron, nickel and calcium, all in a terrifically high state of excitation because of some unknown source of energy, are the principal contributors to the composition of the corona.

There is an intimate connection between Sun spots and the corona. Sun spots are dark, cloud like regions from 500 to 50,000 miles in diameter which sometimes last more than a year; the record is 18 months. It is common to find a Sun spot which persists for three weeks. They increase in number in 11-year cycles.

The Sun sends out 400,000 times as much light as the moon. We receive from the Sun more light than we receive from the star Aldebaran. Aldebaran sends out 160 times as much light as the Sun but we receive 4,000,000,000 times as much light from the Sun as we receive from Aldebaran because the Sun is so much closer than the star.

The Right Ascension of Mean Sun increases 3.943 minutes daily.

Chronological Eras, 1956

The year 1956 of the Christian era comprises the latter part of the 180th and the beginning of the 181st year of the independence of the United States of America.

The year 1956 corresponds to the year 7464-7465 of the Byzantine era; 5716-5717 of the Jewish era, the year 5717 commencing at sunset, September 5, 1956; 2709 since the foundation of Rome, according to Varro; 2732 of the Olympiads, or the fourth year of 683 Olympiad commencing July 1; 2616 of the Japanese era, and the 31st year of the period Showa; 1375-1376 of the Mohammedan era, the year 1376 commencing at sunset, August 7, 1956.

Greenwich Hour Angles, 1956

Of the Sun and the First Point of Aries
Greenwich Mean Time

To obtain the Sun's hour angle for any hour of the day, add to the tabular value for that day 15 degrees for each hour elapsed since midnight. To obtain the hour angle of the First Point of Aries for any hour of the day, add to the tabular value for that day 15 degrees, 2½ minutes for each hour elapsed since midnight.

The Moon

The Moon completes a circuit around the Earth in a period whose mean or average length is 27 days 7 hours 43.2 minutes; but in consequence of its motion in common with the Earth around the Sun, the mean duration of the lunar month—that is, the time from new moon to new moon—is 29 days 12 hours 44.05 minutes, which is called the Moon's synodical period.

The mean distance from the Earth according to the American Ephemeris is 238,857 miles. The maximum distance, however, may reach 252,710 miles, and the least distance to which the Moon can approach the earth is 221,463 miles.

Its diameter is 2,160 miles, and if we deduct from her distance from the Earth the sum of the two radii of the Earth and Moon—viz., 3,963 and

1,080 miles, respectively—we shall have for the nearest approach of the surfaces of the two bodies 216,420 miles.

The orbit's form is that of a serpentine curve, always concave toward the sun.

The Moon revolves on an axis and the time of rotation is exactly equal to the time of revolution around the Earth—27.321666 days. The Moon's revolution around the Earth is performed irregularly because of the elliptical orbit. The Moon's rotation is regular and this produces what is called "libration in longitude" which permits us to see first around the east side and then around the west side of the Moon.

The tides are caused mainly by the Moon, the tide-raising power of Moon and Sun is 11 to 5.

MOON'S PERIGEE AND APOGEE, 1956 Eastern Standard Time

Perigee, 1956				Apogee, 1956			
January	D.	H.		January	D.	H.	
January	26	8 A.M.		January	11	3 A.M.	25
February	23	1 P.M.		February	7	2 P.M.	June
March	21	7 P.M.		March	6	8 A.M.	July
April	15	5 P.M.		April	3	5 A.M.	August
May	12	8 P.M.		April	30	12 P.M.	September
June	9	10 P.M.		May	28	4 P.M.	October
							November
							December

Each month the Moon is said to be in perigee when nearest to the Earth and in apogee when farthest from the Earth.

The average time for perigee to perigee, or from apogee to apogee, is 27d. 13h. 18m. 33s; known as the anomalistic month.

Star Tables, 1956

To find the time when star is on meridian, subtract R. A. M. S. of the sun table on page 404 from the star's Right Ascension, first adding 24h to the latter, if necessary; mark this result P. M., if less than 12h, but if greater than 12h subtract 12h and mark the remainder A. M.

MORNING STARS

Mercury—Jan. 27 to April 5; May 25 to July 19;
Sept. 26 to Nov. 12.
Venus—June 22 to end of year.
Mars—Jan. 1 to Sept. 10.
Jupiter—Jan. 1 to Feb. 16; Sept. 4 to end of year.
Saturn—Jan. 1 to May 20; Nov. 26 to end of year.

EVENING STARS

Mercury—Jan. 1 to Jan. 27; April 5 to May 25;
July 19 to Sept. 26; Nov. 12 to end of year.
Venus—Jan. 1 to June 22.
Mars—Sept. 10 to end of year.
Jupiter—Feb. 16 to Sept. 4.
Saturn—May 20 to end of year.

POLAR STAR, 1956

Mean time of upper transit (at Washington) and Polar Distance of Polaris.

Date	Upper Transit	Pole Dist.	Date	Upper Transit	Pole Dist.	Date	Upper Transit	Pole Dist.
Jan. 1	H. M. S.	° ' "	May. 1	H. M. S.	° ' "	Sept. 1	H. M. S.	° ' "
Feb. 1	5 8 38 P.M.	0 56 6	June. 1	11 13 54 A.M.	0 56 25	Oct. 1	3 12 41 A.M.	0 56 29
Mar. 1	5 8 38 P.M.	0 56 6	July. 1	9 12 26 A.M.	0 56 33	Nov. 1	1 15 10 A.M.	0 56 20
Apr. 1	1 11 50 P.M.	0 56 16	Aug. 1	7 15 5 A.M.	0 56 37	Dec. 1	9 31 P.M.	0 56 8
				5 13 55 A.M.	0 56 35		11 24 P.M.	0 55 57

Upper transit of Polaris occurs, on the average, 3m. 56s. earlier each day. The interval between lower and upper transit of Polaris is 11h. 56m. 2s. At the latitude of Washington, D. C., the greatest Eastern elongation of Polaris occurs 5h. 56m. before upper transit and 6h. 2m. after lower transit, while the greatest Western elongation occurs 5h. 56m. after upper transit and 6h. 2m. before lower transit.

Radio and Optical Telescopes Used for Studying the Stars

Radio telescopes, which have been built in increasing numbers since the end of World War II, continued in 1955 to supplement the work of optical telescopes in locating stars far beyond man's reach a few decades ago.

The radio telescope picks up impulses or "echoes" from stars. It was first proposed by Karl Jansky, an American, in 1932. Radio waves come from far distances and cannot always be traced to any visible object. Sometimes the source is a nebula or a cloud of gas. The radio telescope also is useful in tracing radio emissions from known stars and for studying the auroras and phenomena of meteors.

Among new radio telescopes projected or recently built are new additions to the equipment at Jodrell Bank, Cheshire, Eng., operated by the University of Manchester, where the newest of the radio telescopes has a parabolic mirror 250 ft. in diameter, built out of steel girders and a steel sheet, and rising 300 ft. above the ground. It is capable of being rotated and tilted to any angle.

Harvard is sponsoring the largest radio telescope in the U.S., at its George Agassiz station, Harvard, Mass. It will have a 60-ft. parabolic antenna. The U.S. Naval Research Laboratory, Washington, D.C., has a 50-ft. antenna. Others are located at Cornell Univ., Ithaca, N.Y., Ohio State Univ., Columbus, O., and Maui, Hawaii. A large radio telescope has been built at Sydney, N. S. W., Australia and another on the African Gold Coast.

Other New Telescopes

A mirror telescope of the Schmidt type has been built in the workshop of the observatory at Upsala University, Upsala, Sweden, for the observatory at Canberra, Australia. It weighs 1 ton and its reflector is coated with aluminum, which has stronger reflecting qualities than silver. A smaller telescope of the same type has been constructed for Upsala and two larger ones are being built.

A Baker-reflector-corrector telescope, similar to the Schmidt but using a 24-in. parabolic mirror and taking photographs on a flat surface, is in use at the observatory of Vanderbilt Univ., Nashville, Tenn. It differs slightly from the Baker-Schmidt type, which is a revision of that devised by Bernhard Schmidt in Hamburg, Germany and adapted by Dr. James G. Baker of Lick Observatory. The first Baker-Schmidt was installed in 1950 at Harvard Station, near Bloemfontein, Orange Free State.

Kinds of Telescopes

Astronomical telescopes are of two kinds, refracting and reflecting.

In the first, the light falls upon a lens which

converges the rays to a focus, where the image may be magnified by a second lens, called the eyepiece, or may be directly photographed.

The reflector consists of a concave mirror, generally of glass coated with silver or aluminum, which throws the rays back toward the upper end of the telescope, where they fall on the eyepiece or on the photographic plate, as in the case of the refractor. In some telescopes the light is reflected again by a secondary mirror and comes to a focus either to the side or after passing through a hole in the principal mirror.

World's Largest Refractors

The largest refractors in the world are: 40-inch of the University of Chicago, at the Yerkes Observatory, William Bay, Wis. (62 feet long); 36-inch of the University of California, at the Lick Observatory, Mount Hamilton; 32½-inch, in the observatory at Meudon, France; 31½-inch, in the astrophysical observatory at Potsdam, Germany; 30-inch, at Pulkova, Russia; 30-inch, Univ. of Paris, at Nice; 28-inch, in Royal Observatory, Greenwich, England; 30-inch photographic refractor of the University of Pittsburgh; the 26-inch instruments at the U. S. Naval Observatory, Washington, and at the University of Virginia; the 27-inch refractor of the University of Michigan, at Bloemfontein, South Africa, and the 26-inch refractor of Yale University, Canberra, Australia.

World's Largest Reflectors

The largest reflector is the 200-inch, Hale Telescope, of California Institute of Technology, Palomar Mountain, 66 mi. north of San Diego, Calif. The 48-inch Schmidt telescope acts as a scouting agent for the Hale.

Other large reflectors: 82-inch, Mt. Locke, Tex., owned by the University of Texas and the University of Chicago; 74-inch, David Dunlop Observatory, University of Toronto, at Richmond Hill, 12 miles north of Toronto, Can.; 72-inch, in the Dominion Astrophysical, Victoria, B. C.; 69-inch, Ohio Wesleyan University, Delaware, O.; 100-inch, Carnegie Institution, Mt. Wilson, Calif.; 61-inch, Oak Ridge, Mass., Station of Harvard; 60-inch, Harvard Univ., in South Africa; 48½-inch, Berlin-Babelsberg, Germany; 42-inch, Lowell Observatory, Flagstaff, Ariz.; 40-inch, Naval Observatory, Washington, D. C.; 39½-inch, Hamburg University, Bergedorf, Germany; 37½-inch, Observatory of the University of Michigan, Ann Arbor; 36-inch, of the University of California, Lick Observatory, Mt. Hamilton; 36-inch, Catholic University, Santiago, Chile; 36-inch, Steward Observatory, Tucson, Ariz.; 30-inch, Agnes Scott College, Decatur, Ga.; 24-inch, Observatory of the Univ. of Michigan, near Portage Lake, Mich.

Comets and Meteors

A comet increases in brilliancy as it approaches the sun and fades rapidly as it departs. There are three parts, nucleus, coma, and tail; the nucleus is supposed to be composed of stones or particles of dust. One can see stars through comets' tails.

Donati's was the finest comet of the nineteenth century and is known as the typical comet. In October, 1858, its tail reached halfway from the horizon to the zenith. Its period is 2,000 years.

Meteoroids are celestial bodies, possibly remnants of stars or comets, that move through space at terrific velocity. Upon touching the earth's atmosphere they burn, causing meteors, or, if in quantity, meteoric showers (falling stars). Most of them are consumed but particles of fused minerals and stone often reach the earth. The largest recorded meteorite fell Feb. 17, 1930, 14 mi. sw. of Paragould, Ark., splitting into fragments of 80 to 320 lbs. A huge meteor is supposed to lie in Meteor Crater, Ariz., which is 1 mi. wide at the surface. A meteor twice this size is believed to have made Chubb (Anzaga) Crater in northern Quebec. A meteoric blast caused vast forest destruction in the vicinity of Lake Balkal, Siberia, in recent times.

Astronomical Time

Source: U. S. Naval Observatory

The accepted standard for the measurement of time is the rate of rotation of the Earth on its axis. This rotation causes the stars to appear to cross the sky from east to west, in the same manner as the Sun.

Even if the Earth did not rotate at all on its own axis, the Sun would rise and set once during the year because of the Earth's journey around it.

The stars are not within the Earth's orbit. They are so far distant that their apparent positions are only very slightly affected by the Earth's orbital motion.

The positions of the stars are commonly reckoned from a point in the sky known as the Vernal Equinox. That point moves very slowly among the stars.

The period of the Earth's rotation measured with respect to the Vernal Equinox is called a sidereal day, or apparent equinoctial day.

The period measured with respect to the Sun is called an apparent solar day.

The apparent solar and sidereal days are of variable length.

The longest apparent solar day occurs about Dec. 23, and it exceeds the average day in length by approximately 30 seconds. In order to overcome this variation, mean time has been devised.

Mean solar time, which is universally used in ordinary life, is sometimes ahead of and sometimes behind apparent solar time, the two being the same only four times in a year. The difference between these two kinds of time is called the equation of time. Its maximum value is a little over 16 minutes.

The difference between mean equinoctial and apparent equinoctial or sidereal time is due to nutation. Its greatest value is only a little over a second, and its greatest daily change is a little more than a hundredth of a second.

The Calendar Year begins at the stroke of 12 on the night of Dec. 31. The solar day and the calendar month also begin at midnight. The interval during which the Earth makes one absolute revolution round the Sun is called a Sidereal Year, and consists of 365 days, 6 hours, 9 minutes and 9.5 seconds of mean solar time.

The Tropical Year, on which the return of the seasons depends, is the interval between two consecutive returns of the Sun to the Vernal Equinox.

The Tropical Year consists of 365 days, 5 hours, 48 minutes and 46 seconds. The Tropical Year is not of uniform length; it is now slowly decreasing at the rate of .530 second per century, but this variation will not always continue.

Astronomical Constants

MEAN solar parallax, 8".80. Nutation constant, 9".21.

Aberration constant, 20".47. Annual precession, 50".2564 + 0".000222 (t-1900).

Obliquity of the ecliptic, 23° 27' 8".26 - 0".4684 (t-1900).

Annual diminution of obliquity, 0".4684.

Moon's equatorial horizontal parallax, 57' 2".70.

Moon's mean distance from the earth (center to center), 239,857 miles.

Sun's mean distance from the earth (astronomical unit), 92,897,136 miles.

Velocity of light, 186,324 miles per second.

Light travels unit of distance—viz. 92,897,416 miles in 498.5800 seconds.

Length of the Year—Tropical (equinox to equinox) 365.2421988 days. Sidereal or absolute revolution, 365.2563604 days. Anomalistic (from peri-

helion to perihelion), 365.2598413 days.

Length of Day—Mean Sidereal, 23 hours 56 minutes 4.991 seconds (mean solar time). Mean solar, 24 hours 3 minutes 56.555 seconds (mean sidereal time).

Length of the Month—Synodical (from new moon to new moon), 29 days 12 hours 44 minutes 2.8 seconds. Tropical, 27 days 7 hours 43 minutes 4.7 seconds. Sidereal (absolute revolution), 27 days 7 hours 43 minutes 11.5 seconds. Anomalistic (from perigee to perigee), 27 days 13 hours 18 minutes 33.1 seconds.

Dimensions of the Earth—Equatorial radius, 3,963.34 miles; equatorial diameter, 7,926.677 miles; equatorial circumference, 24,902 miles. Polar radius, 3,949.99 miles; polar diameter, 7,899.998 miles; meridional circumference, 24,860 miles. Eccentricity of the oblate spheroid, 0.0819981.

Astronomical Signs and Symbols

☉	The Sun.	♁	The Earth.	♅	Uranus.	◻	Quadrature.
☾	The Moon.	♂	Mars.	♆	Neptune.	♂	Opposition.
☿	Mercury.	♂	Jupiter.	♇	Pluto.	♂	Ascending Node.
♀	Venus.	♄	Saturn.	♊	Conjunction.	♋	Descending Node.

Two heavenly bodies are in "conjunction" (♊) when they have the same Right Ascension, or are on the same meridian, i. e., when one is due north or south of the other; if the bodies are near each other as seen from the earth, they will rise and set at the same time; they are in "opposition" (♋) when in opposite quarters of the heavens, or when one rises as the other is setting. "Quadrature" (♌) is half way between conjunction and opposition. By "greatest elongation" is meant the

greatest apparent angular distance from the sun, the planet is then generally most favorably situated for observation. Mercury can be seen with the naked eye only at this time. When a planet is in its "ascending" (♌) or "descending" (♋) node it is passing through the plane of the earth's orbit. The term "Perihelion" means nearest to the sun, and "Aphelion" farthest from the sun. An "occultation" of a planet or star is an eclipse of it by some other body, usually the moon.

*At mean distance.

The planet Pluto was an object of search for many years in accordance with predictions made by Dr. Percival Lowell, founder and director of the Lowell Observatory, Flagstaff, Arizona. It was finally located by C. W. Tombaugh of that observatory and public announcement made on March 13, 1930. Its mass, according to a recent determination by new methods, is about 0.83 of the mass of the earth. Its average distance from the Sun is about 3,700,000,000 miles. Perihelion will occur in 1989 and Aphelion in 2114. It lies in the constellation of Leo. On January 1, 1956 its predicted position in the sky will be 10 hours 18 minutes in Right Ascension and 22 degrees 11 minutes in North Declination.

Greenwich Meridian and Date Line

Source: U. S. Navy Hydrographic Office

In 1884, the International Meridian Conference, held at Washington, D. C., established the meridian passing through Greenwich, England, as the prime meridian from which time was to be counted or reckoned. Inasmuch as there was no formal agreement entered into by the nations attending, as to an International Date Line, as such, the line delineating the change from American to Asiatic time is designated simply as the Date Line.

The 180th meridian, because it is midway around the earth from the prime meridian and passes generally through ocean areas, became the logical selection for a Date Line. The line deviates somewhat from the 180th meridian to include islands of the same group in the time zone having the same date. The Date Line is defined as follows:

Starting at the North Pole it extends southward on the 180th meridian to 75°N.; thence southeastward to 68°N. and the longitude of the meridian passing between the Diomed Islands (approx. 168° 58' 22"W.); thence due south through Bering Strait to 65° 30'N.; thence southwestward to 53°N., 170°E.; thence southeastward to 48°N. and the

180th meridian; then due south to 5°S., thence southeastward to 15°S., 172° 30'W.; thence due south to 45° 00'S., 172° 30'W.; thence southwestward to 51°S. and the 180th meridian; thence due south to the South Pole.

When crossing this line in a westerly direction the date must be advanced 1 day, and when crossing in an easterly direction, the date must be set back 1 day.

The line is so bent that it passes through Bering Strait with Asia to the West and Alaska to the East, then bends west so as to leave all the Aleutian Islands on the East. The line turning east again follows the 180° meridian until 5° below the equator, where it bends to the east toward the Samoan Islands which are left to the east and away from the Fiji Islands to the west. It continues south on the meridian of 172° 30' W., east of Tonga Islands and New Zealand, to 45° 00' S., thence the line continues southwesterly to the 180th meridian at 51° 00' S., thence southerly on the 180th meridian to the Pole.

Eclipses in 1956

FOUR ECLIPSES DUE

Two of Sun, Two of Moon

In the year 1956 there will be four eclipses, two of the Sun and two of the Moon.

I. A Partial Eclipse of the Moon, May 24, 1956, not visible in the United States. The beginning is visible generally in Asia except the western part, the Aleutian Islands, the Pacific Ocean except the eastern part, Australia, the Indian Ocean and the Antarctic regions. The ending is visible generally in Africa except the northwestern part, Asia Minor except the extreme northwestern part, southeastern Russia, Asia except the northern coast, the Indian Ocean, Australia, the western Pacific Ocean and the Antarctic regions.

CIRCUMSTANCES OF THE ECLIPSE

Greenwich Mean Time

	d.	h.	m.
Moon enters penumbra.....	May 24	12 35.3	p.m.
Moon enters umbra.....	May 24	1 48.7	p.m.
Middle of the eclipse.....	May 24	3 31.3	p.m.
Moon leaves umbra.....	May 24	5 13.8	p.m.
Moon leaves penumbra.....	May 24	6 27.3	p.m.
The Magnitude of the Eclipse is 0.970 of the Moon's diameter.			

II. A Total Eclipse of the Sun, not visible in the United States. It will be seen as a partial eclipse soon after sunrise in the northern and southern islands of New Zealand. The path of totality is entirely over the Pacific Ocean.

CIRCUMSTANCES OF THE ECLIPSE

Local Mean Time

All times are A.M.

Place	Beginning	Middle	Ending	Magnitude
	h.	h.	h.	
Tutuila, Samoa	8.23	9.14	10.05	0.23

III. A Total Eclipse of the Moon, November 17-18, 1956, visible in the United States. The beginning is visible generally in North America, South America, the Atlantic Ocean except the southeastern part, Europe except southeastern Russia, northwestern Africa, the Arctic regions, northern coast of Asia and the eastern part of the Pacific Ocean. The ending is visible generally in North America, South America except the eastern coast, the western part of the Atlantic Ocean, the Arctic regions, northeastern Asia, the extreme northeastern coast of Australia and the Pacific Ocean.

CIRCUMSTANCES OF THE ECLIPSE

Eastern Standard Time

	d.	h.	m.
Moon enters penumbra.....	November 17	10 59.9	p.m.
Moon enters umbra.....	November 18	12 2.6	a.m.
Total eclipse begins.....	November 18	1 8.0	a.m.
Middle of the eclipse.....	November 18	1 47.6	a.m.
Total eclipse ends.....	November 18	2 27.3	a.m.
Moon leaves umbra.....	November 18	3 32.7	a.m.
Moon leaves penumbra.....	November 18	4 35.3	a.m.
The Magnitude of the Eclipse is 1.323 of the Moon's diameter.			

IV. A partial Eclipse of the Sun, December 2, 1956, not visible in the United States. It will be visible generally in eastern Europe, the Mediterranean, the Red Sea, Asia Minor and most of Asia except southern India, Indo-China and south China.

CIRCUMSTANCES OF THE ECLIPSE

Greenwich Mean Time

	d.	h.	m.
Eclipse begins.....	December 2	5 51.6	a.m.
Middle of the eclipse.....	December 2	8 0.0	a.m.
Eclipse ends.....	December 2	10 8.5	a.m.
The Magnitude of greatest eclipse is 0.805 of the Sun's diameter.			

Days Between Two Dates

The table applies to ordinary years only. For leap year, one day must be added after Feb. 28.

Day Mo.	Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
1	1	32	60	91	121	152	182	213	244	274	305	335

The Zodiac

The Sun's apparent yearly path among the stars is known as the ecliptic. The zone 16° wide, 8° on each side of the ecliptic, is known as the zodiac. Beginning at the point on the ecliptic which marks the position of the Sun at the vernal equinox, and thence proceeding eastward, the zodiac is divided into twelve signs of 30° each, as shown herewith.

These signs are named from the twelve constellations of the zodiac with which the signs coincided

Spring Signs.	1. ♈ Aries. The Ram.
	2. ♉ Taurus. The Bull.
	3. ♊ Gemini. The Twins.
Summer Signs.	4. ♋ Cancer. The Crab.
	5. ♌ Leo. The Lion.
	6. ♍ Virgo. The Virgin.

in the time of the astronomer Hipparchus, about 2,000 years ago. Owing to the precession of the equinoxes, that is to say, to the retrograde motion of the equinoxes along the ecliptic, each sign in the zodiac has, in the course of 2,000 years, moved about 30° into the constellation west of it; so that the sign Aries is now in the constellation Pisces, and so on. The signs of the zodiac with their Latin and English names are as follows:

Autumn Signs.	7. ♎ Libra. The Balance.
	8. ♏ Scorpius. The Scorpion.
	9. ♐ Sagittarius. The Archer.
Winter Signs.	10. ♑ Capricornus. The Goat.
	11. ♒ Aquarius. The Water-Bearer.
	12. ♒ Pisces. The Fishes.

Visibility at Sea

Source: United States Coast Guard

The following tables give the approximate geographic range of visibility for an object which may be seen by an observer whose eye is at sea or lake level. In practice, therefore, it is necessary to add to these a distance of visibility corresponding to the height of the observer's eye above sea or lake level.

DISTANCES OF VISIBILITY FOR OBJECTS OF VARIOUS ELEVATIONS ABOVE SEA LEVEL

Height, Feet	Nautical Miles	Height, Feet	Nautical Miles	Height, Feet	Nautical Miles	Height, Feet	Nautical Miles
5	2.5	55	8.5	110	12.0	450	24.3
10	3.6	60	8.9	120	12.6	500	25.6
15	4.4	65	9.2	130	13.1	550	26.8
20	5.1	70	9.6	140	13.6	600	28.0
25	5.7	75	9.9	150	14.1	650	29.1
30	6.3	80	10.3	200	16.2	700	30.3
35	6.8	85	10.6	250	18.2	800	32.4
40	7.2	90	10.9	300	19.9	900	34.4
45	7.7	95	11.2	350	21.5	1,000	36.2
50	8.1	100	11.5	400	22.9		

DISTANCES OF VISIBILITY FOR OBJECTS OF VARIOUS ELEVATIONS ABOVE LAKE LEVEL

Height, Feet	Statute Miles	Height, Feet	Statute Miles	Height, Feet	Statute Miles	Height, Feet	Statute Miles
5	2.9	55	9.8	110	13.8	450	28.0
10	4.2	60	10.2	120	14.5	500	29.5
15	5.1	65	10.6	130	15.1	550	31.0
20	5.9	70	11.0	140	15.6	600	32.3
25	6.6	75	11.4	150	16.2	650	33.7
30	7.2	80	11.8	200	18.7	700	34.9
35	7.8	85	12.2	250	20.9	800	37.3
40	8.3	90	12.5	300	22.9	900	39.6
45	8.9	95	12.9	350	24.7	1,000	41.7
50	9.3	100	13.2	400	26.4		

Roughly, the distance of visibility in nautical miles is equal to eight-sevenths of the square root of the height of the light above sea level.

The actual curvature of the surface of the earth for the first mile is about 9 inches, and increases at first approximately as the square of the distance. The approximate curvature effect may be found by multiplying the square of the distance in miles by .6, the answer being in feet.

CANDLE-POWER OF BRIGHTEST UNITED STATES LIGHTHOUSES

Station	C.P.	Station	C.P.	Station	C.P.
Hillsboro Inlet, Fla.	5,500,000	Windward Point, Cuba	500,000	Craighill Chan. Range,	250,000

Cape Charles, Va.	700,000	Cape May, N. J.	300,000	Cape Spencer, Alaska	200,000
Whitfish Pt., Mich.	700,000	Columbia River Range		Cp. Hinchinbrook, Alas.	200,000
Marcus Hk Range, Del.	600,000	Lights, Wash.	300,000	Manhattan Range, Ohio.	200,000
30-Mile Point, N. Y.	600,000	Stratford Pt., Conn.	300,000	Point Loma, Calif.	200,000
Anacapa Isl., Calif.	600,000	Cape Arago, Ore.	250,000	Mt. Desert, Me.	200,000
Kauhoia Point, Hawaii	560,000	North Head, Wash.	250,000	Cape San Blas, Fla.	200,000
Pauwela Pt. Hawaii	500,000	Cape Hatteras, N. C.	250,000	Brazos River, Texas.	200,000

The Fire Island (N. Y.) Light is 167 feet high; visible 19.3 nautical miles; distance based on observer's eye being 15 feet above sea level.

The luminous range of the light to an aircraft or any object at a height not affected by the curvature of the earth is about 30 miles with clear visibility. Electricity is the illuminant now used in most of the larger lighthouses, electric incandescent lamps placed inside the larger sizes of lenses producing beams of as much as 5,500,000 candlepower where such brilliance is required.

The highest light maintained by the U. S. Coast Guard is on top of the island of Lohua, Hawaiian Islands; 709 feet above sea level.

The highest light on the Pacific coast of continental United States is South Point Light on Santa Rosa Island, Calif., 530 feet above sea level.

The highest light on the Atlantic coast of continental United States is the rear range light of Marcus Hook Range, on the Delaware River, 278 feet above the level of the sea.

Knots and Miles

Source: United States Coast and Geodetic Survey

A Knot is a measure of speed, one knot being a speed of one nautical mile an hour.

The U. S. Statute Mile is 5,280 feet. In Europe, the old miles, which varied in length from about 3,300 feet to over 36,000 feet, have been mostly replaced, officially at least, by the kilometer, which equals 0.6214 statute mile or 3,280.8 feet.

The International Nautical Mile is 1,852 meters or 6,076.10 feet.

The International Nautical Mile was adopted for official use by agencies of the U. S. Government on July 1, 1954.

International Nautical Mile—1.150777 statute miles; a fathom—6 feet; a cable—100 fathoms or 600 feet or approximately 0.1 nautical mile.

To convert statute miles into international nautical miles multiply statute miles by 0.868978; to convert international nautical miles into statute miles multiply nautical miles by 1.150777 or roughly 1 1/7.

A Nautical, Geographic, or Sea Mile at any place is considered, for purposes of navigation, to be equal to the length of one minute of latitude at that place.

The Weather Bureau

Source: Weather Bureau, United States Department of Commerce

A national weather service was established 1870, under the Army Signal Corps. The present Weather Bureau, formed in the Department of Agriculture, took over the meteorological work of the Signal Corps, July 1, 1891. Subsequent legislation and executive decisions extended the Bureau's responsibilities in the fields of weather and climate until its service now applies to civil aeronautics and other modern fields as well as to general agricultural, commercial, industrial, and transportation interests. The Fourth Plan of Government Reorganization, 1940, transferred it from Agriculture to the Department of Commerce.

The Weather Bureau is authorized to carry on research into the causes of weather and climate because of their vital influence on the national welfare. Through a Joint Meteorological Committee in Washington, it maintains close liaison with the Air Force, the Army, and the Navy to coordinate military and civil meteorological operations. It also cooperates closely with the Civil Aeronautics Administration.

The Central Office of the Weather Bureau is in Washington, D. C. For administrative purposes, the United States (including Alaska) is divided into five regions, each with a regional office. On the operational plane, state forecasts and much of the general public service of the Bureau originate in 21 forecast centers throughout the country. These forecast centers aid approximately 300 local offices, which have the most direct contact with the public in discharging their functions.

General Public Service

The General Public Service provides daily bulletins and forecasts for business, commerce, industry, and the general public. These forecasts are published in practically all daily newspapers and broadcast from most radio and television stations daily. The automatic telephone forecast repeater, installed in ten cities, is a popular service.

Aviation Weather Service

Twenty-six Flight Advisory Weather Service (FAWS) Centers issue every 6 hours regional forecasts covering the entire country and some 350 terminal forecasts for the most important airports. These forecasts, which are transmitted over national teletypewriter circuits, provide invaluable weather information for pilots and other aviation interests. As a further aid to safety in the air, these FAWS centers maintain continuous watch on current weather developments in their areas and keep their associated air traffic control centers (operated by the Civil Aeronautics Administration) advised of significant developments for relay to aircraft in flight. Similar forecast service is provided for the Hawaiian Islands by the Center at Honolulu and for Alaska by a center located in Anchorage. Local preflight briefing service is provided by Weather Bureau stations at some 210 airports throughout the country. The Bureau also provides weather advices and forecasts for transoceanic flight operations.

Crop Weather Service

The Corn and Wheat Crop Weather Service and the Cotton Crop Weather Service, organized by state divisions in the principal crop areas, furnish special weather bulletins to growers during the crop season.

Special Services

The Fruit-Frost Service provides detailed and localized forecasts and warnings to fruit growers on a cooperative basis in those states where winter and spring fruit and vegetable production is a major activity. The Fire-Weather Warning Service warns against atmospheric conditions conducive to disastrous fires in the forest areas of the nation. The Hurricane Warning Service prepares its highly important advisories and warnings at special hurricane forecast centers along the nation's coasts.

Climatological Service

The Climatological Service, which covers the United States, Alaska, Hawaii, Puerto Rico, and the oceans, is headed by the Climatological Services Division in Washington. In the field an area climatologist is responsible for applications of climatology to problems of the national economy in his geographical area. This work is supported in each state by state climatologists who (a) direct liaison with state interests and (b) carry out certain state responsibilities such as those of Crop-Weather Services and severe storm investigation. The work depends basically on observations taken at about 11,000 substations (mostly manned by unpaid cooperative observers) and about 300 regular Weather Bureau stations. Three data monitoring centers receive and process, by modern tabulating methods, the original climatological observations of all substations and regular stations, and publish periodical summaries of data. The repository for American weather records and facilities for large-scale tabulation are maintained in the National Weather Records Center, Asheville, N. C.

River and Flood Service

The River and Flood Forecasting Service is conducted through 85 river district offices and six river forecasting centers and issues river stage and flood warnings for all the principal rivers and tributaries of the United States. Rainfall studies conducted in cooperation with the Army Corps of Engineers and of the Department of Agriculture assist in the planning of engineering works for flood control and navigation, as well as for water utilization and power development.

Research and Development

The Weather Bureau conducts scientific investigations pertaining to the problems of its meteorological services. This research is aimed at increasing the accuracy and time scope of forecasts of weather, storms, and floods and the development and application of modern meteorological science in the technical work of the Bureau.

The Atmosphere

Source: Weather Bureau, United States Department of Commerce

The atmosphere is composed of a mixture of gases which envelop the Earth. The permanent gases near the surface of the Earth are mainly nitrogen, oxygen, and argon, which are present in the amounts of approximately 78, 21, and 1 per cent by volume, respectively. Other constituents, amounting to less than one-tenth of one per cent, are carbon dioxide, hydrogen, neon, helium, krypton, and xenon. These proportions remain approximately the same up to about 180,000 feet, above which there may be a slight decrease of heavier gases relative to the lighter gases. There is always a small amount of water vapor in the air. It occupies space independently of the other gases and varies in amount from practically zero to an extreme of about 4 per cent by volume. Ozone appears in very small quantities at low levels, increases to a maximum at about 65,000 feet, and then diminishes with height; small amounts of ozone have been observed by rocket at an altitude of about 230,000 feet. Recent spectroscopic evidence also indicates the presence of small amounts of methane and nitrogen-oxygen compounds in the atmosphere.

The attraction of gravity prevents all except the lightest gases from escaping into space. The air rests upon the Earth's surface with the weight equivalent to a layer of water 34 feet deep. In other words, at the bottom of the atmosphere the mixture of gases exerts a pressure of about 15 pounds per square inch. This pressure is exerted equally in all directions.

Air, of course, is easily compressed. The density, therefore, is greatest near the surface of the Earth because the air is compressed by the weight of all the air that lies above. At sea level the density is only about one eight-hundredth that of water; it follows, then, that the atmosphere would be 800 times 34 feet, in depth, or about 5 miles, if it were of the same density at all altitudes. Actually, however, the density decreases as the height increases because the weight of the air that lies above decreases.

The temperature of the air, except in some regions near the surface of the Earth, normally decreases with increasing height until a level called the tropopause is reached. The portion of the atmosphere below the tropopause is known as the troposphere, and that for several miles above the tropopause, as the stratosphere.

The height of the tropopause, at any one place, varies from day to day and is often observed as a multiple boundary; on the average it is higher at lower latitude and higher in Summer than in Winter, and its range is from 25,000 to 60,000 feet, approximately. From the tropopause to about 150 thousand feet, the average temperature at any given place increases with height; near the bottom of this layer the temperature is estimated to range seasonally and latitudinally from about -55 degrees Fahrenheit to -115 degrees Fahrenheit; near the top of this layer, the temperature goes above +90° F at times.

Normally, highs that follow lows bring clearing weather, while lows that follow highs cause unsettled weather.

Although highs and lows sometimes remain stationary or even retrograde, they usually move across the country from a westerly quarter, passing off to the northeast. The average speed of lows ranges from 477 to 718 miles a day, of highs from 485 to 594 miles a day; the higher speeds governing in Winter, lower in Summer.

Weather Bureau Warnings

Small Craft—A red pennant indicates moderately strong winds that will interfere with the safe operation of small craft are expected. Small craft warnings usually are not displayed at night.

Northeast Storm—A red pennant above a square red flag with black centre displayed by day, or two red lanterns, one above the other, at night, indicates the approach of a storm of marked violence with winds beginning from the northeast.

Southeast Storm—A red pennant below a square red flag with black centre displayed by day, or one red lantern at night, indicates the approach of a storm of marked violence with winds beginning from the southeast.

Southwest Storm—A white pennant below a square red flag with black centre displayed by

day, or a white lantern below a red lantern at night, indicates the approach of a storm of marked violence with winds beginning from the southwest.

Northwest Storm—A white pennant above a square red flag with black centre displayed by day, or a white lantern above a red lantern at night, indicates the approach of a storm of marked violence with winds beginning from the northwest.

Hurricane, or Whole Gale—Two square flags, red with black centres, one above the other, displayed by day, or two red lanterns, with a white lantern between, at night, indicate the approach of a tropical hurricane, or of one of the extremely severe and dangerous storms which occasionally occur.

LOCAL INDICATIONS OF WEATHER TRENDS (Adapted for use with aneroid barometers)

Barometer	Wind from	Weather Indicated
High and steady	SW to NW	Fair and little temperature change for one or two days.
High and rising rapidly	SW to NW	Fair followed by rain within two days.
Very high, falling slowly	SW to NW	Fair and slowly rising temperature for two days.
High and falling rapidly	S to SE	Rain within 24 hours.
High and falling rapidly	S to SE	Increasing wind with rain in 12 to 24 hours
High and falling rapidly	SE to NE	Rain in 12 to 18 hours.
High and falling rapidly	SE to NE	Increasing wind with rain in 12 hours.
High and falling slowly	E to NE	Summer—light winds, fair. Winter—rain in 24 hours.
High and falling rapidly	E to NE	Summer—rain in 12 to 24 hours.
Low and falling slowly	SE to NE	Winter—rain or snow and increasing winds.
Low and falling rapidly	SE to NE	Rain will continue one or two days.
Low and rising slowly	S to SW	Rain and high wind; clearing and cooler in 36 hours.
Low and falling rapidly	S to E	Clearing soon and fair several days.
Low and falling rapidly	E to N	Severe storm soon, clearing and cooler in 24 hours.
Low and rising rapidly	Going to W	Northeast gales with heavy rain or snow, followed in winter by cold wave.
		Clearing and colder.

Winds, Their Force and Official Designations

Designation	Miles per hour	Designation	Miles per hour	Designation	Miles per hour	Designation	Miles per hour
Calm	Less than 1	Gentle	8 to 12	Strong	25 to 38	Whole gale	55 to 72
Very light	1 to 3	Moderate	13 to 18	Gale	39 to 54	Hurricane	Above 72
Light	4 to 7	Fresh	19 to 24				

Cyclone—System of winds circulating about a center of low barometric pressure. The winds blow spirally inward toward the center and the whole system may travel at the rate of 20 miles per hour or more. The direction in equatorial latitudes is from west to east, in a cyclone in the Northern Hemisphere the wind rotates around the center in a direction opposite the hands of a clock.

Tornado—Violent rotary storm of small diameter which leaves devastation along a path seldom more than a few hundred yards in width and of 10 to 40 miles in length. The tornado is accompanied by a funnel shaped cloud around which the winds revolve spirally upward in a direction usually opposite to the hands of a clock. The wind speed

within a tornado has not been measured, but some estimates place it as high as 500 miles per hour. Tornado funnels sometimes rise and fall, which accounts for whole sections unscathed along a path of demolished buildings and uprooted trees.

Hurricane—A tropical cyclone, accompanied by low barometric pressure and high winds which sometimes attain a velocity of 100 miles an hour or more. The winds take the form of a circle or oval shaped area, sometimes as much as 300 miles in diameter. Hurricanes usually move toward the west or northwest at 10 to 15 mph. When the center approaches 25° to 30° N. Lat., direction of motion changes to northeast with increased speed. The use of women's names to designate hurricanes has dramatized them in popular imagination.

Normal Temperatures, Highs, Lows; Precipitation

Source: Weather Bureau, United States Department of Commerce

These normals are based on records for the thirty-year period 1921 to 1950 inclusive.

Extreme temperatures are based on the period of record through 1954.

Stations are city office stations. "AP" after the city indicates "airport station."

The minus (—) sign indicates temperatures below zero. Fahrenheit thermometer registration.

—Closed May 31, 1953, moved to Minneapolis.

Annual Snowfall (Inches)—Denver, Colo., 56.2; Eastport, Maine, 71.0; Boston, Mass., 42.3; Detroit, Mich., 39.4; Sault Ste. Marie, Mich., 83.4; Minneapolis, Minn., 42.4; Helena, Mont., 54.1; Albany, N. Y., 50.3; Rochester, N. Y., 74.4; Cleveland, O., 42.2; Salt Lake City, Utah (airport), 55.1; Burlington, Vt., 64.7; Cheyenne, Wyo., 56.6; Juneau, Alaska (airport), 80.5.

Highest Temperature—The National Geographic Society notes the highest temperature ever recorded under standard conditions was taken on Sept. 13, 1922 in northwestern Libya, about 25 miles south of Tripoli, the thermometer soared to 136.4 degrees.

Lowest Temperature—A reading still recognized as the world's record for sub-freezing temperatures was taken in February 1892 in the northern Siberian village of Verkhoyansk, the thermometer there hit 90 degrees below zero.

The lowest official temperature on the North American continent was recorded at 81 degrees below zero in February, 1947, at a lonely airport in the Yukon called Snag.

These are the meteorological champions—the official temperature extremes—but there are plenty of other claimants to thermometer fame. However, sun readings are unofficial records, since meteorological data to qualify officially must be taken on instruments in sheltered and ventilated locations.

Absolute Zero—Absolute Temperature

Absolute zero—the point at which, theoretically, all molecular motion ceases—exists at 459.6 degrees below the Fahrenheit and 273.15 degrees below the Centigrade zero points. This is the beginning of what is known in dynamic meteorology as Absolute

Temperature, as determined by observation of the contraction of gases when cooled, and from thermo-dynamical considerations.

A temperature 0.8 degrees, Centigrade, from the absolute zero was reached in 1921 in the physical laboratory of the University of Leyden.

Monthly Normal Temperature and Precipitation

Table of Magnetic Declination

Specially prepared for the WORLD ALMANAC in the office of the Coast and Geodetic Survey. Further information may be obtained by addressing the Director, U. S. Coast and Geodetic Survey, Washington 25, D. C.

Values observed at selected points, reduced to January 1955; also the annual change. A plus (+) sign to the annual change denotes increasing declination, and a minus (—) sign the reverse.

Changes in the Weather and its Effect on Human Beings

Source: Our American Weather, by Dr. George H. T. Kimble, published by McGraw-Hill Book Co.

The weather is getting warmer. During the past 100 years there has been an increase in the annual temperature of at least 2° around the shore of the North Atlantic, and up to 10° in other places. If this change were to continue, it would mean that in 100 years a great many of our habits would be affected.

The northern margins of the main crop belts of Eastern North America have been advancing during the past 30-40 years. Cotton is now being experimented with in Ontario. Barley has become an Iceland crop, and sheep raising a source of livelihood for Greenlanders. There also have

been similar shifts in forest belts. White birch is dying because it needs frozen ground. Birds are nesting farther north, too, staying longer in the winter.

There is a tendency for more people to die when the thermometer takes a sharp upward turn and this is not confined to the summer season. Even in winter about 10% more people died in the New York region following a two day rise of temperature on the order of 15° than on days with a corresponding drop in temperature. Even in the severest cold spells, the life expectation of New Yorkers was greater than in the most pronounced mild spells.

The Meaning of "One Inch of Rain"

An acre of ground contains 43,560 square feet. Consequently, a rainfall of 1 inch over 1 acre of ground would mean a total of 6,272,640 cubic inches of water. This is equivalent to 3,630 cubic feet. As a cubic foot of pure water weighs about 62.4 pounds, the exact amount varying with the density, it follows that the weight of a uniform coating of 1 inch of rain over 1 acre of surface would be 226,512 pounds, or 113¼ short tons.

8,345 pounds. Consequently a rainfall of 1 inch over 1 acre of ground would mean 27,143 gallons of water. This is equivalent to 603 barrels of 45 gallons each.

A rainfall of 1 inch on a roof of 3,000 square feet would mean 432,000 cubic inches, or 250 cubic feet, available for the cistern. This is equal to 1,870 U. S. gallons, or 41.5 barrels of 45 gallons each.

Ten inches of snow equals in water content, on the average, about one inch of rain.

Daily Maximum and Minimum Temperature at New York, 1954

The heaviest snowfall in New York City's history buried the city Dec. 26-27, 1947. Between 3:20 a.m. Dec. 26 and 3:05 a.m. Dec. 27, 25.8 inches of snow fell, or 4.9 inches more than during the blizzard of 1888, which began at 12:10 a.m. March 12 and ended 2:30 p.m. March 14. But the 1947 snowstorm was not classified as a blizzard by the Weather Bureau.

The snowfall for the 1947-48 season was the next to heaviest in the records of the New York Weather Bureau. Between Dec. 10, 1947, and March 11, 1948, 61.5 inches fell. The all-time record was set in the 1892-93 season when 77.6 inches fell.

New York City Tide Tables, 1956

Source: U. S. Coast and Geodetic Survey; Eastern Standard Time; observations made at The Battery, Time meridian 75° W. The hours of the day are numbered consecutively from 0^h (midnight) to 23^h (11:00 p.m.). 12^h is noon. All hours greater than 12 are in the afternoon (p.m.).

Heights are reckoned from the datum of soundings on charts of the locality which is mean low water.

Tide is the rising and falling of the sea and is rightly attributed to the attractive influence of the moon, modified by a similar influence of the sun, which is less in influence because of the distance from the attracting body. Tides at most places occur twice each day, becoming each day later by half an hour to an hour and a half. Tides do not always rise to the same height. At new and full moon the range is increased (spring tides) while at the moon's quadrature the range is decreased (neap tides). The rise and fall of the tides is also increased when the moon is in perigee (nearest the earth) and decreased when the moon is in apogee (farthest from the earth).

Time of Tides at Points on the Atlantic Coast

At New Orleans, the periodic rise and fall of the tide varies with the stage of the Mississippi River, being about 10 inches at low river stage and zero at high river stage. The greatest tides in the world are reported in the Bay of Fundy, between Nova Scotia and New Brunswick, where, under a combination of certain astronomical conditions, it is possible for the tide in Minas Basin to rise 53½ feet from low water. The mean range at Calais, Maine, is 20 feet but a range in excess of 23 feet can be expected each month.

ART GALLERIES, LIBRARIES, MUSEUMS

Classified under Regions. Consult also Washington, D. C., and New York City.

NEW ENGLAND

Atheneum, Hartford

Wadsworth Atheneum, 25 Atheneum Sq., N., Hartford, Conn., established 1844, comprises Colt, Morgan and Avery Memorial buildings of 50 galleries illustrating arts of Europe and America; containing J. P. Morgan collection of antique bronzes, porcelain, silver; Wallace Nutting collection of early American furniture; painting from 1300 A.D. to today; tapestries, arms, armor; period rooms; early Central and South American art; ship models; Lifar collection of ballet design and costume; S. P. Avery collection of oriental porcelain and modern bronzes; old master and modern drawings; religious arts of the Middle Ages and Renaissance. The Atheneum maintains a reference library, lectures, art classes and publishes the Bulletin and catalogues of exhibitions.

Mystic Seaport

Mystic Seaport, Mystic, Conn., is a 19th century coastal village recreated by the Marine Historical Association, Inc. Buildings include an apothecary, smithy, chapel, schoolhouse, ropewalk, sail loft and museums. At the docks lie the wooden whale-ship, Charles W. Morgan; the square-rigger Joseph Conrad; schooner Australia; Chinese junk Mon Lei and ferryboat Brinckerhoff. In 1954 there were over 100,000 visitors, including 900 boats.

At Yale University

Yale University Art Gallery, New Haven, Conn., founded 1832 by Col. John Trumbull (Washington's aide-de-camp) and Benjamin Silliman, was the first art gallery connected with a university. The original gallery was replaced in 1901.

The collections contain objects illustrative of the art of the ancient Orient, of Greece and Rome (notably antiquities from the University's excavations in Dura-Europos, a Hellenistic-Roman trade route city on the Euphrates, and from Gerasa in Transjordan); of the Near and Far East, consisting mainly of textiles and Japanese prints; Europe (the Jarves and Griggs Collections of Early Italian Painting, and French Impressionists from the Webb Collection); America, Colonial interiors, Trumbull Collection of paintings of the American Revolution, the Garvan Collection of American furniture, silver, glass, pewter, prints and painting; the Morgan Collection of American Miniatures, and the Edwin Austin Abbey Collection, Greene Collection of portrait engravings; Collection of Société Anonyme (modern painting, sculpture and prints).

Peabody Museum of Natural History, Yale University, founded 1866 by George Peabody, is used in connection with teaching and scientific research. It has large collections in vertebrate paleontology, zoology, invertebrate paleontology, mineralogy, archaeology. Connected with the museum is the Bingham Oceanographic laboratory with collections of deepsea fishes and invertebrates.

The first floor gives a survey of animal life, both recent and fossil. The Great Hall is devoted to reptiles, amphibians and birds, with one of the foremost collections of dinosaurs in America. The skeleton of a Brontosaurus is 67 ft. long and 16 ft. high. A mural depicting the great reptiles in their natural size and environment, 110 ft. long and 16 ft. high, is considered the largest painting ever made of a natural history subject. There are two halls of mammals.

The Hall of Astronomy on the third floor has a large collection of meteorites, including the Weston Fall, first to be observed to fall from the sky. Other notable collections are in the Hall of Minerals, the Hall of Southern New England, two halls devoted to zoology, and four halls devoted to anthropology and primitive culture. One shows the culture of the Plains Indians and another the prehistoric culture of South America.

Antiquarian, Concord

Antiquarian Museum, Concord, Mass., situated at the intersection of Lexington Road and Cambridge Turnpike, contains antiques from Concord families, 1685-1870, and relics associated with the military Daniel Hawthorne of Concord, the seat of Nathaniel Emerson, Amos Bronson Alcott, Louisa M. Alcott, Elizabeth Peabody, Frank Sanborn, William Bull and other famous Americans. The study of Emerson's house, with his books as he left them, has been moved into the museum; here are also furniture, Thoreau's stay at Walden; and books, old Concord, where "the embattled farmers stood and fired the shot heard 'round the world."

Antiquarian, Worcester

The American Antiquarian Society, Worcester, Mass., has one of the largest reference libraries of American history and printing in the country. It has nearly 1,000,000 titles, covering 20 miles of shelving. It has the most complete collection of early American newspapers, almanacs, and American printing before 1820. The collections of local history for the entire country, biography, and American literature are notable. Graphic arts, such as lithographs, early American engraving, and engraved bookplates are other fields in which the library is constantly used by researchers.

Berkshire Museum, Pittsfield

The Berkshire Museum, Pittsfield, Mass., is an art, science and local history museum. The eight art galleries include painting, sculpture and pottery from the earliest times to the present, works by Rubens, Van Dyck, Reynolds, Raeburn, Stuart and a large Hudson River group, as well as modern masters. "The Adoration of the Magi," dated 1477, by the Spanish painter Juan Pons, is the most famous work to be discovered by this artist and teacher. An educational program of classes, lectures, motion pictures, and music is carried out, with annual attendance over 100,000.

The natural history collections include miniature groups of large animals by Louis Paul Jonas, a biology room with the story of life on its walls, and the "Stellarium," a miniature planetarium. In the Hall of Man is one of the five sledges with which Robert E. Peary reached the north pole, while in the historical collection is the original "One Hoss Shay," immortalized by Oliver Wendell Holmes.

Boston Museum of Fine Arts

The Museum of Fine Arts, Fenway and Huntington Ave., Boston, contains superior collections of the art of the Far East, the Middle East, Egypt and America. The Chinese and Japanese painting and sculpture collections contain many rare items and there is an important Indian collection. The Museum has conducted excavations in Egypt and obtained valuable objects at Gizeh. In the classical collection the Eros relief, the Cretan chryseophantine statuette and the gold bowl are considered exceptional.

The textiles include examples of Medieval French and Flemish work, also Asiatic, Peruvian, Coptic, English and American. Medieval and Renaissance sculpture are well represented. The examples of decorative arts include the Liberty bowl and other pieces by Paul Revere. The American period rooms, from the 17th to the early 19th century, are authentic interiors and include a McIntire room from Peabody, Mass., and the Karolik American furniture and paintings, 1720 to 1865.

In painting the major works of all important schools of Europe and America are represented. The Museum has Velasquez' Don Carlos and the Dwarf, El Greco's Fray Paravicino, Van der Weyden's St. Luke Drawing the Virgin, Rembrandt's St. John, Lorenzetti's Madonna, Duccio's Crucifixion, as well as outstanding work by Gauguin, Caravaggio, Canaletto, Copley, Rubens, Renoir, Manet, Cezanne and Monet.

Boston Museum of Science

Boston Museum of Science, Science Park, Boston, combines exhibits of natural history, science, industry, man, public health and astronomy. It carries forward in a 1951 structure the work of the Museum of Natural History, founded 1830.

The Museum specializes in exhibits that operate or permit audience participation. A fully equipped ship's bridge, with instruments, faces up Charles River. The atomic energy exhibit, with a 6-ft. model of Uranium-235 atom, has continuous cloud chambers in which cosmic ray tracks and radioactive particles are made visible. Marine transportation is explained with the help of a 9,000,000 candlepower lens from Navesink, N. J. lighthouse, and models of ships and engines. Among the dioramas is a notable one showing the building of a pyramid at Gizeh, with 2,500 figures.

At Harvard University

The Computation Laboratory of Harvard University, Cambridge, Mass., was completed in 1946. Under the direction of Prof. Howard H. Aiken, research is carried on in fields relating to the construction and operation of large-scale digital calculating and data processing machinery in both its scientific and its commercial applications.

The building houses a library of 850 volumes, the shops and laboratories. In the center of the building is the machine room, where the IBM

Automatic Sequence Controlled Calculator, Mark I, and the Harvard Automatic Magnetic Drum Calculator, Mark IV, compute tables and solve mathematical problems.

The Mark I Calculator is the first large-scale digital computer built. It is constructed of electro-mechanical counters and relays, and is automatically controlled by perforated paper tape. The machine can store at one time 91 numbers of 23 decimal digits, and can add any two of these in 0.3 seconds. The 46-digit product of two such numbers can be obtained in 1.8 seconds. The machine can be programmed so that it automatically stops if an error is made. Results are printed in any desired format on electric typewriters controlled by the machine. These pages can be reproduced by the photo-offset without transcription.

The Mark IV Calculator is an electronic digital computer employing a magnetic drum and static magnetic delay lines for the internal storage of 4,230 numbers of 16 decimal digits and 10,000 program orders. In one second the machine can perform up to 277 additions, 83 multiplications, and 37 divisions. Results are recorded on magnetic tape. An independent unit of the calculator reproduces the numbers in printed form, using four electric typewriters.

The Computation Laboratory constructed two other digital calculators, the Mark II and Mark III, located at Dahlgren, Va., and operated by the Bureau of Ordnance of the U. S. Navy.

Peabody Museum of Archaeology and Ethnology, Harvard University, Cambridge, Mass., was founded 1866 by George Peabody. Its collections, acquired by expeditions, are notable for the objects of Mayan origin, and for ethnological materials from the Pacific Islands, Central Africa, South America, the Pueblo area of the American Southwest and the Indian settlements of the western plains. Some of the objects date from the Lewis & Clark expedition of 1806; others were obtained through the leadership of Alexander Agassiz (1835-1910) son of Louis Agassiz. The Museum has the largest collection of Old World Prehistoric material in the Americas, including the only Palaeolithic skull (from Palestine) to be seen in the Western Hemisphere. The Museum Library is extensive in all anthropological and related subjects.

Massachusetts Historical

Massachusetts Historical Society, Boston, oldest historical organization in the U. S., was founded in August, 1790, and held its first meeting in Boston on January 24, 1791. Resident membership is limited to 125 citizens of the Commonwealth, to 50 corresponding members not living in Massachusetts, and 10 honorary members, not inhabitants of the United States. Endowments exceed \$1,000,000.

The museum contains many relics associated with American history, and valuable portraits by Smibert, Harding, Copley, Stuart, and other American painters. Two collections of coins, ancient, medieval, and modern, were given to the Society by William Sumner Appleton, I, and by Henry Adams.

The library has the Winthrop Papers, covering three centuries of New England, the private papers of Thomas Jefferson and the Adams Papers, 300,000 pages of mss. of John Adams, John Quincy Adams and Charles Francis Adams. These are being edited by Lyman Henry Butterfield and will be published by Belknap Press of Harvard University Press.

Jones Library, Amherst

The Jones Library, Amherst, Mass., inc. 1919, was given the town of Amherst by Samuel Minot Jones (1836-1912), who provided \$690,118 in his will. The building, of Connecticut Valley architecture, was erected 1928, and houses art, genealogical and historical collections besides general works. It has special collections of Emily Dickinson, Ray Stannard Baker (David Grayson), and Robert Frost material; exhibition and story-telling rooms for children, a stage and an auditorium.

Old Sturbridge Village

Old Sturbridge Village, on Route 20 near Southbridge, Mass., is a reconstructed village on the Quinebaug river, reproducing the atmosphere of 1790 and later in New England. It is based on the collections of Albert B. Wells, a former executive of the American Optical Co., and his brother, J. Cheney Wells, and is described as a "functioning community," as well as a museum. Most of the houses were removed from New England villages.

Pilgrim Hall, Plymouth

Pilgrim Hall, Plymouth, Mass., estab. 1824, contains surviving relics of the Mayflower Pilgrims and the cradle of Peregrine White, first child born in their families, including swords of Myles Standish, Bibles of Governor Bradford and John Alden, the colony; original chairs and chests, books owned

by Pilgrims, original letters, manuscripts, records of the churches and fragments recovered from sites of original settlements. The patent of Plymouth Colony, 1621, oldest state document in New England, is here. The collections are maintained by the Pilgrim Society of Plymouth.

Salem Museums

Essex Institute, 132-134 Essex St., Salem, Mass., founded to promote history, science and art, houses one of New England's finest collections of original records of settlement and seafaring. The library comprises over 750,000 books and pamphlets. There are 1,850 logbooks, 5,100 broadsides, 3,000 almanacs, 4,400 vols. in the Ward China collection, 35,000 imprints by Essex County writers, complete editions of Hawthorne and Whittier, original records of witchcraft trials, customs reports, business papers of the sailing ship era. Among relics the institute has a sampler made by Gov. Endecott's wife before 1638, the cradle of Judge Story, the table of Moll Pitcher; also a large number of military uniforms, guns, swords of all wars, furniture, pewter and household articles. The Institute supervises three completely furnished buildings illustrating their times: John Ward house, 1684; Pingree house, 128 Essex St., designed by Samuel McIntire, 1804; Peirce-Nichols house, 80 Federal St., also by McIntire, 1782-1801, called "the finest wooden house in New England." A colonial apothecary and cobbler's shop are exhibited. In the Annex are larger objects including a one-horse chaise of 1785, early spinets and pianos including the piano on which Lowell Mason wrote *Nearer My God to Thee*; also early American tools, sewing machines, dolls and toys.

The Peabody Museum of Salem, founded 1867 by George Peabody, occupies the rebuilt East India Marine Hall (1824). It took over the museum of the East India Marine Society, begun 1799, and the natural history collections of Essex Institute, begun 1834, and developed collections in marine materials, ethnology and natural history. American sailing vessels, whaling, the Salem trade with India and China, ethnology of the Far East and South Pacific, are among the subjects covered.

Whaling, New Bedford

The Old Dartmouth Historical Society and Whaling Museum, New Bedford, Mass., contains a collection of furniture, costumes, portraits, American glassware, firearms and historical documents.

On display are a large and unique collection of whaling implements, Log-books, shipping lists and curios are preserved here. Of especial interest are the Lagoda, largest ship model in the world, the humpback whale skeleton, the collections of scrimshaw and whaling irons, and the DeCoppet collection of 40 ship models.

Worcester Art Museum

The Worcester Art Museum was founded in Worcester, Mass., 1896, with Stephen Salisbury as its first and largest benefactor.

The permanent collection consists of 25 galleries illustrating the evolution of art from early Egyptian civilization to modern times, with primary emphasis on painting and sculpture; especially notable are the ancient mosaics from Antioch; Egyptian, Classical, Oriental, and Medieval sculpture; the Gothic tapestry of the Last Judgement; the Italian and Flemish paintings of the 15th and 16th centuries; the English, French, and Early American collections of the 18th century.

Currier Gallery, Manchester

Currier Gallery of Art, Manchester, N. H., is notable for American paintings of 18th, 19th and 20th centuries by Copley, Stuart, Trumbull, Sargent, Henri, Homer, Hassam, Waugh, Bierstadt, Alexander, James, Sample, Sheeler, Wyeth, etc.; paintings by Tintoretto, Costa, Ruisdael, Monet, Corot, Constable, Picasso, Perugini. It has American primitives and French wallpaper from the Vaughan house in Thetford, Vt., as well as early American and later furniture. Examples of American and English silver by John Coney, Benjamin Burt, Hester Bateman, Andrew Tyler, Paul Revere, Edward Winslow, William Cowell, etc., are exhibited, also textiles, hooked rugs, pewter and household accessories, and American glass, including an important group of Suncook, N. H., glass.

New Hampshire Historical

The New Hampshire Historical Society, Concord, N. H., organized 1823, maintains an extensive library with exhibits. The library contains over 75,000 volumes, pamphlets, and manuscripts, state papers, maps and documents relating to early New Hampshire records, a nearly complete file of New Hampshire newspapers up to 1900, a genealogical section, portrait gallery and auditorium. Displayed in the Society's gallery are portraits painted in the Concord by Samuel F. B. Morse, inventor of the telegraph. Here also are original paintings or authentic reproductions of New Hampshire notables,

including those of Daniel Webster, Ebenezer and Abigail Webster, his parents; Dudley Leavitt, Almanac publisher; John Wheelwright, founder of Exeter; Lewis Bartlett by Trumbull, and many others. The painting "Crawford Notch" by Thomas Hill was a gift by popular subscription.

The Society displays two Revolutionary War flags of the Second New Hampshire Regiment, Continental Army, which were captured by the British at Fort Anne, New York (1777). Exhibited here also are collections of New Hampshire-made glassware and silver, the Durgin Collection of historic china, silver and pewter services from New Hampshire churches, miniatures, paper money, and the Daniel Webster, General Stark, and President Pierce Collections.

Newport and Providence

Newport Historical Society, Newport, R. I., founded 1853, has a marine museum and extensive exhibits of silver, china, glass, furniture, etc. It uses two brick structures and a meeting house built by the Seventh Day Baptists in 1729 and owns a house of 1675, an ancient grist mill and several forts. The library has 150,000 books and 1,700 manuscript vols. of log books, custom house papers, mercantile records; also loose mss. of the 17th and 18th centuries.

The Rhode Island Historical Society, Providence, R. I., occupies the historic John Brown House, 52 Power St. It comprises a museum of objects of Rhode Island origin and rooms containing furniture made by Newport 18th century cabinet makers. The library specializes in the history of Rhode Island and genealogy.

MIDDLE ATLANTIC

Thomas Alva Edison Museum

The Thomas Alva Edison Museum, West Orange, N. J., opened 1948, by Thomas Alva Edison Foundation, comprises Edison's library of 10,000 books and original notebooks and records; his workshop, where the phonograph, universal electric motor, nickel-iron-alkaline storage battery, motion picture apparatus, etc., were perfected; his chemical room, where he worked on coal-tar derivatives, and the approach to electronics.

Montclair Art Museum

The Montclair Art Museum, Montclair, N. J., is the only public museum in the state dedicated entirely to art. The museum houses hundreds of art treasures, including comprehensive examples from the four cultural groups of North American Indians; a large collection of American and foreign paintings, sculptures, and prints; an Eighteenth Century Dutch clock; various pieces of furniture; early costumes; a Fifteenth Century illuminated Book of the Hours; English, Irish, Scotch, French, and American silver; Chinese snuff bottles and other Oriental art objects; Roman glass dating from 1000 B. C.; and Greek and Roman pottery.

Newark Museum

Newark Museum, 43-49 Washington St., Newark, N. J., a museum of art, science and industry, offers a program of changing exhibitions, a Junior Museum and arts workshops for adults. Its collections include 400 American paintings, with primitives well represented; American sculpture, examples of Chinese, Japanese and Tibetan art; the Eugene Schaefer collection of ancient glass, ceramics, bronzes and jewelry. Science collections include birds, insects, fossils, economic botany, minerals, shells, fossils. There also are a planetarium, over 200 models of mechanical movements, a lending library circulating over 10,000 three-dimensional objects, and a reference library. Newark's oldest schoolhouse (1784) stands in the garden. The main building (1926) was the gift of Louis Bamberger.

New Jersey State Museum

New Jersey State Museum, State House Annex, Trenton, N. J., estab. 1890, is a division of the Dept. of Education. It shows exhibits of birds and mammals, physical and economical geology, Indian artifacts and other New Jersey materials. The museum sends out instructional films and other materials to schools and community groups. Operates with County Educational Audio-Visual Aid Centers.

Albright Gallery, Buffalo

The Albright Art Gallery, Buffalo, N. Y., conducted by the Buffalo Fine Arts Academy, includes in its permanent collection works by David, Seurat, Cezanne, Renoir, Degas, Vuillard, Picasso, Soutine, Gauguin, Bellows, Hassam, Homer, Earl, Gilbert Stuart, Hogarth, Reynolds, Gainsborough, Romney, Lawrence, Claude Lorrain, di Credì, Pannini, Caracciolo, Reubens and Gericault; sculpture by Maillol, Despiau, Brancusi, Lachaise, Lehmbruck, Pipchitz and Gericault; also rare

early Greek, Oriental, Spanish and Italian marbles and bronzes.

Buffalo Museum of Science

The Buffalo Museum of Science, Humboldt Park, Buffalo, N. Y., is operated by the Buffalo Society of Natural Sciences. Its exhibits in full color in 17 compact halls tell a related story of man's scientific knowledge, beginning with the constitution of matter and ending with civilization.

Outstanding among the permanent exhibits are the Transparent Man, the Malvina Hoffman bronzes of selected racial types, the electrically operated doll exhibit illustrating the laws of heredity, the Bermuda Coral Reef group, the famous Marchand wax flowers in the Hall of Plant Life and the Hall of Conservation, the Milestones of Science embracing rare editions of books on science; African and South Pacific collections of primitive art, folk art textiles from Indonesia, and collections of Chinese ceramics and bronzes, and Mesopotamian seals.

Cooperstown Museums

Cooperstown, N. Y., on Lake Otsego, was the one-time home of Jas. Fenimore Cooper and inspired his Leatherstocking Tales. It has three distinctive museums.

The National Baseball Hall of Fame and Museum, opened 1939, contains a distinguished collection of baseball souvenirs. Balls, bats, uniforms of famous players, like Babe Ruth and Cy Young, pictures of old time clubs, trophies presented to many stars, lithographs and paintings of early games and famous incidents, a complete set of souvenirs of World Series winners and pictures of the winning teams are among the more than 4,000 exhibits in the collection. One of the items is Ruth's No. 3 uniform, worn by the Yankees (June 13, 1948) in the last game of the season.

The building contains the Hall of Fame where the Abner Doubleday field, asserted to have been the first in which modern baseball was played.

Fenimore House, on Route 80, is the administrative office of the New York State Historical Assn. and contains one of its museums. It has Brower's famous life masks of the Founding Fathers, his formal records and manuscripts, including the Hamilton-Burr correspondence; a gallery of folk art and of New York state painters. It conducts exhibits, seminars and educational work.

The Farmers' Museum, across the road from Fenimore House, operated by the Historical Assn., contains farm implements, wagons, carts, looms, pottery and dairy utensils used in New York state since colonial times. Besides the main building, a great stone dairy barn, it has a smithy, a country store, a print shop, a one-room school, a law office, etc., of the 1800-1840 period. The Cardiff Giant, famous hoax of 80 years ago, carved from a block of gypsum, is on view.

Corning Glass Center

Corning Glass Center, Corning, N. Y., opened May, 1951, on the centennial of Corning Glass Works, contains the Corning Museum of Glass, a library devoted solely to the subject of glass; the Hall of Science and Industry and the Steuben factory where the making of crystal glass is demonstrated. Examples of glass from pre-Christian times to early American and modern glass are shown. The first casting of the 200-inch disc for the Hale Telescope on Palomar Mtn. is on exhibition. It conducts ten weeks of summer theatre.

Fort Ticonderoga Museum

Fort Ticonderoga Museum is located in the restored fort, commanding the waters connecting Lake George with Lake Champlain in Essex Co., N. Y. The village of the same name is one mile west. The fort and adjacent grounds are owned by Fort Ticonderoga Association. Ruined casemates and walls have been restored and have been built inside structures similar to the originals have been built inside the walls and are filled with relics of Indian, colonial and Revolutionary days, including arms, shot, utensils, glass, etc., picked up on the grounds, occupied by thousands of troops in the 18th century.

The fort was begun 1755 by the French and named Fort Carillon. In 1758 it was the headquarters of Gen. Montcalm, who captured Fort William Henry on Lake George. In 1758 Montcalm with 3,800 stood off the British Gen. Abercromby with 15,000. In 1759 the fort was captured by the British Gen. Lord Jeffrey Amherst and renamed Ticonderoga. On May 10, 1775 Ethan Allen and his Green Mountain Boys, with Benedict Arnold joining in, surprised the British garrison.

The cannon of the fort were hauled across New England by Gen. Henry Knox to Washington's batteries at Dorchester Heights, opposite Boston. In 1777 Gen. John Burgoyne captured the fort. When Burgoyne surrendered at Saratoga the fort came back into American hands. Benedict Arnold built his ill-fated flotilla on the beach below the fort 1776.

At Cornell University

The Collection of Regional History and the University Archives are housed in the Albert R. Mann Library at Cornell University, Ithaca, New York. The Collection of Regional History was established in 1942 with the aid of a Rockefeller grant, and in 1951 the University Archives was established and added to this division.

The combined collections already hold more than 6,000,000 manuscript sheets and volumes, newspapers, pamphlets, broadsides, maps, pictures, photographs, recordings, microfilms, and movies, emphasizing the history of New York State and the activities of its residents. Of special interest to researchers are extensive collections relating to the development of western lands. The Archives include the correspondence files and records of the founders, administrators, professors, and alumni of Cornell.

The Andrew Dickson White Museum of Art, Cornell University, Ithaca, New York, opened in November, 1953. The building is the former President's House, built in 1876 by Andrew D. White, co-founder and first president of the university.

The museum houses the university's art collections, including 16th, 17th and 19th century paintings in the Maganini and Clark collections, and paintings by young contemporaries, especially in the Zadok and Solinger collections. The William P. Chapman collection of more than 3,000 prints contains an outstanding group of etchings and lithographs by Whistler, and other works of graphic art from the 16th to the 20th century.

A focus for community interest and activity in the arts as well as a part of the university's educational program, the museum sponsors exhibitions of works from the permanent collections, loan exhibitions, lectures, discussions, motion pictures and other activities. It is the center for the university's annual Festival of Contemporary Arts.

New York State Museum

The New York State Museum, Albany, New York, had its origin (1836) in materials gathered by the Geological and Natural History Surveys of the State of New York. These materials, placed under the jurisdiction of the Board of Regents of the University of the State of New York in 1845, formed the nucleus of the collections of the New York State Museum of Natural History established by the State Legislature in 1870. Today the Museum is the custodian of all state-owned property, appropriate to a general museum, which is not placed in other custody by specific law.

The extensive collections are grouped under the headings of geology, paleontology, zoology, entomology, botany, archeology and ethnology, history and industry, and the fine arts. Its most important collections are in geology and biology. These contain basic scientific source materials, including many hundred type specimens.

The exhibit halls of the State Museum are on the fifth floor of the State Education Building, in the heart of Albany. Some of the more famous exhibits are the restoration of the Gilboa Devonian forest, the Cohoes mastodon, the six life-size Iroquois Indian groups, the original water color bird paintings of Louis Agassiz Fuertes, and the scenes of nineteenth century life by E. L. Henry, N.A.

Rochester Museums

George Eastman House of Photography, 900 East Ave., Rochester, N. Y., opened 1949, is a memorial to George Eastman, photographic pioneer, and occupies his former home. It contains extensive historical collections, including Daguerre's cameras, Fox Talbot prints, Muybridge negatives, technological material down to color processes of Mannes and Godowsky; a large collection of early motion pictures; 30,000 movie stills; examples of cameras and apparatus; a library of 4,000 vols. and bound sets of photographic magazines going back to 1850. The paintings collected by Eastman, including Rembrandt, Tintoretto, Van Dyck, Romney, Gainsborough, etc., remain in their original places. Cavalcade of Color is a showing of 700 color slides with sound and music. The Birthplace of George Eastman was brought here from Watertown, N.Y.

Rochester Museum of Arts and Sciences, founded 1912, is a community museum of the natural history, archaeology, ethnology, culture and industrial science of western New York, with educational exhibits, classes and lectures. It has pioneer shops and rooms, a hall of American women's fashions and a hall of optical science.

Franklin D. Roosevelt Library

The Franklin D. Roosevelt Library, Hyde Park, N. Y., was established by joint resolution of Congress approved July 18, 1939, to preserve and make available books, manuscripts and other historical material donated by President Roosevelt, and related historical material. The building was erected with privately subscribed funds on a sec-

tion of the Roosevelt estate turned over to the Government July 4, 1940. The museum portion has historic documents and photographs, ship models, art objects and curios. All of the books and most of the manuscript collections are available for research. Mr. Roosevelt's White House papers are the largest single group. A number of his associates have placed their personal papers in the Library.

The Library is maintained by the Government and is administered by the National Archives and Records Service of the General Services Admin.

Sunnyside, Irvington

Sunnyside, in Irvington and Tarrytown, N. Y., the home of Washington Irving, was bought by him in 1835 and developed from a salt-box cottage into a gabled house "as full of angles and corners as an old cocked hat." He lived here from 1838 until his death in 1859, except for 1842-46, spent in Madrid as minister to Spain. Here he completed his Life of Washington and entertained Thackeray, Prince Louis Napoleon, William Cullen Bryant, Bayard Taylor, Nathaniel Willis, etc. Restored through the generosity of John D. Rockefeller, Jr., the house is a picturesque example of romantic Gothic in a wooded vale. It contains 1,000 household objects and many books originally owned by Irving and memorabilia, including the costume worn by Joseph Jefferson when he played Rip van Winkle. At the entrance of Sunnyside Lane on Broadway stands the Washington Irving Memorial by Daniel Chester French.

Tarrytown-Yonkers Restorations

Three fully restored buildings recalling days when manors were established by royal edict in the province of New York are located on the old Albany Post Road, now Broadway (U. S. 9) in Yonkers and North Tarrytown, N. Y.

Philipse Manor Hall, Yonkers, N. Y., was begun c. 1682 by Frederick Philipse, carpenter-architect for Director Peter Stuyvesant of the Dutch province of New Netherland. Philipse was granted the manor of Philipsborough by the British, 1693, and by 1694 owned a huge terrain on the Hudson from Spuyten Duyvil, opposite the northern tip of Manhattan, to the Croton River. The Manor Hall, only surviving building of a community of mills and barns on the banks of the Nepperhan River (now underground) was augmented by Philipse's grandson, 1745, and was a center of colonial social life. When the Philipse family remained loyal to Britain in the Revolution it was confiscated and sold; taken over by the State, 1908, it was restored by the American Scenic and Historic Preservation Society, 1911, and more recently by New York State.

Philipse Castle, built at a mill site on the Pocantico in North Tarrytown, N. Y., by Frederick Philipse, 1683, comprises a completely restored Dutch colonial mansion, a mill and farm buildings. A section added by Gerard Beekman after 1785 reflects the decorative taste of the early republic. The stone mansion is equipped with furniture, linens and kitchen utensils of the 17th and 18th centuries. A separate exhibit has Victorian furnishings of John D. Rockefeller, Sr.

On the Pocantico, beyond the mill pond, stands the Washington Irving Memorial Bridge, and farther upstream is the site of the old bridge where, according to Irving's Legend of Sleepy Hollow, the headless horseman chased Ichabod Crane. This adjoins Sleepy Hollow cemetery, where the Dutch Church, restored, appears substantially as erected, 1699, by Frederick Philipse and his second wife, Catherine van Cortlandt. In and his second wife, Catherine van Cortlandt. In Sleepy Hollow Cemetery are buried many great Americans, including Irving, J. K. Paulding, Carl Schurz and Andrew Carnegie.

Syracuse Fine Arts

The Syracuse Museum of Fine Arts, Syracuse, N. Y., founded 1896, contains the first permanent collection exclusively by American artists ever assembled in a museum. Its biennial Ceramic National sponsored by the Museum, the Onondaga Pottery Company, Syracuse, and the Ferro Corporation, Cleveland, features ceramic sculpture, pottery and enamels, and gives a large number of prizes offered by industries. Selected works from the initial showing in Syracuse are sent to leading museums in the U. S. and Canada. The Museum functions as a Community Art Center, with classes in arts and crafts for adults and children, and as a music center.

Utica, N. Y., Institute

Munson-Williams-Proctor Institute, 312-318 Genesee St., Utica, N. Y., is a community art center offering through its Community Arts Program changing exhibits, period rooms dating from 1900, collections of 19th and 20th century American and European art, art lending service, art library, record library and loan service, lectures, films and music programs. The School of Art has classes for children and adults in painting, drawing, design, ceramics and sculpture.

Buhl Planetarium, Pittsburgh

The Buhl Planetarium and Institute of Popular Science, Pittsburgh, Pa., has an auditorium seating 500 and can demonstrate 9,000 stars and planets, and comets, clouds and other phenomena. It has five galleries devoted to the natural sciences. The Micro-zoo, showing microscopic water animals magnified to monster size is a popular feature. A 10-inch siderostat telescope is available for public use. Schedule for schools includes tours and laboratory demonstrations for science classes, sky dramas and exhibitions for geography, Latin, and English classes; and monthly changes in galleries.

Carnegie Institute, Pittsburgh

Carnegie Institute, located in Schenley Park, Pittsburgh, Pa., founded and endowed by Andrew Carnegie (1896), houses under one roof the central branch of the Carnegie Library of Pittsburgh, with special departments covering technology, art, and music; the Department of Fine Arts, with a representative and growing collection of modern painting and sculpture, and with the distinction of having international exhibitions of paintings; Carnegie Museum, covering the natural sciences and applied arts, and Carnegie Music Hall.

Franklin Institute, Philadelphia

Franklin Institute, Benjamin Franklin Parkway and 20th St., Philadelphia, founded 1824, is one of the country's oldest and foremost institutions for the study and promotion of the mechanic arts and applied science. The building contains a memorial hall dedicated to Franklin, a museum, a library, the Fels Planetarium and offices. A heroic-sized statue of Franklin by James Earle Fraser stands in the hall.

The Museum maintains scientific exhibits which may be operated by visitors. There are permanent exhibits showing applications of basic science and special displays on current developments.

The Fels Planetarium, donated to the Franklin Institute, 1933, by Samuel S. Fels, reproduces the stellar world of past, present and future.

The Library, founded at the same time as the Institute, has over 146,000 vols., 9,000 maps and 51,000 pamphlets, including complete runs of domestic and foreign technical periodicals.

The Journal of the Franklin Institute, first issued 1826, has been published continually since. Its papers are written by distinguished and qualified workers in scientific fields.

The Committee on Science and the Arts of the Institute awards medals and certificates of merit to men or organizations deserving of recognition for their work in science, the most distinguished of which is the Franklin Medal.

The Franklin Institute Laboratories for Research and Development specialize in research for industry and the U. S. Government. Problems in physical science, particularly nuclear physics, are studied by the Institute's Bartol Research Foundation at Swarthmore, Pa. The Biochemical Research Foundation, affiliated with the Institute, has laboratories at Newark, Del., for the study of cell growth, reproduction and diseases from a chemical point of view, and of new organic compounds that have therapeutic value.

Mellon Institute, Pittsburgh

Mellon Institute, Pittsburgh, Pa., founded 1913 by Andrew W. and Richard B. Mellon, is an endowed nonprofit body for research in pure and applied sciences, for training research workers and providing technical information of use to industries and municipalities for the preservation of health and resources. From Mar. 1, 1954 to Mar. 1, 1955, the Institute expended \$4,784,344, of which \$1,033,172 was used for pure research in the 6 departments and on 12 fellowships, with 147 members engaged. In applied science 390 members were employed on 64 other fellowships.

During 1954 departments and fellowships produced 7 books, 8 bulletins, 50 research papers and 62 other scientific articles. The Institute issues Mellon Institute News, American Pollution Control Assn. News, and Industrial Hygiene Digest.

Natural Sciences, Philadelphia

The Academy of Natural Sciences of Philadelphia at 19th and the Parkway (1812), the oldest scientific institution of its kind, possesses a collection of natural objects in many respects unrivaled. Its Natural History Museum exhibits animal life groups, minerals, birds common to Philadelphia and vicinity, and from all parts of the earth; the Fluorescence exhibit, which reveals glowing colors hidden in certain minerals, and the Hall of Earth History, which graphically depicts the story of the earth and its first inhabitants. A hall of birds is named for J. J. Audubon, once a member.

The Academy's study collection of birds contains more than 150,000 specimens, and its insect col-

lection more than 2,000,000 specimens. Its shell collection is equally notable. The herbarium contains plants from all parts of the world. The library has 150,000 vols.

Pennsylvania Academy

The Pennsylvania Academy of the Fine Arts in Philadelphia, Pa., founded 1805, is the oldest art institution in the United States. Organized "to promote the cultivation of the fine arts in America," it set high standards of excellence, which have been maintained in its acquisition of paintings and in its educational work. The institution possesses a representative cross section of American art, from the collections of Peales, Gilbert Stuarts, Sully through Eakins, Homer and Chase to contemporary artists of national importance.

Pennsylvania Historical

Historical Society of Pennsylvania, 1300 Locust St., Philadelphia, Pa., has one of the most important manuscript depositories in the U. S. consisting of over 4,000,000 items. Its library has approximately 500,000 books, pamphlets, and periodicals. Included are books from the library of Benjamin Franklin, an almost complete set of Poor Richard Almanacks, including the first issue of 1733; Pennsylvania printings of the 18th century; the Cassel collection of Pennsylvania German imprints; the Charlemagne Tower collection of Colonial Laws.

There are over 7,000 vols. of newspapers including at least one paper for every date of issue in Philadelphia from 1728 to date. The print collection consists of some 45,000 items. The museum has portraits and memorabilia of Penn. Franklin, Washington, and Lincoln. The Pennsylvania Magazine of History and Biography is the oldest general historical magazine.

Philadelphia Museum of Art

The Philadelphia Museum of Art at Benjamin Franklin Parkway and Fairmount Ave., Philadelphia, Pa., has collections of first rank in the arts of Europe and America, representative of the Christian era and especially rich in medieval, Renaissance, modern and oriental art, in painting, sculpture and tapestries. Among antique architectural exhibits are the Romanesque cloister of the 11th century from Saint-Genis de Fontaines, France; three rondels of French Gothic glass of about 1270 A. D., a portal from the abbey of St. Laurent of the 12th century; a French Gothic chapel from Pierrecourt of the 14th century; an altar from the Church of the Templars at Norroy-sur-Vair (Vosges) about 1400, and a French Gothic room of the 15th century from Le Mans.

Conspicuous among the Renaissance objects from Italy and France are the sculptures and carvings in marble, bronze and wood from the Foule collection, including a Virgin and Child by Desiderio, an Adoring Virgin by Luca della Robbia and numerous 15th century bronzes. Among the architectural units are elements from the Piccolomini Palace in Siena, Santa Maria del Popolo in Rome, and the Chateau de Pagny, including its choir screen and the sculptured Virgin of Pagny.

The south wing of the Museum is devoted to oriental art, beginning with the Near East, where the installation includes the carpets of the McIlhenny Collection and the Joseph Lees Williams Memorial Collection. From Sasanian Persia comes an arched portal excavated at Damghan, as well as a series of bas-reliefs from Rayy. Islamic art of Egypt, Anatolia and Persia is represented, the last by a mosque revetment of mosaic tile and by a vaulted interior of painted stucco—both of the Safavid period. The display of art of India includes an entire sculptured temple portico of the 15th century from Madura besides many works of the Græco-Buddhist, Buddhist and Hindu periods. The section devoted to the art of China surrounds a large palace hall of the Ming period, and includes as other major units a stone tomb chamber of the T'ang dynasty.

Among the notable works are the John G. Johnson collection of over 1,000 paintings, containing many Italian and Flemish masterpieces by such artists as Van Eyck, Van der Weyden, Masolino, Antonella da Messina, Botticelli, Rubens and Rembrandt. The Anna H. Wilstach collection contains Italian, Flemish and Spanish baroque paintings. The John H. McFadden collection has English 18th century portraits and landscapes. The Wm. L. and Geo. W. Elkins collections include Dutch, English, American and notably French paintings from Pissarro to the Impressionists, supplemented by Post-Impressionists and the Lisa Norris Elkins collection. There is an excellent collection of French 20th century art in the Gallatin and Arensberg collections and a large new section devoted wholly to modern art.

University of Pennsylvania

The University Museum, of the University of Pennsylvania in Philadelphia, Pa., was founded 1839 and is concerned with the study of man, par-

ticularly as exemplified by the remains of ancient civilizations and the customs of primitive peoples. Its activities comprise field research in archaeology and ethnology conducted through its expeditions to all parts of the world, and museum research.

The American Section contains exhibits illustrating the customs, arts, and industries of the historic Indian tribes of North America; Mayan and Mexican pottery and sculpture; archaeological objects from South America, comprising Colombian gold work, Peruvian pottery and textiles, and ethnological collections illustrating the living tribes.

The Babylonian Section contains a tablet library with about 20,000 cuneiform documents from Nippur and Ur. The Egyptian collection includes pieces from the temple of Merenptah; the Far East section has iconography of the Gupta, Gandhara and South India schools; there are mosaic fountains in the Islamic section, and collections from Ancient Crete, Greece, Italy, Cyprus and Palestine.

The Elkins Library of the Museum contains approximately 30,000 volumes relating to archaeology, anthropology, ethnology and allied subjects.

The Johnson Film Library contains approximately 80,000 feet of 16 mm. motion picture films, some in color. The Educational Department gives classes and gallery talks for school, college and club groups.

Valley Forge

Valley Forge State Park, 2,033 acres, 22 mi. n. of Philadelphia (State Roads 23 and 83) preserves the site of Washington's encampment during the hard winter of 1777-78, when 11,098 soldiers reported for duty of whom 2,898 were incapacitated. Of special interest are Washington's headquarters, National Memorial Arch, restored soldiers' huts, field hospital, redoubts, Dogwood blooms, in May, attract many visitors. Adjoining are Washington Memorial Chapel, built by the Rev. W. Herbert Burk; the Cloister of the Colonies, Peace carillon, Museum of American History and Memorial Bell Tower dedicated 1953 by the D.A.R.

Delaware Art Center

The Wilmington Society of the Fine Arts, Est. 1912, occupies its own building, the Delaware Art Center, Park Dr. at Woodlawn Ave., Wilmington, Del. It supports permanent exhibits, varied monthly exhibitions, lectures and a large educational program, with classes for children and adults. Of unique value is its collection of paintings and drawings by Howard Pyle (born in Wilmington 1853, died in Florence, 1911). The Art Center has the extensive Bancroft English Pre-Raphaelite Collection of Paintings by Rossetti, Brown, Watts, Sandys, Burne-Jones, Millais, and owns some contemporary American paintings.

SOUTH

Baltimore Museum of Art

The Baltimore Museum of Art, Baltimore, Md., has extensive collections of paintings, sculpture, ceramics, tapestries, furniture, covering many periods. A partial list includes: Mosaics, from 2nd to 6th century A.D., from Antioch, Syria; Oriental Room containing sculpture, bronze vessels and ceramics; Saïdie A. May Collection of classical, medieval and Renaissance art, as well as an important collection of modern paintings and sculpture, principally French; Jacob Epstein Collection of paintings by Old Master, bronzes by Rodin and Barye; Mary Frick Jacobs Collection of European paintings from the 15th to the 18th century, tapestries, furniture, porcelains, jades, and other objects d'art; Mrs. P. B. Daingerfield Collection of English, French and American 18th and early 19th century paintings; George A. Lucas Collection (on loan) of 19th century French paintings; Cone Collection of late 19th and 20th century French paintings and sculpture (including a survey of Matisse and numerous items by Picasso), as well as textiles, laces, jewelry, rugs, furniture and other art objects of various periods and cultures; the Gallagher Memorial Collection of contemporary American paintings; Maryland Wing with colonial rooms, paintings and Americana and the White Collection of Maryland silver.

The Saïdie A. May Young People's Art Center has 4 studios, a large gallery, a lecture hall, staff offices of the Museum's Education Department, which conducts painting, sculpture and pottery classes. The Museum's program also includes movies and concerts.

Maryland Academy of Sciences

Maryland Academy of Sciences, Baltimore, founded 1797, occupies quarters in the Enoch Pratt Library Bldg. It supports exhibits and lectures on science and in studies including astronomical observations, mobile exhibits for schools. It conducts Davis Planetarium. Two sections are doing special work in American archeology and in mineralogy.

Maryland Historical Society

Maryland Historical Society, 201 W. Monument St., Baltimore, Md., founded 1844, is privately

supported and has 3,500 members. It is the home of the original manuscript of the Star-Spangled Banner, presented 1953 by Mrs. May McShane Jenkins, in memory of her mother-in-law, Catherine Key Jenkins.

The Society maintains a library, art gallery and museum and publishes periodicals devoted to history. The library has 50,000 books, 20,000 pamphlets and thousands of manuscripts, prints and maps. Among its treasures are the papers of the Lords Baltimore, Charles Carroll of Carrollton, Robert Gilmor, Robert Oliver, the Lloyd, Ridgely and Latrobe families. The original competitive designs for the United States Capitol (1792) and drawings for public structures by Benjamin H. Latrobe are here. There are 250 engraved portraits of George Washington and a group of original portraits and engravings by St. Meemin.

The gallery and museum has portraits by American artists, landscapes, drawings and miniatures; furniture of the 18th and early 19th century, silver, porcelain, glass, military relics, jewelry and costumes. Special collections include furnishings of the Paterson-Bonaparte and other families, and Confederate items. Other major groups are Oriental export china, Amelung glass, early American kitchenware, and the Klirk silver service of the old battleship Maryland.

The Maritime collection consists of ship models, drawings, paintings and lithographs of Chesapeake Bay craft, charts of Baltimore house flags, compasses, ship's gear and a collection of ship's logs and maritime records.

Peabody, Baltimore

Peabody Institute Library, 1 East Mt. Vernon Pl., Baltimore, endowed 1857 by George Peabody, has 265,000 vols. and 2,500 maps, many unique. Subjects include, among others, religion, 16th, 17th, and 18th century imprints, Maryland newspapers, voyages, genealogy, bibliography, incunabula, illustrated books on flora and fauna, a special section on early 19th century American Fiction, Cervantes and the complete files of John Pendleton Kennedy (1795-1870), who wrote as "Mark Littleton." Research facilities are available.

Walters Art Gallery, Baltimore

The Walters Art Gallery in Baltimore, Md., is a gift to the city from Henry Walters. (d. 1931). The exhibits illustrate the history of all the arts from ancient Mesopotamia and Egypt to the 19th century. Noteworthy are the Egyptian small sculptures; the Greek, Roman and Etruscan bronzes and ceramics; the Roman sarcophagi; the medieval arts in general, with particular emphasis on Byzantine arts and enamels, carved ivories, stained glass, and illuminated manuscripts; Renaissance bronzes, enamels and jewelry; 18th century English and French porcelain, ormolu and small sculptures; the collection of Bayre bronzes; the Oriental ceramics and the Islamic pottery and metal-work.

The paintings range from Italian and Spanish examples of the 13th century to the chief French schools of the 19th. The library contains over 1300 incunabula.

Appomattox, Va.

The house in which Gen. Robert E. Lee surrendered the Confederate Army of Northern Virginia to Gen. U. S. Grant, USA, Apr. 9, 1865, has been reproduced by the National Park Service in the grounds of Appomattox Court House National Historical Monument, which covers 968 acres and includes the final position of the opposing armies. The original house, owned by Wilmer McLean, was dismantled for removal but never re-erected.

Colonial Williamsburg

The historic portions of Williamsburg, Va., 56 miles east of Richmond, have been restored to their 18th century appearance in what constitutes the most comprehensive restoration of the American past ever undertaken. The work started in 1926, made possible by John D. Rockefeller, Jr. More than \$30,000,000 has been expended and the work continues. It is carried forward by Colonial Williamsburg, Inc., a non-profit educational corporation. On over 216 acres, more than 400 colonial homes, taverns, shops and public buildings have been reconstructed after the removal of more than 500 post-colonial structures. Most of more than 90 18th century buildings have been restored. Eight principal buildings, including the colonial Capitol, Governor's Palace, Raleigh Tavern, George Wythe House, Ludwig-Paradise House, Public Gaol, the Magazine and Guard-house, and the Brush-Everard House, have been accurately furnished and are open to the public daily with guides in colonial dress. Points of interest include Bruton Parish Church (1715), the so-called Christopher Wren building of the College of William and Mary (1695), and the Court-house of 1770. Visitors exceed 500,000 a year.

Williamsburg was the capital of Virginia, 1699-

1780, and played a part in the movement for independence. Washington, Jefferson, Patrick Henry, George Mason and other early patriots received their early training here.

The Institute of Early American History and Culture, sponsored jointly by the College of William and Mary and Colonial Williamsburg, Inc., was founded 1943 to promote study, research and publication of American history in all its early phases. It publishes historical monographs and documentary works and the William and Mary Quarterly, a journal of early American history.

James Monroe Memorial

The James Monroe Law Office and Museum in Fredericksburg, Va., is the original building in which President Monroe practiced law in the 1780's. Owned by the James Monroe Memorial Foundation and opened as a museum in 1927, it houses a large collection of personal possessions of Monroe and his family; china, silver, portraits, court costumes and White House furniture including desk on which Monroe Doctrine was signed. The Foundation owns a large part of original Monroe correspondence and a large library pertaining to Monroe and the Monroe Doctrine which comprise a complete reference library on Monroe.

Mariners' Museum

The Mariners' Museum was founded 1930 by Archer Milton Huntington. It is situated on Route 60, on the Virginia Peninsula near Hampton Roads, six miles north of Newport News, Va.

The Museum contains one of the largest collections of ship models, marine pictorial material, figureheads, navigation instruments and memorabilia in the Western Hemisphere. It includes more than 750 models ranging from bark canoes to large scale ship models, and working mechanical scale models of ship propulsion machinery. More than 80 ship figureheads show the art of the ship carver, the masterpiece of which is an eagle with a wingspread of 18 feet, from U. S. S. Lancaster (1858). The Marine Library contains 35,000 vols. and thousands of maps, charts and plans of vessels.

Norfolk Arts and Sciences

Norfolk Museum of Arts and Sciences, Yarmouth at the Hague, Norfolk, Va., is the headquarters of numerous local cultural organizations including its sponsoring group, the Norfolk Society of Arts. There are 13 galleries on two floors, a library room housing the horticultural library of the federated garden clubs, D.A.R. and C.S.A. historical records and the art and Tidewater history reference library. It exhibits 18th century furniture, old master and 20th century paintings and sculpture, Serpell collection of ivories, fans and enamels. Dr. J. C. Perry collections of Chinese ceramics and American Indian artifacts, old master drawing collections and Norfolk and Tidewater material in history and history.

The Myers Historic House, Freemason and Bank Street, built 1792, has been restored. It now has its original furniture, silver, a Tidewater kitchen, paintings and restored garden.

Virginia Museum of Fine Arts

The Virginia Museum of Fine Arts, Boulevard and Grove Ave., Richmond, Va., estab. 1936, was founded by John Barton Payne and others and is administered by the Commonwealth of Virginia. It has a comprehensive collection of old masters of the Italian, Dutch, English and French schools, as well as a fine group by American artists, historical and modern.

Virginia Historical

Virginia Historical Society, 707 E. Franklin St., Richmond, Va., estab. 1831, has its hq. in the house occupied by the R. E. Lee family during the Civil War and its library and portrait gallery in an annex. The library has 100,000 printed items and 500,000 mss., prints, maps, etc., relating to early history. It has original diaries of Geo. Washington and Wm. Byrd, II, letterbooks of Gov. Alex. Spotswood and "King" Carter, military papers of Gen. R. E. Lee and the library of John Randolph of Roanoke. Over 500 paintings include portraits of the Lee and Randolph families, John Marshall (the society's first president), Arthur Lee, and works by Wollaston, Hesselius, Sully and Thos. Willson Peale. The society maintains Battle Abbey, Richmond, devoted to Confederate memorabilia and Virginia House, bequeathed by Alex. W. Weddell, constructed from a priory of Warwick, England. It publishes books and periodicals on Virginia history.

Virginia War Memorial

The War Memorial Museum of Virginia in Warwick, just outside of Newport News, Va., exhibits thousands of implements and memorabilia of World War I and World War II. These include weapons and equipment used by American, French,

Japanese, Russians, English, and many other nations.

Topping World War II items is the watch used by Pvt. Lockhart when he timed the approach of the Japs at Pearl Harbor.

Other outstanding items of the World War II collection include: Gen. Montgomery's shoulder patches worn by the British Eighth Army in Africa and a tank that entered Paris the first day of the liberation and later was used by Gen. George S. Patton.

Mint Museum of Art

The Mint Museum of Art, Charlotte, N. C., occupies a building erected 1835 as the first branch of the Philadelphia Mint. It is a free educational institution fostering appreciation of the arts by exhibitions, classes and lectures. Monthly it presents collected or traveling exhibitions. Collections include works by Salvati, Granacci, Fungai, Ghirlandalo, Ramsay, Child Hassam, Thomas Sully and others.

Morehead Planetarium

The Morehead Planetarium of the University of North Carolina at Chapel Hill, opened 1949, constitutes the sixth Zeiss Planetarium in this country, and the first in the world to be owned by a University.

The building houses a memorial rotunda in which paintings and objects of art are permanently exhibited; a Copernican Orrery which mechanically demonstrates planetary order and motion; and scientific and art exhibits that are changed periodically. The Planetarium chamber seats 500 under a 68-foot dome.

Marine Studios, Florida

Marine Studios, at Marineland, near St. Augustine, Fla., built originally as an underwater motion picture studio, has over 10,000 specimens of 125 species of salt water fish and animals on exhibit. The specimens range in size from small coral reef fish to large sharks.

All specimens are placed together in two oceanariums and are not segregated by species. One oceanarium is circular in shape, 75 feet in diameter, and 12 feet deep, containing 380,000 gallons of sea water. The other is 100 feet long, 40 feet wide, and 18 feet deep, containing 420,000 gallons of sea water. There are over 300 portholes for underwater observation. Trained porpoises may be watched in the Porpoise Stadium.

Ringling Museums, Sarasota

The John and Mable Ringling Museum of Art, Sarasota, Fla., was established by John Ringling and given to the state of Florida at his death in 1936, together with his adjoining home. The museum contains the most important paintings from nearly 500 made by Ringling, and newer acquisitions. Included are works by Rubens, Rembrandt, Frans Hals, Veronese, Strozzi, Tiepolo, Piero di Cosimo, Poussin, Velasquez, Murillo, Gainsborough, Reynolds and many other masters. It is built around three sides of a tropical garden court, incorporating arches, columns and doorways from Europe. An important exhibit is the 18th-century Asolo Theater, brought from Italy in 1950 and in regular use.

The Ringling Residence (Ca' d' Zan), in Venetian Gothic style reminiscent of the Doge's palace, is maintained much as it was when the Ringlings lived there. The Museum of the American Circus was built by the state and opened in 1948. It contains old parade wagons, lithographs, and the Chambers collection of historical material on the European and American circus.

Alabama Natural History

The Alabama Museum of Natural History, University, Alabama, contains a geological section with 20,000 specimens of minerals; a large collection of fossils of the Cretaceous and Tertiary ages from Alabama and the Gulf Coast; an herbarium of 2,500 Alabama ferns and flowering plants; a collection of 200,000 marine shells, native and foreign; an outstanding collection of Alabama fresh water shells; a very large collection of land shells, mostly from the United States; 13,000 species of United States beetles and a large and worldwide collection of Carabid beetles; large collections of birds, reptiles, and batrachians; an enormous collection of skeletal material and artifacts from aboriginal sites in Alabama and in the Southeast; and a small but representative and fine lot of artifacts from the primitive area of the southern Pacific region. The library contains 25,000 vols.

An adjunct of the museum is Mound State Monument at Moundville, in adjacent parts of Hale and Tuscaloosa Counties. On a tract of 300 acres containing 34 mounds of the truncated pyramid or domiciliary type has been constructed a burial museum of reinforced concrete, containing a central exhibition hall and in situ burials in

each sink. There are also an administration building with a small auditorium; a large archaeological research laboratory; and picnic shelters.

Old Harrodsburg, Kentucky

Pioneer Memorial State Park, Harrodsburg, Ky., 30 mi. from Lexington, contains the reconstructed Fort Harrod (1927) with stockade, blockhouses and cabins; Lincoln Marriage Temple, sheltering log cabin in which Thomas Lincoln and Nancy Hanks, Abraham Lincoln's parents, were married; Mansion museum, with relics of Shaker-town, Ky.; shops and houses. Fort Harrod founded 1774, protected first white settlement west of Alleghenies, and was one of posts used by Gen. Geo. Rogers Clark for equipping troops against British and Indians, 1778-1782.

Patton Museum, Fort Knox

The George S. Patton, Jr., Museum, at Fort Knox, near Louisville, Ky., contains World War II equipment, collected by Gen. Patton from pieces captured from Nazi armies, including armored vehicles, field pieces, Gen. Patton's jeep, small arms, and weapons captured in Korea.

Museum of Atomic Energy

The American Museum of Atomic Energy, Oak Ridge, Tenn., first and only museum devoted entirely to atomic energy, opened March, 1949. It is 20 mi. from Knoxville, and 20 mi. from Norris Dam. It can be reached by US 27, US 70, US 25W and state highway 61.

The museum is operated for the AEC by the Oak Ridge Institute of Nuclear Studies. It shows the development and peacetime application of atomic energy by demonstrations, poster animations, motion pictures, a 250,000-volt generator, a miniature atomic reactor, etc., and illustrates the use of isotopes in agriculture, industry and medicine. It makes exhibits on atomic energy available to sponsors and schools and mails atomic energy literature on request.

Delgado Museum, New Orleans

The Isaac Delgado Museum of Art in City Park, New Orleans, La., houses various collections and art objects including Italian Renaissance paintings given by Samuel H. Kress Foundation, the Chapman H. Hyams Collection of Barbizon and other salon paintings and statuary, the Morgan Whitney collection of carved jades and other hard stones, the Frank T. Howard collection of Greek vases and ancient Aegean glass, old and modern masterpieces of painting and sculpture and works by New Orleans and Louisiana artists, past and present.

Louisiana State Museum

The Louisiana State Museum, New Orleans, La., estab. 1906, consists of the Cabildo, the Presbytere, the old State Arsenal (Museum of War), the Jackson House, War Annex, the Pontalba historic house, set up as of 1849; Madame John's Legacy, an ancient residence, and the St. Ann Street Pontalba building. During 1954 840,529 people visited the Museum.

In the Cabildo, built in 1795, where the Louisiana Purchase was consummated in 1803, are exhibited period costumes, material of both World War I and World War II, and of the War of 1812. Mardi Gras costumes, Carnival favors, the history of music in New Orleans and important works of art. Particularly important are the portraits of French and Spanish governors, of the Montegut family, John Paul Jones, the Lafitte brothers, Generals Beauregard, Plache and Thomas, and the Napoleon Death Mask. The Museum is rich in 19th Century American portraits, clothes, industrial products, sculpture and photographs. There is a large Audubon collection.

Old Court House, Vicksburg

Old Court House Museum, Vicksburg, Miss., occupies the Warren County Court House, built by slave labor on a high eminence in 1853, filling an entire square. It is managed by the Vicksburg & Warren County Historical Society. The building has porticoes supported by 30-ft. fluted columns. The clock in the tower still marks the hours after 90-odd years. Here the Confederate flag was lowered and the U. S. flag raised on July 4, 1863, when Vicksburg fell.

Museum exhibits number over 5,000 items, including china and silver of early founders; Confederate relics, flags and manuscripts; receipts for slaves; handwritten field orders of siege of Vicksburg and map used by Gen. U. S. Grant; a wallpaper newspaper printed by the Federals July 4, 1863; pastels of early river packets and pictures of old Vicksburg; pioneer memorials.

Tulane Research Institute

The Middle American Research Institute of Tulane University, located near St. Charles Ave. in New Orleans, La., founded in 1924, is devoted to

research, education and public service related to Middle America, a region limited arbitrarily to Mexico, Central America, the West Indies, and the Bahamas.

The museum gallery features archaeological relics of the ancient civilizations of Middle America, including the Maya of Yucatan and Central America, the Aztec and earlier cultures of Mexico, and the circum-Caribbean tribes of southern Central America. Also on display are exhibits on modern Indians, and rare historical books and documents, including the Codex Tulane, a genealogy of Mixtec kings painted on a white deerskin scroll 14 feet long.

MIDDLE WEST

Cincinnati Art Museum

The Cincinnati Art Museum and the Art Academy of Cincinnati comprise the Cincinnati Museum Association in Cincinnati, Ohio. The museum contains the Mary M. Emery collection of 15th to 20th century paintings, the Mary Hanna collection of 17th to 19th century paintings, the J. J. Emery collection of European and American paintings, the Emilie Heine collection of 17th to 20th century paintings and the Herbert Greer French collection of print masterpieces from the 15th through the 19th centuries, also Nabataean antiquities from Khirbet-Tannur, Egyptian, Graeco-Roman, Medieval, Renaissance, modern and oriental sculpture; Islamic pottery and miniatures; Chinese ritual bronzes and paintings and a Louis XVI salon and its complete furnishings. Also a comprehensive collection of musical instruments and an outstanding collection of American Indian objects and art of primitive peoples. Important loans to the Museum include the U. S. Playing Card Company's comprehensive historical collection of playing cards and the Arthur Joseph collection of Meissen porcelain. The Museum library covers every period of art.

Cleveland Health Museum

The Cleveland Health Museum in Cleveland, Ohio, first of its kind in America, was incorporated in 1936 on a non-profit basis. Its hundreds of three-dimensional exhibits, largely designed and built in Museum studios, dramatize means and advantages of maintaining good health. The special health education department has a comprehensive film library and loan exhibits. The museum co-sponsors a weekly television program, Prescription for Living.

Cleveland Museum of Art

The Cleveland Museum of Art, Cleveland, Ohio, includes in its permanent collections and visiting exhibitions primitive, ancient, and classical art; various periods of Europe; Near and Far East; Pacific localities; Africa; North, Central, and South America; as represented in sculpture, painting, graphic processes, the decorative arts in furniture, tapestry, lace, metals, pottery and jewelry.

Richness of quality is to be found in its medieval collections, including an important portion of the great Guelph Treasure of the House of Brunswick; the Holden Collection of European paintings; the Louis XVI Rousseau de la Rotonde Room; the J. H. Wade Collection with its great decorative art and paintings and the extensive Severance-Prentiss collections. Recent additions include paintings by Monet, Van Dyck; a French primitive; 12th century Chinese landscape painting, a Japanese Wooden Angel, 7th century, Enamel Chasse, Limoges; French 18th century bed of Marie Antoinette, attr. to Georges Jacob.

Cleveland Natural History

The Cleveland Museum of Natural History, 2717 Euclid Ave., Cleveland, O., (founded 1920), has study collections of shells, insects, birds, mammals, fossils and ethnological material. Some of these are ranked among the top ten in the country. The Museum sponsors occasional expeditions to distant places and operates for the City of Cleveland its Zoo and Aquarium. A former Hamann Museum collection of Western Reserve University is on deposit here, and there is a Spitz Planetarium in operation continuously. The most outstanding specimens in the Museum are Devonian fishes, gems, the Johnstown Mastodon, and a series of well mounted small birds and mammals. There are many affiliated clubs, including Gem-Cutters, Telescope Makers, and others.

Cleveland Western Reserve

The Western Reserve Historical Society, 10825-10915 East Boulevard, Cleveland, Ohio, founded 1867, occupies two 70-room buildings opposite Wade Park. Among the museum collections are: early Cleveland dioramas; the Richard Warren Miniature rooms depicting the homes of one family from Plymouth Colony 1620 to 1880; an American Indian collection, including eight Indian settings; a log cabin interior and pioneer tools; the Bierce collec-

tion of Washingtoniana; a comprehensive lighting exhibit; early Western Reserve materials; a large costume collection; and the D. Z. Norton collection of Napoleonic and paintings by Archibald Willard, including his first large painting of the "Spirit of '76." A mill room, a Marine room, Shaker and Eskimo collections are shown.

The library of 19th Century American history has about 200,000 books, 100,000 pamphlets (many unique), 20,000 vols. of newspapers, an estimated 1,000,000 manuscripts, many pictures, and maps. In addition to the materials on the Western Reserve, which include the papers of the Connecticut Land Company, the collection contains much on other parts of Ohio and the eastern United States. Strong sections are: the William P. Palmer Civil War collection, including many Southern newspapers and other material on the Confederacy; Lincoln; railroads; the American Indian; Shaker manuscripts; a costume collection; exploration, travel and genealogy, including some 12,000 family histories and supporting local history.

Fort Recovery, Ohio

Fort Recovery, Mercer Co., Ohio, lies on the Wabash river one mile east of the Indiana line. (State Route 49). The reconstructed fort (1932), plus monuments (1912), library and museum commemorate the defeat of the American Army under Gen. Arthur St. Clair Nov. 4, 1791, by the Maumee Indians, and the Indian attack on the fort June 30, 1794, after it had been erected by Gen. Anthony Wayne. The monument contains bones of slain soldiers.

Fallen Timbers monument on the Maumee river, sw. of Toledo, O., commemorates the victory of Wayne over Indians and British Aug. 20, 1794.

Toledo Museum of Art

The Toledo Museum of Art was founded 1901 and endowed by Mr. and Mrs. Edward Drummond Libbey "for the benefit of all those who seek self-improvement." Its Museum School of Design has free art and music appreciation courses.

The Museum has one of the most complete collections of ancient glass. Its painting collection numbers more than 600 European and American works, including masterpieces by: El Greco, Velasquez, Goya, Holbein, Rembrandt, LeNain, Filippino Lippi, DiCosimo, Cezanne, Gauguin, Van Gogh, Picasso; Robert Peke, Samuel F. B. Morse, Gilbert Stuart and Benjamin West.

Sculpture includes Greek and Roman examples, pieces from the French and Spanish Gothic periods and the Italian Renaissance, as well as from the 19th and 20th centuries.

The Museum has a reference and lending library of 15,000 volumes, 25,000 slides; and a music lending library of 8,000 records and 400 scores.

Herron Institute, Indianapolis

The John Herron Art Institute of Indianapolis, Ind., including an art museum and a school in separate buildings, was erected 1906 from funds bequeathed to the Art Association of Indianapolis by John Herron. It is owned and operated by the Art Association of Indianapolis (organized 1883).

The collection of more than 11,000 objects is arranged in 12 galleries in the museum building, and represents the arts of countries throughout the world, from ancient to modern times. Most important paintings include Dutch 17th Century landscapes, work of American artists, and French post-impressionist pictures. The collection of ancient Chinese bronzes and porcelains of the Sung and Ming dynasties is exceptionally good.

Indiana State Memorials

Nancy Hanks Lincoln State Memorial and Lincoln State Park, near Lincoln City, Spencer Co., Ind., includes most of Tom Lincoln's farm and the grave of Nancy Hanks, mother of Abraham Lincoln. Two limestone buildings connected by a semi-circular cloistered walk are memorials to Lincoln and his mother.

Lincolnbloss State Memorial, home of Gene Stratton Porter, author and naturalist, from 1895 to 1913, is at Geneva, Ind., where swampy, heavily timbered land, since drained, provided Mrs. Porter with many of her stories. The Gene Stratton Porter State Memorial, in Wildflower Woods, from Sylvan Lake, near Roma, City, Ind., was her home from 1913 to 1918. Both houses, two-story log cabins, were designed by Mrs. Porter.

Territorial Capitol State Memorial, Vincennes, Ind., is a two-story frame house with green shutters and a stoop porch, the seat of Indiana Territory, 1800 to 1813, reopened to the public 1950. Wm. Henry Harrison, 9th President, was the first governor of the Territory.

Spring Mill Village, a restored pioneer settlement dating back to 1814, is located in Spring Mill State Park 3 mi. east of Mitchell, Ind. It contains a stone grist mill with overshot wheel and corn; wooden gears and huge stones still grinding corn; postoffice, general store, apothecary's shop, tavern, distillery, saw mill and houses; also hat

shop where pioneer "bee gum" hats were made.

Dearborn, Mich., Exhibits

The Henry Ford Museum and Greenfield Village, Dearborn, Mich., near Detroit, were founded by Henry Ford and dedicated to Thomas Alva Edison. The Henry Ford Museum is housed in reproductions of Independence Hall, Congress Hall and Old City Hall, Philadelphia, and its 14 acres include exhibits of antique automobiles, locomotives, fire engines, farm implements, furniture, glass, silver, etc.

Greenfield Village has over 100 separate buildings illustrating 19th Century America, including the laboratory and other buildings used by Edison at Menlo Park, N.J., where he invented the electric light; a silk mill, a grist mill, a cooper shop, a blacksmith's shop, a shoemaker's shop, a Cape Cod windmill, etc., moved from original sites; the Logan County, Ill., courthouse in which Lincoln practiced law, containing relics such as the chair he sat in when shot; the Wright Brothers cycle shop from Dayton, Ohio; the birthplaces of Henry Ford, William Holmes McGuffey, Luther Burbank and Orville Wright; the house in which Noah Webster prepared his dictionary. There are also machine shops, a village fire house, an inn of stagecoach days, a covered bridge from Pennsylvania, a showboat and many other historic houses and objects intended to recall development of industries and cultural life in the United States.

Detroit Historical Museum

The Detroit Historical Museum, Woodward at Kirby, was founded by the Detroit Historical Society and is maintained by the City of Detroit.

Four main exhibit areas present (1) The Streets of Detroit—full scale street scenes of two periods; (2) Metropolitan Services, with exhibits of cultural, recreational aspects of life in the city and the work of city departments and public utilities; (3) Social History, emphasizing home life and standards of living of typical citizens; (4) Industrial exhibits of the development of commerce and industry over 250 years; (5) Hall of Patriotism, and the Hall of Citizenship.

The Museum of Great Lakes History is housed in the schooner J. T. Wing, the last commercial schooner on the Great Lakes, beached on Belle Isle, Open April through September.

Fort Wayne Military Museum, 6053 W. Jefferson, includes the bastions, casemates, tunnels, barracks building and powder magazine with associated exhibits on military history of this area.

Detroit Institute of Arts

The Detroit Institute of Arts, 5200 Woodward Avenue, Detroit, Mich., is a municipally owned museum of art. Its aim is to represent within one building the whole meaning of the arts in human society since the first appearance of the instinct of design. It represents in orderly historical sequence every stage of human culture and every great art epoch from prehistoric man to the 20th century.

Within this general plan the most distinguished sections are the arts of the Italian Middle Ages and the Renaissance, the arts of the Netherlands from the fourteenth to the seventeenth centuries, the baroque and rococo period of European culture, the American colonial period and the romantic period, the European twentieth century arts, the arts of the Near East and Far East.

The collection consists of more than 1,000 paintings, a fine collection of sculpture and examples of furniture, goldsmiths' work, glass, graphic arts, textiles.

Recent additions include Rodin's Eve and Houdon's Mme. Thelusson; pre-historic Irish gold jewelry; arms and armor from the Hearst collection; a Flemish tapestry, a French toilet service, 8 pieces of Sevres and Vincennes porcelain; works by Guardi, Credi, Constable, Fragonard, Ghirlandajo, Gentileschi, Kokochka, Lawrence, Mino da Fiesole, Sassetti.

Chicago Academy of Sciences

The Chicago Academy of Sciences, Museum of Natural History, in Lincoln Park at 2001 N. Clark St., Chicago, Ill., was founded 1857 for "the promotion and diffusion of scientific knowledge."

Emphasis in the public exhibits is placed upon the natural history of the Chicago region. The Chicago Environs Hall is composed of large habitat groups illustrating ecological relationships in replicas of typical dune, marsh, prairie, and woodland sites in the vicinity of Chicago. Study collections also represent many other areas in North America.

Adler Planetarium, Chicago

The Adler Planetarium and Astronomical Museum, on Chicago's lake front, was the first institution of its kind in America. It was presented to the people of Chicago by Max Adler, May 12, 1930, and is operated by the Chicago Park District. Although commonly referred to as the Planetarium, it is really an Astronomical Museum, of which the Planetarium instrument is the principal exhibit.

The astronomical museum contains an unexcelled collection of antique astronomical and mathematical instruments among which are astrolabes, nocturnals, armillae, celestial globes, sun dials, early telescopes, etc., beautifully made by the most skilled craftsmen of the 16th, 17th and 18th centuries as well as modern instruments, together with exhibits explaining various phases of astronomy. Set into the walls of the main floor corridors are 72 large transparencies of astronomical photographs made with the world's foremost telescopes.

Art Institute of Chicago

The Art Institute of Chicago, on Michigan Ave., Chicago, founded 1879, is one of the great galleries and educational centers of the nation. Its paintings represent major work in many schools. The Ryerson Library of Art and the Burnham Library of Architecture have over 70,000 vols., many prints, photographs and lantern slides. In 1953 the attendance reached 1,053,304.

Many masterpieces adorn its walls, especially of French, Dutch, Flemish, Italian and American art, including 4 El Greco paintings, Saurat's La Grande Jatte, Rembrandt's Girl at Open Half-door, 4 panels by Tiepolo, Adoration of the Magi by van Leyden, Edouard Manet by Fantin-Latour and other famous work by Monet, Crivelli, Degas, Courbet, Winslow Homer, Poussin, Titian, Constable, Corot, Innes, Gilbert Stuart and others. Similarly many masters are represented among the prints and drawings. There is a large Oriental Dept. and an extensive Decorative Arts Dept., with the famous Thorne miniature rooms, and many examples of china, lusterware, rugs, glass, pottery and vestments.

John Crerar, Chicago

John Crerar Library, Michigan Ave. and Randolph St., Chicago, has collections in every branch of science, technology and medicine, including the Senn medical, Chanute on aeronautics, DuBois Reymond on comparative physiology, Meissner on physiology, Baum on historical medicine, Martin on gynecology, Grulee on pediatrics, Prande on Spallanzani, private papers of Ludwig Hektoen and James B. Herrick. It has collections of books on cremation, cooking, international congresses and expositions and is especially strong in aeronautics, chemistry, radio, medicine, dentistry, pharmacy, botany, zoology, biology, engineering, railroads, mining and geology, and in collections of scientific periodicals and indexes.

Chicago Historical Society

The Chicago Historical Society, Chicago, Ill., incorporated 1857, is located in Lincoln Park. While specializing in the history of Chicago and the Midwest it includes exhibits of national importance.

In the presentation of exhibits, the Society has made extensive use of the principles of visual education. The story of American History is given in the chronological arrangement of period rooms. Each exhibit in the building is displayed so as to deal with a specific subject and its related facts as a unit. One of the 18 period rooms is the Senate Chamber, a reproduction of the original in Congress Hall, Philadelphia, the seat of the Government of the United States prior to its transfer to Washington (1800). Authentic relics owned by George and Martha Washington are shown.

Lincoln Hall contains one of the greatest collections of Lincolniana in existence, including personal effects and over 1,000 letters, documents. A corridor lined with etchings, lithographs and engravings of Abraham Lincoln, leads to the Lincoln Parlor, a reproduction of the front parlor of the Lincoln Home in Springfield, Ill. There is also an exact reproduction of the bedroom in which Lincoln died, including bed and furniture.

The Gilpin Reference Library has available general Americana although the emphasis is placed upon the history of Chicago and the Old Northwest. The book collection of 80,000 volumes and pamphlets embraces current historical works, early America, reports of foreign travelers, pioneer sketches of political development.

Lincoln Park Zoo, Chicago

The Lincoln Park Zoological Gardens in Chicago, Ill., operated by the Chicago Park District, covers 25 acres, exhibits more than 2,600 mammals, birds and reptiles collected from all over the world. Annual attendance is 4,000,000.

The exhibits are housed in five buildings, five barns, 30 outdoor yards and enclosures, nine dens for wolves and foxes, nine bear pits, raccoon pit, outdoor pool for sea lions, penguin pool, wild fowl pond, bird of prey cages, pheasantries, flightless bird section, and the world's only Zoo-rookery. This is a landscaped rock garden with a meandering stream in its center. There are no fences, only a water barrier, and visitors may photograph birds without interference of wires and bars. Included among the many winged creatures are flamingos, cranes, storks, swans and peacocks. A

"Zoo Answer Shop" has been established, at which visitors may ask questions about the various members of the animal kingdom.

The Zoo became famous as the home of Bushman, called the most perfect specimen of gorilla in captivity until his death on Jan. 1, 1951, at the age of 22 years, 9 months. In his prime Bushman stood 6 feet, 2 inches and weighed over 550 lbs. Sinbad, youngest of the four young gorillas flown over from Africa in October, 1948, at 6 years weighed 115 pounds, slightly more than Bushman at the same age. The 4 young gorillas and their ages on Mar. 1, 1955, were Sinbad, 7 years; Rajah, 7½ years; Irwin Young, 8½ years; and Lotus, the only female of the group, 9 years.

Chicago Natural History

Chicago Natural History Museum, Roosevelt Road and Lake Shore Drive, Chicago, presents a comprehensive survey of the races of man as well as flora, fauna and geology. The exhibits and scientific study collections are divided into four major departments: anthropology, botany, geology, zoology. These include many subdivisions. Outstanding among them are the Hall of the Stone Age; the Races of Mankind, a series of sculptures in bronze and stone by Malvina Hoffman; the North American Indian groups and exhibits of Ancient Egypt, Babylonia, Etruria and Rome; China, Tibet and other parts of Asia; Africa and islands of the South Pacific. The Hall of Babylonian Archaeology contains the results of collection on the site of the ancient city of Kish.

The Hall of Plant Life and the botanical exhibits give a survey of the plant world from the lowest microscopical forms. A large diorama reproduces an alpine meadow in the Rocky Mountains; other dioramas represent spring flora in an Illinois woodland, seashore plants of the intertidal zone of the Bay of Fundy, fresh water aquatics from South America, and a South African desert scene displaying one of the most unusual of woody plants, the two-leaved tumbao. Two halls are devoted to plant economics and two to North American and foreign woods.

The museum has the world's largest collection of meteorites and an extensive collection of fossil skeletons of prehistoric animals, as well as life-size dioramas showing them in their native habitats. The Carl E. Akeley Memorial Hall contains many mounted game animals collected by this naturalist. The first specimens of the giant panda ever to reach the U. S. are shown.

Newberry Library, Chicago

The Newberry Library, Chicago, Ill., was founded in 1837 by a bequest from Walter Loomis Newberry and incorporated 1893 as a free public reference library. Its books and manuscript collections, about 725,000 in number, fall within the general field of the humanities and include texts and comments on thought and culture since classical times. Though emphasis has been on English and American literature and history and on the Renaissance, later Western European collections are also good, and in some respects unusual, for pre-19th century periods. The Library is especially strong in such out of the way subjects as the Arthurian legend, old Gaelic texts, 16th century imprints, 17th century novels and political miscellanies, genealogy, linguistics, and pre-1800 reference works.

The Edward E. Ayer Collection of about 80,000 vols. is concerned with the colonial and frontier history of the Americas, the anthropology of the Indians and of the Pacific natives, and the history of their relations with the white man. The Philippines collection is one of the finest extant. The William B. Greenlee Collection of 6,000 vols. concerns the history and literature of Portugal.

The John M. Wing Foundation is one of the strongest collections of its kind on the history of printing and calligraphy. The Library's music collection is especially rich in classical scores.

The Library's collections on the social, economic and cultural history of the Midwest include the central-office papers of the Chicago, Burlington and Quincy Railroad, 1850-1901, and of the Illinois Central Railroad, 1851-1906, the correspondence of Victor F. Lawson, Edward Price Bell, Carter Harrison, and other Chicago leaders and letters and manuscripts of Sherwood Anderson, Floyd Dell, F. F. Browne, Henry B. Fuller, Joseph Kirkland, Mary Hartwell Catherwood, Eunice Tietjens, and Henry Kitchell Webster, and the calligraphic inventor Platt R. Spencer.

Oriental Institute, Chicago

The Oriental Institute of the University of Chicago is a research institute devoted to the study of the ancient civilizations of the Near East. It discovers, records, and studies the cultural monuments particularly of ancient Egypt, Palestine, Syria, Anatolia, Mesopotamia, and Persia and interprets their importance for the development of Western civilization.

Five exhibition halls in James H. Breasted Hall.

the Institute's headquarters, present collections of objects representative of the art, architecture, religion, literature, and handicrafts of the ancient Near East. The objects include colossal sculptures such as a 40-ton human-headed winged bull from the Assyrian palace at Khorsabad, a 16-foot statue of Tutankhamon from Egypt, and a gold treasure from Persia. The exhibits are free.

Science and Industry, Chicago

The Museum of Science and Industry, in Jackson Park, Chicago, was founded by Julius Rosenwald and contains numerous exhibits devoted to scientific and industrial processes, illustrating the theme inscribed above the central dome: Science Discerns the Laws of Nature; Industry Applies Them to the Needs of Man. The Museum occupies the restored Fine Arts building of the Columbian Exposition, 1893, an example of classical adaptation.

Many of the exhibits place the spectator in the midst of the setting or enable him to operate devices demonstrating activities. Unusual displays are those of an Illinois coal mine, a Santa Fe electric railway model, an operating gray iron foundry that makes castings, the evolution of the automobile, and the mechanized operation of a modern farm. The world's first moving rubber sidewalk is part of the new story of rubber. The World of Hardwoods exhibit is a collection of rare and useful woods and how they were used. A large section demonstrates the application of electrical energy and the latest electronic developments. Public health is stressed in polio, cancer, heart and resuscitation exhibits.

Now open to visitors is the U-505, former German submarine captured on the high seas during World War II. The interior of the U-505 has been restored to operating condition and can be inspected.

Shedd Aquarium, Chicago

The John G. Shedd Aquarium, 1200 South Lake Shore Drive, Chicago, Ill., displays approximately 10,000 aquatic specimens from the rivers and oceans of every continent. Here the visitor may see fishes from the sea horse to the shark, in their natural marine surroundings. There are turtles, salamanders, invertebrates. The specimens vary from 325 pound groupers to mosquito fish, 1 inch long.

Illinois State Historical

Illinois State Historical Library, Centennial Bldg., Springfield, Ill., has over 95,000 vols. and numerous manuscripts. The 11,000 vols. of newspapers are supplemented by 6,300 reels of microfilm. The Henry Horner Lincoln collection contains 6,000 books and pamphlets and the Alfred W. Stern Civil War collection is one of the largest in the country. There are over 1,000 original Lincoln manuscripts; and c. 350 original U.S. Grant manuscripts. The library also specializes in Illinois history, Mormons in Illinois, mid-west Americana and genealogy. The State Historian, Harry E. Pratt, also is secretary of the Illinois State Historical Society, a department of the library. Independent of this is the Illinois State Library, administered by the secretary of state.

Layton Gallery, Milwaukee

Layton Art Gallery, Milwaukee, Wis., was organized, incorporated and endowed by Frederick Layton (1881). Its permanent collection includes paintings by John Constable, George Romney, Sir Peter Lely, Jacob Ruysdael, Thomas Couture, Corot, Bastien-Lepage, and such American artists as Rembrandt Peck, Albert Bierstadt, Asher B. Durand, George Inness, Ralph Blakelock, Thomas Moran, Warren Davis, Frederic Remington, Eastman Johnson, Abbott Thayer, Hovsep Pushman, Winslow Homer, and Gerrit V. Sinclair, Karl Priebe, Carol Blanchard, Forrest Flower, Ben Shahn, Edmund Lewandowski, Richard Jansen, Max Kohn, Charles Thwaits, Rufino Tamaya, Alfred Sessler and Don Kingman.

Wisconsin State Historical

The Library of the Wisconsin State Historical Society, Madison, Wis., estab. 1846, is the largest of any American historical society, and contains upwards of 347,205 vols. and periodicals; 367,206 pamphlets; 1,875,000 manuscript items and 3,916 bound manuscripts and 12,000 reels of microfilm. There is a large genealogical collection. Although collecting Wisconsin records is its primary purpose, the library serves the University of Wisconsin in the field of American history. Foremost among its collections are 500 vols. of manuscripts relating to the old West gathered by Dr. Lyman Draper. The McCormick collection was obtained 1951 from Chicago. Many manuscripts deal with labor. The state archives and the state museums are included; the society conducts an annual summer institute for local history and the American History Research Center.

Minnesota Historical, St. Paul

On Capitol Hill in St. Paul, Minn., adjacent to the State Capitol, the Minnesota Historical Society, chartered 1849 by the first Minnesota territorial legislature, is the oldest incorporated institution in the State. The museum of the society, with its varied displays, shows how Minnesotans of the past lived in terms of the tools and implements they worked with, the clothes they wore, the furnishings they used in their homes, and conveyances in which they traveled.

The library contains over 200,000 items, including an extensive collection of materials relating to the Scandinavian elements in the United States; and has one of the largest collections of genealogical and biographical publications in the country.

In the manuscript division are over 2,000,000 items, covering three centuries of Minnesota history and including letters, diaries, and other documents left by men and women who have played some part in making Minnesota. The picture department contains over 450,000 paintings, photographs, and prints.

Minneapolis Institute of Arts

The Minneapolis Institute of Arts, Minneapolis, Minn., estab. 1915, is associated with the Minneapolis School of Art, both sponsored by the Minneapolis Society of Fine Arts. It has extensive collections representing the fine and decorative arts from ancient times to the present, and is especially noted for its 15th to 16th century Flemish tapestries and early 16th century French Artemesia series, Early American silver, pre-Columbian materials from Mexico, Central and South America, and French, English and American period rooms. Persian pottery, Cambodian sculpture, Chinese porcelains and bronzes and antique gold jewelry further give distinction to the remarkable Far Eastern section.

Among the most famous paintings in the Institute are works by Titian, Rembrandt, El Greco, Rubens, Chardin, Goya, Degas, Matisse, Gauguin, Cezanne, Renoir, and many other masters. Works of sculpture include Rodin's the Age of Bronze, Lipchitz' Matador, Maillol's the Three Graces, an Egyptian 6th dynasty funerary stela and an Assyrian bas-relief.

Walker Art Center, Minneapolis

The Walker Art Center, Minneapolis, Minn., developed over collections of oriental ceramics and jade and European and American paintings begun in 1879 by Thomas Barlow Walker, pioneer lumberman. It has extensive collections of contemporary paintings, sculpture and prints. The Center conducts exhibitions of 19th and 20th century art, including photography and design, one-man shows and historical exhibits, and supplements exhibitions with classes for adults and children, workshops, lectures and films. It publishes the Design Quarterly.

At Davenport, Iowa

Davenport Public Museum, 704 Brady Street, Davenport, Ia., established 1867, as Davenport Academy of Sciences, contains the hall of History of Man in the area from earliest Indians to the Steamboat era; excavations from Hopewell mounds, Capt. W. P. Hall collection of Missouri-Arkansas Indian pottery, mineralogy, paleontology, zoology and botany; Herbarium of 20,000 sheets, C. A. Ficke collection of Peruvian pottery ethnological collections from oriental civilizations, ancient Egypt, Greece, Rome, and recent Eskimos. The library of Science, History and Art has 75,000 vols.

Davenport Municipal Art Gallery, 120 W. Fifth St., estab. 1925, originated with paintings collected by C. A. Ficke, including outstanding examples of Mexican colonial, and has since expanded its paintings of European and American schools. It has frequent exhibitions of wood block prints, water colors, portraits, ceramics, photographs and costume designs, and annually holds the Quad-City artists' exhibition (Davenport, Ia., Rock Island, Moline and East Moline, Ill.).

Des Moines Art Center

The Des Moines Art Center, in Greenwood Park, Des Moines, Ia., estab. 1948, has collections of American contemporary painting and sculpture, also examples of work by Goya, Rodin and oriental art. The Center maintains a reference library, daily classes in drawing, painting, sculpture, ceramics, weaving, and gives lectures, concerts and motion pictures. The building was designed by Eliel Saarinen and the court has a bronze fountain sculpture by Carl Milles.

Iowa History and Archives

Iowa State Department of History and Archives occupies the State Historical Bldg., East 12th St. and Grand Ave., Des Moines, Ia. It preserves the history of Iowa from aboriginal days, containing geological specimens, fossil coal plants, utensils of Indians and white pioneers, a complete record of birds, animals, insects, trees; a valuable manu-

script division, with letters from authors, explorers, statesmen; war histories, and G. A. R. collection, autographs, and bound newspapers.

Iowa State Historical

The State Historical Society of Iowa, Iowa City, Ia., incorp. 1857, is housed by the State University and contains 104,000 books and 7,200 bound vols. of newspaper files. It specializes in Iowa and midwestern history, publishes a monthly, the *Palladium*, a quarterly, *Iowa Journal of History*, and books on Iowa history, biography and government. It is supported by state appropriation, and has 5,000 members and 350 depositories and exchanges.

Norwegian-American Museum

The Norwegian-American Historical Museum, Decorah, Iowa, estab. 1877, preserves historical and cultural objects relating to the pioneers who came from Norway. Household utensils, silverware, tapestries, decorative chests; pioneer life exhibits; memorabilia of Civil War veterans are shown; there is also the outdoor museum of two pioneer homes, a schoolhouse, a mill house and a drying house, all built of logs.

St. Joseph Museum

St. Joseph Museum, St. Joseph, Mo., founded 1927, a municipal project, occupies a special place among museums for its emphasis on natural history, wildlife of its region and materials related to Indian tribes, from Alaska to Florida. Ethnological exhibits come from the Far East, Africa and the Arctic, while birds and mammals represent both rare and extinct species and include numerous examples of American fauna. The Museum directs educational and avocational activities.

Academy of Science, St. Louis

The Academy of Science of St. Louis, 4642 Lindell Boulevard, St. Louis, Mo., was founded 1856. The museum serves as a nucleus from which larger, more comprehensive museums may develop in the fields of anthropology, natural history, science and industry. The museum's most outstanding collection is the Whelpley Collection of Indian Relics. The library contains some 75,000 volumes of scientific periodicals.

City Art Museum, St. Louis

The City Art Museum of St. Louis, Mo., municipally owned, is located in Forest Park. Its art collections extend from those of ancient Assyria and Egypt to the present. There are outstanding examples of work by Holbein, Rembrandt and Zurbaran, and the Barberini Satyr represents the peak of Renaissance sculpture.

The historic phases of European and American decorative arts are similarly outlined in furniture, textiles, ceramics and other objects. Included are typical medieval, gothic, Hispano-Moresque, Jacobean, Queen Anne, Georgian, Louis XV and American rooms from Georgian to Victorian times. Unusual among the European rooms is the Gothic Court with its great XVI century stairway from Morlaix, France. Sculpture, pottery, textile and other crafts illustrate the primitive arts of America and Africa.

The Oriental collections contain sculptures, jades, textiles and paintings representative of the historic periods of Far Eastern culture; one of the great collections of Chinese ceramics in America, and another of early Chinese bronzes. Among the Chinese sculptures, porcelains and early bronzes are specimens ranking among world masterpieces. From the Near East are carpets, velvets and other textiles, ceramics, metalwork, etc., originating in Persia and the adjacent regions. The classical galleries contain Greek sculptures in marble and bronze, a Greek helmet which is possibly the finest extant, ceramics, glass, mosaics and gems. Roman portrait busts, ceramics, glass and metalwork.

Kansas City Museum

The Kansas City Museum, Kansas City, Mo., municipally owned, is modernizing its exhibits of regional and natural history. Eskimoland permits school groups to enter igloo and hear recorded sounds of the north. Indianland, based on an Osage Indian dwelling, and Pioneerland, using Daniel Boone's log cabin, are new additions. The North American Mammal wing opened with an exhibit of 3 Kodiak bears. The Museum exhibits dioramas of Kansas City. It has a small planetarium and cooperates with school and community groups in educational programs.

Missouri Historical Society

The Missouri Historical Society, Jefferson Memorial Bldg., Forest Park, St. Louis, has a free museum open daily, and a library restricted to research. Historical memorabilia of early St. Louis (founded 1764), the Lewis and Clark expedition, the steamboat era, are found in the museum. The Chas. A. Lindbergh collection commemorating his flight to Paris in the Spirit of St. Louis plane in 1927 comprises 15,000 items. The library con-

tains Spanish colonial archives, 1,000 Jefferson letters, Mississippi Valley history, 1,000,000 manuscripts, old photographs and material relating to the history of advertising in the Middle West.

Nelson-Atkins, Kansas City, Mo.

The William Rockhill Nelson Gallery of Art and Mary Atkins Museum of Fine Arts is in Kansas City, Mo. The fields of art represented include paintings, sculpture, decorative arts, textiles, tapestries, period rooms, ceramics, etc. The collections cover all periods from pre-classical to modern times and many world-famous artists are represented. The Samuel H. Kress Foundation includes Italian Renaissance painting and sculpture. There is a comprehensive collection of Chinese art.

Eisenhower, Abilene

The original Eisenhower home in Abilene, Kans., containing all the authentic furnishings as they were left when Mrs. Eisenhower, mother of the President, died in 1946, and a new museum building of native stone, are the property of the Eisenhower Foundation to Promote Citizenship and to Honor Veterans of America's Wars. The museum is the repository of the President's trophies and medals, over 3,000 items. Five Eisenhower sons grew up in the home and their pictures and belongings are in place there. The two buildings are open to the public.

Kansas State Historical Society

The Kansas State Historical Society, Topeka, Kan., was founded (1875) by Kansas newspaper men. The society's collection of bound volumes of American newspapers, now totaling more than 68,000, ranks second only to the Library of Congress. In addition newspapers have been photographed on more than 4,800 reels of microfilm. There are 2,000,000 official documents of the territory and state dating from 1854 in the archives division, and the private manuscript collection numbers 300,000 pieces. The Society's library includes 390,000 volumes, periodicals and pamphlets, and 10,000 printed maps, atlases and charts showing the development of Kansas during three centuries. There are more than 26,500 photographs and paintings of Kansas subjects. The museum also contains nearly 35,000 objects including a Spanish sword believed to date from Coronado's Kansas exploration of 1541, and a 1912 airplane built in Kansas.

The Society also is trustee of the Shawnee Methodist Mission established 1830 near present Kansas City, the Kaw Methodist Mission (1850) at Council Grove, and the First Territorial Capitol (1855) on the Fort Riley military reservation.

Univ. of Kansas Museums

Natural History—The Museum of Natural History of the University of Kansas, Lawrence, Kan., in Dyche Hall, is devoted to vertebrates (fossil and recent), Amollusks and archaeology. In addition to extensive research collections there are dioramas and habitat groups. A panorama of North American mammals is 550 feet long and presents mammals in typical attitudes in their natural habitats from the Arctic to the Tropics. The horse, Comanche, lone survivor of Custer's battle of the Little Big Horn is on display.

The University of Kansas Museum of Art, Lawrence, Kan., contains a large collection of European and American paintings and sculpture. The Thayer collection of European and Oriental decorative arts, medals and plaquettes from the Renaissance to the present, the Jones collection of timepieces. Noteworthy are a large wood Madonna by Riemenschneider, two rare 18th century German wood sculptures; paintings by Sully, Rombouts, Troyon, Solimena, Palma Giovane, Seest, Van Tilborgh, Winslow Homer.

The Snow Entomological Museum, named in honor of a former chancellor of the University, Dr. Francis Huntington Snow, now contains 1-400,000 insect specimens. The research collections are particularly rich in the Hemiptera, Homoptera, and in the bees. Also included are all groups of insects, as well as biting arthropods such as chiggers.

Joslyn Art Museum, Omaha

The Joslyn Art Museum in Omaha, Nebr., occupies a building of Georgia pink marble (1934). Surrounding the patio and concert hall are 10 galleries. The permanent collection of paintings, furniture, and other art objects are shown in the south galleries in period arrangement from the Middle Ages to the present day. Paintings, drawings, prints, photographs, industrial arts and architecture make up monthly exhibits.

Two permanent installations are featured on the ground floor: The Early West and Arts of the North American Indians. Other exhibit rooms accommodate displays including Oriental and Classical groups and the Graphic Arts. The Mu-

seum has a substantial art reference library and art classes for adults and children.

Nebraska State Historical

Nebraska State Historical Society, Lincoln, Neb., founded 1878, in September, 1953, entered its new building at 1500 R St. The museum contains Indian artifacts and materials from northern plains and by exhibits and other techniques portrays Nebraska from prehistoric times to now. There is a library of 40,000 books, 37,000 vols. of newspapers and pioneer mss. The society publishes Nebraska History and three other series.

SOUTHWEST

Oklahoma Historical Society

Oklahoma Historical Society, founded 1893, occupies its building on the State Capitol grounds at Oklahoma City, Okla. Its museum contains over 15,000 objects relating to Indian and Mound cultures. It has a historical library of 25,000 vols., the archives of the Five Civilized tribes and other Indians, a newspaper collection and Union and Confederate memorial rooms. There are portraits and sculptures of distinguished Oklahomans. The silver service of the battleship Oklahoma, sunk at Pearl Harbor in 1941, is on display.

Tulsa, Okla.

Philbrook Art Center, Tulsa, Okla., opened 1939 by Southwestern Art Assn., conducts exhibits and educational projects and possesses, besides paintings of European and American masters, extensive collections representing Indian and Spanish colonial cultures, including pottery, basketry, paintings, artifacts. It conducts an annual competition of paintings by artists of Indian or Eskimo extraction and an exhibition in May of contemporary American Indian paintings.

Alamo, San Antonio

Of the five old Spanish Missions in or near San Antonio, Tex., the greatest renown attaches, for patriotic reasons, to the Alamo now preserved as the Cradle of Texas Liberty. This was the Mission de San Antonio de Valero, founded 1718 and named for St. Anthony of Padua and the Marquis of Valero, Spanish viceroy. Alamo is Spanish for cottonwood. Church and convent were surrounded by a wall 8 ft. high, 2½ ft. wide. In February, 1836, Santa Anna and 1,000 Mexicans besieged 184 Texans under Col. William Barrett Travis in the Alamo. They fought to the last man. Davy Crockett and Col. James Bowie dying with them, Mar. 6, 1836. The bodies were burned on the site. The church, in ruins, was bought about 40 years ago from the Catholic church by the State of Texas. The building has been restored, the Plaza cleared and the whole is a memorial to Texas defenders.

San Antonio also has Mission San Jose (1720) called Queen of the Missions; Concepcion (1730), San Juan Capistrano (1731) and San Francisco de la Espada (c. 1730), all holding services.

Hall of State, Dallas

The Hall of State was erected with state funds at a cost of \$1,200,000 and is located in Fair Park in Dallas, Texas. It was built in commemoration of Texas heroes as part of the centennial program in 1936. Later leased by the state to the City of Dallas, it has been the home of the Dallas Historical Society (founded 1922) since 1938.

At the entrance are the heroic figures of Sam Houston, William Barrett Travis, Stephen Fuller Austin, James Walker Fannin, Mirabeau Buonaparte Lamar and Thomas Jefferson Rusk.

Murals are by J. O. Mahoney Jr. (South Texas Room), Arthur Neindorff (North Texas Room), Olin H. Travis (East Texas Room), Tom Lea (West Texas Room), and Eugene Savage, Reveau Bassett, and Buck Wina Jr. (Hall of the Six Flags).

Above the central entrance stands the heroic statue of a Tejas warrior, by Allie Tennant. Pompeo Coppini made the figures of Travis, Rusk, Houston, Austin, Lamar, and Fannin in the Hall of the Heroes. A portrait bust of Fleet Admiral C. W. Nimitz, by Felix de Weldon, was added to the Hall of the Heroes in 1945. A statue of a Cowboy, carved of wood by Dorothy Austin, is in the West Texas Room.

The Texana Reference Library and Archives are open to qualified students.

San Jacinto Museum, Texas

San Jacinto Monument and Museum are located on San Jacinto battleground, a state park of about 460 acres, 22 mi. east of downtown Houston, Texas, scene of the battle on April 21, 1836, between the Texan and Mexican armies, which won independence for Texas. The memorial, constructed in 1936-1939 with federal and state funds, commemorates the heroes of the Battle of San Jacinto and all other patriots. The monument and museum are operated by the San Jacinto Museum of History Association, a non-profit, educational organization. The monument, 570 feet high, is built of rein-

forced concrete faced with Texas fossilized buff limestone. The museum proper which forms the base of the building, is 124 feet square. On the outside of the base are eight massive panels on which is engraved a brief account of the history of Texas. Above the panels, at the base of the shaft, which is 48 feet square at its foundation, tapering to 30 feet square at the observation tower, is a frieze by Wm. M. McVey, depicting significant phases in the Anglo-American colonization of Texas. At the apex is a star 34 feet high.

The museum has approximately 500,000 pages of manuscripts including papers of Sam Houston, Lamar and other patriots, and documents relating to the history of Mexico and Texas.

The relic collection, 9,000 items, includes royal, church and private seals, uniforms and vestments, coins, medals and materials made of gold, silver, copper and iron. The picture collection has 1,500 items. The library has 20,000 publications and 85,000 issues of newspapers. The museum's permanent exhibits present ten periods of Texas history, from aborigines to the modern state.

Texas Memorial Museum

The Texas Memorial Museum in Austin, Tex., is directed by the Regents of The University of Texas. Exhibits cover anthropology, botany, geology, history, and zoology.

The anthropology exhibits show the tools, utensils, weapons, ornaments and costumes of several races of man and many tribes. Interesting collections of objects of the Chinese, Japanese, Javanese, African Negro, and American Indian are shown. Many cases are devoted to the stone and flint work of the Texas Indians. Others contain numerous specimens of Caddoan and Asinai pottery, smoking pipes, and shell ornaments. Seven dioramas represent the domestic life of Texas Indian tribes. The museum contains an excellent collection of blankets and baskets of the American Indians.

Exhibits of vertebrate fossils in the Museum include several unusual skeletons of extinct animals from the several geologic periods in Texas. Four cases show exhibits of early man, represented by artifacts associated with extinct animals, such as the Columbian elephant, the American horse, and the long-horned bison. Maps show the land areas of Texas during successive geologic periods.

Outstanding exhibits in the history division include the gavel of former Vice President John Garner; the first printed copy of the Declaration of Texas Independence, the original President Polk Warrant, dated Dec. 29, 1845, extending the laws of the United States over the state of Texas; and the Wooten fire-arm collection.

Arizona State Museum

The Arizona State Museum in Tucson is chiefly anthropological, stressing particularly the archaeology and ethnology of the Southwest. However, there are historical and natural history materials. There are over 100,000 specimens in the Museum. Outstanding exhibits and collections include:

Western Apache exhibit; tree ring exhibit, including a 10-foot section of Giant Sequoia with over 1700 annual rings; prehistoric Southwestern textile, pottery, stone and bone work. One alcove devoted to Ventana Cave, a stratified record of Man's occupancy for about 10,000 years.

Museum of Northern Arizona

The Museum of Northern Arizona, situated three miles north of Flagstaff, Ariz., is operated by the Northern Arizona Society of Science and Art, Inc. The Museum library contains 4,000 books, 8,500 pamphlets, 200 journals, 1,200 maps.

The permanent exhibits, exclusively devoted to Northern Arizona, present the results of research in graphic form: earth history, animals and plants, and the history and activities of the human inhabitants, prehistoric and contemporary. There are study collections of 68,000 specimens.

Museum of New Mexico

The Museum of New Mexico, in Santa Fe, N. M., has its headquarters in the historic Palace of the Governors, oldest public building in the United States, built 1610, on the Plaza of Santa Fe.

The exhibits of the Museum are devoted principally to the Southwest. The old palace contains the archaeological exhibits and Spanish colonial and American territorial displays and is the headquarters of the Historical Society of New Mexico. Other buildings are the Art Gallery, containing exhibits of the work of southwestern artists; the Hall of Ethnology, illustrating the living Indian of the Southwest and his cultural attainments; the Laboratory of Anthropology, used mainly for research projects and housing important anthropological collections; and the Museum of International Folk Art.

Navajo Art, Santa Fe

The Museum of Navajo Ceremonial Art in Santa Fe, N. M., occupies a site of 10 acres in the foothills of the Sangre de Cristo mountains.

Designed as an interpretation in modern form of a Navajo ceremonial hogan, the building itself is an integral background for the exhibition of sand paintings, as well as a repository for the myths, music, poetry, sacred lore and objects connected with Navajo religion.

In the Research Department, the Wheelwright Collections include over 300 sand paintings transcribed from the originals by various recorders on different parts of the Navajo Reservation; music records of approximately 2000 Navajo chants; ceremonial objects, baskets, blankets and silver; an extensive library of books and manuscripts on Navajo art and religion. Comparative material from Asia and other countries is also represented.

FAR WEST—PACIFIC COAST

Colorado Springs

The Colorado Springs Fine Arts Center, a \$2,000,000 institution given to the Pike's Peak Region by Alice Bemis Taylor, and completed 1936, has an interesting permanent collection of paintings, prints and drawings by contemporary artists and features an extensive exhibition program in all fields of the arts. The Taylor Museum of the Fine Arts Center specializes in culture history of the American Southwest and Latin America, and is famed for its collections of religious folk art of New Mexico, Latin American and Southwestern materials and the John Frederick Huckel collection of 112 Navajo sand painting reproductions. In addition to the gallery facilities, the Art Center houses a complete theatre, music room and library as well as a school.

Museums in Denver, Colo.

The Colorado State Museum of the State Historical Society of Colorado, Denver, portrays life in the old West and Southwest, showing Indian and pioneer relics, scale models of stage coaches, covered wagons, early railroad equipment. There is a model of Denver in 1860, and 42 dioramas show the life of Indian, trapper and miner. The library has complete files of Colorado newspapers. The Society also administers the Healy House and Dexter cabin of the 1830s in Leadville; the restored adobe Fort Garland of 1858; Pike's 1807 stockade site near La Jara, and Chief Ouray monument at Montrose.

The Denver Art Museum is composed of five branch museums. Departmental collections total more than 50,000 objects, including Oriental, Egyptian, African Negro, South Sea, American Indian, Classical, European and American. Activities units include special community education exhibition and gallery tour projects, publications, Children's Museum, Museum Art School and Cooke-Daniels Foundation lecture series.

The Denver Museum of Natural History in City Park, Denver, Colo., is governed by a board of trustees for the city of Denver. The Museum is noted for the excellence of its ecological displays of North and South America, its new Hall of Man, Australian exhibits, and fossil displays. The Museum is open free, and has more than 500,000 visitors annually.

Nevada State Museum

The Nevada State Museum, Carson City, Nev., exhibits collections in the mineralogy, archeology, mammalogy, ornithology and history of Nevada. It occupies the former United States Mint, and coins and documents relating to its operation, 1870-1893, are shown.

Besides collections of birds common to the Great Basin region, the museum has the Max Fleischmann room of habitat groups of Nevada mammals and North American and African game heads; relics of the Nevada Indians; fluorescent rocks and ores, and the 7,500 items of arrowheads, Indian baskets, shells and coins of the Dr. S. L. Lee collection. Outstanding is the unique replica of a mine, extending 300 ft. long under the museum.

California Academy of Sciences

The California Academy of Sciences, San Francisco, Calif., incorporated 1853, for the advancement of the natural sciences through public education, exploration, and research, is the oldest scientific institution on the Pacific coast. It maintains in Golden Gate Park a public museum of natural history, the Morrison Planetarium, the Steinhart Aquarium, a scientific library, and research departments with scientific collections.

Museum buildings include North American Hall, which preserves in permanent form some of the most beautiful and striking aspects of the natural history of the West; African Hall, containing 24 habitat groups of African animals; and the Hall of Science, which houses Morrison Planetarium, a Foucault pendulum, other astronomical exhibits, and the William Barclay Stephens clock and watch collection. Other facilities in the Hall of Science include the May Treat Morrison Auditorium and the James Moffitt Memorial Library of 3,000 vols. dealing with birds and mammals.

The Academy's research collection includes some 10,871 mammals, 68,814 birds, 75,000 reptiles and amphibians, 532,000 fishes, 380,000 plant specimens, 3,000,000 insects, and 1,650,000 specimens in the field of paleontology. Its collections are especially rich in material from California, Alaska, and the Galapagos Islands.

De Young, San Francisco

The M. H. de Young Memorial Museum in Golden Gate park, San Francisco, has 64 galleries, a lecture hall, two garden courts and a library, and receives nearly 1,000,000 visitors a year.

The museum's permanent collection of European and American art is housed in galleries surrounding a central court adorned with Flemish tapestries given by the William Randolph Hearst Foundation. Paintings, sculpture, stained glass windows, tapestries, furniture, decorative arts, and several paneled period rooms, illustrate the cultures of the Western world from ancient times to about 1850. This section recently augmented by a new wing contains, aside from very fine Medieval works, such masterpieces as The Tribute Money by Rubens, St. John the Baptist by El Greco, a marble by Verrocchio and many other works.

Five rooms are devoted to gifts by Mr. and Mrs. Roscoe F. Oakes, mostly French 18th century art including two original paneled rooms complemented by an outdoor formal garden in the 18th century style, outstanding pieces of furniture, tapestries, sculpture, and paintings by Boucher, Nattier and Greuze and portraits by Rubens and Van Dyck. The permanent collection has also been enriched by the Samuel H. Kress Collection of 39 paintings, including Spanish, Dutch, French and Italian masterpieces by Fra Angelico, Titian, El Greco, Pieter de Hooch, Goya and others.

The cultures of the Orient and the Pacific Basin, the pre-Columbian Central and South America and the North American Indians are shown and California's history is the theme of a large section containing old paintings, prints, authentic interiors, a costume collection, historical portraits and documents.

Legion of Honor, San Francisco

The California Palace of the Legion of Honor, in Lincoln Park, San Francisco, Calif., was given to the city of San Francisco in 1924 by the late Adolph B. Spreckels and his wife as a museum of painting and sculpture in memory of California soldiers who fell in World War I. Architecturally, the building is Louis XVI in period, based upon the palace of the Legion of Honor in Paris. A triumphal arch, surrounded by colonnades, constitutes the entrance and extends into the Court of Honor. In the center of the court is Rodin's *The Thinker*.

The permanent collections include sculpture by Rodin, the gift of Mrs. Adolph B. Spreckels; the Mildred Anna Williams Collection of European and American painting; the Collis Potter Huntington Memorial Collection of 18th century French painting, sculpture, tapestries, furniture and porcelain; and the Albert Campbell Hooper Collection of Dutch and English paintings and the decorative arts. The Jacob Stern Collection of 18th and 19th century European and American paintings is on indefinite loan to the Museum. Important recent additions include works by Rembrandt, Renoir, Claude Lorrain, Delacroix, Magnasco and Degas.

San Francisco Museum of Art

The San Francisco Museum of Art, San Francisco, Calif., contains 12 galleries, an auditorium and classrooms. It owns collections of prints and drawings, principally modern European and American; collections of paintings and sculpture by contemporary Western artists, also contemporary European and Eastern American, and Latin American.

The 20th anniversary, 1955-56, is being observed with special exhibitions of collections of contemporary art; Japanese architecture and tradition; German expressionist prints; contemporary Eskimo art; sculpture by Wotruba and Barbara Hepworth; John Marin; Max Beckmann; Renoir retrospective; new reputations in American art; and in European art; Design in Scandinavia.

Crocker Gallery, Sacramento

The Crocker Art Gallery, Sacramento, Calif., estab. 1885, is supported by the City of Sacramento and governed by the California Museum Assn. It is known for its outstanding collection of over 1,000 drawings dating from the 15th century through the early 19th century. It has over 700 paintings of European and American Schools. It also has 70 fine pieces of 12th century Korean pottery.

Griffith Observatory, Los Angeles

The Griffith Observatory and Planetarium, on the slope of Mt. Hollywood, Los Angeles, Calif.,

has twin 9½-inch and 12-inch Zeiss refracting telescopes, three 8-inch solar refractors, the Planetarium theater seating 500, and the Hall of Science. Several complicated space travel projectors in the Planetarium give spectacular imitations of celestial journeys.

Among the astronomical exhibits in the Hall of Science are the Foucault pendulum, a large working model of the moon, a model of the solar system, telescopes for viewing the sun and its spectrum, a series of artificial solar eclipses projected on a screen, a collection of meteorites, a model of our galaxy and models of the planets. Physics, chemistry and geology are represented by such exhibits as a million-volt Tesla coil, polarized light, electrical discharge through gases, oscilloscope, Wilson cloud chamber, spectra of gases, reflection and refraction of light, magnetism, fluorescence, minerals and rocks, geological clock and chemical elements.

Special exhibits include working model of cyclotron; large working scale model of the 200-inch telescope and dome.

Helms Hall, Los Angeles

Helms Hall, 8760 Venice Blvd., Los Angeles, Calif., is under direction of the Helms Athletic Foundation, founded, 1936, by Paul H. Helms to honor athletes, coaches and others who have contributed to amateur, collegiate and professional athletics in a noteworthy way.

Election to Helms Hall is by decision of its board, whose members are Al Santoro, George T. Davis, Ned Cronin, Sid Ziff, Paul Zimmerman, and R. C. Samuelsen. Paul H. Helms is chairman, and W. R. (Bill) Schroeder is Secretary.

Projects of the Foundation are the annual Helms World Trophy awards; Sports Hall of Fame awards; Athlete of the Year, and Athlete of the Month; Ross Bowl Hall of Fame and numerous other projects.

Henry E. Huntington Library

The Henry E. Huntington Library and Art Gallery in San Marino, near Los Angeles, Calif., is an endowed educational institution devoted to advancing the cause of higher learning. It includes a research library for the preservation and diffusion of knowledge, particularly in the fields of English and American literature and history. It also maintains a free public museum, art gallery, botanical garden of 50,000 specimens and desert plant garden of 25,000 representatives of 2,500 varieties.

Among the treasures of the library are the Ellesmere manuscript of Chaucer's Canterbury Tales, made about 1400; a Gutenberg Bible (Mainz, about 1455-56); the first book printed in English, by Caxton at Bruges, 1475, and Benjamin Franklin's Autobiography in his own handwriting.

There are two vaults equipped with every known device for the protection and preservation of their contents—the rare books and manuscripts. The former vault contains approximately 190,000 items, the latter about 1,000,000 letters and documents. The great majority of the rare books and manuscripts were collected by Mr. Huntington (1907-1927). The reference collection numbers nearly 150,000 volumes.

The collections center on English and American history and literature. There is also a group of nearly 5,400 incunabula (books printed between 1450-1500), the eighth largest in existence. The group of English imprints before 1641 numbers over 11,000 volumes.

The principal collection in the Art Gallery is a representative group of 18th century British paintings, including characteristic works in portraiture and landscape. Among the canvases exhibited are 11 by Gainsborough, 12 by Reynolds, 11 by Romney, 4 by Raeburn, and 7 by Lawrence. Thomas Gainsborough's "The Blue Boy," Sir Joshua Reynolds' "Mrs. Siddons as the Tragic Muse," and Sir Thomas Lawrence's "Pinkie" are in the Gallery.

Los Angeles County Museum

The Los Angeles County Museum in Exposition Park, Los Angeles, Calif., is administered by the County Board of Supervisors through a Board of Governors and the Director.

Permanent art galleries include American and European art in historical sequence: William Randolph Hearst Hall of Ancient Art, containing Egyptian, Greek, Roman, Persian, Chinese and Indian collections; Gothic Room, 14th-15th century, French, Italian, Flemish, German, and Spanish; Renaissance gallery, 16th century; Southern and Northern Baroque, 17th century; collection of 16th century Limoges; collection of 16th-17th century Swiss and Flemish stained glass; English, 18th century; French, 18th century; American painting and watercolors, early 20th century; French Impressionist and Modern, 19th-20th century; English and American decorative arts, 17th-19th century; American galleries.

Science galleries include world famous Ice Age Fossils from the Rancho La Brea tar pits; North American and African habitat groups; birds, min-

erals, insects, shells, California's Fossil Record. Scientific reference collections include 500,000 fossils from Rancho La Brea; 31,000 sets of invertebrate fossils; 25,000 birds; 10,000 mammals; 500,000 insects (specializing in Lepidoptera of the southwest); 86,000 plants; 7,000 minerals; 116,000 specimens of marine animals.

Southwest Museum

The Southwest Museum in Highland Park, Los Angeles, Calif., was incorporated 1907 as "a free public institution of history, science, and art." Its collections number hundreds of thousands of objects illustrating the cultures of the American Indians, while its scientific reference library aggregates about 60,000 items. Field work has been conducted in California, Nevada, Mexico, and the Southwest. The Museum maintains the Casa de Adobe, replica of an old Spanish ranch house.

Pasadena Art Museum

The Pasadena Art Museum, 46 N. Los Robles Ave., Pasadena, Calif., has permanent collections in modern German painting, American painting, Oriental art and a considerable print cabinet. About 30 exhibitions are held annually and the year's program includes movies, gallery talks, lectures and concerts. Annual attendance 60,000.

Santa Barbara Museum of Art

Santa Barbara, Calif., Museum of Art, opened 1940, has an outstanding collection of contemporary drawings, oils, and water colors and a permanent collection of ancient Chinese, Assyrian, Korean art; Roman and Greek sculpture, ceramics, glass and coins; African and Pre-Columbian art and oriental instruments. There is a doll collection, 17th-19th centuries. Yearly attendance is over 85,000.

San Diego Gallery, Museums

The Fine Arts Gallery, San Diego, Calif., places emphasis on Old Master paintings, notably Spanish and Italian; on Contemporary American and Old Asiatic Arts. Among modern canvases are paintings by Henri Matisse, A. Masson, Derain, Vlaminck, Dufy, Friez and J. Villon; by Spaniards de Cavedes, Zuloaga, J. Junyer, Pruna, Miró, Dalí and the brothers de Zubiaurre. American contemporaries include Bertola, Breinin, Burchfield, de Diego, J. de Martini, Feininger, H. V. Poor, U. Romano, Doris Rosenthal, Sloan, M. Sterne, Tomlin and Zerbe. The earlier American painters include Duveneck, Homer, La Farge, Ryder, Twachtman, Prendergast, Davies, Dearth, Mary Cassatt, Henri, Luks, Bellows and Reiffel.

An important acquisition of 75 prints from the Bertie Heilbron estate, includes prints by Van Dyck, Rembrandt, Tiepolo, Callot, Meryon, Whistler, McBay, Zorn, Brockhurst and Cameron. 24 prints and drawings, gifts of Mrs. Irving T. Snyder, include Rembrandt, Van Ostade, Legros, Millet, Delacroix, Rodin and Whistler.

The old Spanish painting collection is second only to that of the Hispanic Society of America in New York City. Included is the portrait of the Marques de Solage by Goya, the equal of the best Goya portraiture. Other gems in the old Spanish section are by Velazquez, El Greco, Bermejo, and Fray Sanchez Cotan.

Outstanding sculpture examples are by Jacob Epstein, Mestrovic, Maillol, Maria Martins, Derjinsky, F. Flannagan, Donald Nord (9 examples), and Zorach.

The San Diego Museum of Man in Balboa Park, San Diego, Calif., is a museum of anthropology and archaeology. Although all races of man are considered, the ethnic groups of the American continents are given the greatest attention. The collections comprise the handicrafts of many different peoples, with emphasis on American Indian cultures. There are also models of Indian habitations from the Arctic to the Tropics. An Egyptian hall has been added.

San Diego Natural History Museum, operated by the San Diego Society of Natural History (incorporated 1874) occupies a modern fireproof building centrally located Balboa Park, San Diego, Calif.

Public exhibits, study collections and library occupy three floors 220 feet long and include up-to-date habitat groups, identification series and a few manually operated displays. The Museum is devoted to the fields of zoology, botany, and geology, ornithology, mineralogy, conchology. Prominence is given to the natural history of the southwestern United States and northwestern Mexico, with particular emphasis on San Diego County.

San Diego Zoo

The San Diego Zoo operated by the Zoological Society of San Diego, Calif., in Balboa Park ranks as one of the largest zoos in the world, with over 3,500 animals representing 843 different species, some of great rarity. The Zoo sprawls over 200 acres of semi-tropical landscaped mesas and wild canyons, has 5 mi. of roads and guided

bus tours. Attendance reaches 1,250,000 annually and is increasing, thus exceeding the population of San Diego.

Rarest animals shown are three koalas from Australia. Also to be seen is the very rare tuatara, lizard-like reptile from New Zealand, the Australasian bustard, the ocellated turkey from Honduras, a collection of over 30 huge Galapagos tortoises, the rare bush dog from the Guianas, the beautiful maned wolf from Brazil, the Montague Island giant grizzly bear, Steller's sea eagle from Siberia, the Northern elephant seal, the Hawaiian duck, the Kagu bird from New Caledonia, an outstanding collection of birds of paradise from New Guinea, the money-eating eagle from the Philippines, the Allenopithecus monkey from the Belgian Congo, and the gerenuk or giraffe-antelope from East Africa.

Other valuable exhibits include the Malayan or Saddle-backed tapir, the Kea parrot of New Zealand, a two-headed California king snake, the Nelson desert bighorn sheep, the lowland gorilla, the Andean crested ducks, Baer's white-eyed duck, the Pygmy hippopotamus, Celebes crested ape, Roosevelt sable antelope, Grezy's zebra, black rhinoceros, African elephant, thick-billed parrot, king penguin, shoebill stork, Eyton's plumed tree duck, and Galapagos hawk.

Among the rare breeding animals exhibited are the spectacled langur, Andean condor, ocellated turkey, hippopotamus, crowned pigeon, lesser panda, East African colobus monkey, Guiana bush dog, Vicuña, Uganda giraffe, Anoa or pygmy buffalo, Cuban iguanas, albino king snakes, and several generations of albino gopher snakes. A black cobra has lived at the zoo for more than a quarter of a century. Three generations of boa constrictors have been represented in the collection, while 18 out of 21 known captive breeding records for rattlesnakes are held by the Zoo.

Two of the largest free-flight cages are located in the San Diego Zoo. The largest houses the birds of prey including the Andean condors. The smaller contains shore and marsh birds and has an observation bird walk inside the cage that permits the visitor to view and photograph the birds without the interfering wire barrier.

Newest construction at the Zoo is the Administration-Entrance-Restaurant building opened 1954 with a Flamingo Lagoon opposite the breezeway-type entrance gates. The Wegforth Bowl will seat over 1,000 persons. Research is carried on with the help of an annual Fellowship from the Ellen B. Scripps Foundation. An educational program is conducted in liaison with city and county schools and State College. An animal behaviorist with a doctorate in psychology is employed to study the great apes and other animals.

Rosicrucian, San Jose

The Rosicrucian Order (AMORC) maintains at San Jose, Calif., the Rosicrucian Egyptian Museum, Art Gallery, Egyptian Temple, Science Museum and Planetarium. The museum contains collections

Disneyland, Vast Pacific Coast Amusement Enterprise

Disneyland, a world of make-believe built to Hollywood proportions, was opened to the public July 15, 1955, by Walt Disney, film producer, and associates at Anaheim, Calif., 22 mi. southwest of Los Angeles on the Santa Ana Freeway. Loosely described as an amusement park, it differs from all others of that category in the size of its devices and the elaborate nature of the reproductions. It is intended to entertain thousands of visitors that annually flock to southern California, and is a profit-making venture in which films, television programs and other entertainment projects have a place.

A 200-acre orange grove was displaced by this immense development, 100 acres being set aside as parking space for possibly 12,000 motor cars. Disneyland itself covers 60 acres and has four major themes—Adventureland, Frontierland, Fantasyland and Tomorrowland, all built on a scale of five-eighths of the normal size. Entrance

of ancient jewelry, rare scarabs, mummies and temple ornaments; the temple is a replica of an authentic 6th dynasty Egyptian temple; there is also a full-size reproduction of an Egyptian rock tomb. The art gallery houses national and international exhibits. The science museum demonstrates such subjects as sound waves, electric current, ultra-violet fluorescence, bending of light, the seismographs, Uranisphere, Foucault pendulum and models of moon and space travel.

Montana Historical

The Historical Society of Montana, Helena, Mont., conducts two galleries, a museum and a historical library in its spacious building erected 1951 at a cost of \$1,000,000. Montana past and present, through buffalo and Indian days, mining camps, frontier settlements, cattle roundups, is the subject of paintings, dioramas and exhibits. Outstanding is the Chas. M. Russell room, which has the 41 paintings of the Mackay Collection augmented by 50 other Russell paintings and includes The Last Roundup. The Gallery of Western Art, the formal historical museum and the informal museum of historical objects, are supplemented by audio-visual programs and publications.

Natural History, Oregon

The Museum of Natural History is a part of the University of Oregon in Eugene, Oreg. It has collections relating to geology, botany, zoology and anthropology.

Included in the Condon Museum of Geology is material from the John Day fossil beds in central Oregon; suites of fossils, both vertebrate and invertebrate, from various regions in the western part of the American continent; a complete skeleton of the saber-tooth tiger from the Rancho La Brea near Los Angeles, Calif. The Herbarium contains extensive collections of the flora of Oregon and other western states as well as comparative material from elsewhere. The zoological collections contain approximately 10,000 bird and animal skins together with skeletal material.

The anthropological collections which make up the Oregon State Museum of Anthropology contain specimens of basketry and other crafts from the Pacific Northwest; valuable scientific materials from the early cave culture of the Northern Great Basin; materials from the Southwestern United States; Congolese iron work and collections from the Aleutians and Micronesia.

Seattle Art Museum

The Seattle Art Museum, Seattle, Wash. (1933) has outstanding collections in the arts of China, Japan, and India, with collections in world art from prehistoric to contemporary times. The Samuel H. Kress collection illustrates 4 centuries of Italian paintings and includes Flemish and Dutch 17th century paintings. There is a comprehensive collection of contemporary Northwest artists' works and the Museum exhibits the work of the artists of this region each year.

is through Main Street, U.S.A., a reproduction of a town of the 1890's, with gas-lighted streets, horse-cars, shops of the period. Adventureland is a jungle, with a river, a waterfall, tropical vegetation and simulated wild animals. Frontierland has a stockaded fort, a stern-wheel steamboat, burros and reminiscences of the plains. Fantasyland starts with a reproduction of a medieval castle, with moat and portcullis, and contains a realization of many storybook characters and episodes. Tomorrowland appropriately deals with rockets, spaceships and adventures of the future. The principal appeal is to youthful visitors and adults with youthful memories.

Numerous restaurants in different styles of decoration are scattered about the grounds. The cost of Disneyland was placed at \$16,500,000. A hotel with motel accommodations, reported capable of sheltering 1,250 guests, was erected outside the exposition grounds.

Museum Furnishes Snakes to Pose for Artists

Source: University of Illinois

One of the services of the Natural History Museum of the University of Illinois, Urbana-Champaign, Ill., is to supply reptiles, amphibians, birds and other forms of animal life to artists who illustrate books about the animal world. Accuracy in delineation is an absolute condition for acceptance of an artist's work. The museum authorities reported in March, 1955, that they had shipped 1,000 specimens to artists in New

York and New Jersey, shipments including 75 snakes, 65 frogs, 40 lizards and 48 salamanders. Some of these were live specimens. Snakes must be kept from cold, and golden mice similarly cannot be exposed to excessive heat or cold without perishing. Turtles are "pickled" in formaldehyde and alcohol. The museum has 750,000 specimens and frequently receives additions from students on field trips.

It is the glory of a good bit of work that it opens the way for better things and thus rapidly leads to its own eclipse. The object of research is the advancement not of the investigator, but of the knowledge.—Sir Alexander Fleming, discoverer of penicillin.

COLLECTIONS IN UNIVERSITY LIBRARIES

Baylor University

Baylor University Library, Waco, Texas, contains 192,000 volumes. Of this number, Texas Collection includes 26,500 bound items and over 2,000,000 pages of manuscripts in the Aynesworth, Acree, Baylor, McGregor, Pat M. Neff, and Dorothy Scarborough divisions, all of which pertain to the history of Texas and the Southwest.

Baylor Univ. also has the most comprehensive collection of first editions, manuscripts and letters of Robert Browning in the world. A building specially erected for this collection in 1952 contains the Foyer of Meditation, where 44 stained glass windows illustrate poems by Browning.

Brown University

Brown University Library, Providence, R. I., contains 817,531 vols., 27,500 maps, 30,000 manuscripts, 23,800 broadsides and leaflets, 4,200 films, 43,000 pieces of sheet music, 14,000 phonograph records. The yearly accessions average 18,000 vols. and 7,000 other items. The University was founded 1764. The existence of the college library is first indicated by a gift from President James Manning in 1767. The John Hay Library houses the general collection.

The most famous of the special collections are: Chambers Dante Collection, 1,700 vols.; George Earl Church Collection on South America, 3,500 vols.; Foster Horace Collection, 600 editions; Harris Collection of American Poetry and Plays, the world's largest, 181,000 bound vols., etc.; McLellan Lincoln Collection, 10,000 books, pamphlets and newspapers, 4,550 broadsides, leaflets, 6,400 prints, photostats, 1,842 manuscripts, of which over 700 were written or signed by President Lincoln, 303 pieces of sheet music; Knights Stamps Collection; Rider Collection of Rhode Island History, 5,000 vols., 10,000 pamphlets; Wheaton Collection of International Law, 6,500 vols.; Wilbour collection of Egyptology and a large collection in modern mathematics.

Divisional libraries located in other buildings on the campus are: Biological Sciences, Physical Sciences, and Pembroke College Library.

The Annmary Brown Memorial, estab. 1907, and deeded to the university 1948, is a center for Renaissance studies, and contains the Gen. Rush C. Hawkins collection of incunabula and the university's collections of 15th and 16th century books.

The John Carter Brown Library, estab. 1846 and willed to the university, 1900, is a growing collection of about 30,000 vols., relating to the history of North, South, and Central America. Composed of source material printed before 1801, the collection contains highly valued individual treasures of Americana.

University of California

The combined resources of the libraries of the University of California on its eight campuses exceed 3,500,000 vols. The libraries are autonomous, but policy is integrated.

Berkeley. Sixth largest university library in the U. S. contains over 2,000,000 vols. Includes Main Library, 21 branches, and over 50 departmental libraries. Outstanding collections in biological and physical sciences, engineering, Slavic studies, printing and typography, forestry, music, public health, Mark Twain. Noteworthy are the East Asiatic Library, about 225,000 vols.; Law Library, over 112,000 vols., including a notable Canon Law collection; Bancroft Library, specializing in the history of California and Western America, Mexico and Central America, with over 100,000 vols. and more than 1,000,000 pieces of manuscript and other non-book materials.

Los Angeles. About 1,125,000 vols. Serves UCLA; has large collections in Western Americana, folklore, British Commonwealth history, 19th century fiction, music (10,000 scores), Scandinavian and German literature and linguistics, Oriental languages (35,000 vols.), U. S. Southern history, and Spinoza. Major extramural collections are the William Andrews Clark Memorial Library, 66,000 books and manuscripts concentrating in English culture of the 17th, 18th and 19th centuries; the Bio-medical Library, 70,000 vols.; the Engineering Library, 25,000 vols.; the School of Law Library, 85,000 vols. Important additions were made during 1955 to the Library's collections of 19th century literature, the Spinoza and Norman Douglas collections, and microfilm files of early California newspapers.

San Francisco. Medical College Library, 190,000

101,800 vols. on medicine, pharmacy, dentistry and nursing, receives approximately 1,500 current periodicals. Special collections: Esther Rosenkrantz collection of Osleriana, and the history of Anesthesia. Hastings College of Law Library, over 31,000 vols.

Davis. University Library, over 112,000 vols. Santa Barbara. Santa Barbara College Library, 83,000 vols. Civil War and Lincoln, 11,500 vols.

Riverside. Citrus Experiment Station Library and College of Letters and Science Library, 57,300 vols.

La Jolla. Scripps Institution of Oceanography Library, over 27,000 vols.

Mount Hamilton. Lick Observatory, 20,900 vols.

Catholic University of America

The John K. Mullen Memorial Library of the Catholic University of America, Washington, D. C., contains 450,000 vols., with important collections of Patristics, Christian Orientalia, Medieval Literature and History, Brazilian and Portuguese Literature and History, Bibliography, Canon Law and Catholic Church History and Literature. Between 900 and 1,000 volume-years of Catholic diocesan newspapers have been filmed. Among recent acquisitions was a file of 100 years of the Vatican daily newspaper, *L'Osservatore Romano*.

University of Chicago

The Library of the University of Chicago, estab. 1892, contains more than 1,900,000 books. Central in the system is the William Rainey Harper Memorial Library (970,000 vols.) Numerous departmental libraries serve the needs of law, theology, science, geography, geology and other subjects. The Library is a member of the Midwest Inter-Library Center, Chicago, in which 16 institutions have deposited over 820,000 vols. for research.

The collections of special materials include: Nicholas Bacon collection of English manor rolls, 3,000 pieces; Stephen A. Douglas papers, 16,000 papers; Reuben T. Durrett collection of Kentucky history, biography and newspapers, 15,000 vols.; George Morris Eckles collection of Cromwelliana; William H. English items on Midwestern history, 7,500 items; Private papers of Frank O. Lowden; Elijah Grant Communitist Colony Letters, 1,200; Samuel Harper Collection on Russia; Bonaventure Lafayette Collection of Manuscripts, 250 pieces; Barton, Oldroyd, and Hannay Collections of Lincolniana, 4,000 vols. and mss.; Wyndham Robertson collection of Civil War papers, 10,000 pieces; the Harriet Monroe Library of Modern Poetry; Delos Franklin Wilcox collection on public utilities, 10,000; letters and papers of Hermann von Holst; some 6,000 vols. of early children's books including the Encyclopaedia Britannica collection of books for children; the Fred W. Atkinson and the Morton collections of American drama; the William Harlow Briggs collection of dramatic criticism, 1900-1944; 200,000 sheets of German, Estonian and Finnish folk-songs, mostly photostats; photostats of all known manuscripts of Chaucer's Canterbury Tales (84); the Lincke Library of German fiction, 1790-1850 (15,000 vols.); and Karl Heinemann's Goethe Library (1,750 vols.). The Swift Hall Library has many early Bibles.

In 1954 the Library received the papers of the Atomic Scientists of Chicago as the core of a new collection which will include documents of atomic development. In 1955 there were added to this collection the manuscripts, notes and working papers of Enrico Fermi, Nobel Prize winner and recipient of the first special award given by the United States Atomic Energy Commission. During 1955 also the Library was chosen as one of 16 research libraries to receive microfilm copies of the private papers of the Adams family, and as one of 9 libraries to receive the microfilmed records and briefs of 23 important trials involving communism in the U. S. Numerous additions, among made to the Library's rare book collections, among them four incunabula, a beautifully-executed manuscript of a 16th-century book of hours, first editions of James Fenimore Cooper, Dickens, and James Joyce, and the papers of the poet Jeremy Ingalls.

University of Cincinnati

The Library of the University of Cincinnati, Cincinnati, Ohio, has 670,000 vols., and is especially strong in research material. The Taft Fund, an endowment for the humanities, has built up fine collections in languages and litera-

tures. There is a special library of 65,000 vols. in classics and archaeology and a collection of 7,000 vols. in modern Greek. Other important units include geology and chemistry, Americana, Troubadour poetry, Petrarch and Shakespeare. The Elliston Fund supports rooms devoted to modern poetry and recordings of contemporary poetry.

City College of New York

At the close of the year 1953-44 the Library of the College of the City of New York contained 417,753 vols., of which 360,681 were at the uptown Center, Convent Avenue and 139th St., New York, and 57,072 (including an education collection) at the Bernard M. Baruch School of Business and Public Administration, E. 23rd St. and Lexington Ave. The Uptown Center houses, in addition to the general collection, the libraries of the Schools of Technology and Education, and the Russell Sage collection in the field of social welfare.

University of Colorado

The Library of the University of Colorado, Boulder, Colo., contains 785,000 volumes, including its government documents collection. The strong collections are in the fields of English drama and criticism, medieval and Central European history, Mexicana, history of Colorado and the Rocky Mountain region, and medicine.

Columbia University

The Libraries of Columbia University in the City of New York contain approximately 2,800,000 vols. and large collections of manuscripts, pamphlets and related materials. In addition to the central bookstacks, Circulation and Reference departments in Butler Library (completed 1934), there are departmental and professional school libraries in Butler Library, Low Library, and other buildings on the campus. The Medical Library is at Columbia Presbyterian Medical Center, 168th St. and Broadway, and the Optometry Library at 132 West 60th St. The Charles Paterno Italian Library is in Casa Italiana, Amsterdam Avenue and 117th St.

The original library was a donation of books owned by a London clergyman to King's College, predecessor of Columbia, in 1761. Columbia collections are important in architecture, government, American history, law, politics. One of the major enterprises is the Archive of Russian and East European History and Culture, a constantly growing repository of original Russian material. Of special interest is the Oral History Project begun by Professor Allan Nevins in 1948, which records on tape recollections of leaders in American affairs.

The chief departmental and school libraries and their volumes are as follows: Law, 334,500; Medical, 200,000; Business, 133,000; Journalism, 9,000 and a complete newspaper morgue; Library Service, 67,000; East Asiatic, 184,000; Paterno, 28,000; Avery, 54,000; Fine Arts, 22,000; Music, 37,000, including 12,262 phonograph records; Engineering, 115,000 and 200,000 trade catalogs; Physics, 15,000; Chemistry, 35,000; Mathematics, 13,000; Geology, 50,000 and 65,000 maps; Zoology-Botany, 44,000; Psychology, 17,000.

Among the major special collections are the Park Benjamin, New York literature, 1835-1865; Book Arts and Typographic Library; Pimpton, early textbooks; Smith, early mathematics; Dale, weights and measures; Epstein, photography; Joan of Arc; Kilroe collection of Tammanian; Lodge, early editions of classics; Seligman, early editions in economics; Spinoza; Brander Matthews Dramatic Library; Pulitzer—items that have earned Pulitzer prizes in journalism, letters and music; college and university catalogs; Montgomery, history of accountancy; Scudder, 500 file drawers of material on American Business firms; Webster, plastic surgery; Huntington, anatomy and Curtis, physiology.

Recent acquisitions include the Gouverneur Morris papers (letters, manuscripts and documents) ca. 1768-1816; the Stephen Crane memorabilia collected by his wife; the L. S. Alexander Gumby scrapbooks on the American Negro; the papers of Samuel J. Tilden, Hart Crane, Allan Nevins, James Truslow Adams, Louis Boudin and Thomas S. Jones, and the poster collection of Gabriel Engel, besides many rare volumes in different fields.

Affiliated institutions with libraries are Teachers College, Barnard College, College of Pharmacy, New York School of Social Work, and Union Theological Seminary.

Cornell University

Cornell University, in Ithaca, N. Y., with units in New York City, Buffalo and Geneva, is served by libraries with a total of 1,700,000 vols. Libraries on the Ithaca campus include the University, largest with 1,200,000 vols., and the libraries of Agriculture-Home-Economics, Architecture, Business, Engineering, Industrial and Labor Relations, Law, Veterinary Medicine and 30 departmental libraries. In addition there are the Cornell Medical Library, New York, N. Y., Cornell Aeronautical Laboratory Library, Buffalo, N. Y., and Experiment Station Library, Geneva, N. Y.

The libraries have extensive collections in such fields as Agriculture and related sciences, American Civil War, American History in general, architecture, Assyriology, botany, chemistry, China, Cornellianna, Dante, dramatic literature, Egyptology, engineering, English and French Revolutions, entomology, Freemasonry, history of science, history of superstition, Icelandic culture and literature, languages and literature in general, legal trials, ornithology, Petrarch, philosophy, physics, the Reformation, Rhaeto-Romanic language and literature, slavery, Spinoza, Wordsworth, etc.

The Dante collection (10,000 vols.) contains the Foligno edition of the Divine Comedy, 1472, and nine other 15th century editions of this work. The Petrarch collection (5,000 vols.) has 475 editions of the Rime, 15th century manuscripts of the Sonnets, many incunabula and translations. The Icelandic collections (23,000 vols.) covers Icelandic literature from the earliest literature to the present. The Wordsworth collection (2,000 vols.) includes all first editions of Wordsworth, manuscripts, over 100 original letters by Wordsworth. The President White Historical library is based on the personal library of Andrew D. White, first president of the university.

Dartmouth College

Dartmouth College Library, Hanover, N. H., founded 1769, is the largest undergraduate college library in the country. The general book collection, together with the libraries of Dartmouth Medical School, Thayer School of Engineering, and Tuck School of Business Administration, contains 727,467 vols. The main library is housed in the Baker Memorial building, erected in 1928 by George F. Baker in memory of his uncle, Fisher Ames Baker.

Among the special collections are: American calligraphy, bookplates, crystallography, Dartmouth College archives, early medical classics, French economic history, the George Ticknor library (excluding Spanish literature), longevity, New England railroads, New Hampshire history and imprints, publications of Dartmouth alumni, Spanish plays and the Thalberg movie scripts collections. Also books by Rupert Brooke, with his personal library; Robert Burns, Erskine Caldwell, Stephen Crane, Cunningham Graham, Robert Frost, James Gibbons Huneker, H. L. Mencken, Genevieve Taggard, Daniel Webster and the library on polar regions of Vilhjalmur Stefansson.

University of Denver

The University of Denver Libraries, Denver, Colo., contain 314,381 vols., in 3 separate units. Mary Reed Library on the University Park campus 5 miles south of downtown Denver, has special collections in speech pathology, international relations and social sciences; the last two groups have had special support from the Social Science Foundation. The Libraries of the School of Business Administration and the College of Law are located in downtown Denver.

University of Detroit

The Library of the University of Detroit, Detroit, Mich., contains over 165,000 vols., with important collections in early church and medieval history. Waddingus' *Annales Minorum*, Baroni's *Annales Ecclesiastici*, Muratori's *Rerum Italicum Scriptores*, Monumenta Germaniae Historica and Paedagogica, Corpus Scriptorum Ecclesiasticorum Latinorum, Acta Sanctorum, Commentaria in Aristotelem Graeca, Migne and the Rolls Series are among its important books.

Duke University

The libraries at Duke University, Durham, N. C., contain 1,159,512 vols. The General Library has 727,073 vols.; Law, 102,772; Divinity, 67,025; Hospital 56,200; Woman's College 101,347, with smaller numbers of books in the following schools and departmental libraries: engineering, physics, mathematics, biology, forestry and chemistry. There are more than 1,550,000 items in the George Wash-

ington Flowers Memorial collection of manuscripts and printed materials on Southern history. The university is the repository for the papers of Paul Hamilton Hayne, Thomas Nelson Page, John Esten Cooke, Thomas Holly Chivers, William Gilmore Simms and other Southern authors. It contains also the Trent collection of Walt Whitman materials; the Lanson collection of French literature; collections of Shakespeare, and English and American literature; and the Mazzoni collection of about 90,000 pieces of Italian literature; several distinguished Latin-American collections; the Louis Strisower collection on international law, and the archives of the Socialist party of America.

George Washington University

The George Washington University Library, Washington, D. C., estab. 1821, contains 290,000 vols., including the Richard Heinzl collection of Germanic philology and literature; the Curt Wachsmuth collection of Greek and Roman literature and history; the Mount Vernon collection of Political History, International Law and the Social Sciences; Hispanic American books; the Chauncey M. Depew public speaking collection; 7,500 mounted photographs of the Russell Sturgis collection, the W. Lloyd Wright collection of Washingtoniana, and the former Library of the Carnegie Endowment for International Peace of 50,000 vols. and 20,000 pamphlets.

Harvard University

Harvard University Library, Cambridge, Mass., was founded 1638 when John Harvard bequeathed 400 books to the institution that was to take his name. It is the oldest library in the U. S. and the largest university library, with 5,832,912 at the end of fiscal 1954. Accessions for the year were 123,554 vols.

The main library is the Library of the Faculty of Arts and Sciences (Harvard College Library) with the principal collection in the Harry Elkins Widener Memorial Bldg., 2,021,102 vols.; the Houghton Library Bldg. for rare books and manuscripts, 153,608 vols., and the Lamont Library Bldg. for undergraduates, 107,124 vols. There are 11 other undergraduate collections, 7 house libraries, 22 libraries of divisions under this Faculty, including the Applied Science division, 34,843 vols. Affiliated are 16 research institution libraries, including those of Arnold Arboretum, Dumbarton Oaks, Fogg Art Museum, and Harvard College Observatory.

Libraries of other faculties are: Graduate School of Business Administration, 310,663 vols.; Faculty of Design, 92,020 vols.; Divinity School, 202,779 vols.; Graduate School of Education, 43,988 vols.; Law School, 805,363 vols.; Schools of Medicine, Public Health and Dental Medicine, 321,585 vols., and Graduate School of Public Administration, 266,442.

Recent acquisitions in the Houghton Library, housing rare books and manuscripts, include examples of the first works printed in North and South America and Africa, a hitherto unknown manuscript of Chaucer's treatise on the astrolabe, 22 incunabula including two collections of sermons of Savonarola, first editions of Machiavelli's Prince and Lorenzo Valla's Donation of Constantine, and tracts of Luther, Calvin, and other Reformation leaders. Early English books include Frampton's translation of Marco Polo, 1579, Udall's translation of Erasmus' Apophthegms, 1542, and the Pembroke copy of Holland's Bazilologia, 1618. Of the 17th century there are a large collection of Mazarinades and French news tracts, the first edition of Cervantes' Ocho comedies, several Blaeu atlases, musical treatises by Praetorius and others, and a rare Czech chronicle. Among later items are manuscripts of Heine, Charlotte Brontë, Barham, Swinburne, Thackeray, Oliver Wendell Holmes, Beerbohm, Henry James, T. S. Eliot, G. B. Shaw, and Thomas Wolfe. There are also important collections of drawings by Count Rumford and John Leech, and a drawing by William Blake. Printed additions include numerous Americana, Canadiana, and works of German, French, and Slavic literature of later centuries. Of outstanding interest are three special collections: the William A. M. Burden Aeronautical Collection, comprising over 600 books and manuscripts, mostly concerned with balloon ascensions; the Longfellow Collection from Craigie House, including 200 literary manuscripts, nearly 1,900 letters of Longfellow, 15,000 letters to Longfellow, over 100 special copies of printed books, and the Richard von Mises Collection of Rainer Maria Rilke.

University of Illinois

The combined resources of the libraries at the University of Illinois, Urbana, Ill., are 2,800,000 vols. The library of the Colleges of Medicine, Dentistry and Pharmacy is in Chicago and an undergraduate division is at Navy Pier, Chicago. Valuable departmental libraries are those of Engineering, 71,000 vols.; Architecture, 27,700 vols.; Law, 101,000 vols.; Agriculture, 36,000 vols. There are extensive collections in literature, history and music, the latter including the John Philip Sousa collection of band music. The newspaper division now has 28,400 vols.

Indiana University

Indiana University Library, Bloomington, Ind., contains in its central unit, departmental libraries, and other centers approximately 2,383,000 separate pieces. Of this approximately 946,600 are catalogued and processed volumes; more than 850,000 are manuscripts; 297,800 pamphlets; 13,900 photographs and prints; 37,100 slides; 4,300 reels of film; 12,000 records; 99,870 music scores; and an estimated 91,700 are maps.

The Department of Special Collections and Rare Books has about 39,000 books and pamphlets and 850,000 manuscripts. It owns Jos. B. Oaklea Lincoln collection of 4,500 items. The war of 1812 collection consists of 1,100 books and 11,600 mss., including the 7,000 letters and papers of Jonathan Williams, one-time secretary to Benjamin Franklin, and Supt. of West Point. The American Revolution collection numbers 1,351 vols. The Augustan collection (English politics and government, 1688-1731, 6,700 titles) emphasizes Daniel Defoe. Also papers of Hugh McCulloch, secretary of treasury under Lincoln, Johnson and Arthur, 15,000 items; 6,000 manuscripts and 4,000 books and pamphlets on the Far West from the library of Robert S. Ellison; 823,000 mss. in the Indiana history collections; 3,100 mss. in the Lafayette collection and 1,600 books and pamphlets in the Oscar L. Watkins Wordsworth collection.

State University of Iowa

The Libraries of the State University of Iowa contain 826,838 vols. and about 365,000 processed but uncatalogued government documents. Important is the Leigh Hunt collection of 3,500 manuscripts, books, association copies and periodicals collected by Luther A. Brewer, Cedar Rapids, Iowa. Among the 1,700 manuscripts are letters to and from Shelley, Keats, Browning and Dickens. The library also contains the John Springer collection of 1,850 books on printing and allied subjects, and the Mark Ranney memorial collection of 3,650 vols. in the fields of literature, art and history. Helping to preserve the cultural record of the day is the rapidly growing collection of books and manuscripts by Iowa authors. Gifts of their writings received from Herbert Hoover, John R. Mott and Carl Van Vechten, formed the nucleus of the book collection. The manuscript collection includes writings by MacKinlay Kantor, Wallace Stegner, James Norman Hall, Carl Van Vechten, Marquis Childs, Hartzell Spence, Frank Luther Mott, Phil Spong, Wilbur Schramm, Cornelia L. Meigs, Arthur Davidson Ficke, and many others. The Bollinger Lincoln collection contains 4,150 books about Lincoln.

Johns Hopkins University

The Johns Hopkins University Library, Baltimore, Md. (founded 1876), contains 1,048,102 vols. chosen for scholarly and research value. About 36,000 volumes are in the John Work Garrett Library at Evergreen House, a collection particularly strong in early Maryland items and the history of art. Also included are approximately 167,234 vols., comprising the William H. Welch Medical Library and the Library of the Institute of the History of Medicine, which specializes in the book needs of the medical profession.

Also of first importance are the Tudor and Stuart Club Collection of 17th Century English literature, the Hutzler Collection of Economic Classics, the Barnett Collection of Trade Union Publications, the Birney Slavery Collection, the Mackall Bibliographical Collection, the Strouse Rabbinical Library, the Loewenberg Collection of Modern German Drama, the Collitz Collection of Linguistics, the Colet Collection of French Drama, the McCoy Art Collection, the Hoffman Collection of Bibles, the Fowler Collection of Architectural Classics, the Ottensen Icelandic Collection, the Hauer Chinese Collection, the Havens Southey Collection, the Vincent Collection of Swiss history, the Abbé Meteorology Collection, and manuscripts

of Sidney Lanier, Francis Lieber, D. C. Gilman, John Banister Tabb, and Edward Lucas White.

University of Kansas

The Libraries of the University of Kansas, Lawrence, Kans., consist of approximately 650,000 vols. On the Lawrence campus the collections are located in Watson Library and several departmental special libraries, including Law, Engineering, Geology, and Physical Sciences. At the KU Medical Center in Kansas City, Kans., are the Medical School Library and the Logan Clendening Library of the History of Medicine. The general collections are strong in economic history and theory, European history, and mathematics, besides the following special collections: Kansas Collection including Pennell Collection of Early Kansas Photographs; Ralph M. Ellis Collection of Ornithology and Rare Books (approx. 17,000 vols.); T. J. Fitzpatrick collection on the History of Botany; James F. Spoerri collection of James Joyce.

University of Kentucky

The University of Kentucky Libraries contain nearly 700,000 vols. The manuscript division contains 3,000 bound vols., 300,000 separate pieces. They are strong in the history of Kentucky, the Ohio Valley, the Middle and Deep South. The Samuel M. Wilson Library of Americana contains 10,000 books, 100,000 mss. dealing with the history of Kentucky and the Presbyterian church, including the Gov. Shelby family papers, and political tracts of the early 1800s. Other collections are: Records of the John P. Morton Publishing Co., Louisville, 436 vols.; Southern country store records, 2,000 vols. and 50,000 pieces; Grant C. Knight collection of letters of modern authors, 491 pieces; Laura Clay collection of papers relating to the woman suffrage movement, 10,000 pieces; records of the Kentucky Court of Appeals (about 70,000 cases) from 1860 to 1943; and books and manuscripts of Kentucky authors, including James Lane Allen, Young E. Allison, Harriet Arnow, Ben Lucien Burman, John Fox, Jr., A. B. Guthrie, Jr., Thomas Merton, and Robert Penn Warren.

Louisiana State University

Books of all the libraries in the University system now total 625,813 vols. The Hill Memorial Library and branch libraries on the Baton Rouge, La., campus contains 491,717 vols. The holdings of other units are: Law Library, 91,337 vols.; Medical Library 38,778 vols. Among the Library's more important materials for research are (1) The Louisiana Collection, containing printed materials relating to the State of Louisiana, its history, people, and resources. It includes also the writings of Louisiana novelists, poets and dramatists, and selected material on the Lower Mississippi River and the Lower Mississippi Valley. (2) The Newspaper Collection, especially strong in Louisiana papers. (3) The Romance Language Collection, 13,159 vols., including a special Blondheim Collection on the dialects of France.

Also containing research materials, though not a part of the Library, is the University's Department of Archives, containing 347,000 historical manuscripts and about 1,650,000 items of state and parish agencies.

Mass. Institute of Technology

The Massachusetts Institute of Technology Libraries contain more than 500,000 vols. and comprise one general and 5 divisional libraries. The Charles Hayden Memorial Library houses the General Library, containing the main reference and research collection and the union catalog, the Science Library and the Humanities Library. Special facilities in this building include the Boston Stein Club Map Room, music library, exhibition gallery, projection room and microfilm laboratory.

Located outside of the Charles Hayden Memorial Library are the following divisional libraries: the Dewey Library (industrial management), the Engineering Library, the Rotch Library (architecture and city planning). Other special collections: Early aeronautical prints and books, Baldwin (18th and early 19th century civil engineering), Theodore Schwarz map collection, Gaffield (19th century glass making in the United States), prints and books on early shipbuilding, naval history, marine and electrical engineering.

University of Michigan

The University of Michigan, Ann Arbor, Mich., is served chiefly by the University Library with its 27 divisional libraries, and by the William L.

Clements Library of American History, the Law Library, and the Michigan Historical Collections, with total resources of 2,321,624 vols.

The University Library is especially strong in publications of French local historical and scientific societies; history of the Netherlands, 3,600 items, with emphasis on source materials and the 16th and 17th centuries of Dutch and Belgian history; Far Eastern studies in Japanese and Chinese, 55,000 vols.; social science, the Parsons collection of 6,000 vols., stressing political economy and statistics of European countries before 1850.

Some of the special collections are: English and American drama before 1850, strongest in Restoration and 18th century plays; Shakespeare, 8,000 vols.; history of mathematics, 3,500 vols. dating from the 15th century to 1850; history of medicine, about 2,000 vols. of first, early, and important editions on anatomy, surgery, and internal medicine; military art and science previous to 1800, a considerable part of the Stephen Spaulding Memorial Collection of 3,474 vols.; Hubbard Collection of Imaginary Voyages, 3,800 vols., which includes many editions of Defoe's Robinson Crusoe and Swift's Gulliver's Travels; Worcester Philippine Collection, 1,200 vols.; polar exploration, presented by William H. Hobbs, 7,500 items, books, photographs and letters of Arctic and Antarctic explorers of the 20th century. The Music Library, chiefly through the acquisition in 1954 of the library of the late Jean-Auguste Stelfeld of Antwerp, Belgium, now possesses among its rare items about 200 mss., 700 books and 1,000 publications of music printed before 1800.

Among the larger divisional libraries are the Bureau of Government, 33,758 vols.; Business Administration, 109,700 vols.; Museums, 46,679 vols. and 110,000 reprints in natural history and systematics, paleontology and anthropology, including the Howard A. Kelly mycological collection of 12,000 items, the Bryant Walker mollusk collection, 6,000 items, and about 7,000 vols. of ornithology; Transportation, over 150,000 books, pamphlets, prints, and serials, covering this broad field with some emphasis on the engineering aspects.

WILLIAM L. CLEMENTS LIBRARY

The William L. Clements Library of American History at the University of Michigan, was founded by William L. Clements (1861-1934), Bay City, Mich., industrialist and regent of the university. The Library is now supported by the university, acting through the Board of Regents and the Library's Committee of Management. It contains approximately 35,000 volumes in the Division of Books, 200,000 pieces in the Manuscript Division, and more than 25,000 printed and about 800 manuscript maps in the Map Division.

Rare and famous volumes fill the heavily protected cases of the Book Division. Among the noteworthy items are the 1493 edition of the Epistola in which Christopher Columbus reports the discovery of the New World, and the Waldseemüller geography of 1507 which gave the name America to the two continents. Peter Martyr's contemporary accounts of the activities of the Spanish Conquistadores are supplemented by the first printings of letters sent by Hernando Cortes. DeBry's illustrated voyages, 1590-1625, are exceptional. The reports of voyagers are expanded by the stories of the first settlers. Thus the voyages of the French, Cartier and others, are paralleled in a great collection of the Jesuit Relations, compiled by Jesuit missionaries.

The exploits of Elizabethan mariners are recorded in Hakluyt's Voyages, 1582, and English entrance upon the colonial scene is marked by a long list of rarities led by Thomas Hariot's Virginia, London, 1588, and Capt. John Smith's True Relation, 1608.

Among major collections are books by and about Christopher Columbus, Amerigo Vespucci, the Mathers and the Adamases, Benjamin Franklin, John Wilkes, Tom Paine, George Washington, Thomas Jefferson, Abraham Lincoln, and Theodore Roosevelt.

Also included in the Book Division are many historical items relating to the political, religious, and cultural life of Colonial America. Typical are works by William Bradford, Roger Williams, John Cotton, Thomas Hooker, William Penn, Jonathan Edwards, and Crèvecoeur.

In the Manuscript Division are housed the headquarters papers of many of the British commanders and leaders during the American Revolution, sup-

plemented by papers of the patriots. Included are such names as Admiral George Clinton, the Earl of Shelburne, Sir Peter Warren, John Wilkes, Lord George Germain, Lieut. Gen. Thomas Gage, Lieut. Gen. Sir Henry Clinton, Gen. Nathaniel Greene and Brig. Gen. Josiah Harmar, commander of the first United States Army. The Hessians employed by the British are represented by the papers of Baron von Junken, war minister of Hesse-Cassel. Other important manuscript collections are the papers of Lewis Cass, governor of Michigan Territory and Secretary of State under Buchanan; the John Wilson Croker papers, and Mexican collections. These latter include the Porfirio Diaz papers relating to the War of Intervention, and letter books containing letters written to Antonio Maria Bucareli y Ursúa, Viceroy of New Spain.

More modern groups within the division are the important papers of James G. Birney and Rev. Theodore D. Weld, leaders in the anti-slavery movement. Here too are the papers of Michigan's first senator, Lucius Lyon; of Russell A. Alger, secretary of war under McKinley; and a collection of the correspondence of Theodore Roosevelt.

Maps from the 15th to the 20th century illustrate the course of American history. The Division is particularly strong in American maps printed before 1800 and in its series of manuscript maps of Revolutionary commanders.

University of Minnesota

The University of Minnesota Library, Minneapolis, Minn., has 1,763,728 vols. and 300,000 pamphlets, including an especially strong collection of Scandinaviana, both official records from abroad and studies of immigration and settlement in the Midwest. It has microfilmed 12,635 reels of newspapers and documents. Outstanding among its collections is the James Ford Bell collection of Jesuit Relations and other Americana consisting of history of commerce with special emphasis on the Age of Discovery. Other strong fields include: Seventeenth Century English History, including early English newspapers and many thousands of volumes on South Asia.

University of Missouri

The libraries of the University of Missouri, Columbia, Mo., contain 715,000 vols., 30,000 foreign theses, 17,000 maps and more than 16,000 reels of microfilm. The General Library has 530,000 vols. and cooperates with the State Historical Society of Missouri, which has 298,000 vols. and is housed in the same building. Western Americana includes collections of Mark Twain and Eugene Field, and the J. Christian Bay collection acquired in 1942. The Western Historical manuscript collection, est. 1943, contains diaries and records. There are also American speeches and sermons, the Lawson collection of crime and criminology, the Flach collection of French law, 6,000 vols., the Lejay collection of classical philology, the Thomas Moore Johnson collection of classical philosophy. The Frank Lee Martin Memorial library of the School of Journalism has over 10,000 books. The microfilm holds a dozen files of 18th century newspapers. 80 files of American literary periodicals published before 1800, 190 files of American periodicals published between 1800 and 1825 and complete files of important newspapers, American and foreign.

New York University

The New York University Libraries, New York, N. Y., contain over 1,000,000 vols. in eight separate libraries. Washington Square Library is the largest with 450,000 vols. Branch libraries in departmental buildings include the Jewish Culture Foundation and the Institute of Fine Arts at 17 East 80th St. The general collection includes the labor publications amassed by the Labor Bureau, Inc., the Schiff collection in economics, and, in education, the collection of Will Monroe and the Henry Barnard papers. The Law Library, 125,000 vols., has a complete collection of Anglo-American reports. The Frederick Brown Collection of ancient legal documents contains 200 documents dated before 1600. The Commerce Library contains 125,000 vols.; the library of the Graduate School of Business Administration 22,000 vols.; the Medical Library 70,000 vols.; the Dental Library 15,000 vols.; the University Heights Library with its departmental branches 215,000 vols.

In Sept., 1951, the Mills Memorial Library, a \$500,000 gift of the Davila Mills Foundation, was opened in Arthur T. Vanderbilt Hall of the new Law Center south of Washington Park.

University of North Carolina

The University of North Carolina Library was organized in Chapel Hill, N. C., in 1795 when the

oldest state university in America opened. The main library and 15 departmental libraries have 670,000 vols. The collection of North Caroliniana contains 154,000 items. The Southern Historical collection of manuscripts, dealing with the plantation system, slavery, the Civil War, the Confederacy, etc., has over 2,500,000 items of extraordinary richness. Also: the Wilmer collection of 600 Civil War novels; the Augustus Thomas collection of manuscripts and plays; the Thomas Wolfe collection of letters and books; the Jacobs collections of maps of the South and modern American and European Prints; the Latin Americana collection with emphasis on Chile, Argentina, Paraguay, Uruguay and Venezuela; the Archibald Henderson collections of American Drama and Bernard Shaw's works; Spanish plays, 18,500 titles; the Burton Emmett collections of Graphic Arts and first editions; the Josephus Daniels collection of Mexican items, 604 vols.; the Bowman Gray collection of World War I propaganda; the Sir Walter Raleigh collection relating to his career and Roanoke colonies, 215 items; the Whitaker collections on Samuel Johnson, James Boswell and their friends; the illustration of Cruikshank, Dickens' first editions and Dickensiana; the Judge Parker collection of Nuremberg trial documents, 1,030 items; the John Nolen collection of town and regional planning; the original manuscripts of North Carolina authors. The Library has the Shakespeare collection of Dr. Samuel A. Tannenbaum of New York, 4,000 items, and the Hanes collection for studying the history of printing, from clay tablets and incunabula to the present. It also has foundations of important research collections in Napoleonic, Southern literature, folklore, Federal and State documents, and books by and about the Negro.

Northwestern University

The libraries of Northwestern University comprise two groups: one on the campus in Evanston (est. 1856) and one on the Chicago campus, Lake Shore Dr. and Chicago Ave., Chicago. They contain approximately 1,150,000 vols. and 130,000 pamphlets.

The libraries on the Evanston campus, which constitute the University Library, contain about 745,000 vols., and include the Charles Deering Library, the general library with collections in the humanities and the social and biological sciences; the Library of the Technological Institute, with collections in engineering, chemistry, and physics; the Library of the School of Music; the Geology and Geography Library; and several departmental libraries. Special collections include: Africana, 8,500 vols. dealing with Africa south of Sahara; Biblioteca Femina, 3,000 vols. by women; Japanese language collection, 10,000 vols. on 20th century government and politics of Japan; Old Northwest Territory (mss.). Rare books, 8,000 vols.; Spanish plays, 16,000 pieces; 20th-century English and American literature, 4,000 vols. of first or limited editions and association copies.

The libraries on the Chicago Campus totaling approximately 410,000 vols., comprise the Archibald Church Medical Library, containing about 127,000 vols., a large number of pamphlets, and a collection of over 5,000 medical portraits; the Dental School Library, containing about 34,000 vols.; the Elbert H. Gary Law Library, containing some 163,000 vols. on Anglo-American law, comparative law, Roman law, international law, and criminal law; and the Joseph Schaffner Library of approximately 85,000 vols., chiefly in the fields of commerce and journalism.

University of Notre Dame

The University Library of the University of Notre Dame, Ind., estab. 1873, contains 385,000 vols., comprising the Law Library, 33,252 vols.; the Architecture Library, 4,500 books, 2,500 pamphlets and over 10,000 slides; the Engineering and Metallurgy Library of about 10,000 vols.; the Science Library (Chemistry, Mathematics, Physics) of 18,000 vols. and 2,100 reprints; the Biology Library of 10,000 vols. in addition to the Edward Lee Greene botanical library of 2,900 vols. and herbarium of 190,000 specimens, and the Julius A. Newland botanical library of nearly 10,000 vols. and herbarium of 200,000 specimens and the Mediaeval Institute of 5,000 vols. The Main Library of 260,000 volumes includes the Zahn South American collection of 1,500, the Hiberniana of 3,000 and the Dante Library of nearly 3,000 vols. in 40 languages and is rich in incunabula and post-incunabula editions. A collection of medallions, bronzes, marbles and photographs of Dante is maintained in connection with the Dante Library.

The Archives of the University of Notre Dame

Recent important acquisitions of Princeton Univ. Library include collections and papers of Geo. McAneny, James M. Beck, Sen. David A. Reed, and deCoppet, Samuel Putnam, Ridgely Torrence and his wife Olivia Dunbar; the ms. of Somerset Maugham's novel 'Theatre'; letters and papers relating to Elias Boudinot, pres. of the Continental Congress; the Shakespeare library of Henry M. Paul; ms. and letter of Robt. Louis Stevenson, Willkie Collins, Lewis Carroll, Trollope and other Victorians; and a drawing of a redshouldered hawk by J. J. Audubon.

Rutgers University

The Rutgers University Library, containing over 700,000 vols., includes the libraries for the College of Agriculture at New Brunswick, the College of Arts and Sciences, Rutgers Law School, the College of Pharmacy, at Newark, N. J. In addition the library contains over 100,000 pamphlets and maps, and several hundred special manuscript collections.

The largest special collection is the library of New Jerseyana which includes books, letters, and manuscripts of New Jersey historical and political figures. Also of New Jersey newspapers, pamphlets, maps, and prints. Another collection is the Symington collection of first editions, manuscript, correspondence, and memorabilia pertaining to English literature of the late 18th and early 20th centuries. It is rich in material relating to Swinburne, Browne, the Bronzes, Gosse, and Wise; also collections of American almanacs and newspapers, gift annals; DeLoe, Cobbett, Freness, Noah Webster, Walt Whitman, and Joyce Kilmer.

Stanford University

The Stanford University Library at Stanford, Calif., contains over 1,268,000 catalogued vols., 1,800,000 other vols., pamphlets, maps, and recordings, and 100,000 manuscripts. They receive over 11,500 periodicals. Of special interest are the Lee Simonson collection of plans and sketches for the dramatic settings; the Devere edition of the Triptan, about 1730; the Emille Melville Collection in play scripts; the James Wright Brown collection of 975 historic newspapers; the Newton Collection; and the Felton Library of English and American literature, with original editions of 19th and 20th century works, and the Sir Thomas More Collection.

The Memorial Library of Music, the gift of Mr. and Mrs. George J. Keating, includes manuscript scores of Massagena's Cavalleria Rusticana, Pjotow's Martha, and works by Cherubini, Berlioz, Donizetti, Dvorak, Grieg, Elton John, Mozart, Stravinsky, and other composers.

The Hoover Institute and Library on War, Revolution, and Peace was begun by Herbert Hoover. It now comprises over 350,000 books and pamphlets, besides documentary materials for the study of social movements and international relations during the past half-century. A 285-foot tower, comprising the research staff of the Institute, a collection of 35 bells was presented by the Belgian government. Other important libraries are the Hopkins Transportation Library, the Gubbeley Library in the School of Education, and the libraries of the Graduate School of Business, the Law School, and the Hopkins Marine Station at Pacific Grove, Calif. The Lane Medical Library of the Stanford Medical School in San Francisco contains 127,000 vols. and pamphlets and 1,100 current periodicals.

Syracuse University

Syracuse University, Syracuse, N. Y., has 500,000 books in its library, including the holdings of the New York State College of Forestry. Unbound and periodicals were received. Special collections include the Stephen Crane Collection of books, letters and unpublished short stories; the Frederic W. Goudy Collection of manuscripts, type faces and publications of the Village Press; the Van Rensselaer Library of history, 20,000 vols., collected by the German historian, Leopold von Ranke, and the Gertrude Smith collection of 45,000 documents, deeds, and books of central New York and 19th century America.

University of Texas

The Library of the University of Texas, at Austin, Tex., has 1,068,818 vols. The resources for the study of American history include special collections in the fields of Texas, the South, and Latin America. The Texas collection comprises 50,000 vols., exclusive of 9,500 vols. of Texas newspapers.

The library of the University of Oklahoma, Norman, Okla., including the General Library and 15 branches, contains more than 532,400 vols., plus extensive manuscript, pamphlet and document collections. The strong collections are in geology, petroleum technology, chemistry, biological sciences, and English literature. Notable special collections, usually the gift of alumni and other friends of the University, include: the E. Decolover Collection in the history of science and technology; containing first editions of epochal books in the development of sciences, including 16 incunabula; the Frank Phillips Collection on Oklahoma history; and the large William Bennett Bizzell Bible collection; but especially 17th and 18th century English literature. The history and contemporary life of Oklahoma and the Southwest is covered in the papers of former members of Congress, jurists, governors, state legislators and other leaders, and records of early day clubs, mines, and mercantile firms; the Manuscripts collection also includes 35,000 historical photographs.

University of Oregon

The University of Oregon Library, Eugene, Oregon, has 544,344 vols. The Medical School Library Special collections include the Burgess collection of medieval manuscripts, incunabula and early printed books. In the field of Northwest history the library maintains an Oregon collection of books and pamphlets, a manuscript collection of personal papers, diaries and account books and a photograph and negative collection, which includes the Clarence L. Andrews Alaska Collection, the Lee Moorhouse Eastern Oregon and the Peter Britt Southern Oregon collections.

University of Pennsylvania

The Library of the University of Pennsylvania, Philadelphia, Pa., was founded in 1750 and contains the original books presented by Lewis Evans, Joseph Priestley, Louis XVI of France and others. It has the Henry C. Lea library of medieval church history, with an unguessed section on the Inquisition; the Furness Memorial Library, formed by the editors of the Variorum Shakespeare, including rare folios and quartos; the Burr collection of Aristotle; the Macaulay collection of 15th and 16th century Italian literature; the Renner collection of Spanish drama; the Edgar Fahs Smith Library of Greek and Latin literature; the Curtis collection of Greek and Latin literature; the Woodcock collection of oriental and European manuscripts and the graphic arts collection.

Princeton University

Princeton University has its main book collection in the Harvey S. Firestone Library and a dozen special libraries in other buildings. Important collections include the Greenfield Kane, of early Americana; the Great Oriental; the Parrish 18th century English authors; the Hollins western Americana; the William Seymour theater collection; the Garrett collection of oriental and Western European manuscripts and the graphic arts collection.

Princeton has large collections in international law, diplomacy, public and corporation finance and industrial relations. Total resources are 1,500,000 vols.

¹Expenditures (excluding capital outlays). ²N. Y. Public Library Circulation Dept. ³N. Y. Public Library Reference Dept. ⁴Not a circulating library; 2,547,018 volumes consulted.

Total number of volumes 55,565,923; circulation of volumes 163,887,884. Expenditures (exec. capital outlay) for salaries \$56,491,430; books and periodicals \$9,643,270, other categories \$11,372,782, total \$77,507,482. Population of area served 46,694,756.

Air Force Library Service

The Air Force Library Service provides technical, legal, educational and recreational reading materials to all USAF personnel. It includes 178 main libraries within the U. S. continental limits and 106 main libraries and library depots overseas with a total of 4,437 service units including branches and field collections. The Air Force Library collections contain over 3,315,277 volumes with an annual circulation of 7,950,617 volumes. Each Air Force Library is supplied with technical and legal books by a central procurement directed by the Libraries Section at Headquarters USAF. Monthly recreational book and periodical kits are also centrally procured to supplement local acquisitions. An Air Force Library Publicity Contest and an Air Force Short Story Contest open to all Air Force personnel are conducted each year.

The American Academy in Rome, est. 1894, chartered 1905 by Act of Congress, awards one-year fellowships, with possibility of extension, to American citizens for independent work in fine arts and classical studies. A research fellowship has a grant of \$2,500 and residence at the Academy; others have \$1,250, residence and transportation allowances. Information may be obtained from the American Academy in Rome, 101 Park Ave., New York, N. Y.

Scholarships for Americans in Oxford and Rome

A student with at least junior standing in a recognized American college or university may become eligible for one of 32 scholarships awarded annually under the will of Cecil John Rhodes, providing two years of study (possibly three) at Oxford University in England. The stipend is £600 (\$1,680) a year. Information may be obtained from Courtney Smith, American Secretary of the Rhodes Scholarships, Swarthmore College, Swarthmore, Pa.

Home of George Washington's Ancestors Restored in England

Washington Old Hall, County Durham, England, the 12th century seat of the ancestors of George Washington, was formally opened to the public, in October, 1955. Restored through the efforts of the America-British Commonwealth Assn. at a cost of about \$28,000, contributed, it was opened (1376) and of John of Wessington, prior of Durham, 1416-1446, and ancestors of Washington, were viewed by the ambassador in Durham Cathedral. Members of the Washington Greys of the New York National Guard were present.

American Colleges and Universities

SENIOR, MEDICAL, PROFESSIONAL AND TEACHERS

Enrollment and number of teachers are reported for the Academic Year, September to June, 1954-55, and do not include registrations for summer term, extension or correspondence courses.

Abbreviation following name of college: (O) co-educational; (M) has medical school; (N) attended predominantly by Negroes; (T) primarily teachers; (W) women only. President unless otherwise stated. Asterisk (*) denotes land-grant college. Year that of founding.

Life in the United States, 1955

An unauthorized rule by which women wearing shorts were barred from the visitors' gallery of the House of Representatives, Washington, D. C., was annulled in July after protests.

Comic books devoted to crime, sex, horror, terror or brutality may not be published or sold to anyone under 18 in New York state. An amendment to the penal law makes punishment a year in jail, or a \$500 fine, or both.

State governments devote the largest slice of tax revenue to education. The U. S. Bureau of the Census reported that in fiscal 1954 expenditures were \$4.65 billion, up 6.3% over the previous year; nearly \$3 billion of this amount went to local governments for support of schools, and \$1.3 billion went to higher education. Next to education states spent over \$4 billion for highways, with \$477,000,000 of this amount for toll roads and bridges.

A new spire was placed on top of Christ Episcopal Church, Boston, known also as Old North Church, in July, 1955, replacing one destroyed by a hurricane Aug. 31, 1954. The lantern signalling Paul Revere and Charles Dawes that the British were leaving Boston for Lexington and Concord hung in the original steeple, which was destroyed in 1804. The spire, above the lantern casement, is 67 ft. tall, with a 20

ft. original weather vane above it.

In August, 1955, Hollywood sources reported that the motion picture *Gone With the Wind*, produced by David O. Selznick in 1940, continues to be shown in theaters around the world and has had a gross income of \$55,000,000.

A Wisconsin state law, effective May 20, 1955, prohibits any corporation, labor union and certain other organizations from contributing directly or indirectly to any political party, organization, committee or individual candidate, or to promote or defeat a candidate for nomination or election, except that individuals may join and contribute to voluntary organizations other than those named and unions, corporations and cooperatives may publish periodicals commenting on candidates.

Toll collectors on the Rip van Winkle bridge, which spans the Hudson River from near Hudson, N. Y. to the Catskills, were confronted in the spring by a mule-drawn, wooden-wheeled covered wagon, containing a farmer, his wife and 6 children. The farmer had pulled up stakes in Connecticut and was headed for the plains of Nebraska, to buy a farm. The bridge regulations made no provision for this anachronism so the collectors charged 15c for the wagon and mules and 15c for a spare mule and rider, total 30c, and sent them on their way.

Forms of Address for Persons of Rank and Public Office

President of the United States

Address: The President, The White House, Washington, D. C. Also, The President and Mrs. —.

Salutation: Dear Sir or Mr. President or Dear Mr. President. More intimately: My dear Mr. President. Also: Dear Mr. President and Mrs. —.

The Vice President takes the same forms as President.

Cabinet Officers

Address: Mr. John Smith, Secretary of State, Washington, D. C., or The Hon. Mr. John Smith. Similar addresses for other members of the Cabinet. Also: Secretary and Mrs. John Smith.

Salutation: Dear Sir, or Dear Mr. Secretary. Also: Dear Mr. and Mrs. Smith.

Officers of Army and Navy

Address: Careful attention should be given to the precise rank, thus: General of the Army Douglas MacArthur; Fleet Admiral Chester W. Nimitz. Also Brigadier General John Smith, United States Army, or abbreviated, Brig. General John Smith, USA, or Captain (Capt.) John Smith, USN. If he is retired, Rtd. is added.

Salutation: Dear Sir, or Dear General. All general officers, whatever rank, are entitled to be addressed as generals. Likewise a lieutenant colonel is addressed as Colonel and first and second lieutenants are addressed as Lieutenant.

Warrant officers and flight officers are addressed as Mister. Chaplains are addressed as Chaplain. A Catholic chaplain may be addressed as Father. Members of the Army Nurse Corps are addressed as Nurse. WACs may be addressed informally by their equivalent army rank. Cadets of the United States Military Academy are addressed as Cadet officially and in written correspondence. Aviation and other cadets of the Army and Air Force are addressed as Cadet. Noncommissioned officers are addressed by their titles.

The Bench

Address: Chief Justice of the United States, Washington, D. C. Associate Justice of the Supreme Court of the United States, Washington, D. C. Also Mr. Justice Smith, for an associate justice. Other judges are The Hon. John Smith, Associate Judge, U. S. District Court, etc. Salutations: Dear Sir, or Dear Mr. Chief Justice, or Dear Mr. Justice. Also, for others, Dear Sir or Dear Judge Smith.

Members of Congress

Address: The Hon. John Smith, United States Senate, Washington, D. C. or Sen. John Smith, etc. Also The Hon. John Smith, House of Representatives, Washington, D. C. or Rep. John Smith, etc. Salutation: Dear Mr. Senator, Dear Mr. Representative, or more generally, Dear Mr.

Smith. A Representative should never be addressed as Congressman.

Ambassador, Governor, Mayor

Address: The Hon. Mr. John Smith, followed by his title. He can be addressed either at his embassy, or at the Department of State, Washington, D. C. A foreign ambassador is His Excellency.

Salutation: Dear Mr. Ambassador. A foreign ambassador is Your Excellency.

Governors and Mayors are often addressed as The Hon. John Smith, Governor of —; or The Hon. John Smith, Mayor of —; also Governor John Smith, State House, Albany, N. Y., or Mayor John Smith, City Hall, Erie, Pa.

The Clergy

Address: His Holiness, the Pope, or His Holiness Pope Pius XII, State of Vatican City, Italy.

Salutation: Your Holiness or Most Holy Father.

Also: His Eminence, John, Cardinal Smith; salutation: Your Eminence. An archbishop or a bishop is addressed The Most Reverend, and the salutation is Your Excellency. A monsignor who is a papal chamberlain is The Very Reverend Monsignor and saluted as Very Reverend Monsignor; a monsignor who is a domestic prelate is The Right Reverend Monsignor and salutation is Right Reverend Monsignor. A priest is addressed Reverend John Smith, and saluted as Reverend Father, or Dear Reverend Father.

A bishop of the Protestant Episcopal Church is The Right Reverend John Smith; salutation is Right Reverend Sir, or Dear Bishop Smith. If a clergyman is a Doctor of Divinity, he is addressed: The Reverend John Smith, D. D., and the salutation is Reverend Sir, or Dear Dr. Smith. The D. D. is omitted when a clergyman does not have the degree; the salutation then is Dear Mr. Smith.

A bishop of the Methodist Church is addressed Bishop John Smith with titles following, and saluted as Dear Bishop Smith.

Royalty and Nobility

An Emperor is to be addressed in a letter as Sir, or Your Imperial Majesty.

A King or Queen is addressed as His Majesty (Name), King of (Name), or Her Majesty (Name), Queen of (Name). Salutation: Sir, or Madam, or May it please Your Majesty.

Princes and Princesses and other persons of royal blood are addressed as His (or Her) Royal Highness, and saluted with May it please Your Royal Highness.

A Duke or Marquis is My Lord Duke (or Marquis), a Duke is His (or Your) Grace.

Wives of any peer may be addressed as Madam, with the further alternative of Your Ladyship, or Your Grace, if she is of high rank.

American College Fraternities, Sororities and Societies

Source: World Almanac Questionnaire

The oldest American college Greek letter fraternity is Phi Beta Kappa, organized at William and Mary College, Williamsburg, Va., Dec. 5, 1776. The United Chapters were organized in 1883. Kappa Alpha Society, founded Nov. 26, 1825, is the oldest of all the Greek letter fraternities to have maintained a continuous existence.

National Interfraternity Conference: Sec., Francis Van Derbur, 156 Highlands Station, Denver 11, Colo.
Professional Interfraternity Conference: Sec., J. D. Thomson, 222 W. Adams St., Chicago, Ill.
Association of College Honor Societies: Sec.-Treas., Robert H. Nagel, Un. of Tenn., Knoxville, Tenn.
National Panhellenic Conference: Sec., Mrs. Cicero F. Hogan, 9219 Mintwood St., Silver Spring, Md.
Professional Panhellenic Association: Sec., Miss Marie Marti, 18240 Meyers Rd., Detroit 35, Mich.

PROFESSIONAL, HONOR AND RECOGNITION FRATERNITIES

Honor societies elect members primarily for their excellence in scholarship and/or activities. Phi Beta Kappa, honor society in the general academic category, was originally a secret fraternity founded in 1776, but not continuously active. In 1883 it became an honor society and students with the highest standing on graduation are nominated for membership by college authorities.

In the following list, organizations marked (a) admit both men and women.

Fraternity	Year Found.	Active Chapt.	Members	National Headquarters
Accounting:				
Beta Alpha Psi	1919	38	15,000	436 Hagerty Hall, O. St. Un., Columbus, O.
Advertising:				
Alpha Delta Sigma	1913	42	11,000	Sch. of Journ., Un. of Mo., Columbia, Mo.
Agriculture:				
Alpha Zeta (Honor)	1897	49	30,000	1010 Vermont Ave., Wash. 5, D. C.
Gamma Sigma Delta	1905	15	15,000	Kansas State Coll., Manhattan, Kan.

Fraternity	Year Found.	Active Chapt.	Members	National Headquarters
Animal Husbandry:				
Block and Bridle Club	1919	28	20,000	A. H. Dept., Un. of Tenn., Knoxville, Tenn.
Architecture:				
Alpha Rho Chi	1914	7	2,312	4828 Garfield Ave. S., Minneapolis, Minn.
Scarb	1909	9	3,000	306 Marvin Hall, Un. of Kan., Lawrence
Architecture & Allied Arts:				
Tau Sigma Delta	1913	11	1,656	14424 Longacre Rd., Detroit 27, Mich.
Arts:				
Delta Phi Delta (a)	1909	34	12,000	R.R. 10, Lafayette, Ind.
Kappa Pi (a)	1911	88	35,000	211 No. Adams St., Pleasant, Iowa
Aviation: Alpha Eta Rho	1929	14	900	8218 Hollywood Blvd., Hollywood 46, Calif.
Band: Kappa Kappa Psi	1919	69	15,000	Okla. A. & M. Coll., Stillwater, Okla.
Biology:				
Beta Beta Beta (Honor) (a)	1922	107	14,000	214 So. 3rd St., Mt. Vernon, Iowa
Phi Sigma Society (a)	1915	34	21,000	P.O. Box 454, Blacksburg, Va.
Business Education:				
Delta Pi Epsilon (a)	1936	26	3,700	Ohio St. Un., Columbus 10, Ohio
Pi Omega Pi	1932	69	10,000	Un. of Tenn., Knoxville, Tenn.
Ceramic Engineering:				
Keramos	1902	12	2,100	4055 No. High St., Columbus 14, Ohio
Chemistry:				
Alpha Chi Sigma	1902	79	24,825	5503 E. Wash. St., Indianapolis 19, Ind.
Gamma Sigma Epsilon	1919	17	4,000	Coll. of Phar., Un. of Fla., Gainesville, Fla.
Phi Lambda Upsilon (Honor)	1899	47	22,000	Un. of Cinn., Cincinnati 21, Ohio
Chiropractic:				
Delta Sigma Chi	1913	9	5,000	Box 1020, Davenport, Iowa
Delta Tau Alpha	1936	3	1,255	20 No. Ashland Blvd., Chicago 7, Ill.
Civil Engineering:				
Chi Epsilon	1922	45	10,000	86½ No. Lima St., Sierra Madre, Calif.
Classics:				
Eta Sigma Phi	1914	57	800	Tulane Un., New Orleans 18, La.
Commerce:				
Beta Gamma Sigma	1913	64	27,834	150 Hanna Hall, Un. of Cinn., Cinn. 21, O.
Commerce and Business:				
Alpha Kappa Psi	1904	76	33,988	111 E. 38th St., Indianapolis 5, Ind.
Beta Alpha Psi	1919	39	14,500	Hagerty Hall, Ohio St. Un., Columbus 1, O.
Delta Sigma Pi	1907	85	34,537	222 W. Adams St., Chicago 6, Ill.
Dentistry:				
Alpha Omega	1907	77	8,000	41 E. 19th St., New York 3, N. Y.
Delta Sigma Delta	1882	80	22,852	4660 Buckingham Rd., Detroit 24, Mich.
Omicron Kappa Upsilon	1914	43	9,000	State Un. of Iowa, Iowa City, Ia.
Psi Omega	1892	35	26,753	3313 West St., Welton, W. Va.
Xi Psi Phi	1889	31	20,000	508 N. Grand Blvd., St. Louis 3, Mo.
Drama:				
Alpha Psi Omega (a)	1925	312	23,950	1317 Peacock Lane, Fairmont, W. Va.
National Collegiate Players (Pi Epsilon Delta) (a)	1922	57	6,500	Box 409, Capital Un., Columbus 9, Ohio
Theta Alpha Phi (a)	1919	55	1,500	Albion College, Albion, Mich.
Earth Sciences:				
Sigma Gamma Epsilon (Honor)	1915	47	30,000	Missouri Sch. of Mines, Rolla, Mo.
Economics:				
Artus, Order of	1915	15	2,000	Un. of Pittsburgh, Pittsburgh 13, Pa.
Education:				
Alpha Delta Kappa	1947	88	2,380	Rm. 950, 1006 Grand St., Kan. City 6, Mo.
Kappa Delta Phi	1900	12	3,302	9 Univ. Park, Waltham, Mass.
Kappa Delta Pi (a)	1911	207	80,000	238 E. Perry St., Tiffin, Ohio
Kappa Phi Kappa	1922	42	15,000	2167 Fifth Ave., No. Birmingham, Ala.
Phi Delta Kappa	1906	145	60,000	2034 Ridge Rd., Homewood, Ill.
Phi Sigma Pi	1921	13	4,536	State Teachers Coll., Millersville, Pa.
Engineering:				
Alpha Pi Mu (Industrial)	1949	14	1,350	572 Page Ave. N.E., Atlanta, Ga.
Delta Kappa Phi	1899	5	2,300	6520 No. 9th St., Philadelphia 26, Pa.
Eta Kappa Nu (Electrical)	1904	57	22,000	P.O. Drawer 447, Dillsburg, Pa.
Pi Tau Sigma (Mechanical)	1915	60	20,000	511 Russell St., W. Lafayette, Ind.
Sigma Phi Delta	1924	11	3,120	1308 So. Mattis Ave., Champaign, Ill.
Sigma Tau	1904	30	23,000	210 So. 30th St., Lincoln 10, Nebr.
Tau Beta Pi	1885	96	70,000	Un. of Tenn., Knoxville, Tenn.
Theta Tau	1904	24	13,500	5208 Westwood Dr., Wash. 16, D.C.
Foreign Service:				
Delta Phi Epsilon	1920	8	2,500	448 So. Hill St., Los Angeles 13, Calif.
Forensic:				
Delta Sigma Rho (a)	1906	79	7,000	Kansas State Coll., Manhattan, Kan.
Pi Kappa Delta (a)	1913	181	28,786	East Central St. Coll., Ada, Okla.
Tau Kappa Alpha	1908	90	8,000	Florida State Un., Tallahassee, Fla.
Forestry:				
Xi Sigma Pi	1908	17	4,154	Louisiana St., Un., Baton Rouge, La.

National Spelling Bee Champions

The National Spelling Bee, conducted by Scripps-Howard Newspapers and other newspapers since 1939, was instituted by the Louisville (Ky.) Courier-Journal in 1925. Children under 16 years of age sponsored by participating newspapers are eligible to compete for the cash prizes and prize trips.

1939—Elizabeth Ann Rice, The Worcester (Mass.) Telegram and Gazette.

1940—Laurel Kuykendall, The Knoxville (Tenn.) News-Sentinel.

1941—Louis Edward Sissman, The Detroit (Mich.) News.

1942—Richard Earnhart, The El Paso (Tex.) Herald-Post.

1946—John McKinney, The Des Moines (Iowa) Register & Tribune, champion; (2) Mary McCarthy, New York World-Telegram; (3) Leslie Dean, Passaic (N. J.) Herald News.

1947—Mattie Lou Pollard, Thomaston, Ga. (Atlanta (Ga.) Journal), champion; (2) Sonya Rodolfo, Chicago (Chicago (Ill.) Daily News); (3) Suzanne Gelin, Parma, Ohio (Cleveland (Ohio) Press).

1948—Jean Chappellear, Black Horse, Ohio (Akron (Ohio) Beacon-Journal), champion; (2) Darrel Flavell, Washington, D. C. (Washington Daily News); (3) Rosemary Schirmer, White Oak, Ohio (The Cincinnati Post and Station WCPO).

1949—Kim Calvin, Canton, Ohio (Canton Repository), champion; (2) James Shea, Brooklyn, N. Y. (New York World-Telegram); (3) Fred Shoup, Palo Alto, Calif. (San Francisco News).

1950—(Tie), Colquitt Dean, Atlanta, Ga. (Atlanta Journal); Diana Reynard, Cleveland, Ohio

(Cleveland Press), champions; (2) Jim Bernhard, Houston, Texas (Houston Press); (3) Nancy MacIaren, Lowell, Mass. (Lowell Sun).

1951—Irving Belz, 13, Memphis, Tenn. (Memphis Press-Scimitar), champion; (2) Michael Arating, 13, New York, N. Y. (World-Telegram & Sun); (3) Mary Anne Beckhokiwak, 13, Akron, Ohio (Akron Beacon Journal).

1952—Doris Ann Hall, 13, Hudson, N.C. (Winston-Salem Journal & Sentinel), champion; (2) Marjorie Folliart, 13, Crafton, Pa. (Pittsburgh Press); (3) Mary Ellen Rusk, 12, Washington, D.C. (Washington Daily News).

1953—Elizabeth Hess, 13, Phoenix, Ariz. (Arizona Republic), champion; (2) Raymond A. Sokolov, 11, Detroit, Mich. (Detroit News); (3) David Hudson, 13, Cuyohoga Falls, Ohio (Akron Beacon Journal).

1954—William Cashmore, 14, Center Square, Pa. (Norristown Times Herald), champion; (2) William Kelley, 11, Deering, Mo. (Memphis Press-Scimitar, Memphis, Tenn.); (3) Patricia Brown, 14, Birmingham, Ala. (Birmingham Post-Herald).

1955—Sandra Sloss, 13, Granite City, Ill. (St. Louis Globe-Democrat), champion; (2) Jean Copeland, 12, Prescott, Ariz. (Arizona Republic, Phoenix); (3) Naomi Klein, 12, Brooklyn, N. Y. (New York World-Telegram & The Sun).

Official Typewriting Records

Illiteracy in the United States

Illiteracy had declined to a new low in the United States by October 1952. Of the then 110 million persons who were 14 years of age and over about 2.8 million (2.5 per cent) were unable to read and write, either in English or in any other language, and were therefore classified as illiterate.

Illiterate percentages, by decades, compiled by the U. S. Bureau of the Census, follow: (1870) 20.0;

(1880) 17.0; (1890) 13.3; (1900) 10.7; (1910) 7.7; (1920) 6.0; (1930) 4.3; (1940) 4.2; (1950) 3.2.

In 1930 illiteracy among native whites averaged 1.6 per cent and among Negroes 16.3; among Negroes in cities having over 50,000 Negro inhabitants, about 5.0. Among foreign-born whites the average was 10.8 per cent, ranging from 0.3 among Scots and 0.6 among English and Canadians, to 36.9 among persons from the Azores.

Roman and Arabic Numerals

Source: Historical Records

I	1 VI	6 XI	11 XVI	16 XXI	21 XXVI	26 XXXI	30 LXXX	80 CD	400 CM	900
II	2 VII	7 XII	12 XVII	17 XXII	22 XXVII	27 XXXII	40 XC	90 D	500 M	1000
III	3 VIII	8 XIII	13 XVIII	18 XXIII	23 XXVIII	28 XXXIII	50 C	100 DC	600 MCM	1900
IV	4 IX	9 XIV	14 XIX	19 XXIV	24 XXXIV	29 XXXIV	60 CC	200 DCC	700 MM	2000
V	5 X	10 XV	15 XX	20 XXV	25 XXXV	30 LXXX	70 CCC	300 DCCC	800 V	5000

Note—A dash line over a numeral multiplies the value by 1,000; thus, \overline{X} =10,000; \overline{L} =50,000; \overline{C} =100,000; \overline{D} =500,000; \overline{M} =1,000,000; \overline{CLIX} =159,000; \overline{DLIX} =559,000.

Other general rules in Roman numerals are as follows: (1), repeating a letter repeats its value— \overline{XX} =20; \overline{CCC} =300; (2), a letter placed after one of greater value adds thereto— \overline{VI} =6; \overline{DC} =600; (3), a letter placed before one of greater value subtracts therefrom— \overline{IV} =4.

Arabic numerals are those now commonly in use—0, 1, 2, 3, 4, 5, 6, 7, 8, 9, etc.

Higgins Scientific Trust, estab. 1948, by the will of Eugene Higgins, for education and research in natural and physical sciences at Columbia, Harvard, Princeton and Yale Universities. Income distribution for academic year 1955-56 amounted to \$1,160,000 or \$290,000 to each university. Address: U. S. Trust Co. of N. Y., 45 Wall St., New York 5, N. Y.

Indianapolis Foundation, estab. 1916. A community trust to promote the welfare of persons residing in that city. Interests include child welfare, recreation, the handicapped, and the granting of scholarships. Expenditures for calendar year 1953 were \$144,062. Address 615 No. Alabama St., Indianapolis 4, Ind.

Industrial Hygiene Foundation of America, estab. 1935 for the advancement of health in industry.

Studies are conducted for 370 member companies by the Foundation's staff of physicians, chemists, engineers, toxicologists and industrial hygienists, for the prevention of industrial diseases and for the improvement of working conditions. Research grants are made to other institutions. Address: Mellon Institute, 4400 Fifth Ave., Pittsburgh 13, Pa.

James Foundation (which should be distinguished from subsequently formed James Foundation of New York), incorp. in Missouri in April 1941, was sponsored and organized by the New York Community Trust, 70 Vanderbilt Ave., New York 17, N. Y. It gives effect to desires expressed by the late Lucy Wortham James and acts as a supervising agency for a program of philanthropic projects located in Phelps and Crawford Counties, Missouri. Its expenditures to the end of 1954 were \$630,790 and its assets at Dec. 31, 1954, were \$373,178. It has received annual grants from the Lucy Wortham James Memorial in the New York Community Trust.

Arthur Jordan Foundation, estab. 1928 by Mr. Jordan, the income may be applied to charitable, educational, religious, literary and scientific purposes, and social advancement, including music and the arts, in order to promote the well-being of mankind throughout the world, particularly in the United States. Address: Indianapolis, Ind.

Juilliard Musical Foundation, estab. 1920 by Augustus D. Juilliard to aid in completing the musical education of worthy students; also to provide musical entertainment for the general public. Maintains the Juilliard School of Music, 120 Claremont Ave., New York 27, N. Y., which handles its own program. The School has added dancing to the courses of study which it offers. Address: Mr. M. Steilen, Sec., 31 Nassau St., New York 5, N. Y.

W. K. Kellogg Foundation, estab. 1930. Present activities are in support of agriculture, medicine, education, dentistry, nursing, public health and hospital, administration. Address: 250 Champion St., Battle Creek, Mich.

Sister Elizabeth Kenny Foundation, founded 1943 to combat poliomyelitis through the application of the most effective diagnostic and treatment techniques as developed by Sister Kenny, and to perform research into nature of the disease and its prevention. A comprehensive medical and public information program is maintained. Scholarships are provided for training qualified registered nurses and physical therapists to become Kenny Therapists. Foundation operates treatment centers through authorized chapters. Activities financed entirely by public contributions. Address: National Headquarters, 2400 Fosbury Tower, Minneapolis 2, Minn.

Kresge Foundation, estab. 1924 with a trust made by S. S. Kresge, for the "promotion of eleemosynary, philanthropic and charitable means of any or all of the means of human progress, whether they be for the benefit of religious, charitable, benevolent or educational institutions or public benefactions." Address: 2727 Second Ave., Detroit 32, Mich.

Lalor Foundation was established in 1953. Its principal activity comprises summer awards to younger university and college faculty members for research emphasizing applications of chemistry and physics to problems in any field of biology. There are 40 awards scheduled for 1956, of value \$900, for single men and women, and \$1,100 for married persons. Appointments are made from applications filed before January 15, with announcement thereof on March 14. Address: 4400 Lancaster Pike, Wilmington 5, Del.

Josiah Macy, Jr. Foundation, estab. 1930 by Mrs. Kate Macy Ladd "the interest of the Foundation to be devoted primarily to the fundamental aspects of health, of sickness, and of methods for the relief of suffering" in particular to such special problems in medical sciences, medical arts and medical education as require for their solution studies and efforts in correlated fields as well, such as biology and the social sciences. Address: 16 West 46th St., New York 36, N. Y.

John and Mary R. Markle Foundation, estab. 1927, limits activities to grants to institutions in support of specific projects primarily in medicine in the United States and Canada. Sums are appropriated for "Scholars in Medical Science," as part of a program to keep young doctors on teaching and research staffs of medical schools. Address: 511 Fifth Ave., New York 17, N. Y.

Mayo Association, founded 1919 by Dr. William J. Mayo and Dr. Charles H. Mayo, for the advancement of medical education and research in human ailments and investigation of problems of hygiene, health and public welfare, also to

assist medical, surgical and scientific research in the broadest sense. Address: Rochester, Minn.

McGregor Fund, estab. in 1925 by Tracy W. McGregor to relieve the misfortunes and promote the well-being of mankind by charitable, religious, benevolent or educational uses. Address: 2486 National Bank Bldg., Detroit 26, Mich.

American Medical Education Foundation, estab. 1951 by the American Medical Association with contributions from physicians and medical organizations. The National Fund for Medical Education, organized by leaders in business, industry and medical education, with the American Medical Association and the Association of American Colleges collects funds from corporations and organized groups for a similar purpose. Address: 535 No. Dearborn St., Chicago 10, Ill.

A. W. Mellon Educational and Charitable Trust of Pittsburgh, Pa., founded by Andrew W. Mellon Dec. 30, 1930. The trustees have decided to devote the remaining funds of the trust to educational and charitable projects, institutions and purposes in and around that city. Address: 525 Wm. Penn Pl., Pittsburgh 30, Pa.

Milbank Memorial Fund, estab. 1905 by Mrs. Elizabeth Milbank Anderson "to improve the physical, mental and moral condition of humanity and generally to advance charitable and benevolent objects." Mrs. Anderson increased her gifts until they amounted to \$9,315,175 at the time of her death in 1921. Emphasis is given to activities which are preventive rather than palliative. Address: 40 Wall St., New York 5, N. Y.

New York Community Trust, estab. 1923, a composite charitable foundation administers 105 separate philanthropic trusts, holds funds valued at \$24,508,837, appropriated \$1,140,977 in 1954, and has made cumulative grants in excess of \$14,150,000. The Trust was established in 1923 to manage multiple funds for charitable purposes. These funds range from less than \$10,000 to more than \$2,000,000. Outpayments in 1954 were made from 98 separate trusts and went to 281 agencies in 82 cities and 4 foreign countries. The largest portion of grants went to institutions in the State of New York, followed by Missouri, Vermont and New Jersey. To supervise a program of philanthropic projects in the Ozark foothills southwest of St. Louis, the James Foundation was created by the New York Community Trust in 1941 and incorporated in Missouri. Both organizations are located at 71 Vanderbilt Ave., New York 17, N. Y.

(See also James Foundation and Westchester Welfare Foundation)

New York Foundation, estab. 1909, receives and maintains a fund or funds; applies income thereof to altruistic purposes, charitable, benevolent, educational or otherwise, within the United States. Address: 61 Broadway, New York 6, N. Y.

Nutrition Foundation, estab. 1941 by food and related manufacturers to support a research and educational program in the science of nutrition. Address: 99 Park Ave., New York 16, N. Y.

Permanent Charity Fund, organized 1915 in Boston to accept gifts to the fund, the income of invested principal to be applied to charitable purposes. Committee consists of 7 residents of Massachusetts not holding public office. Address: 100 Franklin St., Boston 10, Mass.

Pew Memorial Foundation, created 1948 in memory of Joseph N. and Mary Anderson Pew. Their children formed the foundation with a gift of 880,000 shares of the Sun Oil Co. common stock for religious, charitable, scientific, literary or educational purposes. The directors may expend either principal or income. Address: 1608 Walnut St., Philadelphia 3, Pa.

Phelps-Stokes Fund, incorp. 1911 to improve housing conditions in New York City and encourage practical education for underprivileged people. Address: 101 Park Ave., New York 17, N. Y.

Elizabeth Severance Prentiss Foundation, estab. Jan. 1939, by Mrs. Prentiss; became operative on her death in January, 1944. General purposes are to promote medical and surgical research; initiate and advance activities designed to promote public health; aid hospitals and health institutions in Cuyahoga County (Ohio) that are organized and operated exclusively for public, charitable purposes; improve methods of hospital management and administration, and support plans to make hospital and medical care available to individuals of all classes. Trustee, National City Bank of Cleveland. Address: P. O. Box 5756, Cleveland 1, Ohio.

Wilhelm Reich Foundation, estab. 1949, with an endowment of \$73,026. A non-profit, educational and research organization dedicated to conducting

research and teaching in cosmic orgone energy (orgone physics, orgone bio-physics) and the medical, technical, other and all future applications of cosmic orgone energy. Total assets, \$97,968; expenditures, \$34,233. Address: Orgonon, P. O. Rangeley, Maine.

Z. Smith Reynolds Foundation, estab. 1936 by Richard J. Reynolds, Mrs. Mary Reynolds Babcock and Mrs. Nancy Reynolds Bagley, for charitable, civic and eleemosynary purposes within the State of North Carolina, by a grant of all the property received by them from the estate of their late brother, Zachary Smith Reynolds. On Sept. 10, 1951, the principal of the Foundation was increased by approximately \$14,000,000 by a bequest from the late W. N. Reynolds, uncle of the founders. Since July 1, 1947, most of the income has been contributed to Wake Forest College for its program for enlargement and relocation near Winston-Salem. Address: 1206 Reynolds Bldg., Winston-Salem 3, N. C.

Rockefeller Foundation, estab. 1913, its charter purpose "to promote the well being of mankind throughout the world." In terms of broad objective the Foundation's program is the advancement of knowledge and the effective application of knowledge to human interests and needs. Its program areas are as follows: medical education and public health, biological and medical research, agriculture, social sciences, and humanities. Within each of these areas certain specific fields receive emphasis. Except to a limited extent in public health and agriculture the Foundation does not itself engage in research, but seeks to advance its purposes through grants to universities, research institutes, and other qualified agencies conducting work within the scope of the Foundation's program, and in the training, through postdoctoral fellowships, of competent personnel in its various fields of interest. Address: 49 West 49th St., New York 20, N. Y.

Damon Runyon Memorial Fund for Cancer Research, estab. 1947. As of June, 1955, \$8,960,563 had been allocated in 549 grants and 316 fellowships in 193 institutions in 48 states, the District of Columbia and 16 foreign countries. Resources entirely devoted to research in the field of cancer. It does not maintain or support any clinical facilities, nor does it operate any laboratories of its own. Address: 399½ Madison Ave.—Bldg. E—12th floor, New York, N. Y.

Russell Sage Foundation, created 1907 by Mrs. Russell Sage, as a memorial to her husband, to improve social and living conditions in the U.S. Its present program is designed to increase the application in social practice of the results of social science research. Address: 505 Park Ave., New York 22, N. Y.

San Francisco Foundation, a community trust, estab. 1948 to provide for management and use of numerous philanthropic trusts. Nine banks are trustees. Funds are disbursed, primarily in the San Francisco area, by a seven-member committee of citizens chosen for their knowledge of the needs of the community. Balfour Bldg, 351 California St., San Francisco, Calif.

Sarah Mellon Scaife Foundation, estab. 1941 by Sarah Mellon Scaife, for religious, charitable, scientific, literary and educational purposes, with particular consideration to encourage and foster research in medical science for the good of mankind. Special consideration is given to the Pittsburgh area and Allegheny County, Pennsylvania. Address: 525 William Penn Place, Pittsburgh 19, Pa.

National Science Foundation, estab. by Act of 1950, to promote the progress of science; advance the national health, prosperity, and welfare; and secure the national defense. During the fiscal year 1955 about 2 billion dollars of scientific funds will be obligated by federal agencies, including sums allocated for basic and applied research in physical, social, and life sciences, and latter including biological, medical, and agricultural sciences. Address: Alan T. Waterman, director, 1520 H St., N.W., Washington 25, D. C.

Alfred P. Sloan Foundation, founded 1934, makes grants-in-aid to fully accredited educational and charitable institutions of recognized standing. Among current recipients are the Sloan-Kettering Institute for Cancer Research, Mass. Inst. of Tech., Dartmouth College, New York Univ., Tuskegee Institute. The Conservation Foundation, National Bureau of Economic Research, Teleprograms Inc., The Brookings Institution, and some 30 additional colleges and universities. Address: 30 Rockefeller Plaza, New York 20, N. Y.

Southern Education Foundation, formed in 1937 by consolidation of the Peabody Education Fund (1867), the John P. Slater Fund (1882), the Anna T. Jeanes Fund (1907), and the Virginia

Randolph Fund, a small fund raised by the Jeanes Teachers through the Southern States. The latter fund is not chartered but is an integral part of and administered by the Southern Education Foundation. The original endowment of these funds was \$2,310,728. The foundation cooperates with public and private school officials and others in improving educational and living conditions, with special regard for the needs of the Negro race in the southern United States. Address: 811 Cypress St., N.E., Atlanta 8, Ga.

Henry L. Stimson Fund for Research in World Affairs, estab. 1951 at Yale University by an initial gift of \$500,000 from the late Susan A. Ensign Morse, of Cambridge, Mass., for "basic research in all fields of learning, an endeavor significant to world peace and to all fundamental human problems underlying the cause of war." Address: Yale University, Yale Station, New Haven, Conn.

Sugar Research Foundation sponsors research on the role of sugar in plants and animals, including the human, on sugar in the technology of foods and on sacrochemistry. By this last is meant the synthetic industrial organic chemistry based upon sugar and its by-products. The annual budget is about \$400,000. Address: 52 Wall St., New York 8, N. Y.

Turrell Fund, estab. 1935 by Herbert and Margaret Turrell, for religious, charitable, literary, scientific or educational purposes, particularly for the benefit of children in the U.S., who because of the death, disability or other failure of one or both parents are dependent upon others or are living or being reared in unhealthy, unwholesome or improper environment; or for the benefit of children or adults who are mentally incompetent or defective and are committed to, or in care of, accredited institutions organized for the relief of such persons; or for those who because of age or infirmity are dependent upon others. Address: 100 No. Arlington Ave., East Orange, N. J.

Twentieth Century Fund was founded 1919 by Edward A. Filene, to promote better "economic, industrial, civic and educational conditions in the U. S." Since 1937-1938, all resources of the Fund have been devoted to its own program of scientific research and public education on current economic and social problems. Address: 330 West 42nd St., New York 36, N. Y.

Wenner-Gren Foundation for Anthropological Research, created and endowed in 1941 as The Viking Fund, is a non-profit foundation for the promotion and support of scientific, educational, and charitable enterprises. Actively interested in the field of anthropology and related sciences. Address: 14 East 71st St., New York 21, N. Y.

Westchester Welfare Foundation, a group of charitable funds for application in that county, is financed from, and administered as part of, the New York Community Trust. Its resources at Dec. 31, 1954 were \$133,855, and its cumulative disbursements to the end of that year were \$138,582.

Joseph B. Whitehead Foundation, estab. 1937 by Joseph B. Whitehead, Jr., one-fourth of income to be distributed to orphans' homes; balance to be used in territory of Atlanta, Ga., for charity and in the relief of pain, suffering and poverty, without regard to race, creed or color. Address: 205 Whitehead Bldg., Atlanta 3, Ga.

Helen Hay Whitney Foundation, estab. 1947, "to promote basic research in rheumatic fever and rheumatic heart disease." Maintains a central clearing house of information on rheumatic fever facilities and programs. Grants and fellowships committed in 1953 totaled \$188,333. Address: Rm. F231, 525 East 68th St., New York 21, N. Y.

Wieboldt Foundation, founded 1921 by Mr. and Mrs. Wm. A. Wieboldt. Provides grants for worthy charitable institutions serving the Metropolitan Area of Chicago with preference to: (1) Projects of a pioneering or experimental nature; (2) Demonstrations of new or untried plans or methods. Address: 1580 Sherman Ave., Evanston, Ill.

Woodrow Wilson Foundation, estab. 1922, carries on an educational program for the furtherance of Wilson's ideals. Has published and made available texts of official documents, from Wilson's 14 Points to the present. It is a distribution center for publications of the U. S. Dept. of State and of the United Nations; has published a study of United States foreign economic policy. Assets approximately \$900,000. Address: 45 East 65th St., New York 21, N. Y.

World Peace Foundation, founded 1910, to "promote peace, justice and good will among nations," seeks to increase public understanding of international problems by an objective presentation of the facts of international relations. Address: 40 Mt. Vernon St., Boston 8, Mass.

Census of Physicians and Surgeons in U. S. and Territories

Source: Journal of the American Medical Assn.

The official count of physicians who received their first license to practice medicine and surgery in 1954, published May, 1955, by the Council on Medical Education and Hospitals of the American Medical Assn., was 7,917 for the United States, Canal Zone, Guam, Hawaii and Puerto Rico. The number of physicians who died was 3,667, making the net increase in the number of physicians 4,250, or 641 more than the increase in 1953.

In 1954, a total of 15,029 licenses to practice medicine and surgery was issued by the 54 boards authorized to grant licenses to practice medicine. These represented 6,827 granted after a successful written examination and 8,202 granted by reciprocity and endorsement of state licenses or the certificate of the National Board of Medical Examiners. The number of licenses issued annually has been steadily increasing. The increase last year as compared with 1953 totaled 595; 262 were written examination, and 333 were by endorsement of credentials.

Of the 15,029 licenses to practice medicine and surgery issued in 1954, both by examination and

by reciprocity and endorsement of credentials, the greatest number, 1,975, were issued in California. New York licensed 1,498 physicians, while more than 500 were registered in Illinois, Ohio, Pennsylvania, and Texas. However, Delaware, Idaho, Nevada, North Dakota, South Dakota, Vermont, and Wyoming issued less than 50. The fewest, 24, were licensed in Wyoming. Among the territories and possessions, Puerto Rico licensed 82, Hawaii 19, Alaska 15, the Canal Zone 12, and Guam 2. The increase in the number of licenses issued last year as compared with 1953 totaled 595, representing an increase of 262 by written examination and 333 by credentials.

In 1954 1,033 examination failures were reported. Failures by graduates of approved medical schools in the United States amounted to 4.2% and by graduates of medical schools in Canada, 4.8%. The percentage of failures in three other groups—graduates of foreign faculties of medicine, unapproved medical schools, and schools of osteopathy—were 42.6%, 64.4%, and 16.6% respectively.

AWARDS—MEDALS—PRIZES

The Alfred B. Nobel Prize Winners

Alfred B. Nobel, inventor of dynamite, who died Dec. 10, 1896, bequeathed \$9,000,000, the interest to be distributed yearly to those who had most contributed to the benefit of mankind during the preceding year.

Physics and chemistry awards are made by the Swedish Academy of Science; for medicine or physiology by the Stockholm Faculty of Medicine; for literature by the Swedish Academy of Literature; for peace by a committee of five persons elected by the Norwegian Parliament (Storting). The Nobel Fund is managed by a board of directors, the head of which is appointed by the Swedish Government.

The founder stipulated that "no consideration whatever shall be paid to the nationality of the candidates . . . the most deserving be awarded the prize, whether of Scandinavian origin or not." Nationality of the winner at the time of the award is given. In cases of double nationality, the nation of birth is added.

Pulitzer Prizes in Journalism and Letters

The Graduate School of Journalism, founded and endowed by the late Joseph Pulitzer, opened Sept. 1912, is located at Columbia University, 116th St. and Broadway, New York City.
 The Pulitzer Prizes, established by Mr. Pulitzer in a bequest to Columbia University, are awarded annually by the trustees of that University on recommendation of the Advisory Board of the School of Journalism for work done during the preceding year.
Advisory Board on Pulitzer Prizes—Grayson Kirk, of Columbia University; Sevellon Brown (1956)—Providence Journal; Hodding Carter (1957)—Delta Democrat-Times, Greenville, Miss.; Turner Catledge (1959)—New York Times (Washington Bureau); Robert Choate (1958)—Boston Herald; Kent Cooper (1956)—The Associated Press, New York, N. Y.; Gardner Cowles (1958)—Cowles Magazines, New York, N. Y.; J. D. Ferguson (1957)—Milwaukee Journal; John S. Knight (1958)—Knight Newspapers, Inc., Chicago; William R. Mathews (1956)—Arizona Daily Star, Tucson, Ariz.; Benjamin M. McKelway (1959)—Evening Star, Washington, D. C.; Stuart H. Perry (1957)—The Adrian (Mich.) Telegram; Joseph Pulitzer, Jr. (1959)—St. Louis Post-Dispatch. John Hohenberg, secretary (1956), Columbia University, New York, N. Y.

No awards given for years omitted.

Academy Awards in Motion Pictures

Source: Academy of Motion Picture Arts and Sciences

Given annually by the Academy of Motion Picture Arts and Sciences. A statuette, the golden Oscar, is the principal symbol. The figure remained nameless until 1931 when Mrs. Margaret Herrick, present executive secretary of the Academy, reported for her first day's work as librarian. Observing a copy of the statuette, she remarked: "He reminds me of my Uncle Oscar." A newspaper columnist overheard the remark. Next day his syndicated copy contained the line "Employees have affectionately dubbed their famous statuette 'Oscar.'" From that day it has been called Oscar.

Miss America Pageant of Atlantic City, N. J.

The Miss America Pageant of Atlantic City, N. J. is a resort-promotion device developed with great success since 1921, attracting thousands of visitors and getting national newspaper, radio and television coverage. Miss Leonora Slaughter, who became secretary of the board in 1935, directs the contest. Contestants are chosen locally by civic, educational and service organizations, must have a high school education and may come from the United States, Canada, Hawaii and Puerto Rico. The Scholarship Foundation, supported by industrial leaders, supplies the prize funds, which are often augmented by prizes awarded by state and local organizations, over \$100,000 being expended annually for this purpose. The 1955 contest was held Sept. 5 to 11.

MISS AMERICA PAGEANT CONTESTANTS

Fickling, Jr. She was married in December, 1954, after graduating from Wesleyan Conservatory of Music. Evelyn Margaret Ay (1954) is Mrs. Carl Sempler. Ensign Sempler is stationed at Carl Norfolk, Va., where they make their home. Lee Meriwether (1955) will begin dramatic studies in New York and work in TV.

Medals and Citations of the U. S. Armed Forces

Medal of Honor (Army): Awarded in the name of Congress to an officer or enlisted man of the Army who, in actual conflict with an enemy, distinguishes himself conspicuously by gallantry and intrepidity at the risk of his life and above and beyond the call of duty.

Medal of Honor (Navy): Awarded in the name of Congress to any person who, while in the naval service of the United States shall, in action involving actual combat with the enemy, or in the line of his profession, distinguish himself conspicuously by gallantry and intrepidity at the risk of his life over and beyond the call of duty and without detriment to the mission.

Navy Cross: To any person serving with the naval service of the United States who distinguishes himself by extraordinary heroism in connection with military operations.

Distinguished Service Cross (Army): To any person who, while serving in any capacity with the Army of the United States, has distinguished himself by extraordinary heroism in connection with military operations against an armed enemy.

Distinguished Service Medal (Navy): To any person who, while serving in any capacity with the Navy of the United States, has distinguished himself by exceptionally meritorious service to the Government in a duty of great responsibility.

Distinguished Service Medal (Army): To any person who, while serving in any capacity with the Army of the United States, has distinguished himself by exceptionally meritorious service to the Government in a duty of great responsibility.

Legion of Merit (Army and Navy): To personnel of the armed forces of the United States and the Philippines, and personnel of the armed forces of friendly foreign nations, who have distinguished themselves by exceptionally meritorious conduct in the performance of outstanding services.

Silver Star Medal (Army and Navy): To any person who, while serving in any capacity with the Army or Navy of the United States, has distinguished himself conspicuously by gallantry and intrepidity in action, not sufficient to justify the Medal of Honor or Navy Cross or D. S. C.

Distinguished Flying Cross (Army and Navy): To any person who, while serving in any capacity with the Air Corps of the Army, National Guard, and Organized Reserves, or with U. S. Navy, Marine Corps or Coast Guard, has distinguished himself by heroism or extraordinary achievement while participating in aerial flight. Members of military naval or air forces of foreign governments while serving with the United States.

Navy and Marine Corps Medal: To any person who, while serving in any capacity with the U. S. Navy or Marine Corps, including Reserves, shall have distinguished himself or herself by heroism not involving actual conflict with an enemy, or to any person to whom the Secretary of the Navy has formerly awarded a letter of commendation for heroism, subject to approval of the Board of Decorations and Medals.

Bronze Star Medal (Army and Navy): To any person serving with Army, Navy, Marine Corps or Coast Guard who distinguishes himself by heroic or meritorious achievement or service, not involving participation in aerial flight, in connection with military or naval operations against an enemy.

Soldier's Medal (Army): To military personnel of the Army of the United States and to members of the Navy, Marine Corps and foreign military personnel serving with the Army who have distinguished themselves by heroism not involving actual conflict with an enemy.

Air Medal (Army and Navy): To any person who, while serving with Army, Navy, Marine Corps or Coast Guard of the United States in any capacity, distinguishes himself by meritorious achievement while participating in an aerial flight.

Presidential Unit Citation (Navy): To any ship, aircraft or naval unit, any marine aircraft detachment or higher unit for outstanding performance in action.

Purple Heart (Army and Navy): To persons wounded in action against the enemy of the United States, while serving with the Navy, Marine Corps, or Coast Guard of the United States or as a result of act of such enemy, if wound necessitated treatment by a medical officer. Also to next of kin of persons killed in action.

Organization Citation (Army): To organizations, units, detachments or installation of the Army of the United States or the Army of the Philippine Commonwealth for outstanding performance of duty in action.

Merchant Marine Combat Bar: Issued to crew members of merchant ships attacked. Any crew member forced to abandon his vessel is awarded a silver star to be attached to bar.

Service ribbons or bars are ordinarily worn with service dress. In peacetime the decorations and medals are worn on formal occasions.

Army decoration service ribbons are worn in the sequence of importance starting on the top row toward center of body and reading toward left arm, followed by medal service ribbons in sequence earned.

Navy and Marine Corps ribbons are worn in prescribed order in horizontal rows of three each on left breast without space between ribbons in same row.

In the Army, for each succeeding accomplishment sufficient to justify a second similar decoration, a bronze oak leaf cluster is awarded to be worn on the suspension ribbon or the corresponding service ribbon. A silver oak leaf cluster is awarded to persons with five awards.

In the Navy a gold star is awarded under similar circumstances. Bronze stars on ribbons have different meanings with different medals.

Bronze stars on Army and Navy theater ribbons denote participation in battles and engagements respectively. Five such bronze stars may be replaced by a single silver bar.

American Mother of the Year

The American Mother is selected annually from nominations sent to the Golden Rule Foundation Mothers' Committee, 60 East 42nd St., New York 17, N. Y. The choice is based on these requirements: she must be a successful mother, as shown by the character and achievements of her children; she must embody those traits most highly regarded in mothers—courage, moral strength, patience, affection, kindness, understanding, homemaking ability; she must have a sense of social and world relationships and must

have been active in her own community betterment or in some other service for public benefit.

1950—Mrs. Henry Roe Cloud, West Linn, Ore.

1951—Dr. Mary T. Martin Sloop, Crossmore, N.C.

1952—Mrs. Toy Len Chin Goon, Portland, Me.

1953—Mrs. Ethlyn Wisegarver Bott, Belleville, Ill.

(the first stepmother to be so chosen).

1954—Mrs. Love McDuffie Tolbert, Columbus, Ga.

1955—Mrs. Lavina Christensen Fugal, Pleasant Grove, Utah.

American Father of the Year

Father's Day was founded in 1910, in Spokane, Wash., by Mrs. John Bruce Dodd. The National Father's Day Committee, of 50 East 42nd Street, New York 17, N. Y., was formed in 1936 to "spread the sentimental, spiritual and patriotic observance of Father's Day throughout America." The American Father is elected annually.

1942—Gen. Douglas MacArthur. 1943—Gen. Dwight D. Eisenhower. 1944—Lieut. Gen. Mark W. Clark. 1945—President Harry S. Truman. 1946—Albert A. Schmid, Philadelphia marine who was blinded in action on Guadalcanal. 1947—Warren Austin, Burlington, Vt., U. S. delegate to the

United Nations. 1948—Drew Pearson, for inspiring the Friendship Train and his educational program, Make Democracy Live. 1949—Ralph J. Bunche, Palestine Mediator for U. N. for bringing about peace in the Near East. 1950—Mr. Justice William Orville Douglas, of the United States Supreme Court. 1951—U. S. Senator Estes Kefauver (Tenn.). 1952—Brig. Gen. David Sarnoff, RCA chairman. 1953—Henry Cabot Lodge, Jr. (former U. S. Senator from Mass.). 1954—Paul G. Hoffman (former president of the Ford Foundation, and board chairman of the Studebaker Corp.). 1955. Basil O'Connor, president of the Natl. Foundation for Infantile Paralysis.

Mex.'s GKAG, for Navajo Hour; music citation, Boris Goldovsky (ABC).

ROCKEFELLER PUBLIC SERVICE

Public Service Awards, based on grant of \$450,000 by John D. Rockefeller, 3rd, administered by Woodrow Wilson School of Public and International Affairs of Princeton Univ. Third annual award totaling \$165,100 for public service, to 13 career employees of the U. S. Government: Dr. Francis J. Olligan, Dr. Harry M. Douth, Albert J. Esgain, Dr. Samuel R. Hall, Dr. Fredk. Kaufman, Dr. Albert R. Ochse, Jerome Namias, Dr. Hugo F. Sanderson, David Schwartz, Herman M. Southworth, Dr. Richard E. Trees, Walter G. Vincenti and Miss Margaret E. Thomas.

THEODORE ROOSEVELT MEDAL

Awarded by Theodore Roosevelt Assn. since 1923, for distinguished services and leadership. Arthur H. Compton in the field of science and in the development of American character. Thomas E. Dewey in the administration of public office.

ROTARY FELLOWSHIPS

Established in 1947, to promote international understanding, Rotary International has awarded, through 1955, 709 fellowships to college graduates for one year of study abroad. Grants average \$2,500. Total grants exceed \$1,750,000.

DAVID SARNOFF FELLOWSHIP

By Radio Corp. of America at New York Univ. College of Engineering, \$3,500. Lawrence Wechsler, Forest Hills, L. I., N. Y.

AMERICAN ASSOCIATION FOR ADVANCEMENT OF SCIENCE

Newcomb Cleveland Prize, estab. 1923 by Newcomb Cleveland to the author of a paper representing a contribution to science; \$1,000. Daniel H. Alpert (physics).

Theobald Smith Award in Medical Sciences, estab. 1936 by Eli Lilly & Co. Bronze medal and \$1,000. Winston Harvey Price, Johns Hopkins Univ.

NATIONAL ACADEMY OF SCIENCES

The Academy is a quasi-official agency of the U. S. Government, estab. 1863, 1401 Constitution Ave., NW, Washington, D. C. Medals to Dr. Maurice Ewing, Columbia Univ.; Dr. Libbie H. Hyman, Amer. Museum of Natural History; Dr. Peter Mackenzie Millman, Canadian Natl. Research Council; Dr. William E. Castle, Harvard; Dr. Hermann J. Muller, Univ. of Indiana.

SIBELIUS AWARD

Annually to distinguished careers in music or science, \$35,000, given by Antti Wihuri, Helsinki, Finland, shipowner. Paul Hindemith.

SPINGARN MEDAL

Estab. 1914 by Joel E. Spingarn. Awarded annually by the National Assn. for the Advancement of Colored People, for the highest achievement of an American Negro. Carl Murphy, publisher Afro-American Newspapers, Baltimore.

Theatre Awards

Antoinette Perry Awards (Tonys), annually since 1946-47 by the American Theatre Wing for the season's outstanding contribution to the theatre. 1954-55 season: Play, The Desperate Hours, by Joseph Hayes. Musical, The Pajama Game. Stars: Nancy Kelly, Alfred Lunt, Mary Martin, Walter Slezak. Featured players: Francis L. Sullivan, Patricia Jessel, Cyril Ritchard, Carol Haney. Setting: Oliver Messel, House of Flowers. Costumes: Cecil Beaton, Quadrille. Choreography: Robert Foss, The Pajama Game. Stage technician: Richard Rodda, Peter Pan. Conductor: Thomas Schippers, The Saint of Bleecker Street.

Barter Theatre Award. Mary Martin, Peter Pan. Jamestown Corp., Williamsburg, Va. annual play contest. First, \$1,000. Dr. Thos. D. Pawley, Jefferson City, Mo. for Messiah. 2nd, \$500. Fredk. Russell, Richmond, Va., Young Poe.

Clarence Derwent Awards, for best non-featured performances by an actress and actor during the season, \$500 each. Vivian Nathan, in Anastasia; Fritz Weaver, in The White Devil.

Donaldson Awards, 1954-55 season. Play, Cat on a Hot Tin Roof, by Tennessee Williams, and The Pajama Game. Actor, Paul Muni, in Inherit the Wind; actress, Kim Stanley, in Bus Stop. Supporting: Ed Begley, Inherit the Wind; Eileen Heckart, The Bad Seed. Musical: Directors, George Abbott and Jerome Robbins, for The Pajama Game. Actor, Cyril Ritchard; actress, Mary Martin, both Peter Pan. Supporting: Carol Haney, The Pajama Game. Book and lyrics, Richard Adler and Jerry Ross, The Pajama Game.

New York Drama Critics Circle, 1954-55 Season: play, Cat on a Hot Tin Roof, by Tennessee Williams; musical, The Saint of Bleecker Street, by Gian-Carlo Menotti; foreign play, Witness for the Prosecution, by Agatha Christie.

Shubert Foundation Award, a gold medal. Joshua Logan, "in recognition of the most outstanding individual contribution to the New York theatrical season of 1954-55."

Variety poll of N. Y. drama critics, 1954-55 Season—Dramatic: Paul Muni, in Inherit the Wind; Kim Stanley, in Bus Stop. Musical: Walter Slezak, in Fanny, Gwen Verdon, in Damn Yankees.

NATIONAL SCULPTURE SOCIETY

Lindsey Morris Memorial: Laci de Gerenday, design, St. Francis of Assisi medal, \$150. Mrs. Louis Bennett Prize: Theodore Spicer-Simson, frame of 12 medals, \$50. Herbert Adams Memorial Award Medal: Leo Friedlander Peer Gynt, bronze. Honorable Mentions: Clara Fasano, Erwin F. Springweiller.

NATIONAL TUBERCULOSIS ASSOCIATION

Trudeau Medal, annually since 1926 for "the most meritorious contribution on the cause, prevention or treatment of tuberculosis." Dr. William H. Feldman, Mayo Foundation, Rochester, Minn.

Will Ross Medal, estab. 1952 to be awarded annually "to a person who has made outstanding and distinguished contribution to the tuberculosis control field other than that of the medical sciences." Frederick D. Hopkins, of Glen Rock, N. J., retired exec. sec. of the NTA.

VETERANS OF FOREIGN WARS

Omar N. Bradley Medal and Citation—Frank H. Bartholomew, pres. United Press Assn.

VOLKER AWARD

William Volker Distinguished Service Award, \$15,000, given at intervals by anonymous donor, administered in Burlingame, Calif. 1955—Roscoe Pound, dean Harvard Law School, 1916-1936.

WESTINGHOUSE SCHOLARSHIPS

Estab. 1942 by Westinghouse Educational Foundation for high school senior science students. 1954—Science Talent Research: Alan Hought, 17, Bethesda, Md., \$2,800; Everett Dade, 16, New Hampshire, \$2,000; 8 scholarships of \$400 each, and 30 of \$100 each, 1955—Frederick P. Greenleaf, 17, Allentown, Pa., \$2,800; Kathleen A. Hable, 18, Loyal, Wis., \$2,000. George Westinghouse Scholarships, 10 high school seniors interested in engineering, chemistry or physics received \$3,170 for study at Carnegie Institute of Technology. 4-H Electric Contest—high school seniors are eligible for 6 scholarships of \$300 each, 48 trips to National 4-H Club Congress in Chicago, and medals of honor for county winners.

STEPHEN WISE AWARD

Estab. 1949 by the American Jewish Congress to honor its founder. Four annual awards for service in the fields of human rights, Jewish education, Jewish welfare, and the development of Israel. Each award a scroll and \$1,000. Eimer Davis, Louis Lipsky, and Franz Boehm. Also Yale Univ. for its Judaica series.

WILLIAMSBURG AWARD

By Colonial Williamsburg, Inc., to "a person who has influenced the course of national or world events significantly by expressing in sustained action or eloquent and persuasive statement a dedication to liberty and justice for all men." First award, 1955—Sir Winston Churchill. The award carries an honorarium of \$10,000 and a full-scale reproduction of a colonial town crier's bell. It will be made at intervals.

YALE HOWLAND PRIZE

By Yale University, in memory of Henry E. Howland, Class of 1854, to Ralph Vaughan Williams, British composer.

WORLD FACTS

Geologic Eras

Source: United States Geological Survey

The rocks composing the earth's crust are grouped by geologists into three great classes—igneous, sedimentary, and metamorphic.

The igneous rocks have been solidified from a molten condition. Those which have become solid after ejection upon the earth's surface, either on land or below water, are known as extrusive rocks; those which have hardened from molten material injected into strata below the earth's surface are known as intrusive rocks. Included in the extrusive rocks are the volcanic rocks: lavas, bombs, pumice, tuff, volcanic ash and other fragmental materials thrown out from volcanoes.

Sedimentary rocks are formed by the deposition of sediment in water (aqueous), or by wind (eolian). The sediment may consist (1) of rock fragments or particles of various sizes which form

sandstone, shale, and conglomerate; (2) of the remains or products of animals and plants which form certain limestones and coals; (3) of the products of chemical action or evaporation that form salt, gypsum, etc.; or (4) of a mixture of these materials. A characteristic feature of sedimentary deposits is a layered structure known as bedding or stratification. It is from the order of succession of the sedimentary rocks and that of their contained fossils that the fundamental data of historical geology have been deduced.

Metamorphic rocks are derived from igneous or sedimentary rocks which have undergone such alteration through heat or pressure, or both combined, that their original character is lost. Metamorphic rocks include gneiss, schist, slate, quartzite and marble.

Era and Length*	Period and Length*	Epoch	Characteristic Life
Cenozoic (Recent Life) 60,000,000 yrs.	Quaternary 1,000,000 yrs.	Recent Pleistocene	Age of man. Animals and plants of modern types.
	Tertiary 59,000,000 yrs.	Pliocene. Miocene. Oligocene. Eocene. Paleocene.	Age of mammals. Possible first appearance of man in late Pliocene. Evolution of modern mammalian stocks. Marine and non-marine invertebrates of modern types. Rise and development of highest orders of plants.
	Cretaceous 70,000,000 yrs.	Late. Early.	Age of reptiles. Rise and culmination of huge land reptiles (dinosaurs). First appearance of birds and mammals. Origin of social insects. Cephalopods dominant among marine invertebrates. Non-marine invertebrates common. Seed-bearing flowering plants, including palms and hardwood trees appear in abundance in early Cretaceous.
Mesozoic (Intermediate Life) 125,000,000 yrs.	Jurassic 25,000,000 yrs.	Late. Middle. Early.	
	Triassic 30,000,000 yrs.	Late. Middle. Early.	
	Permian 25,000,000 yrs. Carboniferous Pennsylvanian 25,000,000 yrs. Mississippian 30,000,000 yrs.		Age of amphibians. Origin of reptiles. Insects present in variety. Marine invertebrates continue abundant. Dominance among plants or tree ferns and huge mosses. Earliest cone-bearing trees.
	Devonian 55,000,000 yrs.	Late. Middle. Early.	Age of fishes. Shellfish (mollusks) also abundant. Culmination of brachiopods, rise of land plants, and origin of amphibians.
Paleozoic (Old Life) 335,000,000 yrs.	Silurian 40,000,000 yrs.	Late. Middle. Early.	Shell-forming sea animals dominant. Rise of fishes and of reef-building corals. First land plants.
	Ordovician 80,000,000 yrs.	Late. Middle. Early.	Shell-forming sea animals. Culmination of the marine arthropods known as trilobites.
	Cambrian 80,000,000 yrs.	Late. Middle. Early.	First clear record of animal life. Trilobites, brachiopods and other sea shells. No trace of land animals. Algae abundant.
	Pre-Cambrian 1,500,000,000 yrs. (+)		First life that has left record. Algae and problematica.

*Length of eras and periods follows estimates in the "Report of the National Research Council, Committee on the Measurement of Geologic Time, 1949-1950." Estimated length of Mississippian and Pennsylvanian periods furnished by chairman Committee on the Measurement of Geologic Time.

Seven Wonders of the Ancient World

Pyramids of Egypt—Built from 3000 B.C. to 1800 B.C., the pyramids were the monumental tombs of Egyptian pharaohs. The oldest is at Sak-kara. The largest are at Gizeh, near Cairo. The great pyramid of Cheops covers nearly 13 acres and originally was 481 feet high and 756 feet square at the base; its size has been reduced because the facing stone has been removed, making its present height 450 feet. The Sphinx is located near the pyramids and lately has been cleared of sand; it is 70 feet high, 150 feet long, and has a face 14 feet wide.

Hanging Gardens of Babylon—Nebuchadnezzar, who destroyed Solomon's Temple, was said to have built gardens on terraces at Babylon for his queen, about 600 B.C. According to the legend there were five terraces, each 50 feet above the other, embellished with trees and flowers. On the flat plain of the Euphrates such works created stupendous admiration among the ancients. No trace of them remains.

Phidias' Statue of Zeus—The statue of Zeus at Olympia, province of Elias, built of marble and decorated with ivory and beaten gold, was made by Phidias after 432 B.C. Destroyed in the wars.

Temple at Ephesus—The temple of Artemis (Diana) at Ephesus, south of Smyrna, was built about 5 B.C. by the Ionian cities and became a famous shrine. It was 425 by 225 feet, had 127 col-

umns of Parian marble each 60 feet high. It was set on fire by Erosthathenes in 365 A.D. to gain personal notoriety. Praxiteles built its new altar. It was here that Paul the Apostle challenged pagan worship and enraged the crowd. The temple was despoiled by Nero and destroyed by Alarie the Goth.

Tomb of Mausolus—When Mausolus, King of Caris, Asia Minor, died, his widow built a great marble tomb at Halicarnassus, about 325 B.C. The word mausoleum derives from this. The tomb was broken by an earthquake. In the 19th century surviving fragments were transferred to the British Museum.

Colossus of Rhodes—The colossus is supposed to have been a bronze statue of Apollo, 100 feet high, erected on the island of Rhodes near Asia Minor. Erected about 280 B.C., the colossus was thrown down by an earthquake 224 B.C. After lying on the ground many years it was cut up for junk. The legend that it stood astride the channel leading into the port of Rhodes is without foundation.

Pharos at Alexandria—A lighthouse built on the island of Pharos outside the port of Alexandria became famous under that name. Ptolemy Philadelphus built it about 200 B.C. and inscribed it: "King Ptolemy to the gods, the saviors, for the benefit of sailors." A fire was kept burning on top. It was partly destroyed 400 A.D., finally levelled by an earthquake 1375 A.D.

Oceans and Seas; Man's Deepest Descent

Source: U. S. Navy Hydrographic Office, Washington, D. C.

Ocean Characteristics—The ocean basins are regions of the earth's crust containing rocks of a greater density than those of the continents. Floating on the liquid core of the earth, the continents stand higher and drain into the oceans. The water in the sea is now thought to have accumulated gradually through geologic time from the vapors given off by volcanoes and the waters from hot springs. The salts dissolved in the ocean are partly from this source and partly the residue left after the sedimentary rocks were formed from the erosion and weathering of igneous rocks. There are about 50,000,000 cubic miles of such sedimentary rock in the continents, most of it was laid down in shallow ocean areas. The present volume of the ocean comprises 329,000,000 cubic miles.

A large ridge, 8,000 mi. long, separates two troughs in the Atlantic, the top of which is 10,000 ft. from the bottoms. In the Indian Ocean a wider and lower ridge runs from India to Antarctica. A West Pacific ridge runs from Japan to Antarctica. Antarctica is joined to South America by a ridge, the South Antilles Arc, upon which are situated South Georgia, South Sandwich, South Orkney and South Shetland Islands. A ridge running from north of the New Siberian Islands to Greenland and dividing the Arctic Ocean into two basins was reported by Russian scientists in 1954.

Salt concentration in the ocean depends on the difference between precipitation and evaporation, but is, in general, fairly uniform with latitude. Maximum values, which in some locations are in excess of 36 parts of salt to 1000 parts of water, occur at about 20°N and 20°S. Minimum values of 35 parts per thousand and less occur around the equator. Toward higher latitudes values may decrease to 34 parts per thousand and less. A good average value for ocean areas generally is 35 parts per thousand by weight.

Light scattered against molecules of water relatively free from suspended and dissolved materials gives the blue water typical of middle and low latitudes. This natural blue color combined with dissolved yellow substances results in a scale of green colors more typical of coastal waters. Water of yellow, brown, or red color is found in coastal areas only and is due to suspended materials.

Sound travels nearly five times as fast in water as in air. The speed of sound in the sea varies with temperature and pressure, and the distribution of temperature and pressure is such as to make a zone of minimum sound speed at a depth of about 3000 feet. Hydrophones placed at the depth of this sound channel can detect sound originating thousands of miles away.

Greatest Ocean Depths

The deepest place yet sounded is in the Marianas Trench, where H.M.S. Challenger in October, 1951, obtained a depth of 35,640 feet in latitude 11°19'N, longitude 142°15'E, some 200 miles southwest of Guam. The greatest sounding yet recorded for the Southern Hemisphere was obtained in the Tonga Trench in latitude 23°16'S, longitude 174°48'W, by the Scripps Institution of Oceanography vessel Horizon on Dec. 23, 1952, in a depth of 34,884 feet.

Three other deep trenches exist in the North Pacific. In the Mindanao Trench, east of the Philippines, the USS Cape Johnson found a depth of 34,440 feet in latitude 10°27'N, longitude 126°36'E on July 14, 1945. The Russian vessel Vityaz reported in 1953 a depth of 34,077 feet in the Kurile-Kamchatka Trench in latitude 44°18'N, longitude 150°30'E. The USS Ramapo in December, 1929, obtained a sounding of 34,038 feet near latitude 30°30'N, longitude 142°30'E, in the Japan Trench.

The greatest depth in the Atlantic Ocean is north of Puerto Rico, 30,246 ft., found by U. S. S. Milwaukee, 1939; at Lat. 19° 36', long. 68° 20' 30" W., Lat. 19° 35' N., Long. 68° 08' 45" W.; in the Indian Ocean, 22,968; in the Arctic, 16,500; in the Malay, 21,342; in the Caribbean, 23,748; in the Mediterranean, 18,150; in the Bering, 13,422; in the South Atlantic 26,575; and in Antarctic waters 19,266 ft.

As the deepest spot in the ocean is 35,640 ft. below sea level, and the highest mountain, Mt. Everest, is over 29,000 ft. high, there is a range of over 64,500 ft. or over 12 mi. between the bottom of the sea and the top of the land. Since the

mean elevation of the land is only 2,755 feet, if the surface of the earth were smooth, the oceans would cover all the globe to a depth of 8,000 feet.

Deepest Diving by Man

Lt. Comdr. Georges Houot and Engineer Lt. Pierre-Henri Willm of the French Navy, who made several descents in their bathyscaphe in 1953 off Toulon, on Feb. 15, 1954, reached a depth of 13,287 ft., over 2½ mi., off the west coast of Africa, 160 mi. from Dakar. Their bathyscaphe was designed by Prof. Auguste Piccard and revised by the French Navy at Toulon. It is a sphere of steel with a plexiglas porthole, instruments and light projectors, and attached to a steel cylindrical float filled with gasoline. Water, which compresses the gasoline, sends the sphere down; ballast, in the form of steel pellets, is expelled to send the sphere up. Two men have oxygen for 32 hours.

On Aug. 12, 1954, Comdr. Houot took the bathyscaphe down 1,700 ft. 10 mi. off Toulon, France, to let Dr. Harold E. Edgerton, prof. of electrical engineering at Massachusetts Institute of Technology, take photographs of marine life with a camera and electronic flashlights mounted outside the sphere.

Prof. Auguste Piccard and his son Jacques made several descents in their new bathyscaphe, the Trieste, in the Tyrrhenian sea near the island of Ponza, Italy, and on Sept. 30, 1953, reported a depth of 10,168 ft.

Areas and Average Depths of the Oceans and Seas

Indian.....	28,925,504	12,785

Maps sometimes show a division at the equator of the Atlantic into the North Atlantic and the South Atlantic Oceans, and of the Pacific into the North Pacific and the South Pacific Oceans.

The term Antarctic Ocean, used by some cartographers is not recognized by the International Hydrographic Bureau of Monaco or the U. S. Navy Hydrographic Office, a member of that bureau. This term is supposed to describe the water surrounding the Antarctic continent, but its northern limits cannot be readily defined because there are no fixed geographic points. Oceanographers, however, describe the northern limit as the Subtropical Convergence, a zone in which surface temperature drops rapidly. This line, usually near 40° S. Lat., shifts seasonally.

The Malay Sea, also called the Asiatic Mediterranean, is defined by the International Hydrographic Bureau as comprising the following seas: Sulu, Celebes, Molukka, Halmahera, Ceram, Banda, Arafura, Timor, Flores, Bali, Java, Savu and South China; also the following gulfs: Thailand, Tomini, Boni, and the following straits: Malacca, Singapore and Makassar.

In Brixham, near Plymouth, Devonshire, England, shipbuilders are completing a replica of the famous Mayflower in which the Pilgrims sailed to New England in 1620. This 180-ton vessel will be 90 ft. long, have a 26-ft. beam, 11 ft. depth and 3 masts, 2 of them square-rigged. It is being built with voluntary contributions from Britons. When completed it will carry modern pilgrims on a two-month voyage across the Atlantic.

EXPLORATION Mountaineering

THIRD TALLEST PEAK

Mt. Kanchenjunga, third highest mountain in the world, was conquered May 25, 1955, by a British expedition led by Charles Evans and sponsored by the Alpine Club and the Royal Geographical Society of London. Evans reported reaching the summit of the 28,166 ft. tall peak, "less 5 vertical feet." This was a concession to the feelings of the Sikkim natives, who believe the peak is sacred and must not be touched by human foot.

Evans was a member of the successful Everest expedition of 1953 under Col. Henry C. J. Hunt, in which Hillary and Tensing Norkey gained the summit. He also accompanied Sir Edmund Hillary in exploring Mt. Baruntse in 1954.

Mt. Kanchenjunga is located 35 miles northwest of Darjeeling and is the principal peak of 5 that the Sikkim people call the Five Sacred Treasures of the Snows. Five earlier attempts to climb Kanchenjunga had been made by British, Swiss, Bavarians and others, beginning in 1905.

Mt. Istornal, 24,242 ft. in the Karakorum range, Pakistan, was reported conquered June 8 by Jos. Murphy and Thos. Mutch of Princeton Univ. expedition that started out to climb Tirich Mir, 25,420 ft. They planted Pakistani and American flags. Both men were frost-bitten and had to be carried down by porters.

Mt. Masherbrum, 25,600 ft., attempted, spring, 1955, by 10-man New Zealand group, reached 19,200 ft.; returned.

Reconnaissance in Pakistan, to find routes in the Hushe valley glacier basin was carried out in summer, 1955, by members of the Harvard Mountaineering Club headed by Henry S. Francis, Jr., 24, of Cleveland, O., accompanied by scientists. Three tall summits are nearby: K 6 (23,890 ft.); K 7 (22,900 ft.) and Bride Peak (25,110 ft.).

Ben Nevis—Two American students at Edinburgh University lost their lives May 22, 1955, by falling while attempting to climb Ben Nevis, the highest mountain in Britain, 4,406 feet.

EARLIER RECORDS

Mt. Everest, 29,028 ft., was conquered May 29, 1953, when Edmund Hillary, New Zealand, and Tensing Norkey, a Sherpa of Nepal living in India,

reached the top. They were members of an expedition led by Col. Henry C. J. Hunt for the Royal Geographic Society and the Alpine Club, both of London. They won by climbing the southwest face, first attempted by Eric Shipton in 1951. Hillary was knighted by Queen Elizabeth.

Surveyors for the government of India in November, 1954, placed the height of Everest at 29,028 ft., and noted there might be a deviation of 10 ft. either way due to seasonal fluctuation of snow. They asserted observations were made over a 3-year period.

Mt. Godwin Austen (K-2), 28,250 ft. tall, located in the Jammu-Kashmir part of the Karakorums, was surmounted July 31, 1954, by an Italian expedition under Ardito Desio. The mountain had been attempted unsuccessfully in 1953 by an American group under Dr. Charles S. Houston of Exeter, N. H., which reached 26,000 ft.

Mt. Cho-Oyu, 26,867 ft. tall, in the Nepalese Himalayas northwest of Mt. Everest, was climbed successfully Oct. 19, 1954, by 3 Austrians and a Sherpa guide. They were Dr. Herbert Tichy, Josef Joechler, Dr. Helmut Heuberger and Pasang.

Mt. Api, 23,339 ft., was conquered in 1954 by an Italian expedition. One explorer died at the summit, one was killed by falling into a crevasse and a third was drowned.

M. Nanga-Parbat, 26,660 ft., was conquered July 4, 1953, by Herman Bugl, Austrian, of expedition led by Peter Schenbrenner, German.

Mt. Anapurna, 26,503 ft., was conquered by Maurice Herzog, French, June 3, 1950.

Mt. Nunkun, in Jammu & Kashmir, 23,410 ft., was climbed by a French expedition and two members, Mme. Claude Kogan, 34, and Pierre Vidnoz, 27, a Swiss priest, reached the summit Aug. 28, 1953.

Mt. Revolution, 22,910 ft., in the Pamir range on the Soviet-Afghan frontier, was reported scaled by the Russians in August, 1954.

BOOKS ABOUT MOUNTAINEERING

High Adventure, by Edmund Hillary.
The Conquest of Everest, by Sir John Hunt.
The Age of Mountaineering, by Jas. Ramsay Ullman.

K2—the Savage Mountain, by Chas. S. Houston and Robt. H. Bates.

Polar Explorations—Arctic

Source: National Geographic Society, Washington, D. C.

1587—John Davis (England). Davis Strait to Sanderson's Hope, 72°12'N.

1596—Willem Barents and Jacob van Heemskerck (Holland). Discovered Bear Island, touched northwest tip of Spitsbergen, 79°49'N., rounded Novaya Zemlya, wintered at Ice Haven.

1607—Henry Hudson (England). North along Greenland's east coast to Cape Hold-with-Hope, 73°30', then north of Spitsbergen to 80°23'. Returning he discovered Hudson's Trench (Jan Mayen).

1616—William Baffin and Robert Bylot (England). Baffin Bay to Smith Sound.

1728—Vitus Bering (Russia). Proved Asia and America were separate by sailing through strait.

1733-40—Great Northern Expedition (Russia). Surveyed Siberian Arctic Coast.

1741—Vitus Bering (Russia). Sighted Alaska from sea, named Mount St. Elias. His lieutenant, Chirikof, discovered coast.

1771—Samuel Hearne (Hudson's Bay Co.). Overland from Prince of Wales Fort (Churchill) on Hudson Bay to mouth of Coppermine River.

1778—James Cook (Britain). Through Bering Strait to Icy Cape, Alaska, and North Cape, Siberia.

1789—Alexander Mackenzie (North West Co., Britain). Montreal to mouth of Mackenzie River.

1806—William Scoresby (Britain). North of Spitsbergen to 81°30'.

1819-20—William Edward Parry (Britain). Seeking Northwest Passage, he sailed through Lancaster Sound, Barrow Strait, and Melville Sound, blocked from sea by ice-filled McClure Strait.

1820-3—Ferdinand von Wrangel (Russia). Completed survey of Siberian Arctic coast. His exploration joined that of James Cook at North Cape, confirming separation of the continents.

1821—John Franklin (Britain). York Factory on Hudson Bay to mouth of the Coppermine, then eastward to Turnagain Point.

1821-3—William Edward Parry (Britain). Through Hudson Strait and Foxe Basin to Fury and Hecla Strait.

1822—William Scoresby, Sr. and Jr. (Britain). Mapped Greenland coast near Scoresby Sound.

1826—John Franklin (Britain). To mouth of Mackenzie River, then west to Beechey Point.

1827—John Richardson of his party explored Alaska. Dr. John Richardson of his party explored Alaska. Dr. John Richardson of his party explored Alaska. Dr. John Richardson of his party explored Alaska.

1827—William Edward Parry (Britain). North of Spitsbergen to 82°45'.

1829-33—John Ross and nephew James Clarke Ross (Britain). Through Lancaster Sound and into Prince Regent Inlet, then by land to North Magnetic Pole on Boothia Peninsula.

1834—George Back (Britain). From Port Reliance on Great Slave Lake descended Back (Great Fish) River, mapped Montreal Island.

1837-9—Peter Dease and Thomas Simpson (Hudson's Bay Co.). From mouth of Mackenzie west to Point Barrow, Alaska; from mouth of Coppermine east through Simpson Strait.

1845-8—John Franklin (Britain). Expedition lost off King William Island seeking Northwest Passage. Relics found 1859.

1847—John Rae (Hudson's Bay Co.). Overland from Repulse Bay explored Committee Bay.

1850-3—Robert McClure (Britain). Bering Strait to Prince of Wales Strait and north shore of Banks Island, where ship was abandoned. Party then walked 500 miles over frozen Northwest Passage to Beechey Island and shipped to England.

1851—John Rae (Hudson's Bay Co.). Completed exploration of Victoria Island's south coast from Prince Albert Sound to Pelly Point.

1852—Edward Inglefield (Britain). Through Smith Sound to name Cape Sabine.

1852-4—Belcher Expedition (Britain). Richards and Osborn sledged from Wellington Channel along northern coasts of Cornwallis, Bathurst, and Melville Islands. Meham went westward along south-

ern coast of Melville Island while McClintock explored northern coast.

1853-5—Elisha Kent Kane (U. S.). Through Smith Sound to basin named for him. Morton of his party discovered and named Kennedy Channel, exploring north to Cape Constitution, 80°32'.

1857-9—Leopold McClintock (Britain) with Lady Franklin's Expedition, found traces of Franklin's disaster. Sledged, Bellot Strait to Montreal Isl.

1868—N. A. E. Nordenskiöld (Sweden). Reached 81°42' in attempt at North Pole from Spitsbergen.

1869-70—Karl Koldewey and Julius Payer (Germany). Explored Greenland's east coast from Franz Josef Fjord to Germania Land, 77°N.

1871—Charles Francis Hall (U. S.). Through Robeson Channel between Ellesmere Island and Greenland, to 82°11'N., to Polar Sea.

1873—Julius Payer and Karl Weyprecht (Austria). Discovered Franz Josef Land.

1876—Nares Expedition (Britain). Aldrich explored 250 miles of Ellesmere Island's northern coast from Cape Sheridan to Cape Alfred Ernest. Beaumont traced the Arctic coast of Greenland east to Cape May, Wulff's Land. Markham went from Ellesmere Island to 83°20'.

1878-9—Baron Nordenskiöld (Sweden). Navigated Northeast Passage along coast of Siberia.

1879-1882—Geo. Washington DeLong, Lt. Cmdr., USN, sailed in Jeannette from San Francisco, 1879, on Jas. Gordon Bennett 3-yr. Arctic expedition; trapped in ice, ship was crushed June, 1881, at 77°15'N., 155° W. DeLong and 11 of crew died near Lena River, Siberia, October, 1881.

1882-3—Gen. A. W. Greely Expedition (U. S.). J. B. Lockwood explored Greenland's Arctic coast eastward to island named for him, reaching 83°24'N. and westward on Ellesmere Island to Greely Fjord.

1888—Fridtjof Nansen (Norway). First crossing of Greenland's icecap.

1892 & 95—Robert E. Peary (U. S.). From McCormick Bay on Greenland's west coast over icecap to Independence Fjord on northeast coast.

1893-6—Fridtjof Nansen (Norway). Drifted the Fram across Polar Sea from New Siberian Islands to Spitsbergen. Left his ship in 1895 to make a polar dash to 86°14', reached Franz Josef Land.

1897—S. A. André (Sweden). Attempting to reach pole by balloon, drifted from Spitsbergen to 82°56'N., 29°52'E. with two companions. Remains found Aug. 6, 1930, on White Island.

1898-1902—Otto Sverdrup (Norway). Crossed Ellesmere Island from east to Bay Fjord. Through Jones Sound to discover Axel Heiberg and Ringnes Islands. Along Ellesmere Island to Lands Lök.

1900—Duke of the Abruzzi Expedition (Italy). From Franz Josef Land, Cagni made a new farthest north, 86°34'.

1900—G. Amdrup (Denmark). Explored east coast of Greenland from Scoresby Sound south.

1900—Robert E. Peary (U. S.). Reached 83°50' in attempting Pole from Cape Morris Jesup, northern tip of Greenland.

1903-5—Roald Amundsen (Norway). First sailed Northwest Passage.

1906—Robert E. Peary (U. S.). From Ellesmere Island to 87°06', a new farthest north.

1907—Mylius-Erichsen and J. P. Koch (Denmark). Completed exploration of Greenland's east coast, charting from Cape Bismarck, Germania Land, north to Cape Bridgman.

DISCOVERY OF NORTH POLE

1909—Robert E. Peary (U. S.). Reached the North Pole, 90°, April 6, from Cape Columbia Ellesmere.

Peary had several supporting groups carrying supplies until last group, under Capt. Robt. A. Bartlett, turned back at 87°47'N. Peary, Matthew Henson and 4 Eskimos proceeded with dog teams built an igloo at 90°, remained 36 hours, finally south Apr. 7 at 4 p.m. for Cape Columbia. Eskimos Peary died Feb. 20, 1920. Henson, a Negro, born 1855, aged 88, Ootah, last survivor, died near Thule, Greenland, May, 1955, aged 80.

1914—Donald MacMillan (U. S.). Northwest, 200 miles, from Axel Heiberg Island to seek Peary's

1915-7—Vilhjalmur Stefansson (Canada). Discovered Borden, Brock, Melighen and Loughed Islands. Storkerson of his party in 1918 drifted on an ice floe 250 miles northeast of Point Barrow, east Passage.

1918-20—Amundsen (Norway) negotiated North-

1925—Roald Amundsen (Norway) and Lincoln Ellsworth (U. S.). Reached 87°44' in attempt to fly to North Pole from Spitsbergen.

1926—Richard E. Byrd and Floyd Bennett (U. S.). First to reach North Pole by air, May 9.

1926—Amundsen, Ellsworth, and Umberto Nobile (Italy). Flew from Spitsbergen, over North Pole, May 12, to Teller, Alaska, in dirigible Norge.

1928—Nobile crossed North Pole in airplane Italia May 24, crashed May 25. Amundsen lost while trying to effect rescue by plane.

1928—Sir Hubert Wilkins and Eielson. Flew from Point Barrow to Spitsbergen, 84°N. Lat.

1937—Otto Schmidt (U.S.S.R.). Landed at North Pole by plane, May 21; established a camp on ice under Ivan Papanin. After drifting 9 months they were picked up near Jan Mayen.

RECENT ARCTIC EXPEDITIONS

The British North Greenland Expedition, which has made an extensive geological, geophysical and glaciological survey of the Greenland icecap in the latitude of Thule, completed its work in 1954. The main base at Britannia Lake, 77°07'N., 23°50' W., was established in August, 1952 and an advance station called Northice, 78°07'N., 38°10' W. was set up and supplied by British and American planes from U. S. Air Force base at Thule.

Vast tracts of central Greenland between 63° and 74°N. were surveyed by a French scientific team under Paul-Emile Victor, 1948-1951. Supplied by air from Iceland the scientists built a Central Research Station at 70°55'N., 40°38' W.

In the summer of 1953 Canadian and Swiss explorers flew to Baffin Island to investigate the glaciology, biology, and geology of Cumberland Peninsula. Five camps were up to 6,725 feet.

A USAF plane in 1953 checked locations of cairns erected by Peary. It carried as guests Dr. Gilbert Grosvenor, president, and Thomas W. McKnew, secretary, of the National Geographic Society. Dr. Grosvenor dropped the society's flag on the North Pole, May 20, 1953.

Three U. S. Air Force men on March 19, 1952 landed their C-47 plane on Ice Island T-3 (Fletcher's Ice Island) which by May 36, had drifted within 83 miles of the North Pole. An advance weather base was maintained until May 14, 1954. Air Force research personnel returned in April, 1955. By radioactive age studies it determined that ice floe is 4,000-5,000 years old. It takes 10-12 years for the floe to make a complete drift cycle in the Arctic and it was probably close to its starting point in 1955. T-3 was some 40 miles off the northwest coast of Ellesmere Isl. when abandoned in September, 1955.

A USAF plane piloted by Lt. Col. William P. Benedict flew from T-3 and landed at the North Pole, May 4, 1952. The crew stayed 3 hours and 10 minutes and computed the ocean depth at 14,150 feet. Peary made a sounding on April 7, 1909, 5 miles from the Pole and reported no bottom at 9,000 feet. A later flight found a cache of 4 boxes bearing dates between 1900 and 1909, left by Peary at the northern tip of Ellesmere Island, where his expedition left land to start for the North Pole.

Rear Adm. Donald B. MacMillan, 79, completed his 30th voyage to the Arctic in June-September, 1954. He left Boothbay Harbor, Me., June 26 on the schooner Bowdoin with a crew of 12. The itinerary included Labrador, where the explorer left supplies and medicine for the MacMillan Moravian School of Nain; Baffin Land, Ellsmere Land and Rennselaer harbor.

In 1954 the University Museum of the University of Pennsylvania and the National Museum of Denmark in a joint expedition found houses, graves and implements of a 1,000-year old Arctic village of the Dorset culture on Melville Peninsula in Canada's Northwest Territories.

Canadians, exploring on Ellesmere Island in 1954, found a wooden sled, food and fuel left by Admiral Peary and records of Dr. H. K. E. Krueger, German scientist who disappeared in the Arctic in 1930.

In the summer of 1955 Canada sent a 30-man expedition to the Queen Elizabeth Islands to survey for oil and mineral resources.

In 1955 the U. S. Navy, in cooperation with the U. S. Air Force, the Snow, Ice and Permafrost Research Establishment of the Corps of Engineers, the Theater Command and several Canadian groups, covered over 500,000 miles of aerial ice reconnaissance and prepared hundreds of ice forecasts to aid in the planning and operation of bases in the American Arctic.

In 1954-55 the Soviet Union continued the intensity of its scientific study in the Arctic through observation stations on ice floes. Extensive reconnaissance of the submarine Lomonosov mountain range was carried on.

The United States is constructing the DEW (distant early warning) radar line stretching for 3,000 miles along the northern mainland rim of the North American continent. Canada is building a similar system, the mid-Canada Radar Line, usually called the McGill Fence, along the 55th parallel.

Polar Explorations—Antarctic

1772-4—Capt. James Cook (Britain). Encircled Antarctica without seeing land. In probing ice pack he reached to 71°10'S.

1819-21—F. G. Bellingshausen (Russia). Circumnavigated Antarctica, discovered Peter I and Alexander I Islands.

1820—Nathan Brown Palmer (U. S.). Discovered Palmer Peninsula in 60°W. and thus the Antarctic Continent without realizing it.

1823—James Weddell (Britain). Sailed into sea now bearing his name, reaching 74°15'S.

1831—John Biscoe (Britain). Discovered Enderby Land in 50°E., named Cape Ann.

1833—Peter Kemp (Britain). Sighted land now named for him in 60°E.

1839—John Balleny (Britain). Discovered Balleny Islands at Antarctic Circle and noted appearance of land south in 117°E.

1840—Charles Wilkes (U. S.). Commanded first U. S. Naval Exploring Expedition, found land in 158°E. and skirted the coast westward for 1,500 miles. Wilkes was first to announce existence of an Antarctic Continent.

1840—Dumont D'Urville (France). Discovered Adélie Coast in 140°E. and landed on islets.

1841-2—James Clark Ross (Britain). Discovered Ross Ice Barrier and set a farthest south of 78°10'.

1899-1900—C. E. Borchgrevink (Britain). Landed party from Southern Cross on Cape Adare, first to winter on Antarctic Continent. A new farthest south of 78°50' was reached by sledge.

1902-3—Erich von Drygalski (Germany). Discovered Wilhelm II Coast, in 90°E.

1902-4—Robert F. Scott (Britain). Discovered King Edward VII Land. Sledged south to 82°17', and later west 250 mi. into high plateau.

1904—W. S. Bruce (Britain). Discovered Coats Land in 22°W.

1908-9—Ernest Shackleton (Britain). Reached 88°23' in attempt on South Pole. Others of party reached South Magnetic Pole area.

1909-10—Jean Charcot (France). Explored west coast of Palmer Peninsula and sighted island bearing his name.

DISCOVERY OF SOUTH POLE

1911—Roald Amundsen (Norway). Wintered in Bay of Whales; then marching due south, reached South Pole December 14.

1912—Capt. Robert F. Scott, R. N. (Britain) reached South Pole from Ross Isl. Jan. 17 with 4 companions: Dr. E. A. Wilson, Lt. Bowers, Capt. Oates, Petty Officer Edgar Evans. Found Amundsen's tent there. On return Evans died first; Oates walked into storm; Scott, Wilson and Bowers died in tent during blizzard. Four bodies found Nov. 12, 1912.

1912—Wilhelm Filchner (Germany). Entered Weddell Sea; discovered Luitpold Land in 30°W.

1912-3—Douglas Mawson (Australia). Established bases in Adélie Coast and 1400 miles to the west in newly discovered Queen Mary Coast, charting large sections of coast by sledge.

1928—Hubert Wilkins (Britain). Used airplane first in Antarctic exploration, flying length of Palmer Peninsula.

1929—Richard E. Byrd (U. S.) established Little America on Bay of Whales. On 1,600 mi. airplane flight begun Nov. 28 he crossed South Pole Nov. 29 with pilot Bernt Balchen, a radio operator and a photographer. Dropped U. S. flag over Pole; temp. 16° below zero; circled Polar plateau; landed once in mountains to refuel.

1929-30—Douglas Mawson (Australia). Flew over and discovered MacRobertson Land in 65°E.

1929-30—Riser-Larsen (Norway). In flights from the Norvegia discovered Queen Maud Land in 45°E. and Crown Princess Martha Land in 15°W.

1930-1—Gunnar Isachsen (Norway). Circumnavigated continent from west to east in the Norvegia and Riser-Larsen flew over and discovered Princess Ragnhild Land in 30°E.

1934-5—Richard E. Byrd (U. S.). Led second expedition to Little America, which explored 450,000 sq. mi. Byrd wintered alone at an advance weather station in 80°08'S.

1935—Lincoln Ellsworth (U. S.). Flew south along Palmer Peninsula's east coast, then crossed continent to Little America, making 4 landings.

1939—Alfred Ritscher (Germany). Viewed 230,000 sq. mi. of continent in vicinity of Greenwich Meridian, photomapping 135,000.

1940—Richard E. Byrd (U. S.). Charted most of coast between Ross Sea and Palmer Peninsula.

RECENT ANTARCTIC EXPEDITIONS

Admiral Richard E. Byrd led the U. S. Navy Antarctic Expedition of 1946-7, Operation Highjump. Largest ever organized for polar exploration, it included 13 ships and 4,000 men. 29 land-based flights from Little America and 35 by seaplanes from tenders, photomapped most of the continent's coastline and penetrated beyond Pole.

French scientists under André Lotard established base of Port Martin on Adélie, 66°49'S., 141°24'E. Relief parties arrived annually. Base burned Jan., 1952. Seven men under Mario Marret remained for observation. During winter, 1955-56, French under Comdr. Robt. Guillard reoccupied remaining buildings for geophysical study.

The Ronne Antarctic Research Expedition, 1946-48, Comdr. Finn Ronne, USNR, in charge, determined the Antarctic to be only one continent, with no strait between Weddell Sea and Ross Sea; discovered 250,000 sq. mi. of land by flights to Lat. 79°S. and Long. 40°W., and made 14,000 aerial photographs with ground-control points, over 450,000 sq. mi. of land.

A 1950-52 British-Scandinavian Antarctic expedition under Capt. John Gjaever of the Norsel established Maudheim as a base in Queen Maud Land, latitude 71°03'S., longitude 10°55'W. An area the size of Iceland was air surveyed.

The Australian govt. established scientific stations on Heard and Macquarie Isls., 1947-48, to transmit daily reports on meteorology and study biology and geophysics. First permanent scientific station in Antarctica was opened at 67°S., 66°E., named for Sir Douglas Mawson. Heard Isl. base was transferred to Mawson Jan.-Feb., 1955. Exploring party found a mountain chain 150 mi. inland, estimated at 10,000 ft. high, over 100 mi. long, largely ice free.

NEW AMERICAN EXPEDITION

More than 40 nations are preparing a concerted scientific program, the International Geophysical Year (IGY), with special emphasis on the Arctic and the Antarctic. This "year" of world scientific study, beginning July 1, 1957 and extending to the end of 1958, involves millions of dollars and thousands of scientists. Preparations by participating nations have already begun with the sending of many expeditions and advance exploring and supply parties to establish bases for the study of cosmic rays, polar glaciers, ocean depths and currents, continental drift, weather and other related subjects.

In an advance operation the United States icebreaker *Atka* reconnoitered parts of the Antarctic ice shelf in January, 1955. It discovered that a portion of the base of operations established by Rear Adm. Richard E. Byrd in Little America had disappeared when a part of the ice shelf on which it rested broke off and fell into the sea.

In November, 1955 "Operation Deepfreeze," sponsored by the United States Department of Defense, the National Academy of Sciences and the National Science Foundation with Admiral Byrd as Officer in Charge, sent ships to the Ross Sea to establish an air facility at McMurdo Sound and a scientific base in Little America near Kainan Bay. Plans for 1956 include setting up an inland station at 80°S. Lat., 120°W. Long. in Marie Byrd Land, and a station at the South Pole.

HILLARY TO LEAD

Sir Edmund Hillary in the spring, 1955, was appointed leader of the McMurdo Sound Base (Antarctic) by the Ross Sea Committee. The committee was set up by the New Zealand government with an initial appropriation of £50,000. Sir Edmund's task is to plan a route through Victoria Land mountains to the Polar ice cap. A depot will be built 300 mi. south of McMurdo. A British Commonwealth expedition to cross the Antarctic continent from west to east in surface vehicles with air support under V. E. Fuchs, who will proceed across the South Pole from Weddell Sea toward McMurdo Sound. The British Colonial Office announced in June, 1955, that a United Kingdom group would make an aerial survey of Grahamland and the adjacent islands of the Falkland Islands Dependencies, producing a mosaic of photographs to determine scientific and mineral potentials. A second supply vessel was to be added to the research ship *John Briscoe*, which serves the eight Antarctic bases of this area.

The Soviet Union is sending personnel to establish three bases for the International Geophysical Year.

Important Islands and Their Areas

Source: National Geographic Society, Washington, D. C.

Figure in parentheses shows rank among the world's ten largest islands. Some islands have not been surveyed accurately; in such cases estimated areas are shown.

Australia, sometimes classed as an island, is one of the seven continents. Its area (mainland only) is 2,948,366 square miles.

Islands in minor waters: Manhattan (22.24 square miles), Staten (57 square miles), and Governors Manitoulin (1,068 square miles), (Canada), Lake Huron, Pensang (110 square miles), (Gt. Br.), Strait of Malacca; Singapore (220 square miles), (Gt. Br.), Singapore Strait.

Atolls: Bikini (United States Trust Territory of Pacific Islands), lagoon area 280 square miles, land area 2.87 square miles; Canton (U. S., Great Britain), lagoon area 20 square miles, land area 4.3 square miles; Christmas (U. S., Great Britain), lagoon area 89 square miles, land area 184 square miles; Funafuti (U. S., Great Britain), lagoon area 84 square miles, land area 1.7 square miles.

It's not true, says the Baltimore Assn. of Commerce, that Baltimore has a 44-ft. monument to the Chevalier d'Armour's horse. The monument, an obelisk at North Ave. and Bond St., United States, had suggested it when he learned that America did not possess a monument to the great discoverer. Built of English brick, covered with white plaster, the obelisk was the first erected in North America to Columbus.

Important Active Volcanoes of the World

Mt. Etna in Sicily resumed activity in the summer of 1955. It has erupted many times, the first of record taking place in 525 B. C. Two volcanoes in Chile—Nilahue and Rininahue—also were active in 1955, with flames visible 500 mi. and sulphurous smoke covering 3 provinces.

Great volcanic eruptions of modern times include that of Krakatoa, on an island in the Sunda Strait between Sumatra and Java, which exploded Aug. 27, 1883, creating a depth of 1,000 ft. in the ocean. The concussion was heard 2,500 mi. away, and tidal waves killed 35,000. In 1927 Krakatoa formed the island of Anak-Krakatoa, which exploded, 1929, depositing an island in the hole caused in 1883. Another great volcanic explosion was that of Katmai, Alaska, in 1912, which resulted in the Valley of 10,000 Smokes.

Mont Pelee, Martinique, destroyed St. Pierre and more than 30,000 people May 8, 1902. Mt. Paricutin, southwest of Mexico City, erupted in a field Feb. 20, 1943, and is now over 9,000 ft. tall. It destroyed several villages but the inhabitants saved themselves.

Famous Waterfalls

Source: National Geographic Society, Washington, D. C.

In the table below height means total drop whether in one or more leaps. †Falls consisting of more than one leap; *falls that diminish greatly seasonally; **falls that are reduced to a trickle or remain dry for a part of each year. When names of rivers are not shown, in most cases they are the same as those of the falls.

There are tens of thousands of waterfalls scattered over the earth, hundreds of them of considerable magnitude. Height alone does not indicate the importance of a cataract. Other significant facts are volume of flow, steadiness or variability of flow, width of crest, whether the water drops sheerly or over a sloping surface, and whether in a single leap or in a succession of leaps. When relatively low falls occur in succession over a considerable length of streambed, they are classed as cascades.

On the basis of mean annual flow combined with considerable height, Gualira is the world's greatest waterfall. Its estimated mean annual flow is 470,000 cuacs (cubic feet per second). A greater volume of water passes over Stanley Falls in the Congo River, but not one of its seven cataracts, spread out over a distance of nearly 60 miles, is higher than 10 feet.

The estimated mean annual flows of other great waterfalls are: Khon, 400,000 to 420,000 cuacs; Niagara, 212,200; Paulo Afonso, 100,000; Urubupunga, 97,000; Iguazú, 61,660; Patos-Maribondo, 53,000; Victoria, 38,430; Grand (Labrador), 30,000 to 40,000; and Kaeteur 23,400.

Cauvery, in India, is one of the most variable waterfalls. It is known to have fluctuated from a mere trickle in the dry period to 667,470 cuacs during the monsoon season.

Niagara Falls

The Niagara river carries the water of Lake Erie to Lake Ontario, a descent of 326 ft. in 36 miles. (U.S.) 167 ft. tall, separated by Goat Island. Horseshoe is about 2,500 ft. across; American, 1,000 ft. Niagara has the steadiest flow of all waterfalls because the Great Lakes serve as its reservoir. Over 212,000 cubic ft. of water per second passes over the Falls, 94% over Horseshoe. The river below Goat Island is 92 ft. deep. The Whirlpool Rapids, about half a mile below are located in a gorge only 400 ft. wide leading to the Whirlpool.

Notable Bridges

Source: Chief of Engineers, U. S. Army and other official data. Asterisk (*) designates Railroad Bridge. Figures in parentheses () are height above water between mean low water and low steel.

¹The Golden Gate Bridge crosses the portal of the harbor of San Francisco. Its towers are 746 feet tall. It is 4,200 feet in length and is the longest single span in the world.

²San Francisco Transbay has suspension spans each 2,310 ft. long; 3 of 1,160 ft., and a cantilever span 1,400 ft. long.

World Facts—Notable Bridges; Lakes of World

The Bronx-Whitstone bridge is a link in the Belt Parkway system of N. Y. C. and is 4,000 feet long from anchorage to anchorage with a main span of 2,300 feet; entire length, with approaches, 7,140 ft. Thousands and Islands: American span 800 ft.; Canadian 750 ft. The Canadian crossing includes a continuous truss of two 300-ft. spans, a steel arch of 345-ft. span, and a suspension bridge of 750-ft. span and 120 ft. underpassage.

The Triborough Bridge in N. Y. C. consists of a suspension bridge of 1,380 ft. channel span and 705 ft. side spans over the East River at Hell Gate; a vertical lift bridge over the Harlem River with lift span of 310 ft.; fixed truss spans over the Bronx Kills with channel span of 350 ft.; plate girder viaduct structure in Queens, on Wards and Randalls Island, over Little Hell Gate and in Manhattan.

Rebuilt in 1898.

The longest hinged arch span in the world.

The Henry Hudson Arch Bridge, N. Y. C., has the longest plate girder, fixed steel arch in the world. length of steel is 1,555 feet and the total length of entire structure is 2,000 feet.

Rebuilt in 1931.

10 twin swing spans, each 600 feet long.

Constructed on 25 floating concrete sections. Floating structure 6,561 feet long. Bridge from west waters edge to east waters edge 8,853 feet.

The Royal Gorge bridge, 1,053 ft. above the Arkansas river in Colorado, is the highest bridge above water. Opened Dec. 8, 1929. It is 1,269 ft. long with a main span of 880 ft., width 18 ft., height of towers 560 ft. The cables weigh over 300 tons and are made of 4,200 strands of galvanized wire.

The Straits Mackinac bridge, begun in 1954, is to be opened in November, 1957. It is being built by the Mackinac Bridge Authority of the State of Michigan from Mackinac City, in the lower Peninsula, to the vicinity of St. Ignace, in the Upper Peninsula. With approaches it will be 5 mi. long and have a main suspension span of 3,800 ft., and side spans of 1,800 ft. Towers will rise 552 ft. It will cost over \$80,000,000.

[illegible]

The roosters actually eat large insects, taken in the wing. They are aided by expansive mouthparts; that of the chuck-will's widow can encompass small birds. One was seen off the American coast watching flying warblers. Hummingbirds, perhaps chicken-wills, have been eaten by the chuck-will's widow.

The whippoorwill's Latin name, *antrostomus vociferus* (cave mouth, loud voice), derives from the bird's tunnel and far-carrying cry. John Burroughs, the naturalist, once counted 1,088 continuous calls from one bird. After a half-moon phase, as if to get its breath, the whippoorwill discloses another series of 350 calls.

Distance enhances any whippoorwill's performance. Heard close up, the voice sounds harsh. The whippoorwill sings while perched on logs or low gravel-topped roofs of all buildings.

The nighthawk can be seen ranging twilight skies. An aerial acrobat while pursuing insects, it was for years a target of hunters. It is now protected by law. Nighthawks hatch their eggs in the bare depressions of gravel bars, pastures and sand spits. Sometimes they nest on the flat

Notable Tall Buildings in United States Cities

Height is from the sidewalk to the top of roof, including penthouse, tower, statue or light atop building, but does not include a flag pole.

OTHER TALL BUILDINGS AND FOREIGN STRUCTURES

Other buildings (height in feet in parentheses) are: Akron, Ohio First Natl. Tower Bldg., 28 (308); Allentown, Pa., Penn. Power & Light Bldg., 23 (322); Baton Rouge, La., State Capitol, 34 (450); Birmingham, Ala., Comer Bldg., 27 (325); Columbus, Ohio, Lincoln-Veque Tower, 47 (555); Corpus Christi, Tex., Wilson Tower, 20 (273); Duluth, Minn., Alworth Bldg., 16 (247); Lincoln, Neb., State Capitol (469, incl. 32-ft. bronze statue); New Haven, Conn., Harkness Memorial Quadrangle (257); Providence, R. I., Industrial Trust Co. Bldg., 26 (420).

Foreign structures: The Eiffel Tower (984.25);

Pyramid of Cheops, in Egypt (450); and St. Peter's in Vatican City (448).

The spires of Ulm Cathedral (529), and the Cathedral of Cologne (512), both in Germany, are the tallest in the world. Other such spires include the Strassburg Cathedral (468); St. Stephen's, Vienna (441); Salisbury Cathedral, England (406); Cathedral of Seville, Spain (400); Antwerp Cathedral, Belgium (397); Torrazzo of Cremona, Italy (397); Freiburg Cathedral, Germany (385); St. Paul's Cathedral Cross, London (365), and the St. Patrick's R. C. Cathedral (340), and St. Paul's Church of England Cathedral (300), both in Melbourne, Australia.

The Río de la Plata is the estuary formed by the Paraná and Uruguay Rivers. The source of the St. Lawrence River is in the State of Minnesota. The St. Lawrence is viewed as a part of the Great Lakes Waterway and its source is considered the head of the St. Louis River which feeds into Lake Superior. The St. Louis River rises in Minnesota. Area (sq. miles) of the Great Lakes basins—Amazon (2,053,318); Congo (1,339,923); Nile (1,119,652); Mississippi-Missouri (1,243,700); La Plata (1,198,000); Yenisei (1,042,000); Ob (934,000); Lena (932,000); Amur (709,000); Mackenzie-Peace (699,400); Yangtze (689,000); St. Lawrence (565,200); Volga (531,000); Hwang (400,000); Danube (320,300); Colorado (246,000); Rio Grande (171,890).

Maximum and minimum monthly mean elevations since 1860 of the surface of the Great Lakes above mean tide at New York—Superior, 604.05 (Aug. 1876); 599.98 (April, 1926); Michigan-Huron, 583.68 (June, 1836); 577.35 (Feb. 1926); Erie, 574.70 (May, 1952); 569.43 (Feb. 1936); Ontario, 249.29 (June, 1952); 242.68 (Nov. 1934).	1,427	1,661	740	490	331

The Great Lakes form the largest body of fresh water in the world and with their connecting waterways rank as the world's largest inland water transportation unit. The Lakes form a cheap and ready means for the transportation of wheat from the Canadian prairies to the East. The distance

from Duluth, Minn., to eastern outlet on Lake Ontario is 1,160 miles. Lake Michigan is the largest lake entirely in the United States.

Lake St. Clair is an expansive shallow basin of the waterway through which Lake Huron discharges into Lake Erie. It has low marshy shores and a natural maximum depth of about 21 feet. Its low-water datum is 573.5 feet above mean sea level. Its extreme length is 26 miles and extreme width 24 miles. The improved steamer channel is 18½ miles long, with least width of 700 feet and depth of 25 feet. Of the 490 square miles of water surface 200 are in the United States and 290 in Canada.

National Parks and Other Units of the National Park System

Source: National Park Service. Revised Figures as of June 30, 1955

NATIONAL PARKS

(The year is that of creation of the park; figures in parentheses show area, in acres.)

Acadia, 1919, Maine (30,378)—The group of granite mountains upon Mount Desert Island, also Schoodic Point on mainland.

Big Bend, 1944, Texas (692,305) on bend of Rio Grande.

Bryce Canyon, 1923, Southwestern Utah (36,010)—Box canyon filled with countless array of fantastically eroded pinnacles of vivid coloring.

Carlsbad Caverns, 1930, Southeastern New Mexico (45,847)—Stupendous caverns, not yet wholly explored, limestone decorations.

Crater Lake, 1902, Southwestern Oregon (160,290)—Lake of extraordinary blue in crater of extinct volcano. Sides 500 to 2,000 feet high. Interesting lava formations.

Everglades, 1947, Southern Florida (1,258,640)—Portion of only subtropical area in the United States; extensive watercourses; abundant bird life.

Glacier, 1910, Northwestern Montana (999,320)—Rugged mountain region of great beauty; more than 200 glacier-fed lakes, 60 small glaciers. Precipices thousands of feet deep.

Grand Canyon, 1919, North Central Arizona (673,062)—The greatest example of erosion and the most sublime spectacle in the world.

Grand Teton, 1929, Northwestern Wyoming (298,470)—Includes most spectacular portion of Teton Mountains, an uplift of unusual grandeur.

Great Smoky Mountains, 1930, North Carolina and Tennessee (507,168)—Massive mountain uplift; magnificent forests.

Hawaii, 1916, Hawaii (176,951)—Interesting volcanic areas—Kilauea and Mauna Loa, active volcanoes on the island of Hawaii; Haleakala, a huge extinct volcano on the island of Maui.

Hot Springs, 1921, Middle Arkansas (986)—Hot Springs said to have therapeutic value. Bathhouses under Government supervision.

Isle Royale, 1940, Michigan (133,839)—Largest island in Lake Superior; rugged forested wilderness.

Kings Canyon, 1940, Middle Eastern California (453,716)—Sierra wilderness with numerous peaks 13,000 to 14,000 feet high; park also contains groves of giant sequoias.

Lassen Volcanic, 1916, Northern California (104,161)—Only recently active volcano in United States proper. Lassen Peak, 10,453 feet; Cinder Cone, 6,913 feet; hot springs; mud geysers.

Mammoth Cave, 1936, Southwestern Kentucky (50,696)—Series of caverns including spectacular onyx cave formation. Became nationally known in the war of 1812 when saltpeter from the cave was used in making gunpowder.

Mesa Verde, 1906, Southwestern Colorado (51,018)—Most notable and best preserved prehistoric cliff dwellings in the United States.

Mount McKinley, 1917, South Central Alaska (1,939,319)—Highest mountain in North America; caribou, Dall sheep, and other spectacular wildlife.

Mount Rainier, 1899, West Central Washington (241,571)—Greatest single-peak glacial system in the United States, radiating from the summit and slopes of an ancient volcano; dense forests.

Olympic, 1933, Northwest Washington (888,537)—Notable as finest remnant of the Pacific Northwest forests, including the famous "rain forests," and for its numerous glaciers; also as the summer feeding ground for the rare Roosevelt Elk.

Platt, 1906, Southern Oklahoma (912)—Numerous cold mineral springs.

Rocky Mountain, 1915, North Middle Colorado (255,632)—Heart of the Rockies, snowy range, peaks 11,000 to 14,255 feet altitude. Remarkable records of glacial period.

Sequoia, 1890, Middle Eastern California (385,178)—Great groves of giant sequoias, world's largest and probably oldest living things; magnificent High Sierra scenery, including Mount Whitney, highest mountain in United States proper.

Shenandoah, 1935, in Northern Virginia (193,473)—Outstanding scenic section of the Blue Ridge Mountains.

Wind Cave, 1903, Southwestern South Dakota (27,893). Limestone caverns having several miles of galleries and numerous chambers containing peculiar formations. Buffalo herd.

Yellowstone, 1872, Northwestern Wyoming, Southwestern Montana, and Northeastern Idaho (2,213,207)—More geysers than in all rest of world together. Boiling springs; mud volcanoes; petrified forests. Grand Canyon of the Yellowstone, remarkable for gorgeous coloring. Large lakes; many large streams and waterfalls. Great wild animal herds.

Yosemite, 1890, Middle Eastern California (757,619)—Mountainous region of unusual beauty: Yo-

semitic and other inspiring gorges; many waterfalls of extraordinary height; 3 groves of giant sequoias.

Zion, 1919, Southwestern Utah (94,241)—Magnificent gorge (Zion Canyon), depth from 1,500 to 2,500 feet, with precipitous walls.

NATIONAL HISTORICAL PARKS

Abraham Lincoln, 1939, Kentucky (117)—Traditional birthplace cabin of Abraham Lincoln enclosed in memorial building on site of birthplace.

Appomattox Court House, Virginia (968).

Chalmette, 1939, Louisiana (70)—Part of the ground on which the Battle of New Orleans was fought, Jan. 8, 1815.

Colonial, 1936, Virginia (7,131)—Includes most of Jamestown Island, site of the first permanent English settlement in America; historic Yorktown; the parkway connecting these and other Colonial sites with Colonial Williamsburg, Cape Henry Memorial.

Morristown, 1933, New Jersey (956)—Sites of important military encampments during the Revolution; Washington's Headquarters, 1779-80.

Saratoga, 1948, New York (2,322)—Scene of the American victory over the British General Burgoyne, 1777; turning point of the Revolution and recognized as one of the decisive battles of world history.

NATIONAL MILITARY PARKS

Chickamauga and Chattanooga (8,189), Ga.-Tenn. Fort Donelson (103), Dover, Tenn. Fredericksburg and Spotsylvania County Battlefields Memorial (2,421), Fredericksburg, Va. Gettysburg (2,709), Gettysburg, Pa. Guilford Courthouse (149), Greensboro, N. C. Kings Mountain (4,012), Kings Creek, S. C. Moores Creek (42), Currie, N. C. Petersburg (1,505), Petersburg, Va. Shiloh (3,730), Pittsburg Landing, Tenn. Stones River (324), Murfreesboro, Tenn. Vicksburg (1,330), Vicksburg, Miss.

NATIONAL BATTLEFIELD SITES

Antietam (184), Sharpsburg, Md. Brices Cross Roads (1), Bethany, Miss. Cowpens (1), near Gaffney, S. C. Fort Mifflin (2), S. E. of Uniontown, Pa. Tupelo (1), Miss. White Plains (—), N. Y. (west side of Bronx River parkway at foot of Chatterton Hill), memorials.

NATIONAL BATTLEFIELD PARKS

Kennesaw Mountain, 1947, Georgia, (3,094)—Commemorates the Battle of Kennesaw Mountain, a major battle of Sherman's flanking movement through the heart of the South known as the Atlanta Campaign.

Manassas, Virginia (1,719). Site of Bull Run and Manassas battles.

Richmond, 1944, Virginia (684)—Scene of battles in defense of Richmond during war between the States.

NATIONAL MEMORIAL PARK

Theodore Roosevelt, 1947, North Dakota (68,510)—Badlands along Little Missouri River; part of Theodore Roosevelt's Elk Horn Ranch.

NATIONAL CEMETERIES

Administered by the National Park Service because of their historical interest.

Antietam (1136), Sharpsburg, Md. Battleground (103), Washington, D. C. Fort Donelson (15,34), Dover, Tenn. Fredericksburg (12,00), Fredericksburg, Va. Gettysburg (15,55), Gettysburg, Pa. Poplar Grove (8,72), Petersburg, Va. Shiloh (10,25), Pittsburg Landing, Tenn. Stones River (20,09), Murfreesboro, Tenn. Vicksburg (117,85), Vicksburg, Miss. Yorktown (2,91), Yorktown, Va.

The Department of the Army has jurisdiction over 86 other National Cemeteries (3,435 acres) situated in the United States and its possessions.

The Department of the Interior has jurisdiction over 12 National Cemeteries (157 acres).

The American Battle Monuments Commission administers the United States Military Cemeteries and Memorials on foreign soil.

Arlington National Cemetery, Va., is the nation's most important memorial ground. It is described on page 217.

NATIONAL PARKWAYS

Blue Ridge (52,881) follows Blue Ridge Mountains. Length, 477 miles.

George Washington Memorial (3,130), along Maryland and Virginia shores of the Potomac River. Length, 57 miles.

Natchez Trace (21,998), follows old Indian trail between Nashville, Tenn., and Natchez, Miss. Length, 447 miles.

Suitland (660) Maryland-Dist. of Columbia.

NATIONAL HISTORIC SITES AND MEMORIALS (Acres in parentheses)

Historic Sites

Adams House, Quincy, Mass. (5). Home of Presidents John and John Quincy Adams.
Federal Hall Memorial, Nassau and Wall Sts., New York City (.45). First seat of U. S. Government.
Fort Raleigh, N. C. (18). First attempted English settlement.
Hampton, Md., Georgian mansion, 1783 (45).
Hopewell Village, Pa. (848). Early iron-making industry.
Jefferson Memorial, Mo. (83). Commemorates national expansion.
Old Custom House, Philadelphia (.79). Greek revival architecture.
Franklin D. Roosevelt Home, Hyde Park, N. Y. (94). Includes Library.
Salem, Mass. Maritime Memorial (9).
San Juan, Puerto Rico (40). Ancient Spanish fortifications.
Vanderbilt Mansion, near Hyde Park, N. Y. (212). With arboretum.

Memorials

Coronado Memorial, Ariz. (2,745). Route of Spaniards, 16th century.
De Soto Memorial, Fla. (24). Commemorates 16th-century explorer.
Fort Caroline, Fla. (116). Last French settlement in Florida, 1564, destroyed by Spaniards, 1565.
House where President Lincoln died, Washington, D. C. (.05).
Custis-Lee Mansion, Arlington, Va. (3). Antebellum home of Robert E. Lee.
Lincoln Memorial, Washington, D. C. (.61). Classical monument with statue.
Lincoln Museum, Washington, D. C. (.18). Ford theatre where Lincoln was shot.
Mount Rushmore, S. D. (1,220). Colossal profiles of 4 Presidents.
Thomas Jefferson Memorial, Washington, D. C. (1). Classical circular colonnade.
Washington National Monument, Washington, D. C. (.37). Obelisk commemorates first President.
Wright Brothers, N.C. (name changed from Kill Devil Hill to Wright Brothers) (314). Site of first motor-propelled airplane flight.

NATIONAL CAPITAL PARKS

National Capital Parks (35,042). District of Columbia, Maryland, Virginia and West Virginia. The park system of the Nation's Capital comprises nearly 750 units in the District of Columbia and vicinity.

PROJECTS AND AREAS UNDER THE JURISDICTION OF THE NATIONAL PARK SERVICE BUT NOT WITHIN THE NATIONAL PARK SYSTEM

National Recreational Areas

Coulee Dam (98,500) Washington; Lake Mead (1,399,728) Arizona-Nevada; Millerton Lake (11,605) California; Shadow Mountain (10,231) Colorado.

National Historic Sites Not Federally Owned

Chicago Portage (91.20) Ill.; Dorchester Heights (5.43) Mass.; Gloria Dei (1.53) Penn.; Grand Portage (660) Minn.; Jamestown (22) Virginia; McLoughlin House (0.63) Oregon; Saint Paul's

Church, Bill of Rights Shrine (6.09) Mount Vernon, N. Y.; San Jose Mission (4.13) Texas; Touro Synagogue (0.23) R. I.; Virgin Islands (7.55) V. I.

OTHER PROJECTS

Baltimore-Washington Parkway (2,886) Maryland; Independence National Historical Park (17) Penn.; Cape Hatteras National Seashore Recreational Area (24,705) N. C.; Harpers Ferry National Monument (469) W. Va.-Md.
Total Federal Land Acres administered by the National Park Service, 23,924,223.

Historic Cumberland Gap Becomes National Park

Cumberland Gap, opening in the Appalachian mountains through which colonial armies and the early pioneers of the westward movement passed from Virginia into the Kentucky wilderness, has become Cumberland Gap Historical Park, administered by the National Park Service. It comprises some 20,000 acres of rolling hills and woodland taken from Virginia, Kentucky and Tennessee, which come together there. Daniel Boone is the pioneer most often cited for his exploration in the Gap in 1764 and his movement into Kentucky over the Wilderness Trail in 1769.

Great Inventions and Scientific Discoveries

				Nylon synthetic	1930	Carothers	U. S.
				Nylon	1937	Du Pont lab	U. S.
				Oil cracking process	1891	Dewar	U. S.

Details of Famous Inventions

Automobile. Charles E. Duryea declared he operated the first successful American automobile in Springfield, Mass., Apr. 19, 1892. His brother, J. Frank Duryea, asserts he made essential contributions to the car and that it did not run until Sept., 1893. Original patent was granted to C. E. Duryea June 11, 1895. Supplementary patents were granted to Charles and also to J. Frank Duryea.

Radar. Principle recognized in 1922 by Dr. A. Hoyt Taylor and Leo C. Young, U. S. Naval Research Aircraft Laboratory, Washington, D. C. The Navy ordered radar for ships, 1936. First vessel to use it was U. S. S. New York, 1938. Radar recorded coming of Japanese planes at Pearl Harbor, but no hostile mission was suspected. During the 1930s the British, alerted by the Taylor-Young experiments, independently developed radar, which they called radio-location.

Television. Developed in the 1930s in laboratories, principal patents going to Vladimir Zworykin and Philo Farnsworth, who developed it independently. Authorized by Federal Communications Commission, July 1, 1941. There were five months of telecasting to about 10,000 sets before Pearl Harbor. First commercial TV from Empire State Bldg., New York, 1941. The war stopped manufacture of equipment and limited programs to instructions to air wardens and military services. First stations were WNBT, (NBC, New York), WCBW (CBS, New York) and Dumont. A daily newspaper was televised and acted out at Schenectady in 1943. The FCC allotted frequencies June 27, 1945, and war-time improvements were made available. During the war infra-red tubes, 2 in. diameter, were used with an eyepiece. First coaxial cable, New York to Washington via Philadelphia, completed by American Telephone & Telegraph Co., 1945. The image orthicon pick-up tube was developed by RCA in 1946.

J. L. Baird, British inventor, completed his telechrome for color television in 1944. In the United States Goltsmark made important contributions to color TV. CBS demonstrated a color system in 1946. RCA in 1947. The first color broadcast of any duration was a one-hour program by CBS June 25, 1951, over a network including Boston, New York, Philadelphia, Baltimore and Washington.

Three-dimensional Motion Pictures. First successful public performance of motion pictures with depth (3-dimensional) was given in New York Sept. 30, 1952, by Cinerama, invented by Fred Waller, who died in 1954. Soon thereafter the anamorphic lens, invented in Europe by Henri Chretien, which produced similar depth, was employed by CinemaScope. The Robe, first wide-screen CinemaScope, was released by Twentieth Century-Fox, Sept. 16, 1953. The first full-length feature film in 3-dimensional Natural Vision, *Bwana Devil*, was released by United Artists Feb. 18, 1953. Columbia Pictures' first 3-D film, *Man in the Dark*, was presented Apr. 8, 1953, and Warner Brothers' House of Wax on Apr. 10, 1953. Paramount's first production in wide-screen VistaVision, *White Christmas*, was first shown Oct. 14, 1954. A new 3-D process, Todd AO, was first used for film Oklahoma!, 1955.

International Atomic Weights and their Discoverers

Source: The Journal of the American Chemical Society. Atomic weight is the average weight of an atom compared to an average atom of ordinary terrestrial oxygen as 16. Starred values are the mass numbers of the longest-lived of the known forms of elements, usually synthetic, which are radioactive in all forms.

Chemical element	Symbol	Atomic number	Atomic weight	Year discov.	Discoverer
Actinium	Ac	89	*227	1899	Debierne
Aluminum	Al	13	26.98	1825	Oersted

GENERAL TABLES OF WEIGHTS AND MEASURES

Source: National Bureau of Standards, Department of Commerce

Tables of United States Customary Weights and Measures**LINEAR MEASURE**

12 inches (in.)	= 1 foot (ft.)
3 feet	= 1 yard (yd.)
5½ yards	= 1 rod (rd.), pole, or perch = 16½ feet
40 rods	= 1 furlong (fur.) = 220 yards = 660 feet
8 furlongs	= 1 statute mile (mi.) = 1,760 yards = 5,280 feet
3 miles	= 1 league = 5,280 yards = 15,840 feet
5,280 feet	= 1 statute or land mile
6,076.1033 feet	= 1 international nautical mile

AREA MEASURE

Squares and cubes of units are sometimes abbreviated by using "superior" figures. For example, ft² means square foot, and ft³ means cubic foot.

144 square inches	(sq. in.) = 1 square foot (sq. ft.)
9 square feet	= 1 square yard (sq. yd.) = 1,296 square inches
30¼ square yards	= 1 square rod (sq. rd.) = 272 ¼ square feet
160 square rods	= 1 acre = 4,840 square yards = 43,560 square feet
640 acres	= 1 square mile (sq. mi.)
1 mile square	= 1 section (of land)
6 miles square	= 1 township = 36 sections = 36 square miles

CUBIC MEASURE

1,728 cubic inches (cu. in.)	= 1 cubic foot (cu. ft.)
27 cubic feet	= 1 cubic yard (cu. yd.)

GUNTER'S OR SURVEYORS CHAIN

7.92 inches (in.)	= 1 link (li.)
100 links	= 1 chain (ch.) = 4 rods = 66 feet
80 chains	= 1 statute mile (mi.) = 320 rods = 5,280 feet

LIQUID MEASURE

When necessary to distinguish the liquid pint or quart from the dry pint or quart, the word "liquid" or the abbreviation "liq" should be used in combination with the name or abbreviation of the liquid unit.

4 gills (g.)	= 1 pint (pt.) (= 28.875 cubic inches)
2 pints	= 1 quart (qt.) = 57.75 cubic inches
4 quarts	= 1 gallon (gal.) (= 231 cubic inches) = 8 pints = 32 gills

APOTHECARIES' FLUID MEASURE

60 minims (min.)	= 1 fluid dram (fl. dr.) (= 0.225 6 cubic inch)
8 fluid drams	= 1 fluid ounce (fl. oz.) (= 1.804 7 cubic inches)
16 fluid ounces	= 1 pint (pt.) (= 28.875 cubic inches) = 128 fluid drams
2 pints	= 1 quart (qt.) (= 57.75 cubic inches) = 32 fluid ounces = 256 fluid drams
4 quarts	= 1 gallon (gal.) (= 231 cubic inches) = 128 fluid ounces = 1,024 fluid drams

DRY MEASURE

When necessary to distinguish the dry pint or quart from the liquid pint or quart, the word "dry" should be used in combination with the name or abbreviation of the dry unit.

2 pints (pt.)	= 1 quart (qt.) (= 67.200 6 cubic inches)
8 quarts	= 1 peck (pk.) (= 537.605 cubic inches) = 16 pints
4 pecks	= 1 bushel (bu.) (= 2,150.42 cubic inches) = 32 quarts

AVOIRDUPOIS WEIGHT

When necessary to distinguish the avoirdupois dram from the apothecaries' dram, or to distinguish the avoirdupois dram or ounce from the fluid dram or ounce, or to distinguish the avoirdupois ounce or pound from the troy or apothecaries' ounce or pound, the word "avoirdupois" or the abbreviation "avdp" should be used in combination with the name or abbreviation of the avoirdupois unit.

(The "grain" is the same in avoirdupois, troy, and apothecaries' weight.)

27 11/32 grains	= 1 dram (dr.)
16 drams	= 1 ounce (oz.) = 437 ½ grains
16 ounces	= 1 pound (lb.) = 256 drams = 7,000 grains
100 pounds	= 1 hundredweight (ewt.)*
20 hundredweights	= 1 ton (tn.) = 2,000 pounds*

In "gross" or "long" measure, the following values are recognized:

112 pounds	= 1 gross or long hundredweight*
20 gross or long hundredweights	= 1 gross or long ton = 2,240 pounds*

*When the terms "hundredweight" and "ton" are used unmodified, they are commonly understood to mean the 100-pound hundredweight and the 2,000-pound ton, respectively; these units may be designated "net" or "short" when necessary to distinguish them from the corresponding units in gross or long measure.

TROY WEIGHT

(The "grain" is the same in avoirdupois, troy and apothecaries' weight.)

24 grains	= 1 pennyweight (dwt.)
20 pennyweights	= 1 ounce troy (oz. t.) = 480 grains
12 ounces troy	= 1 pound troy (lb. t.) = 240 pennyweights = 5,760 grains

APOTHECARIES' WEIGHT

(The "grain" is the same in avoirdupois, troy and apothecaries' weight.)

20 grains	= 1 scruple (s. ap.)
3 scruples	= 1 dram apothecaries (dr. ap.) = 60 grains
8 drams apothecaries	= 1 ounce apothecaries (oz. ap.) = 24 scruples = 480 grains
12 ounces apothecaries	= 1 pound apothecaries (lb. ap.) = 96 drams apothecaries = 288 scruples = 5,760 grains

Tables of Metric Weights and Measures**LINEAR MEASURE**

10 millimeters (mm)	= 1 centimeter (cm.)
10 centimeters	= 1 decimeter (dm.) = 100 millimeters
10 decimeters	= 1 meter (m.) = 1,000 millimeters
10 meters	= 1 dekameter (dkm.)
10 dekameters	= 1 hectometer (hm.) = 100 meters
10 hectometers	= 1 kilometer (km.) = 1,000 meters

AREA MEASURE

100 square millimeters (mm ²)	= 1 square centimeter (cm ²)
10,000 square centimeters	= 1 square meter (m ²) = 1,000,000 square millimeters
100 square meters	= 1 are (a)
100 ares	= 1 hectare (ha.) = 10,000 square meters
100 hectares	= 1 square kilometer (km ²) = 1,000,000 square meters

VOLUME MEASURE

10 milliliters (ml.)	= 1 centiliter (cl.)
10 centiliters	= 1 deciliter (dl.) = 100 milliliters
10 deciliters	= 1 liter* (l.) = 1,000 milliliters
10 liters	= 1 dekaliter (dkl.)
10 dekaliters	= 1 hectoliter (hl.) = 100 liters
10 hectoliters	= 1 kiloliter (kl.) = 1,000 liters

*The liter is defined as the volume occupied, under standard conditions, by a quantity of pure water having a mass of 1 kilogram. This volume is very nearly equal to 1,000 cubic centimeters or 1

cubic decimeter; the actual metric equivalent is, 1 liter = 1.000 028 cubic decimeters. (The change in this equivalent from the previously published value of 1.000 027 is based on a recomputation of earlier data, carried out at the International Bureau of Weights and Measures.) Thus the milliliter and the liter are larger than the cubic centimeter and the cubic decimeter, respectively, by 28 parts in 1,000,000; except for determinations of high precision, this difference is so small as to be of no consequence.

CUBIC MEASURE

1,000 cubic millimeters (mm ³)	= 1 cubic centimeter (cm ³)
1,000 cubic centimeters	= 1 cubic decimeter (dm ³) = 1,000,000 cubic millimeters
1,000 cubic decimeters	= 1 cubic meter (m ³) = 1 stere = 1,000,000 cubic centimeters = 1,000,000,000 cubic millimeters

WEIGHT

10 milligrams (mg.)	= 1 centigram (cg.)
10 centigrams	= 1 decigram (dg.) = 100 milligrams
10 decigrams	= 1 gram (g.) = 1,000 milligrams
10 grams	= 1 dekagram (dkg.)
10 dekagrams	= 1 hectogram (hg.) = 100 grams
10 hectograms	= 1 kilogram (kg.) = 1,000 grams
1,000 kilograms	= 1 metric ton (t.)

In the metric system of weights and measures, designations of multiples and subdivisions of any unit may be arrived at by combining with the name of the unit the prefixes deka, hecto, and kilo, meaning, respectively, 10, 100, and 1,000, and deci, centi and milli, meaning, respectively one-tenth, one-hundredth and one-thousandth. In some of the foregoing metric tables some such multiples and subdivisions have not been included for the reason that these have little, if any, currency in actual usage.

In certain cases, particularly in scientific usage, it becomes convenient to provide for multiples larger than 1,000 and for subdivisions smaller than one-thousandth. Accordingly, the following prefixes have been introduced and these are now generally recognized.

myria, meaning 10,000 mega, meaning 1,000,000 micro, meaning one-millionth
A special case is found in the term "micron" (abbreviated as μ [the Greek letter mu]), a coined word meaning one-millionth of a meter (equivalent to one-thousandth of a millimeter); a milli-micron (abbreviated as $m\mu$) is one-thousandth of a micron (equivalent to one-millionth of a millimeter), and a micromicron (abbreviated as $\mu\mu$) is one-millionth of a micron (equivalent to one-thousandth of a millimicron or to 0.000,000,001 millimeter).

Tables of Interrelation of Units of Measurement

Tables of Equivalents

NOTES—When the name of a unit is enclosed in brackets (thus, [1 hand] —), this indicates (1) that the unit is not in general current use in the United States, or (2) that the unit is believed to be based on "custom and usage" rather than on formal authoritative definition.

Equivalents involving decimals are, in most instances, rounded off to the third decimal place except where they are exact, in which cases these exact equivalents are so designated.

LENGTHS

1 Angstrom (A.)	{ 0.1 millimicron (exactly) 0.000 1 micron (exactly) 0.000 000 1 millimeter (exactly) 0.000 000 004 inch	1 micron (μ [the Greek letter mu])	{ 0.001 millimeter (exactly) 0.000 039 37 inch (exactly)

AREAS OR SURFACES

1 acre	{ 43,560 square feet 4,840 square yards 0.405 hectare
1 arc (a.)	{ 119,596 square yards 0.025 acre
1 hectare (ha.)	2.471 acres
1 square (building)	100 square feet
1 square centimeter (cm ²)	0.155 square inch
1 square declimeter (dm ²)	15.500 square inch
1 square foot (sq. ft.)	929.034 square centimeters

1 square inch (sq. in.)	6.452 square centimeters
1 square kilometer (km ²)	247,104 acres
1 square mile (sq. mi.)	0.386 square mile
1 square meter (m ²)	1.196 square yards
1 square mile (sq. mi.)	10,764 square feet
1 square millimeter (mm ²)	259.000 hectares
1 square rod (sq. rd.), sq. pole, or sq. perch	0.002 square inch
1 square yard (sq. yd.)	25.293 square meters
	0.836 square meter

CAPACITIES OR VOLUMES

1 barrel (bbl.), liquid	31 to 42 gallons*
-------------------------	-------------------

*There are a variety of "barrels", established by law or usage. For example, Federal taxes on fermented liquors are based on a barrel of 31 gallons; many State laws fix the "barrel for liquids" as 31½ gallons; one State fixes a 36-gallon barrel for cistern measurement; Federal law recognizes a 40-gallon barrel for "proof spirits"; by custom, 42 gallons comprise a barrel of crude oil or petroleum products for statistical purposes, and this equivalent is recognized "for liquids" by four States.

1 barrel (bbl.), standard, for fruits, vegetables, and other dry commodities except cranberries	7,056 cubic inches 105 dry quarts 3,281 bushels, struck measure
1 barrel (bbl.), standard, cranberry	8,826 cubic inches 86 45/64 dry quarts 2,709 bushels, struck measure
1 bushel (bu.) (U. S.) (struck measure)	2,150.42 cubic inches (exactly) 35.238 liters
1 bushel, heaped (U. S.)	2,747.715 cubic inches 1.278 bushels, struck measure*

*Frequently recognized as 1¼ bushels, struck measure.

1 bushel (bu.) (British Imperial) (struck measure)	1.032 U. S. bushels, struck measure 2,219.360 cubic inches
1 cord (cd.) (firewood)	128 cubic feet
1 cubic centimeter (cm ³)	0.061 cubic inch
1 cubic decimeter (dm ³)	61.023 cubic inches
1 cubic foot (cu. ft.)	7.481 gallons 28.317 cubic decimeters
1 cubic inch (cu. in.)	0.554 fluid ounce 4.433 fluid drams 16.387 cubic centimeters
1 cubic meter (m ³)	1.308 cubic yards
1 cubic yard (cu. yd.)	0.765 cubic meter
1 cup, measuring	8 fluid ounces 1½ liquid pint
1 dram, fluid (or liquid) (fl. dr.) (U. S.)	1 fluid ounce 0.226 cubic inch 3.697 milliliters
1 dram, fluid (fl. dr.) (British)	0.961 U. S. fluid dram 0.217 cubic inch 3.552 milliliters
1 dekaliter (dkl.)	2.642 gallons 1.135 pecks 231 cubic inches 3.785 liters
1 gallon (gal.) (U. S.)	0.833 British gallon 128 U. S. fluid ounces
1 gallon (gal.) (British Imperial)	277.42 cubic inches 1.201 U. S. gallons 4.546 liters 160 British fluid ounces 7.219 cubic inches 4 fluid ounces 0.118 liter
1 gill (gi.)	26.418 gallons 2.838 bushels
1 hectoliter (hl.)	1.057 liquid quarts 0.908 dry quart 61.025 cubic inches 0.271 fluid dram 16.231 minims 0.061 cubic inch
1 liter	1.805 cubic inches 29.573 milliliters 1.041 British fluid ounces 0.961 U. S. fluid ounce
1 milliliter (ml.)	1.734 cubic inches 28.412 milliliters
1 ounce, fluid (or liquid) (fl. oz.) (U. S.)	8.810 liters 33.600 cubic inches 0.551 liter
1 ounce, fluid (fl. oz.) (British)	
1 peck (pk.)	
1 pint (pt.), dry	

pint (pt.), liquid	28.875 cubic inches (exactly) 0.473 liter 67.201 cubic inches 1.401 liters 0.969 British quart
1 quart (qt.), dry (U. S.)	57.75 cubic inches (exactly) 0.946 liter 0.833 British quart
1 quart (qt.), liquid (U. S.)	69.354 cubic inches 1.032 U. S. dry quarts 1.201 U. S. liquid quarts
1 quart (qt.) (British)	3 teaspoons* 60 grains 1½ fluid ounce ¼ tablespoon*
1 tablespoon	1½ fluid drams*
1 teaspoon	

*The equivalent "1 teaspoon = 1½ fluid drams" has been found by the Bureau to correspond more closely with the actual capacities of "measuring" and silver teaspoons than the equivalent "1 teaspoon = 1 fluid dram" which is given by a number of dictionaries.

WEIGHTS OR MASSES

1 assay ton** (AT)	29.167 grams
--------------------	--------------

**Used in assaying. The assay ton bears the same relation to the milligram that a ton of 2000 pounds avoirdupois bears to the ounce troy; hence the weight in milligrams of precious metal obtained from one assay ton of ore gives directly the number of troy ounces to the net ton.

1 carat (c.)	200 milligrams 3.086 grains 60 grains
1 dram, apothecaries' (dr. ap.)	3.888 grams
1 dram, avoirdupois (dr. avdp.)	27 11/32 (= 27.344) grains 1.772 grams
gamma, see microgram	
1 grain	64.799 milligrams 15.432 grains
1 gram (g.)	0.035 ounce, avoirdupois 112 pounds
1 hundredweight, gross or long*** (gross cwt.)	50.802 kilograms

***The gross or long ton and hundredweight are used commercially in the United States to only a limited extent, usually in restricted industrial fields. These units are the same as the British "ton" and "hundredweight".

1 hundredweight, net or short (cwt. or net cwt.)	100 pounds 45.359 kilograms
1 kilogram (kg.)	2.205 pounds
1 microgram (the Greek letter gamma)	0.000,001 gram (exactly)
1 milligram (mg.)	0.015 grain 437.5 grains (exactly)
1 ounce, avoirdupois (oz. avdp.)	0.911 troy or apothecaries' ounce 28.350 grams
1 ounce, troy or apothecaries' (oz. t. or oz. ap.)	480 grains 1.097 avoirdupois ounces 31.103 grams
1 pennyweight (dwt.)	7.000 grains 1.215 troy or apothecaries' pounds 453.592 grams
1 pound, avoirdupois (lb. avdp.)	5,760 grains 0.823 avoirdupois pound 373.242 grams
1 pound, troy or apothecaries' (lb. t. or lb. ap.)	5,760 grains 0.823 avoirdupois pound 373.242 grams
1 scruple (s. ap.)	20 grains 1.296 grams
1 ton, gross or long* (gross tn.)	2,240 pounds 1.12 net tons (exactly) 1.016 metric tons

*The gross or long ton and hundredweight are used commercially in the United States to only a limited extent, usually in restricted industrial fields. These units are the same as the British "ton" and "hundredweight".

1 ton, metric (t.)	2,204.622 pounds 0.984 gross ton 1.102 net tons
1 ton, net or short (tn. or net tn.)	2,000 pounds 0.893 gross ton 0.907 metric ton

Multiplication and Division Table

A number in the top line (19) multiplied by a number in the last column on the left (18) produces the number where the top line and the side line meet (342), and so on throughout the table.

A number in the table (342) divided by the number at the top of that column (19) results in the number (18) at the extreme left; also, a number in the table (342) divided by the number (18) at the extreme left gives the number (19) at the top of the column, and so on throughout the table.

Areas of Circles

To find the circumference of a circle multiply the diameter by 3.14159265 (commonly expressed as 3.1416). To find the area of a circle multiply the square of the diameter by .785398 (usually expressed as .7854). To find the cubic contents of a cylinder or pipe, multiply the area by the height or depth. Thus, a pipe 1 foot in diameter and 1 foot in length contains .7854 cubic feet. To find how many gallons are contained in a pipe or cylinder, divide the cubic contents by 231, which is the number of cubic inches in a United States gallon.

A square is equal in area to a circle when the side of the square equals 0.88623 multiplied by the diameter of the circle; or when the diameter of the circle equals 1.12838 multiplied by the side of the square.

Any straight line extending from the center of a circle to the circumference is called a radius.

CIRCLE AREAS IN EIGHTHS OF A UNIT

Factors and Prime Numbers

Factors are such numbers as multiplied together will produce a required number.

A Prime Number is one that cannot be resolved into two or more factors; or, it is a number exactly divisible only by itself and unity. A Composite Number is one that can be resolved into factors.

TABLE OF PRIME NUMBERS FROM 1 TO 1000

The metric carat of 200 milligrams is now very generally in use. The word also is used to denote the proportion of alloy in a metal. Thus, pure gold is 24 carats fine.

Electrical Units

Source: National Bureau of Standards

The watt is the unit expressing electrical power as horsepower (hp) represents power in mechanics. It is equal to the product of the volts (pressure) times amperes—(rate of flow). Thus, 2 volts times 2 amperes would give in a direct current circuit 4 watts. Electrical energy is sold at so much per watt hour or more generally at a given amount per kilowatt hour—which means 1,000 watt hours. This may represent 1 watt for 1,000 hours or 1,000 watts for 1 hour. 746 watts are equal to one horse-

power or inversely 1 kilowatt (kw) is equal to about 1 1/3 horsepower.

The horsepower represents the power required to lift a weight of 33,000 pounds 1 foot in 1 minute or 550 pounds 1 foot in 1 second.

The ohm is the unit of electrical resistance and represents the physical property of a conductor which offers a resistance to the flow of electricity, permitting just 1 ampere to flow at 1 volt of pressure.

*Highest and lowest points in the United States are only 85 miles apart.

Limits of the Continental United States

Source: U. S. Department of the Interior,

The easternmost land is West Quoddy Head, near Eastport, Maine, in latitude 46°57', latitude 44°49'. Cape Alava, Washington, extends into the Pacific Ocean to longitude 124°44', at latitude 48°10'. The Lake of the Woods projection extends to latitude 49°23'04.5" at longitude 95°09'16". Cape Sable, Florida, is in latitude 25°07' longitude 81°05'. The extreme south point of Texas is in latitude 25°50', longitude 97°24'. From West Quoddy Head west along the parallel to the Pacific Ocean the distance is 2,807 miles.

Geological Survey, Map Information Office

From the south point of Texas due north to the forty-ninth parallel the distance is 1,598 miles. These distances are computed to mean sea level.

The length of the northern boundary, excluding Alaska, is 3,987 miles. The length of the Mexican boundary from the Gulf of Mexico to the Pacific Ocean is approximately 2,013 miles.

The geographic center of the United States is in Smith County, Kansas, latitude 39°50', longitude 98°35'.

Tallest Mountain, Base to Peak, Higher Than Everest

Every schoolboy knows that Mt. Everest is the tallest mountain on the globe, 29,023 ft. above sea level. But Mauna Kea, Hawaii, is 30,784 ft. from base to peak. It doesn't rival Everest because man can see only 13,784 ft. above sea level, an estimated 17,000 ft. being under the sea. It is of volcanic origin. Other Hawaiian mountains: Mauna Loa, 13,680 ft.; Haleakala, 10,025 ft.; Kilauea, 4,090 ft.

INDIA ACCEPTS NEW FIGURE AS HEIGHT OF MOUNT EVEREST

Surveyor General I. H. R. Wilson of the Republic of India has reported that the government of India has accepted 29,028 ft. as the official height of Mt. Everest. Snow fluctuations may affect the height 10 ft. either way. The new figure is only 26 ft. higher than the old figure of 29,002 ft., which has been accepted since 1850. The original figure was reached by trigonometrical computations from 6 stations 110 mi. south of the mountain and under 300 ft. above sea level. The new figures were arrived at in 1952-54.

Southernmost mainland town	Florida City, Florida	25° 27' N.
Easternmost town	Lubec, Maine	66° 59' W.
Westernmost point	Cape Alava, Washington	124° 44' W.
Highest point on Atlantic coast	Cadillac Mountain, Mount Desert Island, Maine	1,530 feet
Highest waterfall	Yosemite Falls—Total in three sections	2,425 feet
	Upper Yosemite Fall	1,430 feet
	Cascades in middle section	675 feet
	Lower Yosemite Fall	320 feet
Longest river	Mississippi-Missouri	3,892 miles
Highest mountain	Mt. Whitney, California	14,495 ft.
Lowest point	Death Valley, California	—282 ft.
Deepest lake	Crater Lake, Oregon	1,996 ft. deep
Highest lake	Tulalayo Lake, California	12,865 ft. high

Size and Dimensions of the Earth

Source: U. S. Navy Hydrographic Office, Washington, D. C.

Size of the Earth—The Earth is considered as a spheroid, or ellipsoid. Equatorial circumference: 24,902.39 mi. Meridional circumference: 24,860.49 mi. Area: 196,950,284 sq. mi. Length of 1° longitude at equator, 69.17 mi. Length of 1° latitude at equator, 68.71 mi.; at pole, 69.41 mi. Mass of ellipsoid (mean density is 5.52): 6,594,000,000,000,000,000 short tons, which reads: six sextillion, 594 quintillion.

Areas and Dimensions of Continents—Africa, 11,500,000 sq. mi. North America, 8,300,000 sq. mi., including islands. South America, 6,800,000 sq. mi.

Asia, 17,000,000 sq. mi., including islands. Europe, 3,750,000 sq. mi. Oceania, 4,000,000 sq. mi. Antarctica, 6,000,000 sq. mi.

Asia is 6,000 mi. E. to W., 5,300 mi. N. to S. Africa is 5,000 mi. N. to S., 4,600 mi. E. to W. Europe is 2,400 mi. N. to S., 3,300 mi. E. to W. South America is 4,600 mi. N. to S., 3,200 mi. E. to W. North America is 4,900 mi. N. to S., 4,000 mi. E. to W. Australia is 1,970 mi. N. to S., 2,400 mi. E. to W. (figures are approximations). Fertile regions occupy 33,000,000 sq. mi., steppes 19,000,000 sq. mi., deserts, 5,000,000 sq. mi.

At 12,506 feet above sea level, Lake Titicaca in South America is more than 1,250 feet higher than the crest of Mt. Hood, Oregon, says the National Geographic Society. Astride the Peru-Bolivia border, it sprawls out a maximum 130 miles and reaches a width of 35 miles and a depth of 1,000 feet. It is half as large as Lake Ontario.

NOTED PERSONALITIES

English Rulers

Name		Began	Died	Age	Rgd
SAXONS AND DANES					
Egbert	Son of Ealhmund, of Kent, King of Wessex	827	839	12	
Ethelwulf	Son of Egbert, defeated Danes, by sea and land	839	858	19	
Ethelbald	Second son of Ethelwulf	858	860	2	
Ethelbert	Third son of Ethelwulf	858	866	8	
Ethelred	Fourth son of Ethelwulf, killed by Danes in battle	866	871	5	
Alfred	The Great, fifth son of Ethelwulf, defeated the Danes	871	901	52	30
Edward	The Elder, son of Alfred the Great, fought the Danes	901	925	55	24
Aethelstan	Elderest son of Edward the Great	925	940	25	15
Edmund	Brother of Aethelstan, murdered	940	946	25	6
Edred	Brother of Edmund	946	955	32	9
Edwy	Eldest son of Edmund	955	958	18	3
Edgar	Second son of Edmund, suppressed piracy	958	975	32	17
Edward	The Martyr, son of Edgar, murdered	975	979	17	4
Ethelred II	The Unready, half-brother of Edward, massacred Danes	979	1016	48	37
Edmund	Ironside, eldest son of Ethelred, fought Canute	1016	1016	27	1
Canute	The Dane, by conquest and election, divided country with Edmund	1017	1035	40	18
Harold I	Harefoot, son of Canute, first ruled north of the Thames	1035	1040	5	
Hardicanute	Son of Canute, had been Danish King, mother a Norman	1040	1042	24	2
Edward	The Confessor, son of Ethelred II, canonized	1042	1066	62	24
Harold II	Brother-in-law of Edward the Confessor, slain in battle	1066	1066	44	0
HOUSE OF NORMANDY					
William I	The Conqueror, defeated Harold at Hastings	1066	1087	60	21
William II	Third son of William I, surnamed Rufus, killed by arrow	1087	1109	43	13
Henry I	Youngest son of William I, surnamed Beauclore	1109	1135	67	35
HOUSE OF BLOIS					
Stephen	Third son of Stephen, Count of Blois, by Adela, fourth daughter of William I	1135	1154	50	19
HOUSE OF PLANTAGENET					
Henry II	Son of Geoffrey Plantagenet, by Matilda, only daughter of Henry I	1154	1189	56	35
Richard I	Eldest surviving son of Henry II, surnamed Coeur de Lion	1189	1199	42	10
John	Sixth and youngest son of Henry II, surnamed Lackland	1199	1216	50	17
Henry III	Eldest son of John, first King buried at Westminster	1216	1272	65	56
Edward I	Eldest son of Henry III, surnamed Longshanks	1272	1307	68	35
Edward II	Eldest surviving son of Edward I; deposed by Parliament, Jan. 7, 1327	1307	1327	43	20
Edward III	Eldest son of Edward II of Carnarvon	1327	1377	65	50
Richard II	Son of Black Prince and grandson of Edward III, deposed	1377	1399	34	22
HOUSE OF LANCASTER					
Henry IV	Son of John of Gaunt, 4th son of Edward III	1399	1413	47	13
Henry V	Eldest son of Henry IV, hero of Agincourt	1413	1422	34	9
Henry VI	Only son of Henry V, deposed 1461, died in Tower of London	1422	1471	49	39
Edward IV	His grandfather was Richard, son of Edmund, 5th son of Edward III, and his grandmother, Ann, was great-granddaughter of Lionel, third son of Edward III; Edward IV was 6 ft. 3 in. tall	1461	1483	41	22
Edward V	Eldest son of Edward IV, murdered in the Tower of London	1483	1483	13	0
Richard III	Crookback, brother of Edward IV, fell at Bosworth Field	1483	1485	35	2
HOUSE OF TUDOR					
Henry VII	Son of Edmund, eldest son of Owen Tudor, by Katherine, widow of Henry V; his mother, Margaret Beaufort was great-granddaughter of John of Gaunt	1485	1509	53	24
Henry VIII	Only surviving son of Henry VII; 2 of his 6 queens were beheaded	1509	1547	56	38
Edward VI	Son of Henry VIII, by Jane Seymour, his 3rd queen. Ruled under regents. Was forced to name Lady Jane Grey his successor. Council of State proclaimed her queen July 10, 1553. Mary Tudor won Council, was proclaimed queen July 19, 1553. Mary had Jane beheaded for treason, Feb., 1554.	1547	1553	16	6
Mary I	Daughter of Henry VIII, by Catharine of Aragon	1553	1558	43	5
Elizabeth	Daughter of Henry VIII, by Anne Boleyn, who was beheaded	1558	1603	70	44
HOUSE OF STUART					
James I	James VI of Scotland, son of Mary, Queen of Scots, who was a great granddaughter of Henry VII	1603	1625	59	22
Charles I	Only surviving son of James I; beheaded at London	1625	1649	48	24
COMMONWEALTH, 1649-1660					
Oliver Cromwell	Lord Protector	1653	1658	59	..
Richard Cromwell	Lord Protector, resigned May 25, 1659	1658	1712	86	..
HOUSE OF STUART (RESTORED)					
Charles II	Eldest son of Charles I, died without issue	1660	1685	55	25
James II	Second son of Charles I (Deposed 1688. Interregnum Dec. 11, 1688, to Feb. 13, 1689)	1685	1701	68	3
William III and Mary II	Son of William, Prince of Orange, by Mary, daughter of Charles I	1689	1702	51	13
Anne	Eldest daughter of James II and wife of William III	1689	1694	33	6
	Second daughter of James. Her children died before her	1702	1714	49	12
HOUSE OF HANOVER					
George I	Son of Elector of Hanover, by Sophia, daughter of Elizabeth, daughter of James I	1714	1727	67	13
George II	Only son of George I, married Caroline of Brandenburg	1727	1760	77	33
George III	Grandson of George II, married Charlotte of Mecklenburg	1760	1820	81	59
	His son, George IV, was Prince Regent, from Feb., 1811, owing to the mental condition of George III.				
George IV	Eldest son of George III, married Caroline of Brunswick	1820	1830	67	70
William IV	Third son of George III, married Adelaide of Saxe-Meiningen	1830	1837	71	7
Victoria	Daughter of Edward, Duke of Kent, fourth son of George III	1837	1901	81	63
HOUSE OF SAXE-COBURG					
Edward VII	Eldest son of Victoria, married Alexandra, Princess of Denmark	1901	1910	68	9
HOUSE OF WINDSOR					
	Name of Royal Family changed to Windsor July 17, 1917				
George V	Second son of Edward VII, married Princess Mary of Teck	1910	1936	70	25
Edward VIII	Eldest son of George V, proclaimed, never crowned; acceded, Jan. 20, 1936; abdicated Dec. 11, 1936; created Duke of Windsor; married Mrs. Wallis Warfield, of Baltimore, Md., June 3, 1937; was appointed Governor of the Bahamas, July 9, 1940; resigned March 15, 1945	1936	1
George VI	Second son of George V, born Dec. 14, 1895; married April 26, 1923, Lady Elizabeth Bowes-Lyon; acceded Dec. 17, 1936; crowned May 12, 1937; died Feb. 6, 1952	1936	1952	56	15 1/2
Elizabeth II	Eldest daughter of George VI, born Apr. 21, 1926; married Nov. 20, 1947, to Philip Mountbatten (former Prince of Greece; Duke of Edinburgh and Prince Philip); acceded Feb. 8, 1952, crowned June 2, 1953	1952

Rulers of Scotland

The Romans gave the name of Caledonia to present-day Scotland and called the people Caledonians. The latter were the forerunners of the Picts. Britons, including Welsh, settled there as refugees from the Normans. Norsemen, Teutonic tribes from Scandinavia, seized islands, raided the mainland and made settlements. The Scots, a Celtic race that spoke Gaelic, came from Ireland, then called Scotia.

Kenneth I (S. C. MacAlpin) was the first Scot to rule both Scots and Picts, 843 A. D.

Duncan I was the first general ruler, 1034. Macbeth seized the kingdom 1040, was slain by Duncan's son, Malcolm Canmore (Malcolm III), 1058.

Malcolm married Margaret, English princess who had fled from the Normans. Queen Margaret introduced English language and English monastic customs. She was canonized. Her son Edgar, 1097, moved the court to Edinburgh. His brothers Alexander I and David I succeeded. Malcolm IV, grandson of David I, 1153, was followed by his brother, William the Lion, 1165, whose son was Alexander II, 1214. The latter's son, Alexander III, defeated the Norse and regained the Hebrides. When he died, 1286, his granddaughter, Margaret, child of Eric of Norway and grandniece of Edward I of England, known as the Maid of Norway, was chosen ruler, but died on the way to Scotland.

Rulers of France

Julius Caesar subdued the Gauls, native tribes of Gaul (France) 57 to 52 B.C. The Romans ruled 500 years. The Franks, a Teutonic tribe, reached the Somme from the East C. 250 A. D. By the 5th century the Merovingian Franks ousted the Romans. In 451 A. D., with the help of Visigoths, Burgundians and others, they defeated Attila and the Huns at Chalons-sur-Marne.

Childeric I became leader of the Merovingians 458 A. D. His son Clovis I (Chlodwig, Ludwig, Louis), crowned 481, founded the dynasty. After defeating the Alemanni (Germans) 496, he was baptized a Christian and made Paris his capital. His line ruled until Charlemer III was deposed, 742.

The West Merovingians were called Neustrians, the eastern Austrasians. Pepin of Herstal (687-714) major domus, or head of the palace, of

1290. Successors:

John Balliol, 1292-1296.

[Interregnum, 10 years]

Robert Bruce (The Bruce), 1306-1329, victor at Bannockburn, 1314.

Robert II, 1316-1390, grandson of Robert Bruce, son of Walter, the Steward of Scotland, was called The Steward, first of the so-called Stuart line.

Robert III, son of Robert II, 1390-1406.

James I, son of Robert III, 1406-1437.

James II, son of James I, 1437-1460.

James III, 1460-1488, eldest son of James II.

James IV, 1488-1513, eldest son of James III.

James V, 1513-1542, eldest son of James IV.

Mary, 1542-1587, daughter of James V, known as Mary of Scots, or Maria Stuart, married (1) Francis, Dauphin of France; (2) Henry, Lord Darnley; (3) James, Earl of Bothwell. Imprisoned by Elizabeth I of England and beheaded.

James VI, 1567-1625, son of Mary and Lord Darnley, became King of England on death of Elizabeth in 1603. Although the thrones were thus united, the legislative union of Scotland and England was not effected until the act of Union, May 1, 1707, when the two kingdoms were called Great Britain, the Scots were given representation in parliament and the Presbyterian Church was recognized as the Church of Scotland.

Austrasia, took over Neustria as dux (leader) of the Franks. Pepin's son, Charles, called Martel (the Hammer) defeated the Saracens at Tours-Poitiers, 732; was succeeded by his son, Pepin the Short, 741, who deposed Childeric III and ruled as king until 768.

His son, Charlemagne, or Charles the Great, (742-814), became king of the Franks, 768, with his brother Carloman, who died 771. He ruled France, Germany, parts of Italy, Spain, Austria, enforced Christianity. Was crowned Holy Roman Emperor by Pope Leo III in St. Peter's, Rome, Dec. 25, 800 A. D. Succeeded by son, Louis I, the Pious, 814. At death, 840, Louis left empire to sons, Lothar (Roman emperor); Pepin I (king of Aquitaine); Louis II (of Germany); Charles the Bald (France). They quarreled and by the peace of Verdun, 843, divided the empire.

A.D.	Name and year of Accession
------	----------------------------

The Carolingians	
840	Charles I, the Bald, Roman Emperor, 875
877	Louis II, the Stammerer, son
879	Louis III (died 882) and Carloman (bro.)

1610	Louis XIII, (the Just), son
1643	Louis XIV, (Le Roi Soleil, the Sun King)
1715	Louis XV, great grandson
1774	Louis XVI, grandson: married Marie Antoinette: both beheaded by Revolution, 1793.

A.D.	Name and year of Accession
------	----------------------------

	Their son, called Louis XVII, said to have died in prison, never ruled
--	--

First Republic	
1792	National Convention
1795	Directory, under Barras and others
1799	Consulate, Napoleon Bonaparte, First Consul
	In 1802 elected Consul for life

First Empire	
1804	Napoleon I, Emperor. Josephine (de Beauharnais) Empress, 1804-09; Marie Louise, Empress, 1809-1814. Her son, Francois, (1811-1832) titular King of Rome, later Duke de Reichstadt and "Napoleon II", never ruled. Napoleon abdicated 1814, returned for 100 days, 1815, then was exiled to St. Helena Island. Died there May 5, 1821.

Bourbons Restored	
1814	Louis XVIII King: brother of Louis XVI
1824	Charles X, brother: deposed

House of Orleans	
1830	Louis Philippe (Egalite), King

Second Republic	
1848	Louis Napoleon, President, nephew of Napoleon I.

Second Empire	
1852	Napoleon III, Emperor. Eugenie (de Montijo) Empress. Deposed 1870. Son, Prince Imperial, (1856-79) died in Zulu War. Eugenie died 1920.

Third Republic—Presidents	
1871	Thiers, Louis Adolphe (1797-1877), historian
1873	MacMahon, Marshal Patrice M. (1808-1893)
1879	Grevy, Paul J. (1807-1891), resigned
1887	Sadi-Carnot, M. (1837-1894), assassinated
1894	Casimir-Perier, Jean P. P. (1847-1907), resigned
1895	Faure, Francois Felix (1841-1899)
1899	Loubet, Emile (1838-1929)
1906	Fallieres, Armand (1841-1931)
1913	Poincaré, Raymond (1860-1934)
1920	Deschanel, Paul (1856-1922) resigned
1920	Millerand, Alexandre (1859-1943) resigned
1924	Doumergue, Gaston (1863-1937)
1931	Doumer, Paul (1874-1932) assassinated
1932	Lebrun, Albert (1871-1950) resigned

Fourth Republic—Presidents	
	Elected for 7-year term jointly by National Assembly and Council of the Republic
1947	Auriol, Vincent (1884-)
1954	Coty, Rene (1883-)

Rulers of Middle Europe: German and Austrian Dynasties

Continental ruling houses emerged from rivalries among nobles who regarded peoples as private possessions, to be traded in marriages and protective alliances. Thus authority often crossed national boundaries. Dominion over Austria, Bohemia, Germany, Hungary, Poland, etc., shifted many times amid devastating wars. This table reflects the rise of German, Austrian and Prussian rulers, from Charlemagne to Hitler.

Carolingian Dynasty

Charles the Great, or Charlemagne, ruled what is now France, Italy and Middle Europe; established Ostmark (later Austria); crowned Roman emperor by pope in Rome, 800 A. D. Died, 814.

Louis I, Ludwig, the Pious, son; crowned by Charlemagne 813, d. 840.

Louis the German, son, succeeded to East Francia (Germany) 843-876.

Charles the Fat, son, inherited East Francia and West Francia (France) 876, reunited empire, crowned emperor by pope, 881; deposed, 887.

Arnulf, nephew, 887-900. Partition of empire.

Louis the Child, 900-911, last direct descendant of Charlemagne.

Conrad I, duke of Franconia, first elected German king, founded House of Franconia.

Saxon Dynasty; First Reich

Henry I, the Fowler, duke of Saxony, 919-936.

Otto I, the Great, 936-973, son; crowned Holy Roman Emperor by pope, 962.

Otto II, 973-983, son; failed to oust Greeks and Arabs from Sicily.

Otto III, 982-1002, son. Minority regency by mother and grandmother. Crowned emperor at 16 by pope.

Henry II, duke of Bavaria, 1002-1024, great-grandson of Henry the Fowler.

House of Franconia (The Salic House)

Conrad II, 1024-1039, son-in-law of Otto I.

Henry III, 1039-1056, son; deposed 3 popes; annexed Bohemia; temporarily king of Hungary.

Henry IV, 1056-1084, son; regency by his mother, Agnes of Poitou. Banned by Pope Gregory VII, he did penance at Canossa.

Henry V, 1106-1125, son; last of Salic House.

Lothar, duke of Saxony, 1125-1137. Crowned emperor in Rome, 1134. Start of contest between Swabian house of Staufen and Bavarian house of Welf.

House of Hohenstaufen

Conrad III, duke of Suabia, 1138-1152. In 2nd Crusade.

Frederick III, duke of Suabia, 1138-1152. In 2nd Crusade.

Frederick I, Barbarossa (Red Beard) 1152-1190; lost Italy. In 3rd Crusade.

Henry VI, 1190-1196, took Lower Italy from Normans. Son became king of Sicily.

Philipp of Suabia, 1198-1208, son of Frederick I.

Otto, of House of Welf, 1198-1215; deposed.

Frederick II, 1215-1250, son of Henry VI; king of Sicily; crowned king of Jerusalem; in 5th Crusade.

Conrad IV, 1250-1254, son, lost Lower Italy to Charles of Anjou.

Conradin, son, King of Jerusalem and Sicily, never recognized as emperor, attempted to recover Italy 1268; failed, was beheaded. With him Hohenstaufen became extinct.

Interregnum, 1250-1273.

Rulers from Various Houses

Rudolph of Hapsburg, 1273-1291, defeated King Ottocar II of Bohemia and conquered Bohemia. Bequeathed duchy of Austria to eldest son, Albert.

Adolphus, count of Nassau, 1291-1298, killed in war with Albert of Austria.

Albert I, German king, 1298-1308.

Henry VII, of Luxemburg, 1308-1313, crowned emperor in Rome.

Louis (Ludwig) of Bavaria, 1314-1347. Also elected was Frederick the Handsome of Austria, 1314-1330, leading to war. Abolition of papal sanction for election of Holy Roman Emperor (began 800 A. D.).

Charles IV of Luxemburg, 1347-1378, grandson of Henry VII, ruler of Bohemia.

Wenceslaus, 1378-1400, deposed.

Rupert, Duke of Palatine, 1400-1410.

Sigismund, 1411-1437, also king of Hungary.

Hapsburg Dynasty

Albert II, of Austria, 1438-1439, son-in-law of Wenceslaus; inherited from him kingdoms of Hungary and Bohemia; began wars with Turks.

Frederick III, 1439-1493; cousin of Albert; wars with the Turks and with Charles of Burgundy.

Maximilian I, 1493-1519; son, married Mary of Burgundy. Assumed title of Roman Emperor, 1508.

Charles V, 1519-1556; King of Spain; grandson of Maximilian; Luther; Reformation and religious wars.

Ferdinand I, 1558-1564. Maximilian II, 1564-1576; son, Rudolf II, 1576-1612; son.

Mathias, 1612-1619; brother; 1618 beginning of the 30 years' war.

Ferdinand II of Steiermark, 1619-1637; elected emperor at Frankfurt; religious wars.

Ferdinand III, 1637-1657; Peace of Westphalia, 1648, Leopold I, 1658-1705; son, Joseph I, 1705-1711; son, Charles VI, 1711-1740; son of Leopold I.

Maria Theresa, 1740-1780; daughter of Charles VI, Queen of Hungary; 7 years' war with Frederick the Great, King of Prussia.

Charles VII of Bavaria, 1742-1745; pretender to the throne, crowned; defeated by Maria Theresa.

Francis I of Lorraine-Tuscany, 1745-1765; husband of Maria Theresa; raised by her to co-heir.

Joseph II, 1765-1790; son, first partition of Poland, Leopold II, 1790-1792.

Francis II, 1792-1806, known as Francis I, emperor of Austria, ruled Germany 1792-1835. In 1806 he abdicated as German emperor and gave up claims to Holy Roman Empire.

Ferdinand, son, 1835-1848. (Abdicated)

Rulers of Prussia

Nucleus of Prussia was the Mark of Brandenburg. First margrave was Albert the bear (Albrecht), 1134-1170. First Hohenzollern to become margrave was Frederick, burgrave of Nuremberg, 1415-1440.

Frederick William, 1640-1688, was called the Great Elector. His son, Frederick III, 1688-1713, was crowned Frederick I of Prussia, Jan. 18, 1701, ruled till 1713.

Frederick II, the Great, 1740-1786, annexed Silesia, part of Poland.

Frederick William II, nephew, 1786-1797.

Frederick William III, 1797-1840. Napoleonic wars. Queen Louise, (d. 1810).

Frederick William IV, 1840-1861. Uprising of 1848 and first parliament and constitution.

Second German Reich

William I, 1861-1888, brother. Annexation of Schleswig and Hanover; Franco-Prussian war, 1870-71; proclamation of German Reich, Jan. 18, 1871, at Versailles; William, German emperor (Deutscher Kaiser), 1871-1888.

Frederick III, 1888.

William II, son, 1888-1918. Led Germany in World War I, abdicated as German emperor and king of Prussia, Nov. 9, 1918. Died in exile in Netherlands June 4, 1941.

Minor rulers (Wuerttemberg, Saxony, etc.) also abdicated. Germany became a republic at Weimar, July 1, 1919. Frederick Ebert, president, 1919-1925.

Paul von Hindenburg-Beneckendorff, 1925, re-elected 1932, d. Aug. 2, 1934. Adolf Hitler, chancellor, chosen successor as Leader-Chancellor (Fuehrer & Reichskanzler) of Third Reich.

Annexed Austria, March, 1938. Precipitated World War II, 1939-1945. Reported suicide in bomb shelter under chancellery, Berlin, May 1, 1945.

For subsequent history see Foreign Countries: Germany.

Austro-Hungarian Monarchy

Francis Joseph II, nephew, 1848-1916, emperor of Austria, king of Hungary. Dual monarchy of Austria-Hungary formed, 1867. After assassination of heir, Archduke Francis Ferdinand, June 28, 1914, Austrian diplomacy precipitated World War I.

Charles I, grandson, 1916-1918, last emperor of Austria and king of Hungary. Abdicated Nov. 11-13, 1918. (d. 1922)

For subsequent history see Foreign Countries: Austria.

Rulers of Spain

Ferdinand II of Aragon married Isabella of Castile and Leon, 1479, uniting kingdoms; Navarre added 1512. Isabella died 1504. Ferdinand 1516, succeeded by grandson, Charles I (of Hapsburg), elected as Emperor Charles V.

Succession: 1556, Philip II; 1598, Philip III; 1621, Philip IV; 1665, Charles II; 1700, Philip V (first Bourbon, grandson of Louis XIV of France); 1746, Ferdinand VI; 1759, Charles III; 1788, Charles IV; 1808, Charles abdicated for son Ferdinand VII, both arrested by Napoleon. Ferdinand resigned; 1808, Joseph Bonaparte; 1814, Ferdinand VII, recalled; 1833, Queen

Christina regent for Isabella; 1843 Isabella II of age, fled 1867; 1870 Amadeus I, abdicated 1873.

1873, republic, Castelar, president; 1874, Alfonso XII, 1886. Queen Christina of Austria regent for Alfonso XIII, who ascended throne at age 1902.

1931, revolution, Alfonso left country but did not abdicate; republic abolished monarchy, presidents: 1931, Niceto Alcalá Zamora; 1936, Manuel Azana.

Fascist revolution, 1936, succeeded; Gen. Francisco Franco proclaimed Supreme Chief, 1939, with provision that he be succeeded by nephew, Alfonso XIII, died in Rome, Feb. 28, 1941, aged 54; his property and citizenship had been restored.

Roman Rulers

From Romulus to the end of the Empire in the West. Rulers of the Roman Empire in the East sat in Constantinople, and for a brief period in Nicaea, until the capture of Constantinople by the Turks in 1453, when it was succeeded by the Ottoman Empire.

Rulers of Modern Italy

After Napoleon fell in 1814 and Murat, King of Naples, was shot in 1815, the Congress of Vienna restored pre-Napoleonic political states as follows: Sardinia and Genoa under King Victor Emmanuel I of Savoy; Parma and Piacenza under Duchess Marie Louise, former French queen; Modena under Archduke Francis IV of Hapsburg; Tuscany, under Duke Ferdinand III of Hapsburg; Lucca under Duchess Maria Louisa of Bourbon; Naples and Sicily under King Ferdinand I of Bourbon; the Papal State under Pius VII; Lombardia-Venetia under Austria; Corsica under France. This reaction led to half a century of bloody conflict, revolts, suppressions by Austrian and French troops. Most spectacular were two campaigns led by Giuseppe Garibaldi, first in 1849, when he penetrated to Rome, and again in 1860, when he liberated Sicily and marched into Naples with Victor Emmanuel II. The latter was proclaimed king of Italy at Turin, 1861. Rome was captured by Gen.

Cadorna Sept. 20, 1870 and made the capital. Succession; (1878) Humbert I; (1900) Victor Emmanuel III who, in 1937, was proclaimed Emperor of Ethiopia. The Allies in 1943 restored Haile Selassie on the throne of Ethiopia. In 1946 Victor Emmanuel III abdicated; was succeeded by his son Crown Prince Humbert as Humbert II. Victor Emmanuel III died in 1947. At a plebiscite held June 2, 1946, to determine whether Italy wanted a monarchy or a republic, the people voted for a republic. Premier Alcide de Gasperi assumed the powers of provisional Chief of State on June 13, 1946, the same day King Humbert II went to Portugal as an exile. On June 23, 1946, the Constituent Assembly elected Enrico de Nicola, Liberal, Provisional President of the Republic of Italy. Luigi Einaudi was elected President May 11, 1948. On April 29, 1955, Giovanni Gronchi, of the leftwing Christian Democratic party, was elected President. He was inaugurated May 11, 1955.

Rulers of the Ottoman Empire

Turkish tribes driven from Central Asia by the Mongols c. 1200 A.D., settled near the Euphrates in Asia Minor. The Ottoman Empire was established by Osman (Othman) c. 1299 A.D. He was the first to be called sultan. Osman I, 1299-1326. Orkan I, 1326-1359; married Theodora, dau. of emperor of Constantinople. Murad I, 1359-1389; made Adrianople capital, extended power as far as Serbia. Bajazet I, 1389-1403; reached Danube, fought Timur (Tamerlane) in Asia Minor. Mehmet I (Mohammed), 1413-1421. Murad II, 1421-1451. Mehmet II, 1451-1481, the Conqueror, took Constantinople, 1453, date considered beginning of Modern History. This ended Christian rule in Constantinople. Bajazet II, 1481-1512. Fought Venice at Lepanto, July 28, 1499. Entered Poland and Egypt, combined caliphate with sultanate, Selim I, the Grim, 1512-1520. Suleiman I, the Magnificent, 1524-1566. Conducted first siege of Vienna. Selim II, 1566-1574. Murad III, 1574-1595; murdered five brothers; had 103 children. Mehmet III, 1595-1603; murdered 19 brothers. Ahmed I, 1603-1617. Mustafa I (incom-

petent) and Osman II, 1618-1622; killed by janissaries. Mustafa I, 1622-1623. Murad V, 1623-1640. Ibrahim I, 1640-1648. Mehmet IV, 1648-1687; Turks defeated by Austrians at St. Gotthard, 1664; siege of Vienna lifted by King John Sobieski of Poland, 1683, marking ebb of Turkish rule in Europe. Suleiman II, 1687-1691. Ahmed II, 1691-1695. Mustafa II, 1695-1703. Ahmed III, 1703-1730. Mahmud I, 1730-1754. Mustafa III, 1757-1773. Abdul Hamid I, 1773-1789. Selim III, 1789-1807. Mustafa IV, 8 mos., 1807-1808. Mahmud II, 1808-1839; dissolved janissaries, ordered officials to discard turban, adopt fez. Abdul Mejid, 1839-1861, fought Crimean war. Abdul Aziz, 1861-1867. Murad V, 3 mos., insane. Abdul Hamid II, 1876-1909; constitutional rule begun. Mehmet V, 1909-1918. Mehmet VI, 1918-1922. The sultanate was separated from the caliphate and abolished. Ankara was made capital. PRESIDENTS OF TURKEY Mustafa Kemal Ataturk, 1923-1938. Ismet Inonu, 1938-1950. Celal Bayar, elected 1950.

Rulers of Denmark, Sweden, Norway

The medieval history of Sweden, Denmark and Norway is one of continual struggle for domination by rival leaders. National issues started in the 10th century, when Christianity was introduced.

DENMARK

Earliest rulers invaded Britain; King Canute, who ruled in London 1017-1035, was most famous. The Valdemars furnished kings until the 15th century. In 1282 the Danes won the first national assembly, Danehof, from King Erik.

Most redoubtable medieval character was Margaret, daughter of Valdemar IV, born 1353, married at 10 to King Kaakon VI of Norway. In 1375 she had her infant son Olaf made king of Denmark. After his death, 1387, she was regent of Denmark and Norway. In 1388 Sweden accepted her as sovereign. In 1389 she made her grand-nephew, Duke Erik of Pomerania, titular king of Denmark, Sweden and Norway, with herself as regent. In 1397 she effected the Union of Kalmar of the three kingdoms and had Erik crowned. In 1439 the three kingdoms deposed him and elected Christopher of Bavaria king (Christopher III). On his death, 1448, the union broke up.

Succeeding rulers were unable to enforce their claims as rulers of Sweden until 1520, when Christian II conquered Sweden. He was thrown out 1522, and in 1523 Gustavus Vasa united Sweden. Denmark continued to dominate Norway until the Napoleonic wars, when Frederick VI joined the Napoleonic cause after Britain had destroyed the Danish fleet (1807). In 1814 he was forced to cede Norway to Sweden and Helgoland to Britain, receiving Lauenburg. Successors: 1839—Christian VII, 1848—Frederick VII, 1863—Christian IX, 1906—Frederick VIII, 1912—Christian X, 1947—Frederick IX.

SWEDEN

Early kings ruled at Uppsala, but did not dominate the country. Sverker (1134-1156) united the Swedes and Goths. In 1435 Sweden obtained the Riksdag, or parliament. After the Union of Kalmar, 1379, the Danes either ruled or harried

Rulers of Russia; Premiers of the U. S. R.

First ruler to consolidate Slav tribes was Rurik, leader of the Russ, who established himself at Novgorod A. D. 862. He and his immediate successors had Scandinavian affiliations. They moved to Kiev after 972 A. D. and ruled as Dukes of Kiev. In 988 Vladimir was converted and adopted the Byzantine Greek service, later modified by Slav influences. Important as organizer and law-giver was Yaroslav, 1018-1054, whose daughters married kings of Norway, Hungary and France. His grandson, Vladimir II (Monomachos) 1113-1125, was progenitor of several rulers, but in 1169 Andrew Bogolubski overthrew Kiev and began the line known as Grand Duke of Vladimir.

Of the Grand Dukes of Vladimir Alexander Nevsky, 1245-1263, had a son, Daniel, first to be called Duke of Muscovy (Moscow) who ruled 1294-1303. His successors became Grand Dukes of Muscovy. After Demetrius III, Donskoi, in 1380 defeated the Tartars, they also became Grand Dukes of All Russia. Independence of the Tartars and considerable territorial expansion was achieved under Ivan III, 1462-1505.

Czars of Muscovy—Ivan III was referred to in church ritual as Czar. He married Sofia, niece of the last Byzantine emperor. His successor, Basil, died in 1533 when Basil's son, Ivan, was only 3. He became Ivan IV, "the Terrible," crowned 1547 as Czar of all the Russias, ruled till 1584. Under the weak rule of his son, Theodore, Boris Godunov had control. The dynasty died, and after years of tribal strife and intervention by Polish and Swedish armies, the Russians united under 17-year-old Michael Romanov, distantly related to the first wife of Ivan IV. He ruled 1613-1645 and established the Romanov line. Fourth ruler after Michael was Peter I.

Czars, or Emperors of Russia (Romanovs)—Peter I, 1682-1725, known as Peter the Great, took title of Emperor in 1721. His successors and dates of accession were: Catherine, his widow,

Rulers of the Netherlands and Belgium

The Netherlands originally were cities and provinces of present Holland and Belgium, ruled by Burgundy, Austrian and Hapsburgs and Spain. In 1579 the Catholic South broke off and seven northern provinces formed the Union of Utrecht under the Stadholder, William the Silent, whose highest title was count (d. 1584). Power rested in the States General. Leaders included Prince Maurice of Nassau (d. 1625); Frederic Henry (d. 1647), who married a daughter of Charles I of England; William II (d. 1650); William III of Orange, who married Mary, dau. of James II of England—they became king and queen of England, William III, 1702, William IV, (d. 1761), William V, (d. 1795). Here ended the Dutch Republic. The Batavian Republic, 1795-1808, was created by the French. Napoleon made his brother Louis King of Holland, 1806. He abdicated 1810, when Holland was annexed to France, William Frederick, Prince of Orange, son of William V, led

the country until Christian II of Denmark conquered it anew, 1520. This led to a rising under Gustavus Vasa, who ruled Sweden 1523-1560, and established an independent kingdom. Charles IX (1594-1611, crowned 1607) conquered Moscow. Gustavus II Adolphus (1631-1633) was called the Great-Later rulers: 1633—Christian II, 1654—Charles X; 1660—Charles XI; 1697—Charles XII (invader of Russia and Poland, defeated at Poltava, June 28, 1709); 1718—His sister, Unrika Eleonora, elected queen; 1720—Her husband, Frederick I (of Hesse); 1751—Adolphus Frederick; 1771—Gustavus III; 1792—Gustavus IV; 1809—Charles XIII. (Union with Norway began, 1814). 1818—Charles XIV. He was Jean Bernadotte, Napoleon's Prince of Ponte Corvo, elected 1810 to succeed Charles XIII. He founded the present dynasty, 1844—Oscar I; 1859—Charles XV; 1872—Oscar II; 1907—Gustavus V; 1950—Gustavus VI.

NORWAY

Overcoming many rivals, Harald Haarfager (872-930) conquered Norway, Orkneys and Shetlands. Olaf, great-grandson (985-1000) brought Christianity into Norway, Iceland, Greenland. In 1035 Magnus the Good also became king of Denmark. Haakon V (1298-1319) had married his daughter to Erik of Sweden. Their son, Magnus, became ruler of Norway and Sweden at 6. His son, Haakon VI, married Margaret of Denmark; their son Olaf became king of Norway and Denmark, followed by Margaret's regency and the Union of Kalmar, 1397.

In 1450 Norway became subservient to Denmark and was forced into wars against Sweden and the League of Hansa. Christian IV (1588-1648) founded Christiania, now Oslo. After Napoleonic wars, when Denmark ceded Norway to Sweden, a strong nationalist movement forced recognition of Norway as an independent kingdom united with Sweden under the Swedish kings, 1814-1905. In 1905 the union was dissolved and Prince Carl of Denmark became Haakon VII.

1725, Peter II, his grandson, 1727, d. 1730; Anne, Duchess of Courland, 1730, daughter of Peter the Great's brother, Czar Ivan; Ivan VI, 1740-1741, great grandson of Ivan V, child, kept in prison and murdered 1764; Elizabeth, daughter of Peter I, 1741; Peter III, grandson of Peter I, 1761, deposed 1762 for his consort, Catherine II, former princess of Anhalt Zerbst (German) who is known as Catherine the Great, 1762-1796; Paul I, her son, 1796, killed 1801. Alexander I, son of Paul, 1801-1825, defeated Napoleon; Nicholas I, his brother, 1825; Alexander II, son of Nicholas, 1855, assassinated 1881 by terrorists; Alexander III, son, 1881; Nicholas II, son, 1894-1917, last Czar of Russia, forced to abdicate by the Revolution that followed defeat by Germany. The Czar, the Czarina, the Czaritch, the Crown Princess and the Czar's 4 daughters were murdered by the Bolsheviks in Ekaterinburg, July 6, 1918.

Provisional Government—Prince Georgi Lvov and Alexander Kerensky, premiers, 1917.

Union of Soviet Socialist Republics—Bolshevik Revolution, Nov. 7, 1917, displaced Kerensky; Council of People's Commissars formed, Nicolai Lenin, premier, Lenin died Jan. 21, 1924. Alexei Rykov (executed 1938) and V. M. Molotov held the office, but actual ruler was Joseph Stalin (Joseph Vissarionovich Djughashvili) general secretary of the Central Committee of the Communist Party. Stalin became president of the Council of Ministers (premier) May 7, 1941, died Mar. 5, 1953. Succeeded by Georgi M. Malenkov, as head of the Council and premier and Nikita S. Khrushchev, first secretary of the Central Committee. Malenkov resigned Feb. 8, 1955, and became deputy premier. Marshal Nikolai Bulganin became premier. On Mar. 1, 1955, the first deputy premier was Molotov, L. M. Kaganovich, A. I. Mikoyan, M. Z. Saburov, M. G. Pervukhin, as head of the major departments; next in line were 8 deputy premiers, of whom Malenkov was one.

a revolt 1813, was named sovereign prince and crowned, 1815, as King of the Netherlands, incorporating Holland and Belgium. The Belgian revolt of 1830-31 led to separate kingdoms, ratified 1839.

THE NETHERLANDS (HOLLAND)

(1840) William II; (1849) William III; (1890) Wilhelmina (daughter of William III and his second wife Princess Emma of Waldeck); Wilhelmina abdicated Sept. 4, 1948, in favor of daughter Juliana, 39.

BELGIUM

(1831) Leopold I of Saxe-Coburg, uncle of Queen Victoria; (1865) Leopold II; (1909) Albert I, nephew of Leopold II; (1934) Leopold III, son of Albert; (1944) Prince Charles, Regent, Leopold returned, 1950, yielded powers to son Baudouin, Prince Royal, Aug. 6, 1950, abdicated July 16, 1951. Baudouin I took throne July 17, 1951.

Presidents and Prime Ministers, Republic of Ireland

The constitution of the Irish Free State was adopted Dec. 11, 1922. By treaty with Great Britain, Northern Ireland could vote itself out, which it did Dec. 12, 1922. A new constitution, July 1937, superseded the Irish Free State with the Republic of Ireland (Eire), an independent, democratic nation, which retained relations in certain external affairs with the British Commonwealth of Nations.

William T. Cosgrave was chosen President of the Executive Council, Dec., 1922. He was in office

until Mar., 1932, when Eamon de Valera became President of the Executive Council and Minister for External Affairs, holding both offices until 1938. Under the republic:

Presidents: Douglas Hyde, 1938-1945. Sean T. O'Kelly, first term, 1945-1952; reelected 1952. (7 year terms).

Prime Ministers: Eamon de Valera, 1938 to Feb., 1948. John A. Costello, 1948-1951. De Valera, June 1951 to June, 1954. Costello, June, 1954—.

Presidents and Prime Ministers, Republic of Ireland

The constitution of the Irish Free State was adopted Dec. 11, 1922. By treaty with Great Britain, Northern Ireland could vote itself out, which it did Dec. 12, 1923. A new constitution, July 1937, superseded the Irish Free State with the Republic of Ireland (Eire), an independent, democratic nation, which retained relations in certain external affairs with the British Commonwealth of Nations.

William T. Cosgrave was chosen President of the Executive Council, Dec., 1922. He was in office

until Mar., 1932, when Eamon de Valera became President of the Executive Council and Minister for External Affairs, holding both offices until 1938. Under the republic:

Presidents: Douglas Hyde, 1938-1945. Sean T. O'Kelly, first term, 1945-1952; reelected 1952. (7 year terms).

Prime Ministers: Eamon de Valera, 1938 to Feb., 1948. John A. Costello, 1948-1951. De Valera, June 1951 to June, 1954. Costello, June, 1954—.

Poets Laureate of England

There is no authentic record of the origin of the office of Poet Laureate of England. According to Warton, there was a Versificator Regis, or King's Poet, in the reign of Henry III (1216-1272), and he was paid 100 shillings a year. Geoffrey Chaucer (1338-1400) assumed the title of Poet Laureate, and in 1389 got a royal grant of a yearly allowance of wine. In the reign of Edward IV (1461-1483), John Kay held the post. Under Henry VII (1485-1509), Andrew Bernard was the Poet Laureate, and was succeeded under Henry VIII (1509-1547) by John Skelton. Next came Edmund Spenser, who died in 1599; then Samuel Daniel, who died in 1619, and then Ben Jonson (appointed 1619). Sir William D'Avenant was appointed in 1638. He was a godson of William Shakespeare.

Others were John Dryden, 1670-1688; Thomas Shadwell, 1689; Nahum Tate, 1692; Nicholas Rowe, 1715; the Rev. Laurence Eusden, 1718; Colly Cibber, 1730; William Whitehead, 1758, on the refusal of Gray; Rev. Thomas Warton, 1785, on the refusal of Mason; Henry J. Fyfe, 1790; Robert Southey, 1813, on the refusal of Sir Walter Scott; William Wordsworth, 1843; Alfred Tennyson, 1850; Alfred Austin, 1896; Robert Bridges, 1913 (died April 21, 1930); John Masefield, 1930.
